Exempt from Review – Acquisition of Facility

Record #: 2176
Facility Name: Rex Radiology of Wakefield
Type of Facility: Diagnostic Center
FID #: 051370
Acquisition by: Browning Equipment SPE, LLC
Business #: 2550
County: Wake

Dear Mr. Qualls:

The Healthcare Planning and Certificate of Need Section, Division of Health Service Regulation (Agency) determined that based on your letter of January 18, 2017, the above referenced proposal is exempt from certificate of need review in accordance with N.C. Gen. Stat. §131E-184(a)(8). Therefore, Browning Equipment SPE, LLC may proceed to acquire the above referenced health service facility without first obtaining a certificate of need. Note that pursuant to N.C. Gen. Stat. §131E-181(b): *“A recipient of a certificate of need, or any person who may subsequently acquire, in any manner whatsoever permitted by law, the service for which that certificate of need was issued, is required to materially comply with the representations made in its application for that certificate of need.”*

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

Michael J. McKillip
Project Analyst

RE: Exemption / No Review Request - Joint venture between Rex Hospital, Inc. and Wake Radiology, Services, LLC Related to Wakefield Outpatient Imaging Site

Dear Ms. Frisone:

On behalf of our client, Rex Hospital, Inc. ("Rex"), along with Frank Kirschbaum who is counsel for Browning Equipment SPE, LLC ("Browning") and Wake Radiology Services, LLC ("WRS"), enclosed please find an attached Exemption / No Review Request for a proposed joint venture between Rex and WRS pertaining to the Wakefield Outpatient Imaging Site. Browning will be the joint venture entity.

As indicated in the Exemption / No Review Request, we do not believe that the Redesignation Transaction described in the attached Request is subject to certificate of need review. Thank you in advance for your attention, and please let me know if you have any questions.

Sincerely,

Gary S. Qualls

**Exemption / No Review Request by Rex Hospital, Inc. and Browning Equipment
SPE, LLC Related to The Wakefield Outpatient Imaging Site**

The purpose of this request is to:

- (1) inform the North Carolina Department of Health and Human Services, Division of Health Service Regulation (“Division”), Healthcare Planning and Certificate of Need Section (the “Agency”) of a planned joint venture known as Browning Equipment SPE, LLC (“Browning”), whose members will be Rex Hospital, Inc. (“Rex”) and Wake Radiology Services, LLC; and
- (2) seek the Agency’s confirmation that the redesignation of specific imaging equipment at REX Radiology of Wakefield (the “Wakefield Outpatient Imaging Site”) to Browning’s ownership (the “Redesignation Transaction”) is not required to undergo Certificate of Need (“CON”) review.

At the time of this submission, Browning is wholly owned by Wake Radiology Services, LLC (“WRS”). WRS is part of Wake Radiology, the largest private diagnostic radiology practice in the Triangle. Following receipt of certain regulatory approvals, Rex will also become a member of Browning, LLC.

STATEMENT OF FACTS

By way of background, Rex operates the following outpatient imaging equipment and related assets at the Wakefield Outpatient Imaging Site now known to the public as REX Radiology of Wakefield:

Existing Equipment at Wakefield Outpatient Imaging Site

<i>Service</i>	<i>Equipment</i>	<i>Current Fair Market Value</i>	<i>Rex Hospital, Inc. Original Purchase Price</i>
X-ray	Siemens Multix LT	\$59,419	\$295,822
X-ray	Siemens Luminos TF 3D-Top	\$102,981	\$572,390
Mammography	Hologic 3D	\$230,220	\$488,398
Bone Density	Discovery C Dexascan	\$24,263	\$65,200
CT	Siemens Sensation 64	\$149,275	\$700,000
Ultrasound	GE Logiq	\$19,927	\$90,727
<i>Subtotal Existing Medical Diagnostic Equipment</i>		\$586,085	\$2,212,537
Existing Essential Non-Medical Equipment Assets*		\$202,433	\$2,024,330
Total		\$788,518	\$4,236,687

*Includes moveable equipment.

The foregoing equipment will be collectively referred to as the “Wakefield Outpatient Equipment.”

Browning seeks to obtain full ownership of the Wakefield Outpatient Equipment. Once Browning obtains full ownership, the same equipment will be used to provide the exact same radiology services, in the same location, with Rex still participating in the ownership. The main difference will be that the services will cost less to patients and their insurers because the Wakefield Outpatient Imaging Site will now be billed based on freestanding billing rules as opposed to provider-based billing to Rex.

DISCUSSION

I. Nature of the Redesignation Transaction.

The facts here make the Redesignation Transaction exempt from CON review. Rex will be contributing its Wakefield Outpatient Equipment to the Browning joint venture. Therefore, as a result of the Redesignation Transaction, all of the following will be true:

1. All of the Wakefield Outpatient Equipment (and associated space) to be part of the Redesignation Transaction already exists and is currently being operated by Rex at the Wakefield Outpatient Imaging Site. Thus, the current equipment owner, Rex, will continue to participate in the Wakefield Outpatient Imaging Site ownership through the new joint venture entity, Browning, after the Redesignation Transaction.
2. Rex has a CON for the Wakefield Outpatient Imaging Site.
3. No imaging equipment will be added to or removed from the Wakefield Outpatient Imaging Site.
4. No new service lines will be added to the Wakefield Outpatient Imaging Site.
5. The Redesignation Transaction will simply result in an existing provider-based imaging center operating in business occupancy space converting to status as a non-provider-based imaging center in that same space.

II. This Redesignation Transaction Is Exempt from CON Review Based on the Facts and Precedents.

Relevant precedents show that the Redesignation Transaction is exempt from CON review, whether that determination is made pursuant to N.C. Gen. Stat. § 131E-184(a)(8)¹ or simply under the reasoning that redundantly reviewing the same CON-regulated assets is not reviewable as a new institutional health service in the first instance. See N.C. Gen. Stat. § 131E-176(16) and § 131E-175. "In construing statutes courts normally adopt an interpretation which will avoid absurd or bizarre consequences, the presumption being that the legislature acted in accordance with reason and common sense and did not intend untoward results." Commissioner

¹ N.C. Gen. Stat. § 131E-184(a)(8) exempts the acquisition of a health service facility. The Redesignation Transaction constitutes the acquisition of a part of a health service facility.

of Insurance v. Automobile Rate Office, 294 N.C. 60, 68, 241 S.E.2d 324, 329 (1978). *Accord State v. Spencer*, 276 N.C. 535, 173 S.E.2d 765 (1970); King v. Baldwin, 276 N.C. 316, 172 S.E.2d 12 (1970).

The Agency and the Division have issued numerous rulings and determinations in recent years analyzing why certain transactions involving existing CON-regulated equipment, beds, and other services need not undergo repetitive CON reviews where the Agency has already found a need. In those instances, the Agency and Division have reasoned that the CON law is not intended to result in unnecessarily duplicative CON reviews when the CON-approved items will continue to serve the same patient base in the same location, albeit through a different ownership structure.

A. Nursing Facility Analogues

One category of such precedent is found in Exhibit 1 to this Request. Exhibit 1 consists of Agency no review approvals for Rex (Ex. 1, pp. 1-5) and Hugh Chatham Memorial (Ex. 1, pp. 6-18). In both instances, the Agency issued no review decisions, finding that no CON review was required where a skilled nursing facility was removed from its associated hospital license and the nursing facility obtained its own separate license from the hospital. Even though a new licensed health service facility was technically created in both situations,² the Agency made the non-reviewability determination. In these nursing facility examples, as in the instant Browning request, the CON law is not intended to result in unnecessarily duplicative CON reviews when the existing CON-regulated equipment, beds, or services will continue to serve the same patient base, in the same location. *See HCA Crossroads Residential Centers, The North Carolina Department of Human Resources*, 327 N.C. at 579, 398 S.E. 2d at 470 ("[w]hen viewed in its

² See N.C. Gen. Stat. §§ 131E-176(9b) and 176(16)(a).

entirety . . . the Certificate of Need Law reveals the legislature's intent that an applicant's fundamental right to engage in its otherwise lawful business be regulated but not be encumbered with unnecessary bureaucratic delay"). In both transactions, the CON and SMFP inventory of nursing home beds remained the same, and those beds remained in the same place serving the same patient base. In the High Chatham Memorial example, the ownership structure was also changing.

B. Radiation Therapy Facility Analogues

Another category of similar precedent is found in Exhibit 2. Exhibit 2 consists of numerous Declaratory Rulings and no review determinations from the Division and the Agency approving, without CON review, ownership structure changes to *per se* reviewable linear accelerators and related assets. See N.C. Gen. Stat. § 131E-176(16)(f1)(5a). The first such ruling in Exhibit 2 is the Agency's August 12, 2015 no review letter from Martha Frisone and Jane Rhoe-Jones to Gary Qualls and William Shenton (Ex. 1, pp. 1-2) regarding the non-reviewability of a joint venture ownership change involving Pitt County linear accelerators. Pages 3-10 of Exhibit 2 contain the request approved in that August 12, 2015 Agency no review letter. The remainder of Exhibit 2 consists of the original exhibits attached to that Pitt County no review request, including other supportive Agency and Division rulings. As in the previously-cited instances, the Agency and the Division reasoned that the CON law's purpose is not to create redundant reviews through an overly technical reading of the statute. *HCA Crossroads, supra*.

C. Heart Lung Bypass Equipment Analogues

Another category of relevant precedent is found at pages 56-68 of Exhibit 2. Those no review approvals pertained to WakeMed's and Rex's acquisition of heart-lung bypass machines through ownership of the physician-owned entities that owned the equipment. Like linear

accelerators, the acquisition of a heart-lung bypass machine is technically *per se* CON-reviewable. See N.C. Gen. Stat. § 131E-176(16)(f1)(5). However, as in Part II(B) above, the Agency concluded that the CON law is not intended to be implicated when existing equipment (otherwise *per se* reviewable) changes ownership, yet is already counted in the CON and SMFP inventory and simply remains in the same place serving the same patient base.

E. Hospital Splits

Exhibits 3 and 4 to this Request catalogue yet another area of similar agency interpretations. Those Division Declaratory Rulings involved The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas HealthCare System and Mercy Hospital, Inc. (collectively “CHS”) and WakeMed, and their respective requests to change the licensure status of hospital segments. In CHS’s November 2, 2012 Declaratory Ruling, the Division approved, without a CON, the redesignation of the Mercy Vail Avenue Campus to be relicensed from the Mercy Hospital license (License # H0042) to the Carolinas Medical Center license (License # H0071). See Exhibit 3.

In the CHS Ruling, the Division cited a July 15, 2002 WakeMed Declaratory Ruling (Exhibit 4), in which the Division determined that no CON was required for WakeMed to split the WakeMed Raleigh and WakeMed Wakefield campuses into two separate licensed hospitals, where those facilities had previously operated under a single license. That was true even though the WakeMed transaction technically constituted the creation of a newly licensed health service facility. See N.C. Gen. Stat. §§ 131E-176(9b) and 176(16)(a). In the WakeMed Declaratory Ruling, the Division reasoned that requiring a CON “would be an overly technical interpretation of the Certificate of Need law and not in furtherance of any statutory purpose.”

CONCLUSION

Based on the facts and precedent discussed herein, Rex Hospital, Inc. and Browning Equipment SPE, LLC request the Agency's confirmation that:

- (1) no CON is required for the proposed Redesignation Transaction described above;
and
- (2) the Wakefield Outpatient Imaging Site shall be recognized as a diagnostic center under N.C. Gen. Stat. § 131E-176(7a) for future purposes.

Facility: Rex Hospital
Project Description: Obtain a separate license for Rex Rehabilitation and Nursing Center of Raleigh
County: Wake
FID #: 953429

Dear Mr. Qualls:

The Certificate of Need Section (CON Section) received your letter of March 24, 2014 regarding the above referenced proposal. Based on the CON law **in effect on the date of this response to your request**, the proposal described in your correspondence is not governed by, and therefore, does not currently require a certificate of need. However, please note that if the CON law is subsequently amended such that the above referenced proposal would require a certificate of need, this determination does not authorize you to proceed to develop the above referenced proposal when the new law becomes effective.

Moreover, you need to contact the Acute and Home Care Licensure and Certification and Nursing Home Licensure and Certification Sections of the Division of Health Service Regulation to determine if they have any requirements for development of the proposed project.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Certificate of Need Section. Changes in a project include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.

RE: Rex Hospital, Inc. (License No. H0065)
No Review Request To Independently License Rex Rehabilitation &
Nursing Center of Raleigh

Dear Ms. Frisone:

We are writing on behalf of our client Rex Hospital, Inc. ("Rex"). Rex owns and operates Rex Rehabilitation & Nursing Center of Raleigh (the "Nursing Center"), a nursing home with 120 nursing beds under the Rex Hospital license. Rex has decided to obtain an independent license for the Nursing Center in order to promote operational efficiencies. We are requesting confirmation from the Department of Health and Human Services, Division of Health Service Regulation, Certificate of Need Section (the "Agency") that this proposal is not subject to certificate of need review.

In this instance, the entity (Rex) that owns the Nursing Center will not change, and the same building, staff and equipment will be used to provide the same services at the same location. Rex will continue to own the CON-authorized Nursing Center assets that have been used to furnish skilled nursing care to the Nursing Center's residents. The proposed transaction does not involve the offering or expansion of any new facility, service or equipment, and the State's inventory of nursing beds will not change. No new or additional nursing home beds will be acquired or placed in operation in the State. The Nursing Center already has its own

RT-3002794 v1

Martha Frisone,
Chief, Certificate of Need Section
March 24, 2014
Page 2

distinct Medicare provider number (Medicare #345369), which is separate from Rex Hospital's Medicare provider number (Medicare #340114).

This proposal is similar to other proposals that the Agency has found to be non-reviewable. For example, the Agency recently determined that no CON review was necessary for Hugh Chatham Memorial Hospital, Inc. to independently license a nursing home that historically operated under its hospital license. See Exhibit 1.

We believe that the CON law allows the independent licensing of the Nursing Center without the requirement of a CON because such an event does not constitute the development or acquisition of a new facility or services, within the meaning of N.C. Gen. Stat. § 131E-176(16). The beds already exist in the State Medical Facilities Plan inventory and there is no new facility constructed. Thus, there has been no action which constitutes the offering or development of a new institutional health service within the meaning of N.C. Gen. Stat. § 131E-178(a), and no CON is therefore required.

We request that you provide a no review letter confirming that our interpretation of the CON law is correct and that this proposal is not subject to certificate of need review.

Please do not hesitate to contact us if you have any questions.

Sincerely,

Gary S. Qualls

Re: Hugh Chatham Memorial Hospital, Inc. (License No. H0049)
No review request to transfer control of Hugh Chatham Nursing Center to wholly owned-subsiary

Dear Ms. Frisone and Ms. Randolph:

We are writing you on behalf of our client, Hugh Chatham Memorial Hospital, Inc. ("HCMH"), a North Carolina non-profit corporation. HCMH owns and operates Hugh Chatham Nursing Center (the "Nursing Center"), a combination facility with 99 nursing beds and 28 assisted living beds (20 Alzheimer's or special care unit beds and 8 general beds), under the hospital's license. HCMH has determined that it is in its best interest to transfer ownership of the Nursing Center to a wholly-owned subsidiary which it has created, Hugh Chatham Nursing Center, LLC, a North Carolina limited liability company ("HCNC"). HCMH is the sole member of HCNC. See HCNC Articles of Organization, *Exhibit 1* hereto.

We also understand that as part of this transfer, the Nursing Center will need to be operated as a separately-licensed nursing facility. I have already spoken about this subject with Becky Wertz, Nurse Consultant with the Nursing Home Licensure and Certification Section, and our client is in the process of preparing the Nursing Home Licensure Application and other related documentation which she has provided. However, before that documentation can be filed, we first need to confirm with your office that this proposal is not subject to certificate of need review.

The CON law provides that transfer of ownership or control of a CON would constitute grounds for withdrawal of the CON if it occurs during the course of development of a project before the project is complete. N.C.G.S. § 131E-189. There is no CON project under development at the Nursing Center. Furthermore, Agency rules provide that neither ownership nor control of a certificate of need is transferred when the holder of the certificate is a corporation and the identity of the holder changes because of a corporate reorganization, such as transferring ownership to a wholly-owned subsidiary. 10A N.C.A.C. 14C.0502(b)(1) and (c).

In this instance, the entity that owns the Nursing Center will not change, and the same building, staff and equipment will be used to provide the same services at the same location. HCMH will continue to own the Nursing Center assets that were authorized under the CON and have been used to furnish skilled nursing care to the Nursing Center's residents. The proposed transaction does not involve the offering or expansion of any new facility, service or equipment, and the State's inventory of nursing home beds will not change. No new or additional nursing home beds will be acquired or placed in operation in the State. The Nursing Center already has its own separate NPI number and Medicare number.

This proposal is similar to other proposals involving transfer of assets to wholly owned subsidiaries that the CON Section has found in the past did not require CON review. For example, the CON Section determined that a perfusion company could hold heart-lung bypass equipment in two separate wholly owned subsidiaries without undergoing CON review. See enclosed Exhibit 2 (without exhibits to original request letter).

For these reasons, we believe that the CON law allows the transfer of the Nursing Center to a wholly-owned subsidiary of HCMH, without the requirement of a CON, because such a transfer does not constitute the development or acquisition of a new facility or services by the subsidiary, within the meaning of G.S. 131E-176(16) or 10A N.C.A.C. 14C.0502. The subsidiary has no control over those services independent of its parent entity. The ultimate ownership and control of the service does not change. The beds already exist in the inventory in the State Medical Facilities Plan and there is no new facility constructed. Thus, there has been no action which constitutes the offering or development of a new institutional health service within the meaning of G.S. 131E-178(a), and no CON is required.

We request that you provide a letter of no review confirming that our interpretation of the CON law and applicable rules is correct and that this proposal is not subject to certificate of need review.

Ms. Frisone and Ms. Randolph

Dear Mr. Shenton:

The Certificate of Need (CON) Section received your letter of November 21, 2011 regarding the above referenced proposals. Based on the CON law in effect on the date of this response to your request, the proposals described in your correspondence are not governed by, and therefore, do not currently require a certificate of need. However, please note that if the CON law is subsequently amended such that the above referenced proposals would require a certificate of need, this determination does not authorize you to proceed to develop the above referenced proposals when the new law becomes effective.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the proposals or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Certificate of Need Section. Changes in a proposal include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.

Please contact the CON Section if you have any questions. Also, in all future correspondence you should reference the Facility I.D.# (FID) if the facility is licensed.

Sincerely,

Martha J. Frisone

RE: CSA Medical Services, LLC; No Review Request regarding Transfer of Heart-Lung Bypass Machines to Wholly Owned Subsidiaries

Dear Mr. Smith and Ms. Frisonc:

This letter is submitted on behalf of CSA Medical Services, LLC ("CSA"), and two subsidiary limited liability companies to be formed and wholly owned by CSA and to be named "CSAMS New Bern Avenue, LLC" (CSA New Bern), and "CSAMS Lake Boone Trail, LLC" (CSA Lake Boone), upon receipt of your approval of this request. CSA currently owns and operates eight (8) heart-lung bypass ("HLB") machines. Five (5) of the HLB machines are operated at WakeMed and three (3) of the HLB machines are operated at Rex Hospital, Inc. ("Rex"). The purpose of this letter is to provide notice to the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Certificate of Need Section (the "Agency"), and confirm that the transfer of CSA's interests in these eight (8) HLB machines and the operation of the same to two wholly owned subsidiaries of CSA is not reviewable as a new institutional health service under the North Carolina Certificate of Need ("CON") law.

The Agency has recently approved a similar transfer in an August 18, 2011 Declaratory Ruling regarding Radiation Oncology Centers of the Carolinas, Inc. ("ROCC"). That Declaratory Ruling concerned the transfer of interests in two radiation oncology facilities from ROCC to two wholly owned subsidiaries of ROCC. Attached hereto as Exhibits 1 and 2 are the ROCC Declaratory Ruling Request and the ROCC Declaratory Ruling. The ruling requested by CSA here is directly analogous to the ROCC ruling, the only difference being that ROCC involved the *per se* reviewable items of linear accelerators and simulators and CSA's request involves the *per se* reviewable items of heart-lung bypass machines.

I. BACKGROUND AND FACTS

CSA directly owns eight (8) Terumo Corporation Series 8000 HLB machines. Five (5) of these HLB machines are located and used by CSA to provide perfusion services at WakeMed, located at 3000 New Bern Avenue, Raleigh, NC 27620. Three (3) of these HLB machines are located and used by CSA to provide perfusion services at Rex, located at 4420 Lake Boone Trail, Raleigh, NC 27607. CSA also owns

 Page 2

seven (7) cell saver machines located at WakeMed in Raleigh, and two (2) located at WakeMed-Cary. These cell saver machines are Baylor Rapid Autologous Transfusion (BRAT) machines manufactured by Sorin Corporation and are not subject to CON review. CSA does not own the BRAT machines at Rex, which are owned by the hospital. CSA also provides the hospitals with the services of seven (7) licensed perfusionists, who are employed by CSA's affiliate Carolina MSO, L.L.C. (MSO) but work for CSA pursuant to its Management Services Agreement with MSO.

The five (5) HLB machines at WakeMed are labeled A, B, C, D, and E, and the three (3) at Rex are labeled 1, 2, and 3. Each HLB machine consists of the following: (a) a four (4) or five (5) pump Terumo Base; (b) three (3) or four (4) Terumo 8000 roller pump modules (8000 roller pump modules); (c) one (1) Medtronic Bio-Medicus arterial pump series 550 (Bio pump); (d) one (1) Medtronic TX 50 Flowmeter (Flowmeter); and (e) one (1) Sachtel air/oxygen mixer (Sachtel). Similarly, the seven (7) BRAT machines at WakeMed in Raleigh are labeled A, B, C, D, E, F and G, and the two at WakeMed-Cary are labeled 1 and 2. Each HLB machine (and its components) and BRAT machine is identified by its serial numbers (SN), model numbers and the hospital where it is located, as described in Exhibit 3 to this letter.

The surgeons of Carolina Cardiovascular Surgical Associates, P.A. (Practice), started performing open heart surgery and providing their own perfusion services at WakeMed in 1979 and at Rex in 1989, through either the Practice itself or a perfusion company owned by the same physicians. Each of the eight (8) HLB machines currently owned by CSA is replacement equipment for a machine owned by CSA (or a predecessor entity) prior to the year 1993, when acquisition of an HLB machine became subject to CON review regardless of its cost. W. Charles Helton, M.D., founded the Practice in 1979 and Cardinal Bio-Medical Associates, Inc. (Cardinal Bio-Medical), in 1980. Cardinal Bio-Medical was the perfusion company predecessor to CSA that like CSA was owned by the shareholders of the Practice. The two hospitals have never owned the HLB machines used at their facilities. Before 1989, Cardinal Biomedical had acquired and operated three (3) HLB machines at WakeMed and two (2) at Rex. Another cardiothoracic surgery practice in Raleigh, Atkinson & Zeok, M.D., P.A., had two (2) additional HLB machines at WakeMed and one (1) additional HLB machine at Rex. Atkinson & Zeok, M.D., P.A. merged with the Practice in 1993, and its two (2) surgeon shareholders, Alvan W. Atkinson, M.D., and John V. Zeok, M.D., joined the Practice. At the same time their three (3) HLB machines were acquired by Cardinal Bio-Medical, and they become shareholders of that perfusion company. Cardinal Bio-Medical or its successor company has continued to own and operate these eight (8) HLB machines (or their replacements) at their same respective locations at WakeMed and Rex since that time. In 1997, the shareholders of Cardinal Bio-Medical reorganized the company by forming CSA and transferring the operations and all eight (8) machines to CSA, which was owned by the same surgeons.

By 2001, CSA needed to replace all eight (8) of its HLB machines. There was a fourth HLB machine at Rex owned by surgeons Abdul G. Chaudhry, M.D. and James H. Davis, M.D. This one (1) HLB machine had been loaned to them by the manufacturer in the late 1990's to replace one they had provided for use at Rex which had become obsolete. At that time, CSA bought this fourth loaned HLB machine, which had already been used at Rex, from the manufacturer to replace one of CSA's older machines at Rex. Thereafter, Drs. Chaudhry and Davis no longer provided perfusion services or a HLB machine for use at Rex. CSA's purchase of this machine thus resulted in a net decrease in useable HLB machines at Rex from four (4) to three (3).

The same year, CSA obtained replacement equipment for its other seven (7) HLB machines at WakeMed and Rex, at a total capital cost of \$322,695. CSA's obsolete machines were subsequently removed out of North Carolina. By letter dated June 25, 2004, the Agency approved CSA's acquisition of the seven (7)

Mr. Craig R. Smith, Chief
Ms. Martha Frisone, Assistant Chief
November 21, 2011
Page 3

new HLB machines at WakeMed and Rex as replacement equipment. The Agency's "no review" letter of that date is attached and labeled as Exhibit 4.

CSA would like to transfer its interest in the eight (8) HLB machines into two wholly owned subsidiary limited liability companies. The first wholly owned subsidiary will be named "CSAMS New Bern Avenue, LLC" and will own the five (5) HLB machines currently operated at WakeMed. The second wholly owned subsidiary will be named "CSAMS Lake Boone Trail, LLC" and will own the three (3) HLB machines currently operated at Rex. The transfer of CSA's interests in the eight (8) HLB machines into two (2) wholly owned subsidiaries is not a CON reviewable event because it will have the following results:

- (1) No increase in the HLB machine inventory in Wake County;
- (2) No physical relocation of any HLB machines in Wake County;
- (3) No creation of any new health service facilities; and
- (4) No asset purchases of any per se reviewable equipment, consistent with the ROCC Declaratory Ruling.

This letter requests your confirmation that such a proposed transfer of interests would not trigger any of the new institutional health service provisions in the CON statute, and the transaction may proceed without first acquiring a CON.

II. ANALYSIS

The CON law provides that the "acquisition by purchase, donation, lease, transfer or comparable arrangement" of an HLB machine constitutes a "new institutional health service" that is subject to CON review. N.C. Gen. Stat. § 131E-176(16)f1; § 131E-176(a). However, we believe the creation of these two wholly owned subsidiaries is not a reviewable event because CSA, the owner of the CON rights for the eight (8) HLB machines, is not undergoing any direct change in its ownership status. Rather, this is merely a type of reorganization in the nature of those which the CON rules recognize as non-reviewable.

Until 1993, the acquisition of an HLB machine was not regulated under the CON law unless it involved the obligation of a capital expenditure exceeding two million dollars (\$2,000,000), which far exceeds the cost of this equipment. See N.C. Sess. Laws 1993, c. 7, § 2 (adding the acquisition of HLB machines and any "major medical equipment" costing more than \$750,000 as "new institutional health services" requiring a CON). However, effective March 18, 1993, the General Assembly amended the CON law to make the acquisition of HLB machines constitute a "new institutional health service" requiring a CON regardless of its cost. N.C. Gen. Stat. § 131E-176(10a), (16)f1.5., as amended by N.C. Sess. Laws 1993, c. 7, § 2.

Under the CON law, transfer of ownership or control of a CON prior to completion of a project or operation of the facility constitutes grounds for withdrawal of a CON. N.C. Gen. Stat. § 131E-189. However, the Agency's rules provide that in that situation, neither ownership nor control of a CON is transferred when the holder of the certificate is incorporated and the identity of the holder changes because of corporate reorganization, including transferring ownership to wholly owned subsidiaries. 10A N.C.A.C. 14C.0502(b)(1) and (c).

Dear Messrs. Qualls and Shenton:

The Healthcare Planning and Certificate of Need Section, Division of Health Service Regulation (Agency) received your letter of July 31, 2015 regarding the above referenced proposal. Based on the CON law **in effect on the date of this response to your request**, the proposal described in your correspondence is not governed by, and therefore, does not currently require a certificate of need. However, please note that if the CON law is subsequently amended such that the above referenced proposal would require a certificate of need, this determination does not authorize you to proceed to develop the above referenced proposal when the new law becomes effective.

However, you need to contact the Agency's Construction and Acute and Home Care Licensure and Certification Section, DHSR Sections to determine if they have any requirements for development of the proposed project.

RE: No Review Request - Joint Venture between Vidant and 21st Century Oncology Affiliate

Dear Ms. Carraway and Ms. Frisone:

On behalf of our client, Pitt County Memorial Hospital, Incorporated, d/b/a Vidant Medical Center ("Vidant"), along with William Shenton, who is counsel for 21st Century Oncology and its North Carolina affiliate, North Carolina Radiation Therapy Management Services, LLC ("NCRT"), enclosed please find an attachment describing a No Review Request for a potential joint venture between Vidant and NCRT.

As indicated in the No Review Request, we do not believe that this joint venture is subject to certificate of need review. Thank you in advance for your attention, and please let me know if you have any questions.

Sincerely,

Handwritten signature of Gary S. Qualls in cursive.

RE: No Review Request – Joint Venture between Vidant and 21st Century Oncology Affiliate

Dear Ms. Carraway and Ms. Frisone:

I am writing as counsel for 21st Century Oncology and its North Carolina affiliate, North Carolina Radiation Therapy Management Services, LLC ("NCRT"), to transmit, along with Gary Qualls and Colleen Crowley, who are counsel for Vidant Medical Center, a No-Review request for your consideration. Vidant and NCRT are planning to implement a joint venture which will entail the combination of their respective freestanding radiation equipment and services in the Greenville area into a new limited liability company, called Vidant Radiation Oncology.

The enclosed document describes the steps in the transaction, and as we indicate this joint venture should not be subject to certificate of need review. We appreciate your attention to this request and please feel free to contact counsel for either of the parties if you should have any questions or need further clarification.

Very truly yours,

William R. Shenton
Partner

**No Review Request for Joint Venture between
Vidant Health and 21st Century Oncology**

The purpose of this request is to inform the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section (the “Agency”) of a planned joint venture between Pitt County Memorial Hospital, Incorporated, d/b/a Vidant Medical Center (“Vidant”) and North Carolina Radiation Therapy Management Services, LLC (“NCRT”),¹ involving the combination of their existing, freestanding radiation oncology equipment and services into a single joint venture limited liability company to be named Vidant Radiation Oncology (“VRO”). We ask that the Agency confirm that this joint venture is not reviewable as a new institutional health service under the North Carolina Certificate of Need (“CON”) law.

STATEMENT OF FACTS

By way of background, NewCo Cancer Services LLC (“NewCo”), d/b/a Leo Jenkins Cancer Center (“Cancer Center”), a 50/50 joint venture between East Carolina University Brody School of Medicine (“ECU”) and Vidant, owns and operates two existing linear accelerators (“linacs”) and CT simulators, pursuant to CON Project I.D. Q-8562-10. See Certificate of Need attached as Exhibit 1 and Exemption Request and Approval to Replace a CT Simulator attached as Exhibit 2. Vidant also owns and operates a Cyberknife linac, which is operated as a freestanding radiation treatment service at the Cancer Center, pursuant to CON Project I.D. Q-8558-10 and Material Compliance letter dated May 19, 2011. See Certificate of Need attached as Exhibit 3 and Material Compliance Letter attached as Exhibit 4.

NCRT owns and operates two existing linacs as part of NC Radiation Therapy-Greenville. See Declaratory Ruling and Exemption attached as Exhibits 5 and 6.

¹ NCRT is a controlled affiliate of 21st Century Oncology.

First, Vidant seeks to obtain full ownership of the two linacs and CT simulators currently owned by NewCo and located at the Cancer Center. NewCo will continue to exist after Vidant obtains 100% ownership of the linacs and simulators. Once Vidant obtains full ownership, the same equipment will be used to provide the same radiation oncology services, in the same location.

Second, as part of a joint venture, Vidant and NCRT will be combining and contributing their existing freestanding radiation oncology services, medical equipment (including the 5 linacs, one of which is a Cyberknife linac) and related assets to the newly created VRO. After the joint venture transaction occurs, all of the equipment will continue to be operated in the same two locations as described above.² Therefore, as a result of these two steps (collectively, the “Transaction”), no linacs will be relocated or added to Linear Accelerator Service Area 27, as defined by the 2015 State Medical Facilities Plan (“SMFP”).

DISCUSSION

I. Obtaining NewCo’s Interest in the Equipment Does Not Require a CON.

As Step #1 to the Transaction, Vidant seeks to acquire 100% ownership of the two linacs and simulators currently owned by NewCo. A separate, third party will not be obtaining ownership of the linacs and simulators. Instead, Vidant, the 50% owner of the equipment, will now become the 100% owner. The linacs and simulators will continue to be operated at the Cancer Center in the same manner they are currently being operated.

The purchase of NewCo’s interest in the two linacs and simulators does not involve the offering or expansion of any new facility, service or equipment, and the State’s inventory of linacs will not change. No new or additional linacs will be acquired or placed in operation in the

² While at some point in the future VRO may seek to relocate equipment, it would not do so unless and until all necessary approvals are obtained from the Agency.

State. As detailed below in Section II, this is similar to membership change in the ownership of regulated equipment and a CON is not required.

II. Creating VRO as a Conduit for Ownership is Not Regulated Under CON Law.

Likewise, Step 2 in the Transaction -- Vidant and NCRT contributing their respective linacs to VRO -- does not require a CON. The CON statute provides a lengthy and exclusive list of activities that constitute development of a new institutional health service, requiring a CON. The joint venture of two existing entities that already actively provide health services is not included on that list. Pursuant to a well-established maxim of statutory construction, *expressio unius est exclusio alterius*, those transactions not included in N.C. Gen. Stat. § 131E-176(16) do not require a CON. *See, e.g., In re Miller*, 357 N.C. 316, 325, 584 S.E.2d 772, 780 (2003) (stating that “[u]nder the doctrine of *expressio unius est exclusio alterius*, when a statute lists the situations to which it applies, it implies the exclusion of situations not contained in the list”); *see also Jackson v. A Woman’s Choice, Inc.*, 130 N.C. App. 590, 594, 503 S.E.2d 422, 425 (1998) (internal citations omitted) (“Where a statute is explicit on its face, the courts have no authority to impose restrictions that the statute does not expressly contain.”).

Here, Vidant and NCRT will place the ownership rights of all five linacs into the joint venture, VRO. NCRT will own 50% of VRO and Vidant will own 50% of VRO. Therefore, both Vidant and NCRT will continue to own the linacs through their respective ownership of VRO.

Previous Declaratory Rulings and No Review Decisions demonstrate that the Agency and the Division of Health Service Regulation have already determined that a CON is not required for similar membership interest changes pertaining to CON regulated equipment. *See Id.*, attached as Exhibit 7; *In re: Request for Declaratory Ruling by Wake Radiology Oncology*

Services, PLLC, et al., attached as Exhibit 8; In re: Request for Declaratory Ruling by Radiation Therapy Services, Inc. et. al., attached as Exhibit 9; No Review/WakeMed/Acquisition of Ownership Interest of CSA-1, Owners of Five Heart-Lung Bypass Machines Located in WakeMed/Wake County attached as Exhibit 10; and No Review /Rex Hospital, Inc./Acquisition of Ownership Interests of CSAMS Lake Boone, LLC, Owners of Three Heart-Lung Bypass Machines Located at Rex Hospital/Wake County attached as Exhibit 11.

Likewise, here, Vidant and NCRT's joint venture does not constitute the acquisition of a linac. In fact, the underlying linac ownership will be essentially the same. Unlike some of the prior situations referenced above that were determined not to be subject to CON review, Vidant and NCRT will still retain an ownership interest in the linacs. No separate third party will be acquiring any ownership interest in the equipment. The same parties will retain ownership of all five linacs (now through the joint conduit of VRO); and the linacs will remain in the same location, and will still be used to serve patients in the same manner.

A "new institutional health service" includes "the acquisition by purchase, donation, lease, transfer, or comparable arrangement . . . by or on behalf of any person" a linear accelerator and simulator. N.C. Gen. Stat. § 131E-176(f1)(5a) and (f1)(9). However, the transaction contemplated here will not constitute the acquisition of a linear accelerator as defined by N.C. Gen. Stat. § 131E-176(16). Ownership of the radiation therapy equipment will largely be unaffected by this transaction. That equipment will continue to be owned, in part, by the same entities both before and after this transaction. VRO will be owned by Vidant and NCRT. VRO will merely be the new ownership conduit through which NCRT and Vidant continue to own the radiation oncology treatment equipment.

A fundamental concept of corporate law is that the owners of corporate stock are distinct from the corporation itself. *See* Robinson on North Carolina Corporate Law, § 2.08 (“A corporation is a legal entity separate and distinct from its shareholders.”) By design, LLC members also stand in a position similar to corporate shareholders. *Id.* at § 34.03[3]. Consequently, under the general principles of business organizations law governing LLC membership interests, the members of an LLC are legally distinct from the LLC itself. *Id.* at § 34.05[1] (“A membership interest may be acquired directly from the LLC or by assignment from another holder”).

Vidant and NCRT are merely placing their collective ownership interests into one joint venture and will then each retain a percentage share of the ownership of the joint venture. Therefore, this transaction cannot constitute the acquisition of a linear accelerator because Vidant and NCRT will retain ownership of their respective equipment through the VRO.

CONCLUSION

Based on the discussion herein, Vidant and NCRT request that the Agency provide confirmation that no CON is required for the proposed Transaction described above.

CERTIFICATE OF NEED

for

Project Identification Number #Q-8562-10

FID #100878

ISSUED TO: NewCo Cancer Services, LLC
P.O. Box 6028
Greenville, NC 27835

Pursuant to N.C. Gen. Stat. § 131E-175, et. seq., the North Carolina Department of Health and Human Services hereby authorizes the person or persons named above (the "certificate holder") to develop the certificate of need project identified above. The certificate holder shall develop the project in a manner consistent with the representations in the project application and with the conditions contained herein and shall make good faith efforts to meet the timetable contained herein. The certificate holder shall not exceed the maximum capital expenditure amount specified herein during the development of this project, except as provided by N.C. Gen. Stat. § 131E-176(16)e. The certificate holder shall not transfer or assign this certificate to any other person except as provided in N.C. Gen. Stat. § 131E-189(c). This certificate is valid only for the scope, physical location, and person(s) described herein. The Department may withdraw this certificate pursuant to N.C. Gen. Stat. § 131E-189 for any of the reasons provided in that law.

SCOPE: NewCo Cancer Services shall acquire two existing linear accelerators, CT simulator, and related equipment, and multispecialty oncology physician practices from East Carolina University Brody School of Medicine/ Pitt County

CONDITIONS: See Reverse Side

PHYSICAL LOCATION: Pitt County Memorial Hospital
600 Moye Boulevard
Greenville, NC 27834

MAXIMUM CAPITAL EXPENDITURE: \$9,700,000

TIMETABLE: See Reverse Side

FIRST PROGRESS REPORT DUE: May 1, 2011

This certificate is effective as of the 30th day of December, 2010

Chief, Certificate of Need Section
Division of Health Service Regulation

CONDITIONS:

1. NewCo Cancer Services, LLC shall materially comply with all representations made in its application.
2. NewCo Cancer Services, LLC shall not acquire, as part of this project, any equipment that is not included in the project's proposed capital expenditure in Section VIII of the application or which would otherwise require a certificate of need.
3. NewCo Cancer Services, LLC shall acknowledge acceptance of and agree to comply with all conditions stated herein to the Certificate of Need Section in writing prior to the issuance of the certificate of need.

A letter acknowledging acceptance of and agreeing to comply with all conditions stated in the conditional approval letter was received by the Certificate of Need Section on December 6, 2010.

Exempt from Review - Replacement Equipment

Facility or Business: Vidant Medical Center
Project Description: Replace CT Scanner and CT Simulator at the Leo Jenkins Cancer Center
County: Pitt
FID #: 933410

Dear Mr. Shovelin:

In response to your letter of August 14, 2013, the above referenced proposal is exempt from certificate of need review in accordance with N.C.G.S 131E-184(a)(7). Therefore, you may proceed to acquire, without a certificate of need, the GE Optima CT580 16 Slice CT Simulator to replace the existing Siemens SimView CT Scanner. This determination is based on your representations that the existing unit will be removed from North Carolina and will not be used again in the State without first obtaining a certificate of need. Further please be advised that as soon as the replacement equipment is acquired, you must provide the CON Section and the Medical Facilities Planning Section with the serial number of the new equipment to update the inventory, if not already provided.

Moreover, you need to contact the Acute and Home Care Licensure and Certification Section and the Construction Section to determine if they have any requirements for development of the proposed project.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. If you have any questions concerning this matter, please feel free to contact this office.

RE: Request for "No Review" for Replacement CT Scanner and CT Simulator at the Leo Jenkins Cancer Center

Dear Ms. Rhoe-Jones:

NewCo Cancer Services, LLC (NewCo), a joint venture between Vidant Medical Center and ECU's Leo Jenkins Cancer Center, plans to replace an existing CT simulator with new equipment. NewCo believes that the proposed equipment replacement is not subject to review under North Carolina's Certificate of Need (CON) laws.

The proposed project includes the replacement of a Siemens SimView CT scanner with a GE Optima CT580 16 slice CT simulator (see Appendix A for vendor quotes and Appendix B for equipment comparison table and brochure). The equipment will be secured through accumulated reserves. The reason for this replacement is due to age and the need for upgraded technology to provide optimal care. Only minor renovations are needed for the existing CT simulator suite (See Appendix C for drawings and construction estimate). The total capital costs for the proposed replacement is estimated to be \$ 1,147,781 (see Appendix D for the Capital Cost Sheet). These costs include all expenses associated with the equipment and minor renovations. After the new scanner is operational, the existing equipment will be permanently removed from the facility and will no longer be exempt from CON law (see Appendix E for required documentation of equipment removal).

NewCo's proposed project meets the definition of replacement equipment found in G.S. 131E-176(22a). The total capital expenditure for the equipment is less than \$2,000,000 and the equipment being purchased is for the sole purpose of replacing comparable medical equipment. Since NewCo's proposal meets the definition of "replacement equipment", G.S. 131E-184(a)(7) exempts this project from review. Therefore, NewCo requests approval of a no review status for the proposed project.

If you require additional information or clarification, please contact me at (252)-847-3631.

RE: Material Compliance/ Project I.D. # Q-8558-10 Pitt County Memorial Hospital shall acquire a CyberKnife radiosurgery system and related equipment from East Carolina University Brody School of Medicine/ Change from operating the CyberKnife as a hospital-based service to a freestanding radiation treatment center/ Pitt County
FID # 933410

Dear Mr. Shovelin:

In response to your correspondence dated April 18, 2011 regarding the above referenced project, the Certificate of Need Section has determined that the proposed change is in material compliance with representations made in the application. These changes include obtaining an additional NPI number and new Medicare and Medicaid identification numbers to operate the CyberKnife service as a freestanding radiation treatment center at the same location in the Leo W. Jenkins Cancer Center. This change in operating status does not constitute a change in the equipment to be acquired from East Carolina University Brody School of Medicine. However, you should contact the Construction Section of the Division of Health Service Regulation to determine if they have any requirements pertinent to the proposed change.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination.

If you have any questions concerning this matter, please feel free to contact this office. Please refer to the Project I.D.# and Facility I.D.# (FID) in all correspondence.

Sincerely,

Re: Notification of a minor project change to Project ID #Q-8558-10 / Pitt County Memorial Hospital, Inc. / Acquire CyperKnife (linear accelerator) from Brody School of Medicine / Pitt County FID#933410

Dear Mr. Smith:

This letter serves as notification of a minor project change in approved Project ID #Q-8558-10 / Pitt County Memorial Hospital, Inc. / Acquire CyperKnife (linear accelerator) from Brody School of Medicine / Pitt County. We believe the change outlined below does not constitute a material difference in the representations made in the original CON. The change was necessary to comply with the new CMS Life Safety Code Requirements effective February, 2011.

Specifically, in the original application, Pitt County Memorial Hospital, Inc. (PCMH) stated the CyberKnife would be operated in its existing location in the existing Leo W. Jenkins Cancer Center (LWJCC) as a hospital-based service under the hospital's existing provider numbers. As a result of new CMS Life Safety Code Requirements effective February, 2011, the LWJCC does not meet the requirements for institutional space. Therefore, in its existing location, the CyberKnife cannot be operated as a hospital-based service without first incurring significant capital improvements.

To address this issue, PCMH will operate the CyberKnife in its current location, but instead of operating as a hospital-based service, PCMH will obtain an additional NPI number and new Medicare and Medicaid identification numbers to operate CyberKnife services as a freestanding radiation treatment center, doing business as "UHS CyberKnife". PCMH believes this change has not materially altered the approved CON as these changes do not require modifications to ownership, need, services to be provided, patients to be served, capital costs, staffing, time lines, or financial projections.

If you need additional information or have any questions, please do not hesitate to call me at (252) 847-3631 or email me directly at jshoveli@uhseast.com.

STATEMENT OF THE FACTS

Except as noted, the following statement of the facts is based on the representations of Petitioners in the Request.

Petitioner RTS is a Florida corporation. NC Radiation is a North Carolina corporation that is a wholly-owned subsidiary of RTS. Both have their principal business address in Fort Myers, Florida.

Petitioners wish to acquire 100% of the issued and outstanding stock of CRTC, which they state is a North Carolina corporation owned by Dr. Gordon Koltis that operates a radiation therapy facility for cancer patients. Petitioners describe CRTC as an oncology treatment center that, prior to 26 August 2005, would have been a "health service facility" as defined in N.C.G.S. § 131E-176(9b). S.L. 2005-325 eliminated oncology treatment centers from the category of "health service facilities," effective 26 August 2005.

Petitioners also state that CRTC "owns and operates two linear accelerators" and "one simulator." Request, p. 3. Footnote 1 to the Request states:

CRTC has represented to Petitioners that it entered into binding obligations to acquire the second linear accelerator prior to August 26, 2005, and that the acquisition of the second linear accelerator cost less than \$750,000, including the cost of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the second linear accelerator.

I note from the files of the Department that the inventory report of linear accelerator equipment submitted by Carolina Radiation Medicine, P.A., certified and dated by Gordon G. Koltis on April 6, 2007, identifies only one linear accelerator owned by CRTC. The Department files do not contain any information concerning the purported second linear accelerator.

Petitioners represent that they have executed a stock purchase agreement by which NC Radiation will acquire 100% of the issued and outstanding capital stock of CRTC from Dr. Koltis. After closing the transaction, Petitioners state that CRTC will remain a separate corporate entity that is a wholly-owned subsidiary of NC Radiation. They state that CRTC will continue to operate its freestanding radiation therapy facility at the same location in Greenville, Pitt County, North Carolina, in the same manner in which it operated prior to the transaction in all material ways. Petitioners will pay more than two million dollars to purchase the CRTC stock. The closing of the transaction is conditioned on receiving confirmation from the Department that acquisition of the stock will not require a certificate of need.

ANALYSIS

N.C.G.S. § 131E-178 provides that no person shall offer or develop "a new institutional health service" without first obtaining a CON. N.G.C.S. § 131E-176(16) defines "new institutional health service" to include: (1) "The acquisition by purchase, donation, lease, transfer, or comparable arrangement" of a linear accelerator "by or on behalf of any person," N.G.C.S. § 131E-176(16)f1.5a, and (2) "The obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service," N.C.G.S. § 131E-176(16)b.

The transaction described by Petitioners does not constitute the acquisition of a linear accelerator or a simulator by any person because ownership of the one reported linear accelerator and one reported simulator here will not change. CRTC will continue to be the owner of these two pieces of equipment, and CRTC's legal status as a corporate entity will not change.

Similarly, the transaction is not an obligation to develop or expand a health service or a health service facility, since Petitioners represent that CRTC will continue to operate at the same

location in a manner that is the same in all material respects as it operated prior to the transaction. In addition, pursuant to S.L. 2005-325, oncology treatment centers are not "health service facilities" for purposes of the CON law.

Finally, on the specific facts of this case, the transaction proposed by Petitioners is not "a capital expenditure . . . which relates to the provision of a health service" within the meaning of N.C.G.S. § 131B-176(16)b. The definition of "health service" specifically "does not include administrative and other activities that are not integral to clinical management." Petitioners' representations indicate that stock ownership of CRTC is not integral to the clinical management of CRTC, because in all material respects the operations of CRTC will not change.

I specifically except from this Ruling any conclusions as to the status or legality of the ownership of a purported second linear accelerator by CRTC. The Department has no notice of the existence or ownership of the second linear accelerator, and I make no finding that CRTC may acquire or operate, or has properly acquired and operated, a second linear accelerator without CON review.

CONCLUSION

For the foregoing reasons, assuming the statements of fact in the Request to be true, I conclude that the acquisition by Petitioners of 100% of the outstanding and issued stock of CRTC, in the manner represented by Petitioners in the Request, is not subject to CON review.

This ruling is subject to the condition that, after the transaction, CRTC continues to operate its freestanding radiation therapy facility at the same location in Greenville, Pitt County, North Carolina, in the same manner in which it operated prior to the transaction in all material ways.

This ruling is not intended to address, expand or validate any activities or status of CRTC with respect to the requirements of the CON law as it relates to CRTC. The ruling is limited to the specific facts presented in the Request. It specifically does not address the status of any linear accelerator that CRTC may own or claim to own.

This 17th day of September 2007.

Robert J. Fitzgerald, Director
Division of Health Service Regulation
N.C. Department of Health and Human Services

RE: Exempt from Review - Replacement Equipment/ Radiation Therapy Services, Inc. d/b/a 21st Century Oncology, North Carolina Radiation Therapy Management Services, Inc. and Carolina Radiation and Cancer Treatment Center, Inc./ Acquire a replacement linear accelerator for the second linear accelerator located at CRCTC in Greenville/ Pitt County

Dear Ms. Montgomery:

In response to your letters of June 23, 2009, November 18, 2008, and July 29, 2008, the above referenced proposal is exempt from certificate of need review in accordance with N.C.G.S 131E-184(a)(7). Therefore, you may proceed to acquire, without a certificate of need, the Varian 2100C, s/n 1167, to replace the existing Varian 2100C, s/n 527. This determination is based on your representations that the existing unit will be removed from North Carolina and will not be used again in the State without first obtaining a certificate of need.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. NORTH CAROLINA DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF HEALTH SERVICE REGULATION
RALEIGH, NORTH CAROLINA

IN RE: REQUEST FOR)	
DECLARATORY RULING BY)	
THE CHARLOTTE-MECKLENBURG)	DECLARATORY RULING
HOSPITAL AUTHORITY D/B/A)	
CAROLINAS HEALTHCARE SYSTEM)	

I, Drexdal Pratt, as Director of the Division of Health Service Regulation, North Carolina Department of Health and Human Services ("Department" or "Agency"), do hereby issue this Declaratory Ruling pursuant to North Carolina General Statute § 150B-4 and 10A NCAC 14A .0103 under the authority granted me by the Secretary of the Department of Health and Human Services.

The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Healthcare System ("CMHA") has requested a declaratory ruling to confirm that its acquisition of the membership interests of University Radiation Oncology Center, LLC ("UROC") and its continued operation of that facility may proceed without first obtaining a Certificate of Need ("CON"). This ruling will be binding upon the Department and the entities requesting it, as long as the material facts stated herein are accurate. This ruling pertains only to the matters referenced herein. Except as provided by N.C.G.S. § 150B-4, the Department expressly reserves the right to make a prospective change in the interpretation of the statutes and regulations at issue in this Declaratory Ruling. William W. Stewart of K&L Gates LLP has requested this ruling on CMHA's behalf and has provided the material facts upon which this ruling is based.

STATEMENT OF THE FACTS

UROC, which is located at 8310 University Executive Park, Suite 500, Charlotte, NC 28262, is a limited liability company which provides radiation therapy treatment. UROC was

acquired by Radiation Oncology Centers of the Carolinas, Inc. ("ROCC") pursuant to an exemption in August 1997. Currently, UROC operates a Varian 2100C linear accelerator and a GE Highspeed Advantage CT simulator, which the CON Section previously approved.

On August 18, 2011, the Department issued a Declaratory Ruling determining that ROCC could transfer, without a CON, its interest in UROC and Matthews Radiation Oncology Center ("MROC") to two wholly owned subsidiaries of ROCC. Once that transaction is consummated, ROCC will be the sole member of UROC. ROCC will then transfer its entire membership interest in UROC to CMHA and CMHA will become UROC's sole member. Thus, UROC will remain intact as the same LLC, but with a different membership composition.

ANALYSIS

The CON law provides that no person shall offer or develop a "new institutional health service" without first obtaining a CON. N.C. Gen. Stat. § 131E-178. The list of new institutional health services includes "the acquisition by purchase, donation, lease, transfer or comparable arrangement" of a linear accelerator or simulator "by or on behalf of any person," N.C. Gen. Stat. § 131E-176(16)(f1)5a, 9, and "the obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service," N.C. Gen. Stat. § 131E-176(16)(b).

Prior declaratory rulings show that the Department has already determined that these definitions do not require an entity to obtain a CON to acquire membership interests in an existing legal entity like UROC which owns and operates a linear accelerator or simulator. The declaratory ruling requested by CMHA is consistent with the Department's prior rulings that

have interpreted the applicability of the CON Law to the purchase of ownership interests in health care organizations, for the following reasons:

CMHA's acquisition of the membership interests in UROC does not constitute the acquisition of a linear accelerator or a simulator because the ownership of the equipment will not change, and the same equipment will be used to provide the same radiation oncology services, in the same location. UROC will continue to own the two pieces of equipment and UROC's legal status as a corporate entity will not change.

The purchase of ROCC's membership interests in UROC does not involve the offering or expansion of any new facility, service or equipment, and the state's inventory of linear accelerators and simulators will not change. No new or additional equipment will be acquired or placed in operation in the State.

CONCLUSION

For the foregoing reasons, assuming the statements of fact in the request to be true, I conclude that CMHA does not require a certificate of need in order to proceed with the purchase of ROCC's membership interests in UROC.

This the 4th day of November, 2011.

Drexdal Pratt, Director
Division of Health Service Regulation
N.C. Department of Health and Human Services

CERTIFICATE OF SERVICE

**NORTH CAROLINA DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF HEALTH SERVICE REGULATION
RALEIGH, NORTH CAROLINA**

IN RE: REQUEST FOR DECLARATORY)	
RULING BY WAKE RADIOLOGY)	
ONCOLOGY SERVICES, PLLC, CANCER)	DECLARATORY RULING
CENTERS OF NORTH CAROLINA, P.C.,)	
US ONCOLOGY, INC., AOR)	
MANAGEMENT COMPANY OF VIRGINIA,)	
LLC AND WAKEMED)	

I, Drexdal Pratt, as Director of the Division of Health Service Regulation, North Carolina Department of Health and Human Services (“Department” or “Agency”), do hereby issue this Declaratory Ruling pursuant to North Carolina General Statute § 150B-4 and 10A NCAC 14A .0103 under the authority granted me by the Secretary of the Department of Health and Human Services.

Wake Radiology Oncology Services, PLLC (hereinafter “WROS”); Cancer Centers of North Carolina, P.C. (“CCNC”); US Oncology, Inc. (“USON”) and its subsidiary AOR Management Company of Virginia, LLC (“AOR”); and WakeMed have requested a declaratory ruling to confirm that the acquisition of the membership interests in WROS and the continued operation of the oncology treatment center may proceed without first obtaining a certificate of need. This ruling will be binding upon the Department and the entities requesting it, as long as the material facts stated herein are accurate. This ruling pertains only to the matters referenced herein. Except as provided by N.C.G.S. § 150B-4, the Department expressly reserves the right to make a prospective change in the interpretation of the statutes and regulations at issue in this Declaratory Ruling. Attorneys for the Petitioners have requested this ruling on their behalf and have provided the material facts upon which this ruling is based.

STATEMENT OF THE FACTS

WROS is a North Carolina professional limited liability company presently owned by certain physician-members, each of whom owns a specific percentage of the total membership interests in WROS. WROS provides radiation oncology treatment services at 300 Ashville Avenue, Suite 110, Cary, North Carolina, based on a certificate of need that was issued in 1997 to own an oncology treatment center and to operate a linear accelerator and simulator and other equipment used in furnishing radiation oncology services.

CCNC is a professional corporation organized under the laws of the State of North Carolina. CCNC employs physicians licensed to practice medicine in the State of North Carolina, who provide oncology treatment services, including radiation oncology services through the use of a linear accelerator.

USON is a business corporation organized under the laws of the State of Delaware. Through its subsidiaries, US Oncology provides administrative support for, and furnishes medical equipment used by, oncology practices throughout the United States.

AOR is a limited liability company, a subsidiary of USON and was organized under the laws of the State of Delaware and authorized to do business in North Carolina. AOR provides administrative and other support services to CCNC under a Management Services Agreement with CCNC.

WakeMed is a North Carolina nonprofit corporation engaged in the provision of acute care services and other health care services in Wake County.

WROS established its oncology treatment center on or about July 17, 1998. Since the establishment of its oncology treatment center, WROS has continuously operated the oncology treatment center established pursuant to the CON it received in 1997.

When the CON Law was amended in 2005, WROS already was operating an existing oncology treatment center pursuant to the CON that it had obtained in 1997 and using a linear accelerator and simulator that had been recognized in the SMFP inventory for seven years. Since it already owned the equipment, it was not required to obtain a second CON to be able to continue to operate its linear accelerator and simulator.

Recently, WROS physician owners approved a conversion of WROS from a professional limited liability company to a limited liability company, to occur simultaneously with the sale of ownership interests to CCNC. It is likely that WROS will change its name after the sale. Subsequently, in a separate transaction, WakeMed anticipates purchasing a minority membership interest in the renamed WROS (“the LLC”).

This change in the business form of WROS that has been approved by its physician owners will not constitute a change in or dissolution of WROS, the legal entity that received the CON in 1997 and has continuously operated the oncology treatment center and the linear accelerator and simulator since they became operational.

After these two transactions, the LLC will continue to exist as a legal and business entity, and will continue to own the oncology treatment center and the equipment that was authorized under the 1997 CON, including the linear accelerator and simulator. The oncology treatment center and its equipment will remain at the same location at 300 Ashville Avenue in Cary.

The LLC will not offer any medical services. Oncology treatment services will be furnished by physicians associated with CCNC.

ANALYSIS

The CON law provides that no person shall offer or develop a “new institutional health service” without first obtaining a CON. N.C. Gen. Stat. § 131E-178. The list of new

institutional health services includes “the acquisition by purchase, donation, lease, transfer or comparable arrangement” of a linear accelerator or simulator “by or on behalf of any person,” N.C. Gen. Stat. § 131E-176(16)(f1)5a, 9, and “the obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service,” N.C. Gen. Stat. § 131E-176(16)(b).

Prior declaratory rulings show that the Department has already determined that these definitions do not require an entity to obtain a CON to acquire membership interests in an existing legal entity like WROS which owns and operates a linear accelerator or simulator. The declaratory ruling requested by Petitioners is consistent with the Department’s prior rulings that have interpreted the applicability of the CON Law to the purchase of ownership interests in health care organizations, for the following reasons:

The entity that owns the linear accelerator and simulator will not change, and the same equipment will be used to provide the same radiation oncology services, in the same location. The LLC will continue to own the linear accelerator, the simulator, and all the oncology treatment center assets that were authorized under the 1997 CON and have been used to furnish oncology treatments to patients. Its membership composition initially will change from the present physician members to a single member, CCNC, with the subsequent purchase of a minority interest by WakeMed.

The Proposed Transaction will involve expenditures by CCNC, and later by WakeMed, but these will be purchases of ownership interests in an existing limited liability company that owns the oncology treatment center. There will be no capital expenditure to develop or expand a

health service or health service facility because the same equipment will continue to be operated at the same location, and no expansion of services is proposed.

The Proposed Transaction does not involve the offering or expansion of any new facility, service or equipment, and the state's inventory of linear accelerators and simulators will not change. No new, or additional equipment will be acquired or placed in operation in the State.

CONCLUSION

For the foregoing reasons, assuming the statements of fact in the request to be true, I conclude that the Petitioners do not require a certificate of need in order to proceed with the Proposed Transaction.

**NORTH CAROLINA DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF HEALTH SERVICE REGULATION
RALEIGH, NORTH CAROLINA**

**IN RE: REQUEST FOR)
DECLARATORY RULING BY RADIATION)
THERAPY SERVICES, INC. AND NORTH) DECLARATORY RULING
CAROLINA RADIATION THERAPY)
MANAGEMENT SERVICES, INC.)**

I, Robert J. Fitzgerald, Director of the Division of Health Service Regulation (the "Department"), hereby issue this declaratory ruling to Radiation Therapy Services, Inc. d/b/a/ 21st Century Oncology ("RTS") and North Carolina Radiation Therapy Management Services, Inc. ("NC Radiation") (collectively "Petitioners") pursuant to N.C.G.S. § 150B-4, 10A NCAC 14A.0103, and the authority delegated to me by the Secretary of the North Carolina Department of Health and Human Services. Petitioners have filed a Declaratory Ruling Request (the "Request") asking the Department to issue a declaratory ruling that they may acquire all of the stock of Carolina Radiation and Cancer Treatment Center, Inc. ("CRTC") without certificate of need ("CON") review.

This ruling is binding on the Department and the person requesting it if the material facts stated in the Request are accurate and no material facts have been omitted from the request. The ruling applies only to this request. Except as provided by N.C.G.S. § 150B-4, the Department reserves the right to change the conclusions which are contained in this ruling. Susan H. Hargrove, Sean A. Timmons, and Jennifer B. Markhan of Smith, Anderson, Blount, Dorsett, Mitchell & Jernigan, L.L.P., counsel for Petitioners, have requested this ruling on behalf of Petitioners and have provided the statement of facts upon which this ruling is based. The material facts as provided by counsel for Petitioners are set out below.

STATEMENT OF THE FACTS

Except as noted, the following statement of the facts is based on the representations of Petitioners in the Request.

Petitioner RTS is a Florida corporation. NC Radiation is a North Carolina corporation that is a wholly-owned subsidiary of RTS. Both have their principal business address in Fort Myers, Florida.

Petitioners wish to acquire 100% of the issued and outstanding stock of CRTC, which they state is a North Carolina corporation owned by Dr. Gordon Koltis that operates a radiation therapy facility for cancer patients. Petitioners describe CRTC as an oncology treatment center that, prior to 26 August 2005, would have been a "health service facility" as defined in N.C.G.S. § 131E-176(9b). S.L. 2005-325 eliminated oncology treatment centers from the category of "health service facilities," effective 26 August 2005.

Petitioners also state that CRTC "owns and operates two linear accelerators" and "one simulator." Request, p. 3. Footnote 1 to the Request states:

CRTC has represented to Petitioners that it entered into binding obligations to acquire the second linear accelerator prior to August 26, 2005, and that the acquisition of the second linear accelerator cost less than \$750,000, including the cost of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the second linear accelerator.

I note from the files of the Department that the inventory report of linear accelerator equipment submitted by Carolina Radiation Medicine, P.A., certified and dated by Gordon G. Koltis on April 6, 2007, identifies only one linear accelerator owned by CRTC. The Department files do not contain any information concerning the purported second linear accelerator.

Petitioners represent that they have executed a stock purchase agreement by which NC Radiation will acquire 100% of the issued and outstanding capital stock of CRTC from Dr. Koltis. After closing the transaction, Petitioners state that CRTC will remain a separate corporate entity that is a wholly-owned subsidiary of NC Radiation. They state that CRTC will continue to operate its freestanding radiation therapy facility at the same location in Greenville, Pitt County, North Carolina, in the same manner in which it operated prior to the transaction in all material ways. Petitioners will pay more than two million dollars to purchase the CRTC stock. The closing of the transaction is conditioned on receiving confirmation from the Department that acquisition of the stock will not require a certificate of need.

ANALYSIS

N.C.G.S. § 131E-178 provides that no person shall offer or develop “a new institutional health service” without first obtaining a CON. N.G.C.S. § 131E-176(16) defines “new institutional health service” to include: (1) “The acquisition by purchase, donation, lease, transfer, or comparable arrangement” of a linear accelerator “by or on behalf of any person,” N.G.C.S. § 131E-176(16)f1.5a, and (2) “The obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service,” N.C.G.S. § 131E-176(16)b.

The transaction described by Petitioners does not constitute the acquisition of a linear accelerator or a simulator by any person because ownership of the one reported linear accelerator and one reported simulator here will not change. CRTC will continue to be the owner of these two pieces of equipment, and CRTC’s legal status as a corporate entity will not change.

Similarly, the transaction is not an obligation to develop or expand a health service or a health service facility, since Petitioners represent that CRTC will continue to operate at the same

location in a manner that is the same in all material respects as it operated prior to the transaction. In addition, pursuant to S.L. 2005-325, oncology treatment centers are not “health service facilities” for purposes of the CON law.

Finally, on the specific facts of this case, the transaction proposed by Petitioners is not “a capital expenditure . . . which relates to the provision of a health service” within the meaning of N.C.G.S. § 131E-176(16)b. The definition of “health service” specifically “does not include administrative and other activities that are not integral to clinical management.” Petitioners’ representations indicate that stock ownership of CRTC is not integral to the clinical management of CRTC, because in all material respects the operations of CRTC will not change.

I specifically except from this Ruling any conclusions as to the status or legality of the ownership of a purported second linear accelerator by CRTC. The Department has no notice of the existence or ownership of the second linear accelerator, and I make no finding that CRTC may acquire or operate, or has properly acquired and operated, a second linear accelerator without CON review.

CONCLUSION

For the foregoing reasons, assuming the statements of fact in the Request to be true, I conclude that the acquisition by Petitioners of 100% of the outstanding and issued stock of CRTC, in the manner represented by Petitioners in the Request, is not subject to CON review.

This ruling is subject to the condition that, after the transaction, CRTC continues to operate its freestanding radiation therapy facility at the same location in Greenville, Pitt County, North Carolina, in the same manner in which it operated prior to the transaction in all material ways.

This ruling is not intended to address, expand or validate any activities or status of CRTC with respect to the requirements of the CON law as it relates to CRTC. The ruling is limited to the specific facts presented in the Request. It specifically does not address the status of any linear accelerator that CRTC may own or claim to own.

RE: No Review / WakeMed / Acquisition of ownership interests of CSA-1, owners of five heart-lung bypass machines located at WakeMed / Wake County
 FID #: 943528

Dear Ms. Murray:

The Certificate of Need (CON) Section received your letter of February 8, 2012 regarding the above referenced proposal. Based on the CON law **in effect on the date of this response to your request**, the proposal described in your correspondence is not governed by, and therefore, does not currently require a certificate of need. However, please note that if the CON law is subsequently amended such that the above referenced proposal would require a certificate of need, this determination does not authorize you to proceed to develop the above referenced proposal when the new law becomes effective.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Certificate of Need Section. Changes in a project include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.

Please contact the CON Section if you have any questions.

Sincerely,

 Michael J. McKillip

Re: WakeMed Acquisition of Ownership Interests in CSA-1

Dear Mr. Smith and Ms. Frisone:

We represent WakeMed. The purpose of this letter is to provide notice to the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Certificate of Need Section (the "Agency") and confirm that WakeMed's acquisition of the ownership interests of CSA-1 is not reviewable as a new institutional health service under the North Carolina Certificate of Need ("CON") law. CSA-1 is a wholly owned sub of CSA Medical, LLC ("CSA") and owns five (5) heart lung bypass ("HLB") machines that have been and are operated at WakeMed. WakeMed would acquire the membership interests in CSA-1, which would continue to exist as a legal entity and to own the five (5) HLB machines that would remain located and operated at WakeMed.

The Agency has issued numerous declaratory rulings and no review letters that acknowledge that acquisition of ownership interests in a legal entity does not constitute a reviewable acquisition of the medical equipment owned by that legal entity. For example, in a declaratory ruling issued to New Hanover Perfusionists, Inc., the Agency determined that the purchase of stock did not constitute the acquisition of a heart-lung bypass machine because ownership of the regulated heart-lung bypass equipment would not change. The Agency also determined that the transaction was not an obligation to develop or expand a health service or health service facility because the equipment company was not a health service facility. The stock purchase transaction proposed also was not "a capital expenditure . . . which relates to the provision of a health service" within the meaning of N.C. Gen. Stat. § 131E-176(16)(b). The definition of "health service" specifically "does not include administrative and other activities that are not integral to clinical management." Stock or membership interest ownership is not integral to clinical management. *In re: Request for Declaratory Ruling by New Hanover Perfusionists, Inc., January 24, 2008.*

Mr. Craig R. Smith, Chief
Ms. Martha Frisone, Assistant Chief
February 8, 2012
Page 2

Similarly, the Department approved the sale of 100% of the issued and outstanding stock of a company that owned a linear accelerator to another entity. Linear accelerators are regulated in the same manner as heart-lung bypass equipment. The Department held that certificate of need review was not required for the stock purchase transaction. *See Declaratory Ruling, In re: Request for Declaratory Ruling by Radiation Therapy Services, Inc. and North Carolina Radiation Therapy Management Services, Inc.*, September 14, 2007.

We would appreciate written confirmation from you that the anticipated transaction does not require CON review. If you require additional information to consider this request, please contact us. We appreciate your consideration.

Sincerely yours,

SMITH MOORE LEATHERWOOD LLP

Re: Rex Acquisition of Ownership Interests in CSAMS Lake Boone Trail, LLC

Dear Mr. Smith and Ms. Frisone:

We represent Rex Hospital, Inc. ("Rex"). The purpose of this letter is to provide notice to the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Certificate of Need Section (the "Agency") and confirm that Rex's acquisition of the ownership interests of CSAMS Lake Boone Trail, LLC ("CSA Lake Boone") is not reviewable as a new institutional health service under the North Carolina Certificate of Need ("CON") law. CSA Lake Boone is a wholly owned sub of CSA Medical, LLC ("CSA") and owns three (3) heart-lung bypass ("HLB") machines that have been and are operated at Rex. Rex would acquire the membership interests in CSA Lake Boone, which would continue to exist as a legal entity and to own the three (3) HLB machines that would remain located and operated at Rex.

The Agency has issued numerous declaratory rulings and no review letters that acknowledge that acquisition of ownership interest in a legal entity does not constitute a reviewable acquisition of the medical equipment owned by that legal entity. For example, in a declaratory ruling issued to New Hanover Perfusionists, Inc., the Agency determined that the purchase of stock did not constitute the acquisition of a heart-lung bypass machine because ownership of the regulated heart-lung bypass equipment would not change. The Agency also determined that the transaction was not an obligation to develop or expand a health service or health service facility because the equipment company was not a health service facility. The stock purchase transaction proposed also was not "a capital expenditure . . . which relates to the provision of a health service" within the meaning of N.C. Gen. Stat. § 131E-176(16)(b). The

definition of "health service" specifically "does not include administrative and other activities that are not integral to clinical management." Stock or membership interest ownership is not integral to clinical management. *In re: Request for Declaratory Ruling by New Hanover Perfusionists, Inc., January 24, 2008.*

Similarly, the Department has recently approved the sale of 100% of the membership interests in a company that owned a linear accelerator to another entity. Linear accelerators are regulated in the same manner as heart-lung bypass equipment. The Department held that certificate of need review was not required for the LLC membership purchase transaction. *See Declaratory Ruling, In re: Request for Declaratory Ruling by The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Healthcare, November 4, 2011 (attached as Exhibit 1).*

We would appreciate written confirmation from you that the anticipated transaction does not require CON review. If you require additional information to consider this request, please contact us. We appreciate your consideration.

NORTH CAROLINA DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF HEALTH SERVICE REGULATION
RALEIGH, NORTH CAROLINA

IN RE: REQUEST FOR)	
DECLARATORY RULING BY)	
THE CHARLOTTE-MECKLENBURG)	DECLARATORY RULING
HOSPITAL AUTHORITY D/B/A)	
CAROLINAS HEALTHCARE SYSTEM)	

I, Drexdal Pratt, as Director of the Division of Health Service Regulation, North Carolina Department of Health and Human Services ("Department" or "Agency"), do hereby issue this Declaratory Ruling pursuant to North Carolina General Statute § 150B-4 and 10A NCAC 14A .0103 under the authority granted me by the Secretary of the Department of Health and Human Services.

The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Healthcare System ("CMHA") has requested a declaratory ruling to confirm that its acquisition of the membership interests of University Radiation Oncology Center, LLC ("UROC") and its continued operation of that facility may proceed without first obtaining a Certificate of Need ("CON"). This ruling will be binding upon the Department and the entities requesting it, as long as the material facts stated herein are accurate. This ruling pertains only to the matters referenced herein. Except as provided by N.C.G.S. § 150B-4, the Department expressly reserves the right to make a prospective change in the interpretation of the statutes and regulations at issue in this Declaratory Ruling. William W. Stewart of K&L Gates LLP has requested this ruling on CMHA's behalf and has provided the material facts upon which this ruling is based.

STATEMENT OF THE FACTS

UROC, which is located at 8310 University Executive Park, Suite 500, Charlotte, NC 28262, is a limited liability company which provides radiation therapy treatment. UROC was

acquired by Radiation Oncology Centers of the Carolinas, Inc. ("ROCC") pursuant to an exemption in August 1997. Currently, UROC operates a Varian 2100C linear accelerator and a GE Highspeed Advantage CT simulator, which the CON Section previously approved.

On August 18, 2011, the Department issued a Declaratory Ruling determining that ROCC could transfer, without a CON, its interest in UROC and Matthews Radiation Oncology Center ("MROC") to two wholly owned subsidiaries of ROCC. Once that transaction is consummated, ROCC will be the sole member of UROC. ROCC will then transfer its entire membership interest in UROC to CMHA and CMHA will become UROC's sole member. Thus, UROC will remain intact as the same LLC, but with a different membership composition.

ANALYSIS

The CON law provides that no person shall offer or develop a "new institutional health service" without first obtaining a CON. N.C. Gen. Stat. § 131E-178. The list of new institutional health services includes "the acquisition by purchase, donation, lease, transfer or comparable arrangement" of a linear accelerator or simulator "by or on behalf of any person," N.C. Gen. Stat. § 131E-176(16)(f1)5a, 9, and "the obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service," N.C. Gen. Stat. § 131E-176(16)(b).

Prior declaratory rulings show that the Department has already determined that these definitions do not require an entity to obtain a CON to acquire membership interests in an existing legal entity like UROC which owns and operates a linear accelerator or simulator. The declaratory ruling requested by CMHA is consistent with the Department's prior rulings that

have interpreted the applicability of the CON Law to the purchase of ownership interests in health care organizations, for the following reasons:

CMHA's acquisition of the membership interests in UROC does not constitute the acquisition of a linear accelerator or a simulator because the ownership of the equipment will not change, and the same equipment will be used to provide the same radiation oncology services, in the same location. UROC will continue to own the two pieces of equipment and UROC's legal status as a corporate entity will not change.

The purchase of ROCC's membership interests in UROC does not involve the offering or expansion of any new facility, service or equipment, and the state's inventory of linear accelerators and simulators will not change. No new or additional equipment will be acquired or placed in operation in the State.

CONCLUSION

For the foregoing reasons, assuming the statements of fact in the request to be true, I conclude that CMHA does not require a certificate of need in order to proceed with the purchase of ROCC's membership interests in UROC.

This the 14th day of November, 2011.

Drexel Pratt, Director
Division of Health Service Regulation
N.C. Department of Health and Human Services

**NORTH CAROLINA DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF HEALTH SERVICE REGULATION
RALEIGH, NORTH CAROLINA**

IN RE: REQUEST FOR DECLARATORY)	
RULING BY THE CHARLOTTE-)	
MECKLENBURG HOSPITAL AUTHORITY)	DECLARATORY RULING
D/B/A CAROLINAS HEALTHCARE)	
SYSTEM AND MERCY HOSPITAL, INC.)	

I, Drexdal Pratt, as Director of the Division of Health Service Regulation, North Carolina Department of Health and Human Services (“Department” or “Agency”), do hereby issue this Declaratory Ruling pursuant to North Carolina General Statute § 150B-4 and 10A NCAC 14A .0103 under the authority granted me by the Secretary of the Department of Health and Human Services.

The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas HealthCare System (“CMHA”) and Mercy Hospital, Inc. (“Mercy”) (collectively “CHS”) has requested a declaratory ruling as to the applicability of Chapter 131E, Article 9 of the North Carolina General Statutes, and of the Department’s rules, to the facts described below. Specifically, CMHA and Mercy request a Declaratory Ruling allowing the hospital facilities situated on the “Mercy Vail Avenue Campus,” at 2001 Vail Avenue, Charlotte, NC 28207 (License # H0042), as well as some specific off-campus outpatient services, to be relicensed as part of Carolinas Medical Center’s license (License # H0071) without first obtaining a Certificate of Need (“CON”), and allowing the good cause transfer of any outstanding CONs issued to Mercy-related CON projects. This ruling will be binding upon the Department and the entity requesting it, as long as the material facts stated herein are accurate. This ruling pertains only to the matters referenced herein. Except as provided by N.C.G.S. § 150B-4, the Department expressly reserves the right to make a prospective change in the interpretation of the statutes and regulations at issue in this Declaratory

License) and (6) F-7979-07 CMC-Pineville Phase II (will still be licensed under the Mercy/Pineville License on the Pineville campus).

ANALYSIS

The CON statute sets forth the following definitions of new institutional health services:

(16) “New institutional health services” means any of the following:

- a. The construction, development, or other establishment of a new health service facility.
- c. Any change in bed capacity as defined in G.S. 131-176(5)

N.C. Gen. Stat. § 131E-176(16) (a) and (c).

On July 15, 2002, the Department issued a Declaratory Ruling to WakeMed to split the WakeMed Raleigh and WakeMed Cary campuses into two separately licensed hospitals, where those facilities had previously operated under a single license. Since the WakeMed transaction, which created a new license did not require a CON, it can be assumed that the Mercy relicensing transaction requested herein which does not create a new license should not require a CON. The placing of Mercy Vail Avenue Campus under the CMC license does not involve any new institutional health service definitions requiring a CON. The relicensing transaction does not constitute the construction, development, or establishment of a new health service facility. The proposed transaction does not constitute a change in bed capacity as defined by N.C. Gen. Stat. § 131E-176(16)(c) and 176(5) in that no beds are being relocated from one licensed facility or campus to another, no health service facility bed capacity is being redistributed among the categories of health service facility beds and there are no increases in the number of health service facility beds, which would require CON review.

DIVISION OF FACILITY SERVICES
RALEIGH, NORTH CAROLINA

IN RE: REQUEST FOR DECLARATORY)
RULING BY WAKEMED) DECLARATORY RULING

I, Robert J. Fitzgerald, Director of the Division of Facility Services ("Agency"), do hereby issue this Declaratory Ruling pursuant to G.S. § 150B-4 and 10 NCAC 3B .0310, and the authority delegated to me by the Secretary of the Department of Health and Human Services. WakeMed asked the Agency to issue a ruling as to the applicability of the Certificate of Need Statute contained in G.S. §131E-176(16)(a) and G.S. §131E-178(a) to the facts described below. For the reasons given below I conclude that these portions of the Statute are not applicable with regard to WakeMed's intent to separately license its New Bern Avenue Campus ("Main Campus") and Western Wake Medical Center ("WWMC") facilities. Furthermore, I conclude that historical acute care utilization data for the last five years for the two hospitals be separately included in the *State Medical Facilities Plan* ("SMFP").

STATEMENT OF THE FACTS

- (1) WakeMed is licensed by the Department of Health and Human Services, Division of Facility Services, Licensure and Certification Section, Acute Care and Home Care Branch, as one facility with multiple sites.
- (2) WakeMed is licensed for a total of 629 acute care beds. These beds are contained on two separate locations – the Main Campus in Raleigh, with 515 acute care beds, and WWMC in Cary, with 114 acute care beds. Both facilities are located in Wake County.

(3) WakeMed operates 55 nursing facility beds, licensed as part of the hospital. These beds are contained in two separate locations: WakeMed Fuquay-Varina, with 37 total nursing facility beds, and WakeMed Zebulon/Wendell, with 19 total nursing facility beds. Both facilities are located in Wake County.

(4) A total of 37 of WakeMed's 55 nursing facility beds were applied for and awarded under Policy C.1 of the 1988, 1990 and 1992 *State Medical Facilities Plans* ("SMFPs").

Twenty-four of the 37 Policy C.1 beds are located at WakeMed Fuquay-Varina, with the remaining 13 beds located at WakeMed Zebulon/Wendell. These beds are compliant with current Policy NH-1 in the 2002 SMFP, in that:

(a) they are certified for participation in the Medicare and Medicaid programs;

(b) residents in these beds are discharged to other nursing facilities in the geographic area with available beds when such discharge is appropriate and permissible under applicable law; and,

(c) patients admitted to these beds have been acutely ill inpatients of an acute hospital or its satellites immediately preceding placement.

The other 18 nursing facility beds were awarded as part of a Settlement Agreement following the 1997 Wake County nursing facility review.

(5) WakeMed operates 68 inpatient rehabilitation beds at its Main Campus, located in Wake County. These beds are licensed as part of the hospital.

- (6) WakeMed operates WakeMed North, an outpatient facility with 4 ambulatory surgery operating rooms and 2 endoscopy rooms, which are included in the WakeMed systemwide hospital license. This facility is located in Wake County.
- (7) Effective January 1, 1989, the Agency granted WakeMed's request for a single, systemwide hospital license for the reporting of its acute care, rehabilitation and nursing facility beds. Utilization data for WakeMed's facilities by location and type of beds are provided each year to the Agency during the annual license renewal application process.
- (8) WakeMed filed a Certificate of Need application to develop WWMC in 1981; the Agency issued the first CON for WWMC in 1984. WWMC opened in December 1991 as an 80-bed acute care hospital. Since opening, WWMC's acute care bed complement has been expanded via several CON Section-approved projects. WWMC is currently licensed for 114 acute care beds – beds have been added at WWMC by relocating them from other WakeMed campuses. The beds have been permanently closed at their original locations, so that the total number of beds systemwide has not changed. Table 1 provides the project numbers and CON issue dates for each of these projects.

Table 1 – CON Projects Involving Licensed Acute Care Beds at WWMC Since 1981

CON Project No.	Description	CON Issue Date(s)	Licensed Acute Beds at WWMC
J-1621-81	Develop an 80-bed acute care hospital in Cary	Mar. 17, 1984 Apr. 26, 1985 (reissued) Feb. 16, 1988 (reissued)	80
J-4115-90	Cost overrun on Project No. J-1621-81	Feb. 26, 1991	80
J-5884-98	Relocate 12 acute care beds to WWMC from Northern Wake Hospital in Wake Forest and 6 acute care beds to WWMC from WakeMed Zebulon/Wendell.	Feb. 9, 1999	98
J-6073-99	Relocate 8 acute care beds to WWMC from WakeMed Fuquay-Varina	Nov. 13, 1999	106
J-6398-01	Change in scope for Project No. J-5884-98, to relocate 8 neonatal Level II beds to WWMC from Main Campus.	Aug. 23, 2001	114

- (9) Since opening, WWMC has been included under the WakeMed systemwide hospital license (No. H0199). However, WWMC has a separate Medicare provider number from the Main Campus, has a separate medical staff from the Main Campus, and is separately surveyed and accredited by the Joint Commission on Accreditation of Healthcare Organizations ("JCAHO").
- (10) WWMC's annual acute care utilization is combined with acute care utilization data from the Main Campus and is reported in each annual SMFP under the name "WakeMed". WakeMed is part of the Wake County Multi-Hospital Service System. Table 2 below illustrates WWMC's utilization since December 1991.

Table 2 – Acute Care Utilization at WWMC Since December 1991

Fiscal Year	Patient Days	Percent Utilization
1992 (10 months)	6,078	20.8%
1993	10,511	36.0%
1994	11,508	39.4%
1995	13,352	45.7%
1996	13,030	44.6%
1997	13,640	46.7%
1998	16,492	56.5%
1999	18,161	62.2%
2000	20,432	59.6%
2001	24,945	72.7%
2002 (6 months prorated)	25,910	75.5%

(Source of FYs 1992-2001 data: Annual License Renewal Applications on file with the Agency; Source of FY 2002 data: WakeMed. Please note that WakeMed's fiscal year is October 1-September 30.)

- (11) WakeMed wishes to license the Main Campus and WWMC under separate hospital licenses for reporting and other internal administrative purposes. No changes in services, staffing, administration or other aspect of management, costs or charges would result from licensing these two hospitals separately. However, doing so might technically be interpreted as the offering of a new institutional health service, via provisions in the Certificate of Need Statute contained in G.S. §131E-178(a), as follows:

(a) No person shall offer or develop a new institutional health service without first obtaining a certificate of need from the Department; provided, however, no hospital licensed pursuant to Article 5 of this chapter that would serve a minority population that would not otherwise have been served and that continues to serve a minority population may be required to obtain a certificate of need for transferring up to 65 beds to nursing care facility beds.

G.S. §131E-176(16) defines a "new institutional health service", in part, as follows:

- a. *The construction, development or other establishment of a new health service facility.*

- (12) In this request, WakeMed maintains that separate licensure of WWMC would not constitute a "change in bed capacity", as defined by G.S. §131E-176(5). No licensed beds would be relocated, nor would this proposal result in any change in the number of health service facility beds in the WakeMed system or in the Wake County Multi-Hospital Service System.

ANALYSIS

WakeMed's request that the Agency issue a Declaratory Ruling described above is based upon the following:

- (1) Neither the WakeMed Main Campus nor WWMC are new health service facilities for Certificate of Need law purposes. The Main Campus opened in 1961; WWMC opened in 1991. At the time of the opening of WWMC, it could have been separately licensed from the Main Campus without further certificate of need review.
- (2) Separate licensure of the Main Campus and WWMC would not affect government reimbursement, because both facilities currently maintain, and will continue to maintain, separate Medicare and Medicaid provider numbers.
- (3) Separate licensure of the Main Campus and WWMC would not impact medical staff organization and composition at either facility, because these facilities have, and have always had, separate medical staffs.

- (4) Separate licensure of the Main Campus and WWMC would not impact accreditation, because both facilities are separately surveyed and accredited by the JCAHO.
- (5) Separate licensure of the Main Campus and WWMC would not affect the governance of either facility, because there would be no resultant change in ownership from this proposal.
- (6) Separate licensure of the Main Campus and WWMC would not change the inventory of licensed acute care beds, either in the WakeMed system or in the Wake County Multi-Hospital Service System.
- (7) Separate licensure of the Main Campus and WWMC would not impact the reporting of acute care bed utilization data, as this data would continue to be reported to the Agency annually.
- (8) Any future capital expenditures and/or services requiring a CON pursuant to G.S. §131E-175 *et seq.*, at either the Main Campus or WWMC would continue to be obtained through the CON process.

CONCLUSION

For the reasons stated above and specific facts presented, I conclude that the separate licensure of Western Wake Medical Center from the WakeMed Main Campus does not constitute a new institutional health service or otherwise require a certificate of need under the applicable portions of the Certificate of Need Statute, specifically G.S. §131E-176(16)(a) and

G.S. §131E-178(a). In particular, I find persuasive the facts and circumstance that, other than the common licensure, these two hospitals were organized and have historically functioned as separate facilities. Moreover, since the only change resulting from this separate licensure status is the separation of utilization data and operating statistics on the annual License Renewal Application submitted to the Agency, I have determined that requiring a certificate of need in this instance would be an overly technical interpretation of the Certificate of Need law and not in furtherance of any statutory purpose. Furthermore, I conclude that the Agency should recognize the historical utilization data for the past five years by licensed hospital in the SMFP; i.e., recognize utilization data for the Main Campus and for WWMC as separate hospitals under common ownership.

WakeMed's acute care, rehabilitation, outpatient and skilled nursing facilities shall be licensed as follows:

Table 3: Licensure of WakeMed Facilities

Licensed Under Main Campus:	Location	Licensed Under WWMC:	Location
WakeMed New Bern Avenue Campus	3000 New Bern Ave. Raleigh, NC 27610	WakeMed Western Wake Medical Center	1900 Kildaire Farm Rd. Cary, NC 27511
WakeMed Rehab	3000 New Bern Ave. Raleigh, NC 27610	WakeMed Fuquay-Varina	400 W. Ransom St. Fuquay-Varina, NC 27526
WakeMed Zebulon/Wendell	535 W. Gannon Ave. Zebulon, NC 27597		
WakeMed North	10000 Falls of Neuse Rd. Raleigh, NC 27614		

This is the 15th day of July, 2002.
