Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 345101	(X2) MULTIPLE CONSTRUCTION A. BUILDING _____ B. WING _____		(X3) DATE SURVEY COMPLETED C 04/10/2014

F 328	<p>Continued From page 1</p> <p>dated 3/20/14 written as a telephone order from the doctor by the Director of Nursing (DON) which stated, "Inner cannula (tube placed through the tracheostomy to provide an airway) to be changed daily on 7-3. Trach (tracheostomy, opening through the neck into the wind pipe) to be cleaned with NS (normal saline) and hydrogen peroxide on 3:00 PM-11:00 PM shift, 11:00 PM-7:00 AM shift and as needed."</p> <p>Additional record review revealed a consultation report from the Ear, Nose and Throat (ENT) doctor dated 4/4/14. The report revealed recommendations which read in part that the inner cannula used by this resident was corrugated, not cleanable and a new inner cannula was needed two times per day. These recommendations were then written on a doctor's order sheet.</p> <p>The next order in the resident's record read, "New inner cannula 1 time per day and PRN (as needed)." This order was signed by the resident's facility doctor. There was no corresponding progress note to explain this order. The last written order in resident #41's medical record was dated 4/6/14 and read "Change cannula PRN." This order was a telephone order from the physician assistant.</p> <p>During an interview with resident # 41 on 4/7/14 she stated that the facility only provided a new inner cannula during the morning tracheostomy care. Resident # 41 reported that during any other tracheostomy care the nursing staff removed the inner cannula, cleaned it in peroxide then reinserted the same inner cannula. In addition, resident #41 stated that for the first 2 years while at the facility, when she received tracheostomy care the inner cannula was replaced with a new one but that last month the</p>	F 328	<p>licensed staff will be educated on writing a complete tracheostomy care order to include an inner cannula size and how frequently the physician would like for the inner cannula to be changed by the DON and/or the Staff Facilitator on April 18, 2014. Information regarding manufacturer's specifications for disposable inner cannulas is sent as part of each package ordered. The instructions were retrieved by the DON. The information in the package indicated the disposable inner cannulas were to be disposed after one use. This information was included in the April 18, 2014 in-service presented by the DON. All newly hired licensed staff will be educated on writing a complete tracheostomy care order, to include size of the inner cannula, the frequency the care should be given (per physician's orders) and disposal of the inner cannula after one use by the Staff Facilitator.</p> <p>3. Any new orders for tracheostomy care, to include when care should be provided and the use of disposable cannulas will be reviewed and signed off on the order by two licensed nurses at the time the order is received. The first nurse will sign as receiving the order. The nurse will then transcribe the order. The signature of the second nurse verifies accuracy in transcription of the order to the Medication and/or the Treatment Administration Record. The pink copy of the order will be reviewed during morning clinical meeting by the DON and/or the MDS nurse Monday through Friday. After review of the physician's order on</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 345101	(X2) MULTIPLE CONSTRUCTION A. BUILDING _____ B. WING _____		(X3) DATE SURVEY COMPLETED C 04/10/2014

F 328	<p>Continued From page 2</p> <p>order for tracheostomy care was changed. The resident reported that she was referred to the ENT specialist and had received written orders to have the inner cannula changed with a new inner cannula two times each day.</p> <p>On 4/9/14 at 2:30 PM nurse #2 demonstrated an unopened inner cannula which was the kind used for resident # 41. The outside of the package read, "Inner Cannula XLT disposable." Nurse #2 stated she only worked on the 7:00 AM -3:00 PM shift so she replaced the inner cannula with a new one every day.</p> <p>A review of the manufacturer specifications provided with the Inner Cannula XLT tubes revealed a warning that the inner cannula was disposable, designed for single use and should not be cleaned or reused.</p> <p>An interview on 4/10/14 at 9:55 AM with the DON revealed the resident's facility doctor was present when the resident returned from the ENT doctor on 4/4/14. The DON stated the resident's facility doctor changed the order from the ENT doctor so that the resident received a new inner cannula once per day and as needed. The DON confirmed this order was present in the medical record with the resident's facility doctor's signature dated 4/4/14. The DON also stated that on 4/7/14 after a conversation with the resident he sent a fax to the resident's facility doctor which requested to change the inner cannula two times per day. At the bottom of a copy of the fax was written "Leave order as it is." The DON confirmed that was what the resident's facility doctor wrote and signed.</p> <p>The DON reviewed the facility's doctor's orders during this interview. He stated the order</p>	F 328	<p>tracheostomy care the DON and/or the MDS nurse will check the MAR and/or the TAR for accuracy of transcription and completion of care per the physician's orders. Review of the pink slips for accuracy in transcription and review of the MAR and/or TAR for completion of tracheostomy care will occur daily x 4 weeks, then twice weekly for 2 weeks, then monthly x 2 months. The resident census will be used to designate any resident with tracheostomy care orders that were reviewed and completion of tracheostomy care per the physician's orders. Tracheostomy care will be observed and findings documented twice weekly by the DON/and or MDS nurse x 4 weeks, random weekly observations x 4 weeks and then continued ongoing random observations.</p> <p>4. Results of the tracheostomy care order audits and observation audits will be reviewed monthly at the QA meeting to identify trends and continued need for monitoring. The information will be presented to the QA committee by the DON and/or MDS nurse</p>

F 328	Continued From page 3 "Change cannula PRN" was not a complete order and needed to be clarified. On 4/10/14 at 12: 58 PM nurse #1 stated that the other 2 shifts were to remove the inner cannula, wash it with peroxide by putting the peroxide and normal saline from the kit into a small syringe. She also stated that the plastic inner cannula used for this resident had grooves which could not be cleaned. The nurse stated that the resident continued to have a lot of upper respiratory secretions which were thicker and had color variations.	F 328			
F 329 SS=D	Multiple attempts to reach the resident's facility physician during the survey were unsuccessful. 483.25(I) DRUG REGIMEN IS FREE FROM UNNECESSARY DRUGS Each resident's drug regimen must be free from unnecessary drugs. An unnecessary drug is any drug when used in excessive dose (including duplicate therapy); or for excessive duration; or without adequate monitoring; or without adequate indications for its use; or in the presence of adverse consequences which indicate the dose should be reduced or discontinued; or any combinations of the reasons above. Based on a comprehensive assessment of a resident, the facility must ensure that residents who have not used antipsychotic drugs are not given these drugs unless antipsychotic drug therapy is necessary to treat a specific condition as diagnosed and documented in the clinical record; and residents who use antipsychotic drugs receive gradual dose reductions, and behavioral interventions, unless clinically	F 329		5/8/14

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE	
F 514	<p>Continued From page 9</p> <p>7. Resident 69 had Alprazolam 0.5 mg signed out 8 times during the date range of 4/1/14 - 4/9/14, as documented on the CSR. The April 2014 MAR indicated that the Alprazolam was administered to the resident 4 times, on the dates of 4/1/14, 4/4/14, 4/6/14, and 4/7/14. The signatures belonged to several members of the nursing staff.</p> <p>During the same interview with the DON, as mentioned above on 4/19/14 on 9:19 AM, he stated that his expectations of the nursing staff are that they assess the resident, pick the appropriate controlled agent for the specific behaviors, document on both the CSR as having been taking out of the narcotic box and on the MAR as having been administered to the resident, and then follow up to see if the symptoms have improved and/or resolved. He stated that he has begun in-servicing the nursing staff about documentation and plans to begin randomly reconciling CSRs with the MARs and narcotic count checks.</p> <p>The administrator, during an interview at 1:48 PM on 4/10/14, stated that the nursing staff is expected to "legibly document on controlled substances sheet that a med(medication) was taken out of narcotic box, then document on front and back of MAR that the med(ication) was given. Not documenting means that the med (medication) was not given to patient (resident)." She continued stating that she thinks that nursing staff may assume that documenting only on the CSR is sufficient practice. She stated that she understands that education will be necessary to see a change in documentation habits from the nursing staff and that she understands the</p>	F 514
