Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

| F 371  | Continued From page 1<br><br>1. During initial tour of the kitchen, beginning at 11:05 AM on 11/13/17, 9 of 12 tray pans stacked on top of one another had moisture trapped inside, 6 of 8 large baking pans stacked on top of one another had moisture trapped inside, and 1 of 1 small baking pans stacked on top of other kitchenware was wet. When these pieces of kitchenware were unstacked and separated water ran onto the floor. The acting dietary manager (DM) stated she was unsure if the kitchenware was stacked wet the night before or the morning of the observation.<br><br>At 9:23 AM on 11/15/17 2 of 15 clear plastic bowls stacked on top of one another in storage had moisture trapped inside.<br><br>At 10:50 AM on 11/16/17 the acting DM stated she was unsure if staff had been trained recently about the need to air dry pieces of kitchenware before stacking them on top of one another. However, she reported it was her expectation that kitchenware be dry and free from food particles before being stacked in storage. She explained the facility had two separate racks in the kitchen, one for air drying wet kitchenware and one for stacking clean and dry kitchenware in storage. The acting DM stated she still had not figured out who stacked the kitchenware when it was found wet on the morning of 11/13/17. According to the acting DM, moisture trapped between pieces of kitchenware could lead to the development of bacteria which could cause cross-contamination and possibly result in residents getting sick.<br><br>At 2:38 PM on 11/16/17 a dietary employee stated she was taught to wash, rinse, sanitize, and air-dry pieces of kitchenware used in cooking | F 371   | the alleged deficient practice(s).<br><br>F 0371<br><br>No specific residents were identified as being affected by the alleged deficiency.<br><br>For residents that have the potential to be affected by the alleged deficient practice;<br><br>1. The facility is to ensure that all kitchenware will be allowed to air dry before stacking them in storage. Compliance will be monitored by the Dietary Manager.<br><br>2. The facility is to ensure that dietary staff will properly clean all areas of the kitchen and all equipment is cleaned and sanitized as appropriate. Compliance will be monitored by the Dietary Manager.<br><br>Systemic Changes:<br><br>1. The kitchenware found by the surveyor during the initial tour was rewashed and allowed to air dry properly. The acting Dietary Manager re-educated dietary staff on the proper drying technique of kitchenware on 11-14-2017 (Attachment #1). An Audit tool was put into place to monitor compliance with this procedure on 11/17/17. A completed copy of the first form completed on 11/17/17 is included for review (Attachment #2 entitled "Sanitation Form"). This form guides the reviewer through an extensive listing of our kitchen equipment, housekeeping |                      |   |

| F 371  | <p>Continued From page 2</p> <p>before stacking them in storage. She reported moisture trapped between pieces of kitchenware could grow bacteria that was dangerous to the health of residents.</p> <p>2. During initial tour of the kitchen, beginning at 11:05 AM on 11/13/17, yellow and tan dried food particles were found on the top interior surface of the microwave.</p> <p>At 9:19 AM on 11/15/17, during a follow-up tour of the kitchen, yellow and tan dried food particles were found on the top interior surface of the microwave.</p> <p>At 10:50 AM on 11/16/17 the acting dietary manager (DM) stated the dietary staff was supposed to clean all of the interior surfaces of the microwave after every use. As a double check she also reported staff were supposed to check the microwave for cleanliness at closing each night and as each day began in the mornings. She commented not cleaning the interior top of the microwave could cause bacteria to grow and cross-contaminate foods being heated in the microwave.</p> <p>At 2:38 PM on 11/16/17 a dietary employee stated the interior roof, back, sides, bottom, and door of the microwave were supposed to be cleaned nightly. She reported if dried food particles were not removed from the interior roof of the microwave they could fall into fresh food that was being heated and possibly make residents sick.</p> | F 371   | <p>items, stored food and personnel sanitation issues, scoring each item for appropriate or inappropriate to help the Quality Assurance / Performance Improvement Committee identify concerns and comply with Tag F371.</p> <p>2. The microwave was cleaned and sanitized on 11-16-17. The acting Dietary Manager re-educated dietary staff that all equipment in the kitchen has to be maintained, cleaned and sanitized, stored appropriately and in good repair on 11-15-17 (Attachment #1). As a dietary employee stated during interview, there is a cleaning schedule for each employee. Corrective actions will be initiated as appropriate.</p> <p>Quality Assurance:</p> <p>The Dietary Manager will monitor using the Dietary Audit Tool. The audit tool will be completed 5 days a week for 3 months or until resolved by the QAPI Committee. The Dietary Manager will report to the QAPI Committee weekly and any corrective action will be initiated as appropriate. The QAPI meeting is attended by the Administrator, Director of Nursing, SDC, Wound Nurse, MDS Nurse and Dietary Manager. The Medical Director will review during the Quarterly QAPI Meeting.</p> |                      |   |
