Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 755	<p>Continued From page 3</p> <p>8/30/24 and she was unable to obtain the prescription requested from the NP or the on-call service for the narcotic. An observation of Nurse #1 was conducted as she used the medication dispensing system. During the observation the nurse was unable to demonstrate how to obtain narcotics from the electronic medication dispensing system. She scrolled through Resident #57 list and stated there were no narcotics available. She stated she did call the physician several times to follow up on the order on the day of the request. She did not recall if she texted or called the Physician and could not provide evidence that she had made the request for the prescription. When the Nurse Practitioner (NP) was in the facility she gave the request directly to the NP.</p> <p>An interview with Nurse #2 on 9/5/24 at 1:31 PM, revealed to obtain a new narcotic hard script on the weekend or holiday she called the NP, the NP then sent the prescription electronically to the pharmacy. The procedure was to reorder medication when there were 8 pills remaining in the card.</p> <p>An interview with NP on 9/5/24 at 1:46 PM, revealed there was an on-call service for holidays, nights, and weekends. She expected the facility to notify her or the on-call service when the medication count gets low to prevent a delay of obtaining the medications. She explained there was also an electronic medication dispensing system and that was the first back up if a resident was out of medication. When she received a request from the facility for a prescription it was electronically sent to the pharmacy.</p>	F 755	<p>ordered timely and no medications run out prior to being ordered. The Director of Nursing or designee will report the findings of this audit to the Quality Assurance Performance Improvement Committee monthly for 3 months with follow up actions and recommendations until such time substantial compliance has been achieved.</p>

F 755	<p>Continued From page 4</p> <p>An interview with the Pharmacist on 9/5/24 at 10:29 AM, via telephone revealed the order for Resident #57's oxycodone-acetaminophen was ordered by the facility on 9/2/24 and delivered to the facility on 9/3/24. The Pharmacist reviewed the transactions on the electronic medication dispensing system and indicated it showed nothing was dispensed for Resident #57 from 8/31/24 through 9/2/24. The Pharmacist stated the facility was to order medications when there were 5 doses remaining for the resident. They had not received a request for Resident #57 for oxycodone- acetaminophen until 9/2/24.</p> <p>The Director of Nursing (DON) was interviewed on 9/6/24 at 2:11 pm. She stated the nurses assigned to the medication carts were responsible for ordering medications. The nurse notified the provider for a new narcotic prescription electronically. On the weekends or holidays the nurse called the Provider and had them fax the prescription or send it directly to the pharmacy. The DON stated residents should not go without medications at any time including narcotic medication and all nurses knew how to access the backup medication dispensing machine. When a resident complained of pain, the nurse should check in the electronic backup system first then follow the re-ordering procedure. She also stated there was a recent pharmacy change and it was possible Nurse #1 missed the training of how to obtain narcotics from the medication dispensing system.</p>	F 755
