F0658 SS = D	<p>Continued from page 1 a preclinical PET (positron emission tomography scan) and appointments with an oncologist and nephrologist. (A PET scan is a nuclear imaging test that can help stage cancer.) The information in the discharge summary included the department and location of each appointment.</p> <p>A review of facility records revealed a physician's progress note, dated 3/9/26, noting that Resident # 1's family member was present and reporting to the physician that Resident # 1 had an oncology follow up scheduled for 10 days and was questioning if transportation could be arranged.</p> <p>Resident # 1's Family Member was interviewed on 3/24/26 at 12:12 PM and reported the following information. He (the family member) had gone to the oncology appointment on 3/18/26 with plans to meet Resident # 1 there. He thought the facility had arranged Resident # 1's transportation to the appointments. The Family Member indicated Resident # 1 did not show up and his appointments were missed.</p> <p>The Transportation Nurse Aide was interviewed on 3/26/26 at 1:00 PM and reported the following information. When a new resident arrives, the nursing staff read the discharge summary and then give the discharge summary to her so that she can review the information for any appointments on the discharge summary for which transportation needs to be arranged. Resident # 1's discharge summary was not given to her for review, and she did not know anything about his 3/18/26 appointments. The Transportation Nurse Aide also stated no one mentioned the appointments to her. She could have taken Resident # 1 to his 3/18/26 oncology appointments if she had known.</p> <p>The facility Social Worker was interviewed on 3/26/26 at 8:05 AM and reported the following information. She was not aware of any of Resident # 1's missed appointments. The Transportation Nurse Aide routinely checked hospital discharge summaries for pending appointments and arranged to transport residents. If the Transportation Nurse Aide was absent, she would assist with the process.</p> <p>The Director of Nursing was interviewed on 3/25/26 at 7:56 PM and reported the Transportation Nurse Aide should have been given the discharge summary to arrange Resident # 1's transport to his oncology appointments on 3/18/26, but this had not happened. The Director of Nursing did not report why the Transportation Nurse Aide had not been given the information. She (the DON) had not been aware of the problem until after Resident</p>	F0658	<p>Continued from page 1 be educated prior to working.</p> <p>The Director of Nursing will review each New Admission's Discharge summary to ensure appropriate appointments and transportation are arranged timely. This review/audit will be documented 2 times a week, weekly x 4, then monthly x 2 months on an Appointment and Transportation QA tool. Reports will be presented to the Monthly QA committee by the Director of Nursing to ensure corrective action is initiated as appropriate. Compliance will be monitored and ongoing auditing program reviewed at the Monthly QA Meeting. The Monthly QA Meeting is attended by the Administrator, DON, Medical Director, MDS Coordinator, Therapy, HIM, and the Dietary Manager.</p>

F0658 SS = D	Continued from page 2 # 1 missed his appointments. The DON further reported that Resident # 1 was transferred back to the hospital later in the day following his first missed appointment on 3/18/26 and therefore the facility had not had time to arrange for the follow ups to take place. Following the interview with the Transportation Nurse Aide on 3/26/26 at 1:00 PM during which the Transportation Aide reported that nursing staff had not given her Resident # 1's discharge summary in order that she knew to make transportation arrangements, an attempt was made to speak to Resident # 1's admitting nurse. According to an interview with the Corporate Nurse Consultant on 3/26/26 at 1:50 PM Nurse # 1, who had admitted Resident # 1 on 3/5/26, had experienced a personal emergency and was not available for interview.	F0658		
F0697 SS = D	Pain Management CFR(s): 483.25(k) §483.25(k) Pain Management. The facility must ensure that pain management is provided to residents who require such services, consistent with professional standards of practice, the comprehensive person-centered care plan, and the residents' goals and preferences. This REQUIREMENT is NOT MET as evidenced by: Based on record review and interviews with staff, family member, and Wound Nurse Practitioner (NP), the facility failed to ensure a resident diagnosed with cancer was administered pain medication when the resident requested. This was for 1 of 3 sampled residents reviewed for pain (Resident # 1). The findings included: Record review revealed Resident # 1 was admitted to the facility on 3/5/26 at 6:53 PM and resided there until his discharge on 3/18/26. Resident # 1 had diagnoses which included stage IV basal cell carcinoma with metastatic disease to the lung and bone, open malignant wound to the posterior left shoulder, neuropathy, and a history of cervical and thoracic spine surgery. Review of physician orders revealed Resident # 1 had orders dated 3/6/26, for hydrocodone (opioid pain medication) 5-325 mg (milligrams) every four hours as needed for pain, oxycodone (opioid pain medication) 10 mg every six hours as needed for pain, and gabapentin (medication used for neuropathic pain) 800 mg three	F0697	Resident #1 no longer resides in the facility. On 4/8/26 the Regional Nurse Consultant reeducated the facility Director of Nursing and Staff Development Coordinator on the facility Pain Management Protocols and documentation standards. This was completed on 4/8/26. On 3/30/26 the Staff Development Coordinator reeducated Nurse #1, and #2 on Pain Management Expectations. This was completed on 3/31/26. On 3/31/26 the Regional Nurse Consultant reviewed the last seven days of the facility Pain assessment report to identify all residents that have pain assessment level between 7-10 and to ensure pain management protocols were in place and meeting resident needs. The findings were 3 out of 94 residents reviewed were observed to have a 7 – 10 pain level at some point. These three resident pain management plans were reevaluated by the Nurse practioner on 4/1/26 to ensure appropriate non pharmacological and pharmacological pain management efforts were in place. This reevaluation was completed on 4/1/26. Pain Management Protocol, Pain assessments, and Non Pharmacological v/s Pharmacological interventions Meeting residents Pain needs timely and appropriate documentation of Pain medicine administration. Facility Nurse Aides will be reeducated to complete a Stop and Watch form for all residents that report pain	04/14/2026

F0697 SS = D	<p>Continued from page 3 times per day.</p> <p>Review of Resident # 1's admission Minimum Data Set assessment, dated 3/11/26, revealed Resident # 1 was cognitively intact and frequently experienced moderate pain which interfered with his day-to-day activities. During the last five days of the assessment period the resident had reported his highest pain level as a "7" on a scale of 1 to 10 (Zero would indicate no pain and ten would indicate the worst pain imaginable).</p> <p>Resident # 1's care plan, dated 3/16/26, included the information that Resident # 1 had complaints of pain related to his wound and cancer malignancy. Interventions on the care plan included to encourage Resident # 1 to request pain medication as needed and to offer the medication as ordered.</p> <p>During an interview with Resident # 1's family member on 3/24/26 at 12:12 PM, the family member reported the following information. Resident # 1 was alert and could ask for pain medication when he resided at the facility. Resident # 1 had voiced to him (the family member) that he would call for his pain medication, and it would take a couple of hours for the staff to administer pain medication. The family member did not reference a specific date when this had occurred but indicated it was a general problem. Resident # 1's pain was in his back and in his shoulders.</p> <p>On 3/24/26 at 1:17 PM the facility's Physical Therapist and Physical Therapy Assistant # 1 were interviewed together regarding Resident # 1's pain. The Physical Therapist reported Resident # 1 had pain, but he was able to stand on the day of her initial evaluation. Following the initial evaluation, PTA # 1 had then consistently worked with Resident # 1. PTA # 1 reported on her first day the resident pivoted but in following days he did not stand or pivot because pain limited his ability to get out of bed. His pain had been in his neck and upper back area. She therefore worked with him on positioning and saw that he would grimace. He would say that his pain was always a "8, 9, or 10." She (PTA # 1) would report the pain to the nursing staff.</p> <p>Nurse # 1, who had routinely cared for Resident # 1, was interviewed on 3/24/26 at 1:52 PM regarding Resident # 1's pain. Nurse # 1 reported the following information. Resident # 1 had both hydrocodone and oxycodone ordered for pain. The nursing staff would try to administer the hydrocodone first and then the oxycodone if needed. The resident was administered his pain medication when requested and when therapy reported the resident's pain. For the "most part" the</p>	F0697	<p>Continued from page 3 during their shift. If nurse is not available please provide to the covering/adjacent nurse. This form will be filled out and a copy given to the nurse as well as the Director of Nursing.</p> <p>On 3/26/26, the Staff Development Coordinator in serviced all Licensed Nurses (including agency) on Pain Management Protocols and Stop and Watch expectations. This training included all current Licensed Nurses including agency. This training included:</p> <p>As of 4/13/2026, 27 staff members has not attended the in-service. The Director of Nursing will ensure that any of the above identified staff who does not complete the in-service training by 4/14/26 will not be allowed to work until the training is completed. This training will also be completed for all newly hired staff as well as new agency staff working in the facility.</p> <p>The Director of Nursing will review resident pain assessments 3 times a week, for 4 weeks and then monthly for 3 months using a Pain Management QA tool. Reports will be presented to the weekly QA committee by the Administrator or Director of Nursing to ensure corrective action is initiated as appropriate. Compliance will be monitored and ongoing auditing program reviewed at the Monthly QA Meeting. The Monthly QA Meeting is attended by the Administrator, DON, Medical Director, MDS Coordinator, Therapy, HIM, and the Dietary Manager.</p>

F0697 SS = D	<p>Continued from page 4 pain medication was effective when administered.</p> <p>The Wound NP was interviewed on 3/26/26 at 10:28 PM about Resident # 1's pain. The Wound NP reported the resident's pain in his shoulder and neck were probably due to radiating cancer pain.</p> <p>Review of assignment sheets revealed Nurse # 2 was assigned to care for Resident # 1 starting at 7:00 PM on 3/16/26.</p> <p>Review of Resident # 1's March 2026 Medication Administration Record (MAR) revealed Resident # 1's evening dose of gabapentin was scheduled to be administered every day between an interval timeframe rather than a scheduled hour. The interval was from 7:00 PM to 11:00 PM. Nurse #2 was responsible for caring for Resident # 1 during this timeframe and Nurse #2's initials did not appear on the MAR by the 3/16/26 evening dose. (A nurse's initials by a medication on the MAR would indicate that nurse was the one to administer medication.) Instead, Nurse # 3's initials appeared by the gabapentin evening dose of 3/16/26 with no indication on the MAR when it was given. Further review of the MAR revealed the first dose of oxycodone on the shift which began at 7:00 PM on 3/16/26 was at 1:48 AM on 3/17/26. This was documented as administered by Nurse # 3 and as removed by Nurse # 3 on 3/17/26 at 2:00 AM from controlled medication storage for administration. There was no documentation Resident # 3 received hydrocodone-acetaminophen on the shift which began at 7:00 PM on 3/16/26.</p> <p>On 3/25/26 Nurse Aide (NA) # 1, who had cared for Resident # 1 on multiple occasions, was interviewed regarding Resident # 1's pain. NA # 1 reported the following information. Resident # 1 always had "excess" pain, and she knew to be careful with him. She was aware of one instance when he requested pain medication, and he did not receive it for several hours because she could not find the nurse. This was either on 3/16/26 or 3/17/26. She worked with him beginning at 7:00 PM on the night when the pain medication was delayed and she had made initial rounds between 7:00 PM and 7:30 PM. During that time, she had asked Resident # 1 if he needed anything. He had reported that he needed his pain medication, and she told him she would relay the message to the nurse. Resident # 1's Nurse (Nurse # 2) had been at the desk, and she (NA # 1) told Nurse # 2 that Resident # 1 was requesting his pain medication and Nurse # 2 replied she would get to it. Then she (NA # 1) went to attend to other duties. Around 8:30 PM she saw Resident # 1's call light on and he reported again he needed his pain medication and had not received any.</p>	F0697		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTIONS		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 345336	(X2) MULTIPLE CONSTRUCTION A. BUILDING B. WING	(X3) DATE SURVEY COMPLETED 03/26/2026

F0697 SS = D	<p>Continued from page 5</p> <p>She again told the resident that she would check with the nurse. At the time, Nurse # 2's cart was at a particular area in the hallway, and she had not seen it moved up and down the halls. NA #1 recalled she could not find the nurse. That evening Resident # 1 kept calling for his pain medication. He would see her (NA # 1) as she went up and down the halls and yell out to her, "I am in pain." Nurse # 1's medication cart continued to stay in the same position throughout the evening, and she did not see her at the cart and could not find her. At some point she saw a Medication Aide (MA) who was assigned to another Unit. She thought it was MA # 1 and she (NA # 1) asked MA # 1 if she had seen Nurse # 2 and let her know she could not find her. She thought MA # 1 went to look for Nurse # 2 outside. At some point she thought she saw Nurse # 2 come back in after she (NA # 1) had mentioned the problem of not being able to locate the nurse, but she did not know what Nurse # 2 did and did not recall speaking to her. Several people called the Director of Nursing (DON) that night and the DON had to come to the facility and direct other staff to administer pain medication to Resident #1. She thought it was midnight or after before Resident # 1 received any pain medication because of this. NA # 1 was interviewed regarding whether Resident # 1 was able to go to sleep without his pain medication that night and reported he had not because he was hurting.</p> <p>Nurse # 3 was interviewed on 3/25/26 at 10:38 AM and reported the following information. She worked from 7:00 PM on 3/16/26 until 7:00 AM on 3/17/26 on Unit 2. Resident # 1 resided on Unit 3 and Nurse # 2 was assigned to care for Resident # 1. Other staff members had alerted her that Nurse # 2 was asleep in her car on the evening of 3/16/26 and that residents on Nurse # 2's unit needed their medications. Nurse # 3 did not specify who alerted her first to the problem. One of the residents, who was in need of medication, was Resident # 1 and he needed his pain medication. Nurse # 2 had the keys to Unit 3's medication cart in her pocket and therefore she (Nurse # 3) could not access Resident # 1's medications to administer the resident any pain medication. She called Nurse # 4, who was the on-call nurse, and requested for help because she had her own residents for whom to care and could not access any pain medication for Resident # 1. Nurse # 4 informed her that he had to work the next day at 7:00 AM and that she needed to go to the car and awaken Nurse # 2. Nurse #3 indicated she called the DON also and alerted her to the problem. Her first call was made at 8:29 PM to the DON and the DON also told her to try to awaken Nurse # 2. Nurse #3 stated she went to the car to awaken Nurse # 2, and two other staff members</p>	F0697		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTIONS		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 345336	(X2) MULTIPLE CONSTRUCTION A. BUILDING B. WING	(X3) DATE SURVEY COMPLETED 03/26/2026

F0697 SS = D	<p>Continued from page 6 also went on separate occasions that evening to try to awaken Nurse # 2 that evening. When she (Nurse # 3) went to the car, Nurse # 2 cracked the door, and she did not talk but wiped her face and she never came into the facility. Nurse #2 closed the car door and went back to sleep. She (Nurse # 3) called the DON multiple times to alert her to the problem, and the DON repeatedly told her to try to awaken Nurse # 2. By midnight Nurse # 2 was still asleep in her car, and the DON said she would come to the facility. By referencing her phone regarding phone calls, Nurse # 3 reported that the DON arrived at 12:28 AM and Resident # 1 still had not had his pain medication by that time. The DON got Nurse # 2 out of her car, had her come into the facility and count off (reconcile the controlled substances), and sent Nurse # 2 home. The reconciliation took longer because there was a problem that needed to be found and corrected. After the problem was accounted for, she (Nurse # 3) then started to help administer medications on Unit 3 since the keys could then be accessed to the medication cart. Resident # 1's pain medication had not been given by Nurse # 2. She (Nurse # 3) administered pain medication around 2:00 AM to Resident # 1. At the time Resident # 1 had tears in his eyes and rated his pain level a "20" on a scale of 1-10.</p> <p>MA # 3 was interviewed on 3/25/26 at 9:39 PM. MA # 3 indicated she had been in orientation with Nurse # 3 on the evening of 3/16/26 on Unit # 2 and reported the following information. She had accompanied Nurse # 3 to Unit 3 when the DON arrived on the shift which began at 7:00 PM on 3/16/26 and she had counted (reconciled controlled medications) with Nurse # 2 at that time. After the count was reconciled and Nurse # 2 was sent home, she helped administer medications. She did not recall going into Resident # 1's room when Nurse # 3 went to administer his pain medication. She did see the DON walk around and check on residents but could not attest to which rooms she went into. She (MA # 3) did not hear anyone yelling out or crying in pain while on Unit 3.</p> <p>MA # 1 was interviewed on 3/25/26 at 5:20 PM and reported the following information. She was not assigned to Resident # 1 but needed Nurse # 2 to help with a nursing task that was not related to Resident # 1 on the evening of 3/16/26. She tried to find Nurse # 2 and someone pointed to her that Nurse # 2 was outside. She went outside and found Nurse # 2 in the car. She banged on the door to get her attention and told her there was a resident that needed some assistance which she (MA # 1) could not render as a medication aide. At that point Nurse # 2 came into the</p>	F0697

F0697 SS = D	<p>Continued from page 7 facility but she did not know how long she was in the facility or what she did.</p> <p>Nurse # 2 was interviewed on 3/25/26 at 4:12 PM and reported the following information. She had not been feeling well on the evening of 3/16/26 and the DON was aware of this. She had gone to her car for break close to the time the DON came to relieve her. Nurse #2 indicated she was not aware of Resident # 1 being in pain and she had not administered pain medication to him.</p> <p>The DON was interviewed on 3/25/26 at 7:56 PM and reported the following information. She had received a call from Nurse # 3 around 8:00 Pm on 3/16/26 but it was not related to Nurse # 2 being in her car and not giving medications. She first received a call on 3/16/26 at 10:32 PM from Nurse # 3 about Nurse # 2 being asleep in her car. She directed Nurse # 3 to try to awaken Nurse # 2 and also told Nurse # 2 that she (the DON) would also call Nurse # 2. She called Nurse # 2 and told her that staff were reporting she was asleep in her car and Nurse # 2 responded that she was on break. She (the DON) responded to Nurse # 2 that staff were reporting she had been on break longer than her allowed break and she directed Nurse #2 to go back into the facility. At "12 something" she received another call from Nurse # 3 saying that Nurse # 2 was back in her car and she went to the facility. The DON indicated she arrived at 12:28 AM and found Nurse # 2 in the car. She made Nurse # 2 get out of the car and went with her into the facility where she then had Nurse # 2 reconcile controlled medications with another staff member. There had been a problem with a controlled substance not being signed out but she (the DON) was able to review the MARs and reconcile where the problem had occurred. After the problem was reconciled, she then sent Nurse # 2 home. The DON stated she checked on all the residents to make sure they were okay. She did not recall exactly what time she had entered Resident # 1's room, but when she checked on him, he was asleep. Prior to coming to the facility, she had dressed quickly and needed to return home to dress in professional attire. She asked that other staff who were present attend to any medications needed while she went home quickly and returned to the facility. The DON was interviewed regarding why NA # 1 and Nurse # 3 would indicate that the resident had not been sleeping and had been in pain and reported she did not know.</p> <p>The interim Administrator was interviewed on 3/25/26 at 10:00 AM and reported the following information. She was aware that Nurse # 2 had gone to her car on the evening of 3/16/26 for a break and fallen asleep. She</p>	F0697

F0697 SS = D	Continued from page 8 did not know the details of how long she was in the car or anything about Resident # 1 needing pain medication while the nurse was in the car. She knew the DON had been aware of the situation and had taken care of it.	F0697		
F0755 SS = E	Pharmacy Srvc/Procedures/Pharmacist/Records CFR(s): 483.45(a)(b)(1)-(3) §483.45 Pharmacy Services The facility must provide routine and emergency drugs and biologicals to its residents, or obtain them under an agreement described in §483.70(f). The facility may permit unlicensed personnel to administer drugs if State law permits, but only under the general supervision of a licensed nurse. §483.45(a) Procedures. A facility must provide pharmaceutical services (including procedures that assure the accurate acquiring, receiving, dispensing, and administering of all drugs and biologicals) to meet the needs of each resident. §483.45(b) Service Consultation. The facility must employ or obtain the services of a licensed pharmacist who- §483.45(b)(1) Provides consultation on all aspects of the provision of pharmacy services in the facility. §483.45(b)(2) Establishes a system of records of receipt and disposition of all controlled drugs in sufficient detail to enable an accurate reconciliation; and §483.45(b)(3) Determines that drug records are in order and that an account of all controlled drugs is maintained and periodically reconciled. This REQUIREMENT is NOT MET as evidenced by: Based on record review, and interviews with resident, staff, and pharmacist the facility failed to ensure the accurate documentation and administration of controlled medications (Residents # 1 and # 4) and that the facility's system to account for controlled medications was being followed between shift change and upon receipt and removal of controlled medications in	F0755	Resident #1 and #2 no longer reside in the facility. As of 4/13/26, Resident # 4 is receiving his pain medications as ordered, the documentation is accurate, and the providers have ensured he is satisfied with his pain management efforts. On 3/31/26 the Regional Nurse Consultant reeducated the facility Director of Nursing on the facility Narcotic Administration Protocols, Timely Returns to pharmacy, and the documentation standards. This was completed on 3/31/26. On 3/24/26 the Staff Development Coordinator started reeducated Nurse #1, #6, #5, #7, #8, #12, and #13 on Narcotic Administration Protocols and documentation standards. This was completed on 3/31/26. On 4/13/26 the Regional Nurse Consultant validated that resident #2 Oxycontin was received at the pharmacy and credited to the facility account on 3/19/26. On 3/31/26 the Regional Nurse Consultant reviewed the last seven days of resident controlled substance sheets and the controlled drug record to ensure all resident count sheets and narcotic medication cards were reconciled. All Unit 1, 2, and 3 counts were determined to be correct. A review of the Controlled Substance sheets was conducted and was observed to have missing signatures on the shift-to-shift report form. The Controlled Drug Record review revealed numerous missing initials on the coordinating Medication Administration Record. However, this was determined to be a documentation issue and not considered a drug diversion. This audit was completed on 4/1/26. On 4/13/26 the facility pharmacist conducted a review of the last 60 days of Controlled Drug Substances facility received and the facility return, to ensure no discrepancies were revealed. The pharmacist audit/review did not reveal any concerns. This was completed on 4/14/26	04/15/2026

F0755 SS = E	<p>Continued from page 9 sufficient detail to enable an accurate reconciliation. This was for 3 of 3 sampled residents whose controlled drug records were reviewed for accurate documentation of administration and removal from locked storage (Residents # 1, # 2, and # 4) and for 1 of 1 unit's records reviewed for accounting of controlled medications at shift change and upon receipt or return of controlled medications.</p> <p>The findings included:</p> <p>1. Record review revealed Resident # 1 was admitted to the facility on 3/5/26 at 6:53 PM and resided there until his discharge on 3/18/26. Resident # 1 had diagnoses which included but were not limited to the following: Stage IV basal cell carcinoma with metastatic disease to the lung and bone, open malignant wound to the posterior left shoulder, neuropathy, and a history of cervical and thoracic spine surgery.</p> <p>Review of orders revealed Resident # 1 had an order, dated 3/6/26, for hydrocodone 5-325 mg (milligrams) every four hours as needed for pain.</p> <p>Review of orders revealed additionally Resident # 1 was ordered oxycodone 10 mg every six hours as needed for pain. This was originally ordered on 3/6/26.</p> <p>Review of Resident # 1's March 2026 Medication Administration Record (MAR) revealed Resident # 1 was documented on the MAR to receive hydrocodone 5-325 mg one time while he resided at the facility. This was on 3/10/26 at 9:35 PM and was noted to be administered by Nurse # 5.</p> <p>Review of Resident # 1's hydrocodone-acetaminophen 5-325 mg Controlled Drug Record revealed the hydrocodone-acetaminophen Controlled Drug Record did not reconcile with the MAR. The hydrocodone-acetaminophen was signed out 11 times from storage with no indication it was administered on the MAR. (A Controlled Drug Record sheet is a log on which nurses are to document their signature, date, and time when a controlled medication is removed from locked storage for administration.) The following documentation was on Resident # 1's hydrocodone-acetaminophen Controlled Drug Record:</p> <p>3/6/26 at 2:00 PM-Nurse # 1 signed for a removal of hydrocodone-acetaminophen</p> <p>3/9/26 at 9:00 AM-Nurse # 1 signed for a removal of hydrocodone-acetaminophen</p>	F0755	<p>Continued from page 9 On 3/24/26, the Staff Development Coordinator started reeducating all Licensed Nurses (including agency) on Pain Management Protocols and the appropriate standards of Narcotic Administration and ensuring documentation is appropriately transferred in the residents electronic medical record. This training included all current Licensed Nurses and Medication Aides to including agency. This training included:</p> <p>Appropriate Narcotic Shift to shift counting, accurate documentation, and ensuring appropriate reconciliation. If discrepancies are noted the Licensed nurse must notify the Director of Nursing immediately per facility policy.</p> <p>Pain Management Protocol, Pain assessments, and Non Pharmacological interventions v/s Pharmacological interventions</p> <p>Meeting residents Pain needs timely and appropriate documentation of Pain medications administered in the Electronic Medical Record.</p> <p>Importance of ensuring that two licensed nurses document accurately by adding and subtracting the controlled Substance sheets as new medications arrive from pharmacy, as well as when medications are discontinued or when residents are discharged from the facility.</p> <p>As of 4/9/26, all licensed nurses have received the above education related to the facility Narcotic/Controlled Substance Policy. The Director of Nursing will ensure that any new hires and/or new agency nurses working in the building will not be allowed to work until this training is completed.</p> <p>The Director of Nursing will review each of the three Nursing Cart's Controlled Drug Record 3 times a week, for 4 weeks and then monthly for 3 months using a Narcotic Control Drug Record QA tool. This QA Tool monitors Controlled Substance count accuracy, no blank spaces on the Control Drug Record, no blank spaces on the Shift to Shift counting sheet, and random comparisons of 5 resident Medication Administration Records against the correlating Controlled Substance Count Sheets. Reports will be presented to the Monthly QA committee by the Director of Nursing to ensure corrective action is initiated as appropriate. Compliance will be monitored and ongoing auditing program reviewed at the Monthly QA Meeting. The Monthly QA Meeting is attended by the Administrator, DON,</p>

F0755 SS = E	<p>Continued from page 12</p> <p>3/15/26 at 10:00 AM Nurse # 1 signed for a removal of oxycodone</p> <p>3/16/26 at 1:35 PM Nurse # 1 signed for a removal of oxycodone</p> <p>Nurse # 5 was interviewed on 3/25/26 at 3:46 PM regarding signing out three doses of oxycodone and three doses of hydrocodone-acetaminophen from Resident # 1's supply of controlled medications on 3/11/26 with indication on the MAR that only one dose of oxycodone was administered on that date by him, and no doses of hydrocodone-acetaminophen were administered by him on that date. Nurse # 5 reported the following information. He was scheduled to work at 7:00 PM starting on 3/11/26. He arrived late and he did not think that he and Nurse # 1 counted controlled drugs that night before he took the keys and began work. He was not sure about whether they had or had not. Resident # 1 needed pain medication at 9:34 PM on 3/11/26 and he administered oxycodone for which he signed both on the MAR and the controlled drug record. At 6:00 AM on 3/12/26, Resident # 1 was in pain again. Therefore, he gave him some hydrocodone-acetaminophen but did not put the administration of the hydrocodone-acetaminophen on the MAR. Nurse # 5 also put it on the controlled drug sheet as being removed at 6:00 AM on 3/11/26 and it should have been 6:00 AM on 3/12/26. At the end of his shift at 7:00 AM on 3/12/26, the count was off for both Resident # 1's oxycodone and hydrocodone-acetaminophen. He thought Nurse # 1 had given some doses of both these pain medications on 3/11/26 which she had not signed as removed from storage and it had gone unnoted since they had not counted at 7:00 PM on 3/11/26. Therefore, he signed out two more oxycodone and two more hydrocodone and left the times blank so that Nurse # 1 could come back and fill in the times that the doses were removed by her. He felt he had to do that, or the count would not have been correct. Nurse #5 thought he had talked to Nurse # 12 about this issue. Nurse # 12 was the Unit Manager and had counted with him at 7:00 AM on 3/12/26. The interview further revealed if he had not talked to the Unit Manager about the count being incorrect, then he should have done so. According to the nurse he knew that he was to notify a manager if the count was not correct so that the count could be checked and a notation written about what action was taken.</p> <p>The Unit Manager (Nurse # 12) was interviewed on 3/26/26 at 10:00 AM and reported the following</p>	F0755		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTIONS		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 345336	(X2) MULTIPLE CONSTRUCTION A. BUILDING B. WING	(X3) DATE SURVEY COMPLETED 03/26/2026

F0755 SS = E	<p>Continued from page 13 information. The number of controlled medications matched the number recorded on the sheets when she counted with Nurse # 5 at 7:00 AM on 3/12/26 and she had not noticed that Nurse # 5 had signed out for six doses of controlled drugs for Resident # 1 on 3/11/26. At the time of the count, she had been looking to ensure the number of controlled drug pills in storage matched the number on each Controlled Drug Record sheet and they matched which indicated no obvious problems with the count to her. Nurse # 5 had not talked to her about the count being off and that he had signed out extra medication to make the count correct. Nurse # 5 should not have signed out for controlled medications that he himself had not removed from storage. Nurse #12 stated each nurse that removed controlled medications from storage was supposed to sign, date, and time the removal of each individual dose and document the administration on the MAR.</p> <p>Nurse # 1 was interviewed on 3/25/26 at 12:40 PM and reported the following information. She had administered to Resident # 1 all the controlled drugs for which she had signed removal from his supply during his residency. He had experienced pain while he resided at the facility and needed pain medication. Nurse #1 indicated she would get busy with her work and forget to document the administration on Resident # 1's MAR after she removed the doses from locked storage.</p> <p>During a follow up interview with Nurse # 1 on 3/25/26 at 5:30 PM regarding Nurse # 5's comments that he did not think she (Nurse # 1) and he (Nurse # 5) had counted at shift change on 7/11/26 at 7:00 PM and that some of his (Nurse # 5's) removals of oxycodone and hydrocodone-acetaminophen from drug storage was actually meant to reflect Nurse # 1's removal and administration on 3/11/26. During the interview, Nurse # 1 reviewed the count sheet and reported she could not specifically recall if this had been the case, but that it was possible that it had been.</p> <p>Nurse # 6 was interviewed on 3/26/26 at 1:08 PM regarding Resident # 1's dose of hydrocodone-acetaminophen she had removed from controlled drug storage on 3/10/26 at 1:30 AM without documentation of administration to Resident # 1. Nurse # 6 reported she had administered the hydrocodone-acetaminophen but had forgotten to sign for the administration on Resident # 1's MAR.</p>	F0755

F0755 SS = E	<p>Continued from page 14</p> <p>On 3/26/26 at 12:06 PM an attempt was made to interview Nurse # 10 regarding the dose of oxycodone she removed from Resident # 1's controlled drug supply on 3/6/26 at 9:00 AM without documentation of administration. Nurse # 10 could not be reached on that date.</p> <p>On 3/26/26 at 12:00 PM an attempt was made to interview Nurse # 11 regarding the dose of oxycodone she removed from Resident # 1's controlled drug supply on 3/9/26 at 4:05 AM without documentation of administration. Nurse # 11 could not be reached.</p> <p>During interviews with the Director of Nursing (DON) on 3/24/26 at 7:10 PM and again on 3/25/26 at 7:56 PM, the DON reported the following. She would expect that the documentation of removal of controlled substances from locked storage should coincide with documentation of administration to a resident. She recalled speaking directly to Nurse # 5 at one point and did one on one training and educated him that he could not sign out controlled medications for another nurse. She thought this was regarding a problem with documentation related to Resident # 1 but did not recall for sure. The DON was not aware of unaccounted for controlled medications.</p> <p>Interview with the interim Administrator on 3/26/26 at 3:50 PM revealed there should be an accurate accounting of controlled medications, and she was not aware of problems with the accounting of controlled medications.</p> <p>2. Unit 3's controlled substance count sheet was reviewed for dates and times which began on 3/10/26 at 7:00 PM through 3/19/26 at 7:00 AM. (The controlled substance count sheet is a document on which nurses sign they have reconciled the number of controlled medications between shifts.) The sheet contains columns where an off-going nurse is to sign with an oncoming nurse after they reconcile the count of controlled drugs. There are also columns for the off-going nurse and on-coming nurse to document the total number of cards/containers in the controlled drug storage and the total number of count sheets. (The number of count sheets should coincide with the number of cards/containers of controlled drugs in storage at each accounting between nurses.) There are also columns on the controlled substance count sheet to reflect if controlled medications and their accompanying count sheets have been removed from the total or added to the total during the shift. The columns include a place</p>	F0755

F0755 SS = E	<p>Continued from page 17 nurses were to reconcile, count, and sign at each change of shift the controlled medications. If controlled medications were subtracted or added to the total count, then two nurses were to witness and sign for the additions and subtractions.</p> <p>3. Resident # 2 resided at the facility from 11/7/25 until her discharge on 3/6/26. Resident # 2's diagnoses included chronic pain.</p> <p>Review of Resident # 2's medications revealed an order, dated 1/5/26, for Oxycontin 15 mg (milligrams) two times per day.</p> <p>The Pharmacist in charge of the facility's contracted pharmacy was interviewed on 3/26/26 at 11:05 AM regarding Resident # 2's most recent dispensed doses of Oxycontin prior to her discharge and any documentation of returned Oxycontin doses to the pharmacy following Resident # 2's final discharge. The Pharmacist reported the following information after reviewing the records in their pharmacy system. On 2/9/26 the pharmacy received a new Oxycontin prescription for a total of 60 tablets of Oxycontin. The pharmacy sent a 14-day supply which equated to 28 pills on that date (2/9/26). On 2/27/26 their pharmacy system showed that a facility request was submitted to the pharmacy for additional Oxycontin doses for Resident # 2. On 2/28/26 their pharmacy system showed that 17 doses of Resident # 2's Oxycontin dispensed on 2/9/26 was returned. On the same date (2/28/26) their pharmacy system showed a return of 17 doses, their system also showed they sent 28 more Oxycontin doses to the facility for Resident # 2. According to the Pharmacist in charge, the pharmacy was caught up with logging any returns and they did not have any records of returned Oxycontin from Resident # 1's doses sent on 2/28/26. The last return they had logged was on 2/28/26. The Pharmacist was interviewed regarding why the pharmacy's system would show a request of more Oxycontin doses on 2/27/26 while also showing a return of Oxycontin on 2/28/26 for Resident # 1. The Pharmacist in charge acknowledged that the information in their system did not make sense but that was what their system records were showing on the date of interview with the surveyor. According to the pharmacist in charge's records, they were still awaiting Resident # 2's unused Oxycontin from their dispense date of 2/28/26 to be returned to them.</p> <p>On 3/26/26 at 11:55 AM the facility's Corporate Nurse</p>	F0755

F0755 SS = E	<p>Continued from page 18 Consultant was interviewed and provided a form entitled. "Medication Disposition Record Med Returns to [Name of contracted pharmacy]." The form contained multiple controlled medications for multiple residents which had been returned to the pharmacy. At the top of the form was a scanned date of 3/9/26 and a status notation of "in transit." Seventeen doses of Resident # 2's Oxycontin, which was shown to be dispensed by the pharmacy to the facility on 2/9/26, was listed on the return sheet as returned. The Corporate Nurse Consultant also provided the individual Controlled Drug Records for Resident # 1's last two dispensed Oxycontin fills they had received from the pharmacy.</p> <p>The first of these two Oxycontin Controlled Drug Records included a pharmacy sticker which included information that 28 doses were filled on 2/9/26 which left 32 remaining doses on the prescription which could be requested by the facility. A nurse signed on 2/10/26 that the 28 Oxycontin doses were received by the facility. A review of this Controlled Drug Record which was filled on 2/9/26, showed that all 28 doses were used and none were returned. The second of the two Controlled Drug records for Resident # 2's Oxycontin included a pharmacy sticker which included information that 28 doses were filled on 2/28/26 under the same prescription number for Resident # 2, which left four tablets left as available to be filled on the prescription. A nurse's signature, which was not clear, showed these 28 tablets of Oxycontin were received on 2/19/26 by the facility (which was before the pharmacy sticker's fill date.) The Controlled Drug Record for the Oxycontin, which was filled on 2/28/26, showed that 17 doses remained after Resident # 2 was discharged and were returned to the pharmacy on 3/9/26.</p> <p>According to the Corporate Nurse Consultant during an interview on 3/26/26 at 11:55 AM all of Resident # 2's unused Oxycontin was returned upon the resident's discharge, and it did not make sense that the pharmacy's internal records would show the facility returned 17 doses on 2/28/26 when their records showed those 17 doses were used for the resident. According to the Corporate Nurse Consultant, the form showing the return of 17 doses on 3/9/26 was directly taken from the pharmacy's system which they (the facility) could access. The Corporate Nurse Consultant did not understand why the Pharmacist in charge thought that there were still remaining doses of Resident # 2's Oxycontin to be returned since the facility's records showed they had returned all of them and she did not know why the records between the pharmacy and the</p>	F0755
