

---

## CHAPTER 6

# OPERATING ROOMS

---

### **Summary of Operating Room Inventory and Utilization**

“Operating room” is defined in G.S. 131E-76(6a) as “...a room used for the performance of surgical procedures requiring one or more incisions and that is required to comply with all applicable licensure codes and standards for an operating room.” In the spring of 2016, the combined inventory of operating rooms in hospitals and ambulatory surgical facilities in North Carolina consisted of 154 dedicated inpatient surgery rooms, including 95 dedicated C-Section rooms, 296 dedicated ambulatory surgery rooms and 913 shared operating rooms. Data from the 2016 Hospital and Ambulatory Surgical Facility License Renewal Applications indicated that of the total reported surgical cases, excluding C-Section cases, 72.3 percent of the cases were ambulatory cases and 27.7 percent of the cases were inpatient cases.

### **Changes from the Previous Plan**

No substantive changes to the Operating Room methodology have been incorporated into the North Carolina Proposed 2017 State Medical Facilities Plan. The inventory and case data have been updated and references to dates have been advanced by one year, as appropriate.

### **Sources of Data**

Data on the number of cases and procedures for the North Carolina Proposed 2017 State Medical Facilities Plan were taken from the “2016 Hospital License Renewal Application” and the “2016 Ambulatory Surgical Facility License Renewal Application” as submitted to the Acute and Home Care Licensure and Certification Section of the Division of Health Service Regulation. *(Note: While utilization data are reported on the annual license renewal applications for dedicated C-Section rooms, utilization data must be collected separately for the excluded Trauma Center and Burn Intensive Care Unit operating rooms described in Step 4.j. of the “Methodology for Projecting Operating Room Need.” For the North Carolina Proposed 2017 State Medical Facilities Plan, one operating room for each Level I and Level II trauma center and one operating room for each designated burn intensive care unit are excluded in Table 6B. However, additional data on cases referred to excluded operating rooms by Level I or Level II trauma centers and burn intensive care units have not been collected because application of the methodology indicated that the Operating Room Service Areas with a Level I or Level II trauma center or burn intensive care unit all had surpluses of operating rooms. Excluding cases for service areas with projected surpluses would only increase the size of the projected surplus.)*

Inventory data for the North Carolina Proposed 2017 State Medical Facilities Plan were compiled by staff based on License Renewal Applications, supplemented with data from the most recent licenses issued by the Acute and Home Care Licensure and Certification Section and with project approval letters from Certificate of Need.

Population data by county for 2015 and 2019 were obtained from the North Carolina Office of State Budget and Management.

### **Methodology for Projecting Operating Room Need**

The following narrative describes the assumptions and methodology used in determining the operating room inventory and in projecting need for additional operating room capacity. The objective of the methodology is to arrive at a reasonable assessment of the adequacy of current resources for performing surgery, compared with an estimate of need for additional capacity.

## Step 1 – Delineation of Service Areas (Column A)

### Definitions:

Single county operating room service area: A county with at least one licensed facility with one or more operating rooms.

Multicounty operating room service area: A group of counties including:

- one or two counties with at least one licensed facility with at least one operating room **and**;
  
- one or more counties with no licensed facility with at least one operating room.

All counties are either single county operating room service areas or are part of a multicounty operating room service area. A multicounty operating room service area may consist of multiple counties with no licensed facility with at least one operating room grouped with either one or two counties, each of which has at least one licensed facility that includes at least one operating room.

The three most recent years of available surgical patient origin data are combined and used to create the multicounty operating room service areas. These data are updated and reviewed every three years. The operating room service areas are then updated, as indicated by the data. The most recent update occurred in the North Carolina Proposed 2017 State Medical Facilities Plan. The following decision rules are used to determine multicounty operating room service area groupings:

1. Counties with no licensed facility with at least one operating room are grouped with the single county where the largest proportion of patients had surgery, as measured by number of surgical cases, unless:
  - a. Two counties with licensed facilities with at least one operating room each provided surgical services to at least 35 percent of the residents who received surgical services, as measured by number of surgical cases.
2. If 1.a. is true, then the county with no licensed facility with at least one operating room is grouped with both the counties which provided surgical services to at least 35 percent of the residents who received surgical services, as measured by number of surgical cases.

A county lacking a licensed facility with at least one operating room becomes a single county operating room service area upon licensure of a facility with at least one operating room in that county. If a certificate of need is issued for development of a facility with at least one operating room in a county lacking a facility with at least one operating room, the operating room(s) for which the certificate of need has been issued will be included in the inventory of operating rooms in that county's multicounty operating room service area until those operating rooms are licensed.

In 2006, in response to an adjusted need determination petition, the State Health Coordinating Council added Swain County to the Jackson-Graham multicounty operating room service area. This created a multicounty operating room service area that included two counties that have licensed facilities with at least one operating room and one county lacking a licensed facility with at least one operating room.

An operating room's service area is the operating room planning area in which the operating room is located. The operating room planning areas are the single and multicounty groupings shown in Figure 6.1.

## **Step 2 – Estimate Total Surgery Hours for the Previous Year (Columns B through H)**

Estimate the total number of surgery hours performed during the previous fiscal year based on reported cases by type from Annual License Renewal Applications, as follows:

- a. Sum the number of inpatient surgical cases reported in the Inpatient Cases column of the “Surgical Cases by Specialty Area” table on the annual Hospital License Renewal Applications for all licensed facilities within the operating room service area. *(Note: Cases performed in Dedicated C-Section rooms; cases reported as “Trauma Cases” by Level I or II Trauma Centers; and cases reported by designated “Burn Intensive Care Units” are excluded for purposes of these need projections.)* Multiply the total number of inpatient cases by three hours to estimate the number of hours utilized for inpatient cases. *(Column B x Column C = Column D)*
- b. Sum the number of ambulatory surgical cases reported in the Ambulatory Cases column of the “Surgical Cases by Specialty Area” table on the annual Hospital License Renewal Applications and the number of surgical cases reported on the annual Ambulatory Surgical Facility License Renewal Applications for all licensed facilities within the operating room service area. Multiply the total number of ambulatory cases by 1.5 hours to estimate the number of hours utilized for ambulatory cases. *(Column E x Column F = Column G)*
- c. Sum the totals from Step 2.a. and 2.b. to determine the “Total Estimated Hours” reported during the previous fiscal year. *(Column D + Column G = Column H)*

## **Step 3 – Project Future Operating Room Requirements Based on Growth of Operating Room Hours (Columns I through L)**

- d. For purposes of these need projections, the number of surgical hours is anticipated to increase or decrease in direct proportion to the change in the general population of the operating room service area. A “Growth Factor” based on each service area’s projected population change between the “data year” (2015) and the “target year” for need projections (2019) is calculated based on population figures from the North Carolina Office of State Budget and Management. *(Column I: Growth Factor = 2019 Service Area Population minus 2015 Service Area Population, then divided by the 2015 Service Area Population.)*
- e. Multiply the “Total Estimated Hours” for the most recent fiscal year by the “Growth Factor” for each operating room service area, then add the product to the Total Estimated Hours to determine the “Projected Surgical Hours Anticipated in 2019.” *([Column H x Column I] + Column H = Column J)*
- f. For purposes of the State Medical Facilities Plan, the average operating room is anticipated to be staffed nine hours a day, for 260 days per year, and utilized at least 80 percent of the available time. The standard number of hours per operating room per year based on these assumptions is 1,872 hours. *(Column K: 9 hours x 260 days x 0.8 = 1,872 hours per operating room per year).*
- g. Divide the “Projected Surgical Hours Anticipated in 2019” by the “Standard Hours per Operating Room per Year” to determine the projected number of operating rooms required by the year 2019. *(Column J ÷ Column K = Column L)*

#### **Step 4 – Inventory of Operating Rooms (Columns M through S)**

- h. List the number of operating rooms by type in each operating room service area by summing the following for all licensed hospitals and ambulatory surgery facilities:
  - Number of Inpatient Operating Rooms (Column M)
  - Number of Ambulatory Operating Rooms (Column N)
  - Number of Shared Operating Rooms (Column O)
- i. For each operating room service area, exclude the number of dedicated C-Section operating rooms as summed from the Hospital License Renewal Application. (Column P)
- j. For each operating room service area, exclude one operating room for each Level I and Level II Trauma Center and one additional operating room for each designated Burn Intensive Care Unit. (Column Q)
- k. For each operating room service area, add the number of additional operating rooms for which certificates of need have been issued or settlement agreements signed but the operating rooms are not yet licensed, as well as any need determinations from previous plans that are pending certificate of need review. (Column R)
- l. For each operating room service area, calculate the “Adjusted Planning Inventory” by summing the licensed operating rooms, minus the exclusions, plus the adjustments for additional operating rooms from Step 4.k. *(Note: By entering the “exclusions” as negative numbers,  $Column\ S = SUM [Column\ M\ through\ Column\ R].$ )*
- m. Determine the utilization rate for each licensed facility providing surgical services and exclude from Step 5 – “Determination of Need” the operating rooms and corresponding procedures in chronically underutilized licensed facilities located in operating room service areas with more than one licensed facility. Do not exclude from Step 5 operating rooms in facilities located in service areas where all facilities are chronically underutilized. Chronically underutilized licensed facilities are defined as licensed facilities operating at less than 40 percent utilization for the past two fiscal years, which have been licensed long enough to submit at least three License Renewal Applications to the Division of Health Service Regulation.

#### **Step 5 – Determination of Need (Columns T and U)**

- n. For each operating room service area, subtract the “Adjusted Planning Inventory” from the “Projected Operating Rooms Required in 2019” to determine the “Projected Operating Room Deficit or Surplus.” *( $Column\ L - Column\ S = Column\ T$ ) (Note: In Column T, projected surpluses will appear as negative numbers indicating that there are more operating rooms in the Adjusted Planning Inventory than the methodology projects will be needed by 2019.)*
- o. For each operating room service area with more than 10 operating rooms and a projected deficit of 0.50 or greater, the “Operating Room Need Determination” is equal to the “Projected Operating Room Deficit” rounded to the next whole number. (In this step, fractions of 0.50 or greater are rounded to the next highest whole number.) For each

operating room service area with more than 10 operating rooms and a projected deficit that is less than 0.50 or in which there is a projected surplus, the Operating Room Need Determination is zero. (*Column U*)

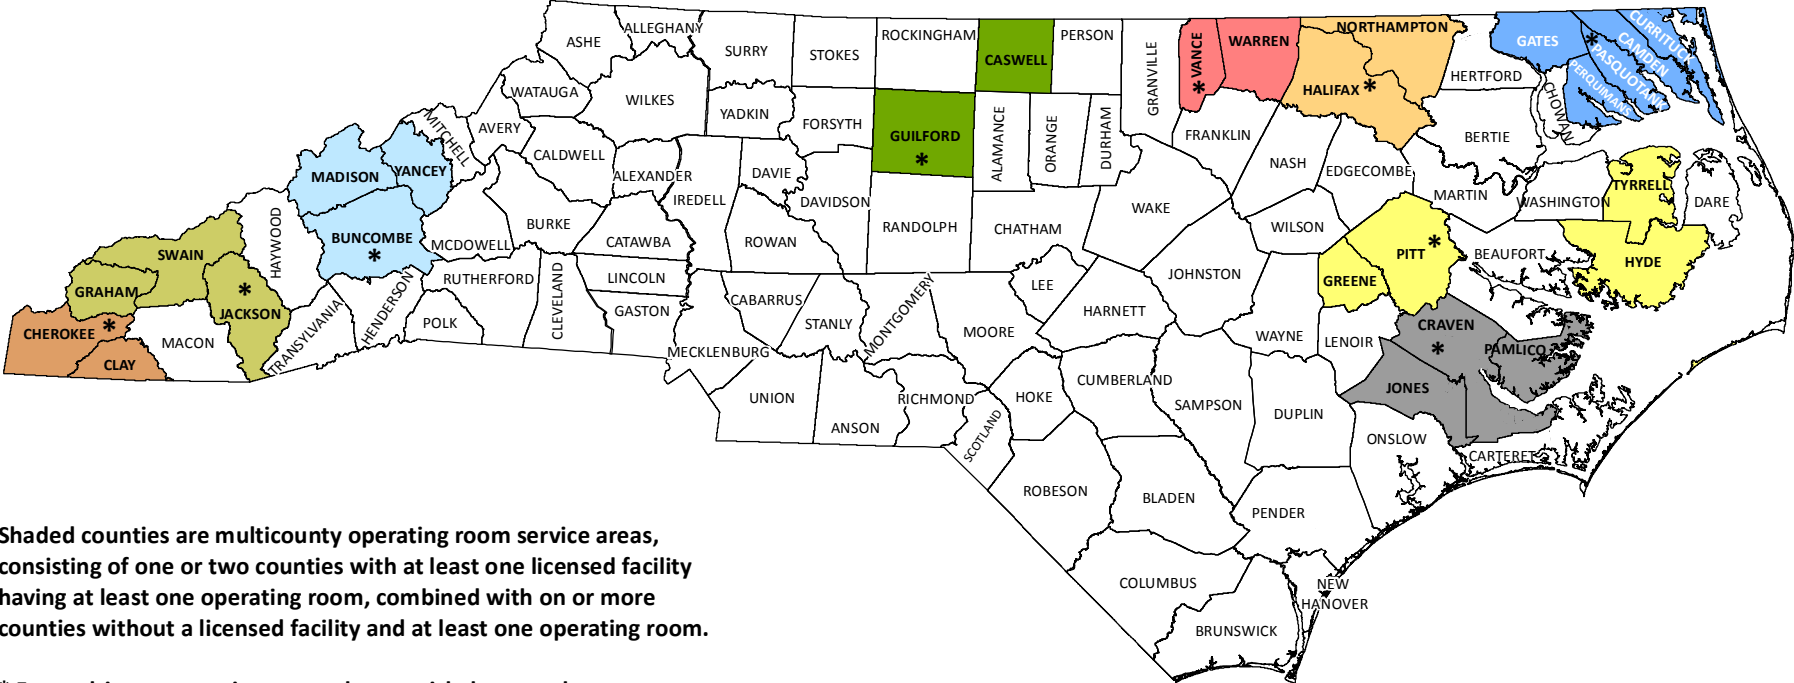

For each operating room service area with six to 10 operating rooms and a projected deficit of 0.30 or greater, the “Operating Room Need Determination” is equal to the “Projected Operating Room Deficit” rounded to the next whole number. (In this step, fractions of 0.30 or greater are rounded to the next highest whole number.) For each operating room service area with six to 10 operating rooms and a projected deficit that is less than 0.30 or in which there is a projected surplus, the Operating Room Need Determination is zero. (*Column U*)

For each operating room service area with five or fewer operating rooms and a projected deficit of 0.20 or greater, the “Operating Room Need Determination” is equal to the “Projected Operating Room Deficit” rounded to the next whole number. (In this step, fractions of 0.20 or greater are rounded to the next highest whole number.) For each operating room service area with five or fewer operating rooms and a projected deficit that is less than 0.20 or in which there is a projected surplus, the Operating Room Need Determination is zero. (*Column U*)

**NOTE:** “Dedicated C-Section Operating Rooms” and associated cases are excluded from the calculation of need for additional “operating rooms” by the standard methodology; therefore, hospitals proposing to add a new operating room for use as a “Dedicated C-Section Operating Room” shall apply for a certificate of need without regard to the need determinations in Chapter 6 of this Plan. There are no other operating room exclusions for which this protocol is applicable.

A “Dedicated C-Section Operating Room” shall only be used to perform Cesarean Sections and other procedures performed on the patient in the same visit to the C-Section Operating Room, such that a patient receiving another procedure at the same time as the Cesarean Section would not need to be moved to a different operating room for the second procedure.

**Figure 6.1: Operating Room Service Areas**

Shaded counties are multicounty operating room service areas, consisting of one or two counties with at least one licensed facility having at least one operating room, combined with one or more counties without a licensed facility and at least one operating room.

\* For multicounty service areas, the asterisk denotes the county with at least one licensed facility having one or more operating rooms.

Hospitals	Multicounty Service Area	Color Code
Murphy Medical Center	Cherokee, Clay	
Harris Regional Hospital and Swain Community Hospital	Jackson, Graham, Swain	
Mission Hospital	Buncombe, Madison, Yancey	
Maria Parham Medical Center	Vance, Warren	
Our Community Hospital and Halifax Regional Medical Center	Halifax, Northampton	
Vidant Medical Center	Pitt, Greene, Hyde, Tyrrell	
CarolinaEast Medical Center	Craven, Jones, Pamlico	
Cone Health and High Point Regional Health	Guilford, Caswell	
Sentara Albemarle Medical Center	Pasquotank, Camden, Currituck, Gates, Perquimans

**Table 6C: Operating Room Need Determination**  
*(Proposed for Certificate of Need Review Commencing in 2017)*

It is determined that the Operating Room Service Areas listed in the table below needs additional operating rooms as specified.

<b>Operating Room Service Area</b>	<b>Operating Room Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
Davie	1	To be determined	To be determined
Moore	1	To be determined	To be determined
New Hanover	1	To be determined	To be determined
Union	1	To be determined	To be determined
It is determined that there is no need for additional operating rooms anywhere else in the state and no other reviews are scheduled.			

\* Need determination shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. The filing deadline is absolute (see Chapter 3).

**Table 6D: Inventory for Single Specialty Ambulatory Surgery Demonstration Project**

<b>Operating Room Service Area</b>	<b>Provider</b>	<b>ORs</b>
Charlotte Area (Mecklenburg, Cabarrus, Union counties)	University Surgery Center, LLC	2
Triad Area (Guilford, Forsyth counties)	Piedmont Outpatient Surgery Center	2
Triangle Area (Wake, Durham, Orange counties)	Triangle Orthopaedics Surgery Center	2
<p>The North Carolina 2010 State Medical Facilities Plan included need determinations for a Single Specialty Ambulatory Surgery Demonstration Project, consisting of three facilities with two operating rooms each to be located in the Charlotte Area (Mecklenburg, Cabarrus, Union counties), Triad Area (Guilford, Forsyth counties), and the Triangle Area (Wake, Durham, Orange counties). On 9/28/2010, CON #G-008477-10 was awarded to Piedmont Outpatient Surgery Center LLC and Stratford Executive Associates LLC to develop a single-specialty ENT ambulatory surgical facility in the Triad area. Piedmont Outpatient Surgery Center received its license effective 2/6/2012. On 6/1/2011, CON #J-008616-10 was awarded to Triangle Orthopaedics Surgery Center to develop a single specialty (orthopaedic) ambulatory surgical facility in the Triangle Area. Triangle Orthopaedics Surgery Center received its license effective 2/25/2013. University Surgery Center, LLC (dba Mallard Creek Surgery Center) received CON #F-008543-10 on 7/18/2012 to develop a single specialty (orthopaedic) ambulatory surgical facility in the Charlotte Area and was licensed on May 1, 2014.</p>		

**Inventory of Endoscopy Rooms in Licensed Facilities**

With the change in legislation which occurred in August 2005 (Session Law 2005-346), endoscopy rooms in licensed facilities are no longer defined as “operating rooms.” For information purposes only, a listing of endoscopy procedure rooms in licensed facilities is provided in Table 6E based on data from the 2016 Hospital and the 2016 Ambulatory Surgery Facility License Renewal Applications. The review schedule for endoscopy rooms in licensed facilities can be found in Chapter 3.
