Please accept this letter of support for Village Family Dental and their venture in a dental only ambulatory center.

My son was seen in November 2014 for surgery at a hospital setting. While I was overly pleased with the care and treatment given by the dental staff, it was very aggravating that I had to wait months after diagnosis to actually get the treatment done. Another thing that soured this experience was the fact I had to take several days off work to get the pre-op visit and his general doctor visit taken care of in addition to the actual treatment date. Unfortunately at that point I did not have any other choice but to do what was best for my child.

In conclusion, I believe that the dental only ambulatory center would be a revolutionary choice to be given to all future patients. Children should not have to wait or be in pain because there are no other options. I believe that Village Family Dental believes that and wants to give them another option and I fully support them on this journey.
