

Dr. Green

I am writing to you in hopes that I may oppose Wilmington Health, PLLC opening new operating rooms in Onslow County. Opening two additional operating rooms may jeopardize the community hospital from keeping its doors open for the community. Onslow Memorial depends on the outpatient surgeries to support all services provided in the community.

I live in a neighboring community and work with a practice at Onslow Memorial Hospital. If this facility closed people would be forced to travel to get access to critical medical services. That would prove to be a severe blow to the people of Onslow County.
