Christopher Ullrich, MD, Chair
State Health Coordinating Council
Trenesse Michael, Analyst
Healthcare Planning and Certificate of Need Section

Dear Dr. Ullrich and Ms. Michael,

This is just a brief note to ask that you approve the special need petition for a replacement fixed MRI in Wake County.

MRI is a common diagnostic tool. However, MRI scans are expensive. Getting one at the hospital, even as an outpatient, can cost thousands of dollars out of pocket. If you need more than one, as many people do, the cost can change your lifestyle, forcing changes between health care, food, and shelter.

Raleigh Radiology is doing an important service by keeping its charges low. Please approve this petition and support them as champions of low charge for MRI in Wake County. Their request is modest and long overdue. Wake County is growing fast and low-cost MRI should keep pace.

Thank you for your time and attention.

Regards,

Lisa Giordano, CFNP

Dear Dr. Ullrich and Ms. Michael,

This is just a brief note to ask that you approve the special need petition for a replacement fixed MRI in Wake County.

MRI is a common diagnostic tool. However, MRI scans are expensive. Getting one at the hospital, even as an outpatient, can cost thousands of dollars out of pocket. If you need more than one, as many people do, the cost can change your lifestyle, forcing changes between health care, food, and shelter.

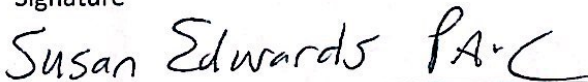

Raleigh Radiology is doing an important service by keeping its charges low. Please approve this petition and support them as champions of low charge for MRI in Wake County. Their request is modest and long overdue. Wake County is growing fast and low-cost MRI should keep pace.

Thank you for your time and attention.

Regards,

Dear Dr. Ullrich and Ms. Michael,

This is just a brief note to ask that you approve the special need petition for a replacement fixed MRI in Wake County.

MRI is a common diagnostic tool. However, MRI scans are expensive. Getting one at the hospital, even as an outpatient, can cost thousands of dollars out of pocket. If you need more than one, as many people do, the cost can change your lifestyle, forcing changes between health care, food, and shelter. This is especially true for our population of students who make these decisions every day. Even more so they make decisions to defer diagnostic care in order to continue their studies if that care is at a distance and causes missing classes.

Raleigh Radiology is doing an important service by keeping its charges low. Please approve this petition and support them as champions of low charge for MRI in Wake County and for our students. Their request is modest and long overdue.

Thank you for your time and attention.

Dear Dr. Ullrich and Ms. Michael,

This is just a brief note to ask that you approve the special need petition for a replacement fixed MRI in Wake County.

MRI is a common diagnostic tool. However, MRI scans are expensive. Getting one at the hospital, even as an outpatient, can cost thousands of dollars out of pocket. If you need more than one, as many people do, the cost can change your lifestyle, forcing changes between health care, food, and shelter.

Raleigh Radiology is doing an important service by keeping its charges low. Please approve this petition and support them as champions of low charge for MRI in Wake County. Their request is modest and long overdue. Wake County is growing fast and low-cost MRI should keep pace.

Thank you for your time and attention.

Healthcare Planning and Certificate of Need Section

Dear Dr. Ullrich and Ms. Michael,

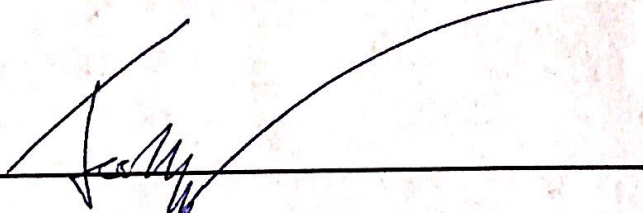

This is just a brief note to ask that you approve the special need petition for a replacement fixed MRI in Wake County.

MRI is a common diagnostic tool. However, MRI scans are expensive. Getting one at the hospital, even as an outpatient, can cost thousands of dollars out of pocket. If you need more than one, as many people do, the cost can change your lifestyle, forcing changes between health care, food, and shelter.

Raleigh Radiology is doing an important service by keeping its charges low. Please approve this petition and support them as champions of low charge for MRI in Wake County. Their request is modest and long overdue. Wake County is growing fast and low-cost MRI should keep pace.

Thank you for your time and attention.

Regards,
