1. HISTORY AND ROLE OF THE MEDICAL CARE COMMISSION

The North Carolina Medical Care Commission (Commission) was created primarily as a result of the findings of the North Carolina Hospital and Medical Care Commission, a special commission appointed in 1944 to study the critical shortages in general hospital facilities and trained medical personnel in the State of North Carolina and to make recommendations for improvements in these areas. Among the recommendations made was that the legislature provide for a permanent State agency that would be responsible for the maintenance of high standards in North Carolina's hospitals, and the administration of a medical student loan fund, and a statewide hospital and medical care program.

The Commission was established in 1945 and empowered by its enabling legislation to, among other things:

- Make a survey of the hospital resources of the State and formulate a statewide program for construction and maintenance of local hospitals, health centers and related facilities, and receive and administer Federal and State funds appropriated for such purposes;
- Make loans to medical students;
- Survey all factors concerning the location of the expanded University Medical School. (The same act authorized the expansion of the University of North Carolina Medical School from a two-year to a four-year program).

In 1946, Congress passed the Hospital Survey and Construction Act (Hill-Burton) to provide funds for the construction and renovation of health care facilities, and the Commission was designated as the State agency empowered to administer the program within North Carolina. Under this program, which is also known as the Hill-Burton program, health care facility construction in North Carolina totaled more than \$500 million dollars, of which 40 percent was provided by Federal sources, 5 percent by the State, and 55 percent by local sponsors. Of the more than 500 Hill-Burton projects approved by the Commission between 1946 and 1976, 241 were general hospital projects, including 80 new facilities.

Pursuant to the Executive Organization Act of 1973, a 17 member Medical Care Commission was incorporated into the Department of Health and Human Services. The Commission is attached organizationally to the Department of Health and Human Services' Division of Health Service Regulation, and is staffed by that Division. Since its inception the Commission has been assigned new responsibilities, while some of the original activities are either no longer needed or are carried out elsewhere. Today the Commission is responsible for the development of rules for:

- Licensure and operations of hospitals, hospices, free-standing outpatient surgical facilities, nursing homes, home health agencies, home care agencies, nursing pools, and adult care facilities;
- Regulation of ambulances and emergency medical services personnel; and
- Financing of construction and modernization projects for qualifying health care facilities.

In 1975, the North Carolina General Assembly enacted the Health Care Facilities Finance Act (Act). The Act provides that the North Carolina Medical Care Commission may conduct financing activities to "acquire, construct, equip, or provide health care facilities for any public or nonprofit agency." The Act defines health care facilities as "any building, addition, or improvement including machinery, equipment, or furnishings that are

suitable for health care." This definition includes but is not necessarily limited to: general acute care or specialty hospitals, nursing homes, continuing care facilities for the elderly, health care clinics, and outpatient facilities; laboratories and research facilities; laundries and other ancillary service facilities; and training facilities for health care personnel, administration buildings, parking lots, garages, and other buildings normally under the jurisdiction of health care facilities.

The law provides that to qualify for assistance under the Act a project must meet several criteria:

- Applicant must be a non-profit or public agency as defined in General Statute § 131A-3;
- Commission must be satisfied that there is a need for the project in the area where it is to be located;
- Applicant must be financially responsible and capable of fulfilling its obligation for making debt service payments;
- All public facilities such as utilities and other public services necessary for the health care facility must be made available; and
- All costs associated with the project must be borne by the applicant and not the State.

While several states have health care finance authorities, which issue tax-exempt bonds, the organization and authority of the North Carolina Medical Care Commission make it unique. First, it is not a quasi-independent authority. It is part of an operational agency of the executive branch of North Carolina State Government, located in the Department of Health and Human Services. Second, it has an affiliation with the Division of Health Service Regulation. The Division of Health Service Regulation prepares the State Medical Facilities Plan with the North Carolina State Coordinating Council for approval by the Governor, issues Certificates of Need, assists in project development, approves construction plans, monitors the construction process, and finally licenses the facility.

2. MEMBERSHIP

The Medical Care Commission is comprised of 17 members. Three members of the Commission are nominated by the North Carolina Medical Society, one by the North Carolina Pharmaceutical Association, one by the North Carolina State Nurses' Association, one by the North Carolina Healthcare Association, and one by the Duke Endowment. Each nomination is subject to the Governor's approval. In addition, ten at-large members, one of whom must be a dentist, are appointed by the Governor. Each member is appointed to a four-year term and memberships are staggered.

As of June 30, 2019, the Medical Care Commission consisted of the following 17 members:

6. MEDICAL CARE COMMISSION TRANSACTION HISTORY

In 1975, the North Carolina General Assembly enacted the Health Care Facilities Finance Act (Act). In accordance with the Act, from December 21, 1977 to June 30, 2019, the Medical Care Commission closed 629 bond series transactions for a par amount of \$25,537,525,350. The 629 bond series represented 234 new construction projects, 20 lease programs, 170 refundings, 82 conversions, and 123 combinations of new construction projects and refundings.

The table beginning on the following page provides a historical summary of total par amounts, total project debt amounts⁸, and current outstanding balances for all financings closed in accordance with the Health Care Facilities

⁷ Duke University Health System has until June 30, 2020 to draw on the maximum par authorization amount of \$40,000,000. The draw balance at 6/30/2019 was \$9,556,788.

⁸ Project debt totals do not include amounts used to refund prior Medical Care Commission (MCC) issues and par amounts of conversions; only issuance costs, refundings of prior non-MCC debt, and new project costs are included in the total project debt amount.

Finance Act. The table is organized by current parent association⁹. A parent association that is currently a for-profit entity listed on the table would not have received financing thru the Medical Care Commission, only non-profit and public agencies are eligible as defined by N. C. G. S. § 131A-3 (4) – (5). The health care facilities that are currently associated with a for-profit entity listed on the table received Medical Care Commission financing prior to the for-profit status change and redeemed all outstanding Medical Care Commission bonds as the result of the for-profit status change. An index of the underlying health care facilities for each listed parent association is provided following the table (beginning on page 25).¹⁰

⁹ Parent association represents a corporate parent entity or a distinct managed contract or a named affiliation. An index of which health care facilities fall under which named parent association is provided beginning on page 25.

¹⁰ Parent association was selected as merely a focal point to summarize over 40 years of financing activities and was determined by a review of a health care facility's public website. A detailed review of corporate documents or management contracts was not conducted, therefore parent association should not be construed to be a reflection of legal corporate parent status.

¹⁴ Parent association represents a corporate parent entity or a distinct managed contract or a named affiliation. Parent association was selected as merely a focal point to summarize over 40 years of financing activities and was determined by a review of a health care facility's public website. A detailed review of corporate documents or management contracts was not conducted, therefore parent association should not be construed to be a reflection of legal corporate parent status.
