MARK PAYNE • Director, Division of Health Service Regulation

November 1, 2019

The Honorable Roy Cooper, Governor
State of North Carolina
20301 Mail Service Center
Raleigh, NC 27699-0301

Dear Governor Cooper:

On behalf of the North Carolina State Health Coordinating Council, I am pleased to forward our recommendations for the North Carolina 2020 State Medical Facilities Plan. This Plan is the culmination of a year's work by the council, its committees and Healthcare Planning staff.

The council has devoted a significant amount of time to the review and discussion of a variety of issues prior to making its recommendations for the upcoming year. The Proposed Plan was disseminated broadly and examined in six public hearings held across the state, and any petitions and comments received during this year-long process were duly considered.

This final document represents the Council's recommendations regarding health care needs to be addressed in the 2020 certificate of need reviews.

Sincerely,

Christopher G. Ullrich, M.D., Chairman
N.C. State Health Coordinating Council

Enclosure

MEMORANDUM

TO: Governor Roy Cooper

FROM: Mandy Cohen, MD, MPH *MC*

SUBJECT: North Carolina 2020 State Medical Facilities Plan

DATE: November 1, 2019

I am forwarding for your review and approval the North Carolina 2020 State Medical Facility Plan (SMFP) as recommended by the North Carolina State Health Coordinating Council (SHCC). Also attached is a summary of the need determinations and summer petitions from the 2019 planning cycle and minutes from all SHCC and Committee meetings held during the year.

I support the SHCC and the implementation of the 2020 SMFP.

Additional background information is available on all areas, if desired. It would greatly facilitate the publication and distribution of the SMFP if you could approve or request changes before the end of November.

MC:ac

DISCLAIMER

The North Carolina 2020 State Medical Facilities Plan is subject to revision throughout the year. Notices containing updates and changes will be posted on the North Carolina Division of Health Service Regulation web page at <https://info.ncdhhs.gov/dhsr/ncsmfp> as they are approved. Check the website for updates.

Chapter 1:

Overview of the North Carolina 2020 State Medical Facilities
Plan

CHAPTER 1

OVERVIEW OF THE NORTH CAROLINA 2020 STATE MEDICAL FACILITIES PLAN

Purpose

The North Carolina 2020 State Medical Facilities Plan (Plan) was developed by the North Carolina Department of Health and Human Services, Division of Health Service Regulation, under the direction of the North Carolina State Health Coordinating Council (SHCC), pursuant to G.S. §131E-177. The major objective of the Plan is to provide individuals, institutions, state and local government agencies, and community leadership with policies and projections of need to guide local planning for specific health care facilities and services. Projections of need are provided for the following types of facilities and services:

- acute care hospitals
- adult care facilities
- end-stage renal disease dialysis facilities
- hospice home care and hospice inpatient beds
- inpatient rehabilitation facilities
- intermediate care facilities for individuals with intellectual disabilities
- Medicare-certified home health agencies
- nursing care facilities
- operating rooms
- other acute care services
- psychiatric hospital units and specialty hospitals
- substance use disorder hospital units, specialty hospitals, and residential facilities
- technology and equipment services

Chapters dealing with specific facility/service categories contain summaries of the supply and the utilization of each type of facility or service, a description of any changes in the projection method and policies from the previous planning year, a description of the projection method, and other data relevant to the projections of need.

The projections of need for the various facilities and services are used in conjunction with other statutes and rules in reviewing certificate of need applications for establishment, expansion, or conversion of health care facilities and services. All parties interested in health care facility and health services planning should consider this Plan a key resource.

Basic Principles Governing the Development of this Plan

1. Safety and Quality Basic Principle

The State of North Carolina recognizes the importance of systematic and ongoing improvement in the quality of health services. Citizens of North Carolina rightfully expect health services to be safe and efficient. To warrant public trust in the regulation of health services, monitoring of safety and quality using established and independently verifiable metrics will be an integral part of the formulation and application of the North Carolina State Medical Facilities Plan.

Scientific quantification of quality and safety is rapidly evolving. Emerging measures of quality address both favorable clinical outcomes and patient satisfaction, while safety measures focus on the elimination of practices that contribute to avoidable injury or death and the adoption of practices that promote and ensure safety. The SHCC recognizes that while safety, clinical outcomes, and satisfaction may be conceptually separable, they are often interconnected in practice. The North Carolina State Medical Facilities Plan should maximize all three elements. Where practicalities require balancing of these elements, priority should be given to safety, followed by clinical outcomes, followed by satisfaction.

The appropriate measures for quality and safety should be specific to the type of facility or service regulated. Clinical outcome and safety measures should be evidence-based and objective. Patient satisfaction measures should be quantifiable. In all cases, metrics should be standardized and widely reported and preference should be given to those metrics reported on a national level. The SHCC recognizes that metrics meeting these criteria are currently better established for some services than for others. Furthermore, experience and research as well as regulation at the federal level will continue to identify new measures that may be incorporated into the standards applicable to quality and safety. As experience with the application of quality and safety metrics grows, the SHCC should regularly review policies and need methodologies and revise them as needed to address any persistent and significant deficiencies in safety and quality in a particular service area.

2. Access Basic Principle

Equitable access to timely, clinically appropriate and high quality health care for all the people of North Carolina is a foundational principle for the formulation and application of the North Carolina State Medical Facilities Plan. Barriers to access include, but are not limited to: geography, low income, limited or no insurance coverage, disability, age, race, ethnicity, culture, language, education and health literacy. Individuals whose access to needed health services is impeded by any of these barriers are medically underserved. The formulation and implementation of the Plan seeks to reduce all of these types of barriers to timely and appropriate access. The first priority is to ameliorate economic barriers and the second priority is to mitigate time and distance barriers.

The impact of economic barriers is twofold. First, individuals without insurance, with insufficient insurance, or without sufficient funds to purchase their own health care will often require public funding to support access to regulated services. Second, the preferential selection by providers of well-funded patients may undermine the advantages that can accrue to the public from market competition in health care. A competitive marketplace should favor providers that deliver the highest quality and best value care, but only in the circumstances where all competitors deliver like services to similar populations.

The SHCC assigns the highest priority to a need methodology that favors providers delivering services to a patient population representative of all payer types in need of those services in the service area. Comparisons of value and quality are most likely to be valid when services are provided to like populations.

Incentives for quality and process improvement, resource maximization, and innovation are most effective when providers deliver services to a similar and representative mixture of patients.

Access barriers of time and distance are especially critical to rural areas and small communities. However, urban populations can experience similar access barriers. The SHCC recognizes that some essential, but unprofitable, medical services may require support by revenues gained from profitable services or other sources. The SHCC also recognizes a trend to the delivery of some services in more accessible, less complex, and less costly settings. Whenever verifiable data for outcome, satisfaction, safety, and costs for the delivery of such services to representative patient populations justify, the SHCC will balance the advantages of such ambulatory facilities with the needs for financial support of medically necessary but unprofitable care.

The needs of rural and small communities that are distant from comprehensive urban medical facilities merit special consideration. In rural and small communities, selective competition that disproportionately captures profitable services may threaten the viability of sole providers of comprehensive care and emergency services. For this reason, methodologies that balance value, quality, and access in urban and rural areas may differ quantitatively. The SHCC planning process will promote access to an appropriate spectrum of health services at a local level, whenever feasible, under prevailing quality and value standards.

3. Value Basic Principle

The SHCC defines health care value as the maximum health care benefit per dollar expended. Disparity between demand growth and funding constraints for health care services increases the need for affordability and value in health services. Maximizing the health benefit for the entire population of North Carolina that is achieved by expenditures for services regulated by the State Medical Facilities Plan will be a key principle in the formulation and implementation of SHCC recommendations for the Plan.

Measurement of the cost component of the value equation is often easier than measurement of benefit. Cost per unit of service is an appropriate metric when comparing providers of like services for like populations. The cost basis for some providers may be inflated by disproportionate care to indigent and underfunded patients. In such cases the SHCC encourages the adjustment of cost measures to reflect such disparity, but only to the extent such expenditures can be measured according to an established, state-wide standard that is uniformly reported and verifiable. Measurement of benefit is more challenging. Standardized safety and quality measures, when available, can be important factors in achieving improved value in the provision of health services. Prevention, early detection and early intervention are important means for increasing the total population benefit for health expenditures. Development of new technology has the potential to add value by improving outcome and enhancing early detection. Capital costs of such new technology may be greater but justified by the added population benefit. At the same time, overutilization of more costly and/or highly specialized, low-volume services without evidence-based medical indications may contribute to escalating health costs without commensurate population-based health benefit. The SHCC favors methodologies which encourage technological advances for proven and affordable benefit and appropriate utilization for evidence-based indications when available. The SHCC also recognizes the importance of primary care and health education in promoting affordable health care and best utilization of scarce and expensive health resources. Unfortunately, technologically sophisticated and costly services that benefit small numbers of patients may be more readily pursued than simple and less costly detection and prevention measures that benefit the broader population. In the pursuit of maximum population-based health care value, the SHCC recognizes the potential adverse impact for growth of regulated services to supplant services of broad benefit to the larger population.

Long-term enhancement of health care value will result from a State Medical Facilities Plan that promotes a balance of competition and collaboration and encourages innovation in health care delivery. The SHCC encourages the development of value-driven health care by promoting collaborative efforts to create

common resources such as shared health databases, purchasing cooperatives, and shared information management, and by promoting coordinated services that reduce duplicative and conflicting care. The SHCC also recognizes the importance of balanced competition and market advantage in order to encourage innovation, insofar as those innovations improve safety, quality, access, and value in health care delivery.

The State Health Planning Process

Throughout the development of the North Carolina State Medical Facilities Plan there are opportunities for public review and comment. Sections of the Plan, including the policies and methods for projecting need, are developed with the assistance of committees of the North Carolina State Health Coordinating Council. The committees submit their recommendations to the Council for approval. A Proposed Plan is assembled and made available to the public. Public hearings on the Proposed Plan are held throughout the State during the summer. Comments and petitions received during this period are considered by the Council and, upon incorporation of all changes approved by the Council, a final draft of the Plan is presented to the Governor for review and approval. With the Governor’s approval, the State Medical Facilities Plan becomes the official document for health facility and health service planning in North Carolina for the specified calendar year.

Other Publications

Committees and Staff Members

Acute Care Services Committee

Planning for acute care beds, operating rooms, open heart surgery services, burn intensive care services, transplantation services (bone marrow transplants and solid organ transplants), and inpatient rehabilitation services:

Sandra Greene, DrPH (Chair); Representative Gale Adcock; Christina Apperson (Vice Chair); Allen Feezor; Brian Floyd; Charul G. Haugan, MD, FACEP; Kenneth J. Lewis; Robert B. McBride, Jr., MD, Senator Gladys A. Robinson

Staffed by: Elizabeth Brown and Andrea Emanuel, PhD

Long-Term and Behavioral Health Committee

Planning for nursing care facilities, adult care homes, home health services, hospice services, end-stage renal disease dialysis facilities, psychiatric inpatient facilities, substance use disorder inpatient and residential services (chemical dependency treatment beds), and intermediate care facilities for individuals with intellectual disabilities:

Valarie Jarvis (Chair); Glendora Brothers; Patricia Leonard; James Martin, Jr.; Commissioner Tonya McDaniel; Denise M. Michaud (Vice Chair); Timothy Rogers; Quintana Stewart

Staffed by: Elizabeth Brown, Andrea Emanuel, PhD, and Trenesse Michael

Technology and Equipment Committee

Planning for cardiac catheterization equipment, gamma knives, linear accelerators, lithotripters, magnetic resonance imaging scanners, and positron emission tomography scanners.

Lyndon Jordan, III, MD (Chair); Robert Bashford, MD; Kelli Collins; Stephen L. DeBiasi, FACHE, CMPE (Vice Chair); Commissioner Barbara McKoy; Vincent Morgus; Dwight Perry, MD Christopher G. Ullrich, MD

Staffed by: Trenesse Michael

Healthcare Planning Staff

Chapter 2:

Amendments and Revisions to the State Medical Facilities Plan

CHAPTER 2

AMENDMENTS AND REVISIONS TO THE STATE MEDICAL FACILITIES PLAN

Amendment of Approved Plans

After the North Carolina State Medical Facilities Plan has been signed by the Governor, it will be amended only as necessary to correct errors or to respond to statutory changes, amounts of legislative appropriations or judicial decisions. The North Carolina State Health Coordinating Council will conduct a public hearing on proposed amendments and will recommend changes it deems appropriate for the Governor's approval.

NOTE: Need determinations as shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (*See Chapter 4*).

Petitions to Revise the Next State Medical Facilities Plan

Anyone who finds that the North Carolina State Medical Facilities Plan policies or methodologies, or the results of their application, are inappropriate may petition for changes or revisions. Such petitions are of two general types: those requesting changes in basic policies and methodologies, and those requesting adjustments to the need projections.

Petitions for Changes in Policies and Methodologies

People who wish to recommend changes that may have a statewide effect are asked to contact Healthcare Planning and Certificate of Need Section staff as early in the year as possible, and to submit petitions no later than March 4, 2020. Changes with the potential for a statewide effect are the addition, deletion, and revision of policies or projection methodologies. These types of changes will need to be considered in the first four months of the calendar year as the Proposed North Carolina State Medical Facilities Plan (explained below) is being developed for the following year.

Instructions for Writing Petitions for Changes in Policies and Methodologies

At a minimum, each written petition requesting a change in policies and methodologies used in the North Carolina State Medical Facilities Plan should contain:

1. Name, address, email address and phone number of petitioner.
2. Statement of the requested change, citing the policy or planning methodology in the North Carolina State Medical Facilities Plan for which the change is proposed.
3. Reasons for the proposed change to include:
 - a. A statement of the adverse effects on the providers or consumers of health services that are likely to ensue if the change is not made, and
 - b. A statement of alternatives to the proposed change that were considered and found not feasible.
4. Evidence that the proposed change would not result in unnecessary duplication of health resources in the area.

5. Evidence that the requested change is consistent with the three Basic Principles governing the development of the North Carolina State Medical Facilities Plan: safety and quality, access, and value.

Each written petition must be clearly labeled “Petition” and one copy of each petition must be received by the North Carolina Division of Health Service Regulation, Healthcare Planning by 5:00 p.m. on March 4, 2020. Petitions must be submitted by e-mail, mail or hand delivery.

E-Mail: DHSR.SMFP.Petitions-Comments@dhhs.nc.gov

Mail: North Carolina Division of Health Service Regulation
Healthcare Planning
2704 Mail Service Center
Raleigh, North Carolina 27699-2704

The office location and address for hand delivery and use of delivery services is:

809 Ruggles Drive
Raleigh, North Carolina 27603

Response to Petitions for Changes in Policies and Methodologies

The process for response to such petitions is as follows:

1. The Division will prepare an agency report. Staff may request additional information from the petitioner or any other people or organizations who may be affected by the proposed change.
2. The petition will be considered by the appropriate committee of the North Carolina State Health Coordinating Council and the committee will make recommendations to the North Carolina State Health Coordinating Council regarding disposition of the petition.
3. The North Carolina State Health Coordinating Council will consider the committee’s recommendations and make decisions regarding whether to incorporate the changes into the Proposed North Carolina State Medical Facilities Plan for the following year.

Petitioners will receive written notification of times and places of meetings at which their petitions will be discussed. Disposition of all petitions for changes in basic policies and methodologies in the North Carolina State Medical Facilities Plan will be made no later than the final State Health Coordinating Council meeting of the calendar year.

Petitions for Adjustments to Need Determinations

On or about July 1 of each year, the North Carolina State Health Coordinating Council adopts a North Carolina Proposed State Medical Facilities Plan for the following year. A Public Review and Comment Period follows, during which regional public hearings are held to receive oral/written comments and written petitions. The Public Review and Comment Period dates are available from Healthcare Planning and appear below.

People who believe that unique or special attributes of a particular geographic area or institution give rise to resource requirements that differ from those provided by application of the standard planning procedures and policies may submit a written petition requesting an adjustment to the need determination given in the North Carolina Proposed State Medical Facilities Plan. These petitions should be delivered to Healthcare Planning as early in the Public Review and Comment Period as possible, but no later than the deadline for receipt of petitions. Requirements for petitions to change need determinations in the North Carolina Proposed State Medical Facilities Plan are given below.

Instructions for Writing Petitions for Adjustments to Need Determinations

At a minimum, each written petition requesting an adjustment to a need determination in the Proposed State Medical Facilities Plan should contain:

1. Name, address, email address and phone number of petitioner.
2. A statement of the requested adjustment, citing the provision or need determination within the Proposed State Medical Facilities Plan for which the adjustment is proposed.
3. Reasons for the proposed adjustment, including:
 - a. Statement of the adverse effects on the population of the affected area that are likely to ensue if the adjustment is not made, and
 - b. A statement of alternatives to the proposed adjustment that were considered and found not feasible.
4. Evidence that health service development permitted by the proposed adjustment would not result in unnecessary duplication of health resources in the area.
5. Evidence that the requested adjustment is consistent with the three Basic Principles governing the development of the North Carolina State Medical Facilities Plan: safety and quality, access and value.

Petitioners should use the same service area definitions as provided in the relevant program chapter(s) of the North Carolina Proposed State Medical Facilities Plan.

Petitioners should also be aware that Healthcare Planning staff, in reviewing the proposed adjustment, may request additional information and opinions from the petitioner or any other people and organizations who may be affected by the proposed adjustment.

Each written petition must be clearly labeled “Petition” and one copy of each petition must be received by Healthcare Planning by 5:00 p.m. on July 29, 2020. Petitions must be submitted by e-mail, mail or hand delivery.

E-Mail: DHSR.SMFP.Petitions-Comments@dhhs.nc.gov

Mail: North Carolina Division of Health Service Regulation
Healthcare Planning
2704 Mail Service Center
Raleigh, North Carolina 27699-2704

The office location and address for hand delivery and use of delivery services:

809 Ruggles Drive
Raleigh, North Carolina 27603

Response to Petitions for Adjustments to Need Determinations

The process for response to these petitions by the North Carolina Division of Health Service Regulation and the North Carolina State Health Coordinating Council is as follows:

1. The Division will prepare an agency report. Staff may request additional information from the petitioner, or other people or organizations who may be affected by the proposed change.
2. The relevant committee submits its recommendations to the North Carolina State Health Coordinating Council and the committee will make recommendations to the North Carolina State Health Coordinating Council regarding disposition of the petition.
3. The North Carolina State Health Coordinating Council considers the committee recommendations and decides whether to incorporate the recommended adjustments in the final draft of the North Carolina State Medical Facilities Plan to be forwarded to the Governor.

Petitioners will receive written notification of times and places of meetings at which their petitions will be discussed. Disposition of all petitions for adjustments to need determinations in the North Carolina State Medical Facilities Plan will be made no later than the date of the final Council meeting of the calendar year.

Scheduled State Health Coordinating Council Meetings and Committee Meetings

Any changes to Council, Committee, workgroup, and public hearing meeting dates, times, and locations will be posted on the meeting information web page at:

<https://info.ncdhhs.gov/dhsr/mfp/meetings.html>

All meetings are scheduled from 10:00 a.m. until noon in Room 104 of the Brown Building on the Dorothea Dix Campus, 801 Biggs Drive, Raleigh NC. Directions to the Brown Building can be found at:

<https://info.ncdhhs.gov/dhsr/brown.html>

North Carolina State Health Coordinating Council

March 4, 2020

June 10, 2020

August 26, 2020 (conference call meeting)

October 7, 2020

The Council will conduct a public hearing on statewide issues related to development of the North Carolina Proposed 2021 State Medical Facilities Plan immediately following the business meeting on March 4, 2020.

Committee Meetings for 2020

Acute Care Services Committee

April 7

May 19

September 15

Long-Term and Behavioral Health Committee

April 9

May 14

September 17

Technology and Equipment Committee

April 15

May 20

September 9

Deadlines for Spring Petitions and Comments, and Public Hearing Schedule

March 4, 2020	The Council will conduct a Public Hearing on statewide issues related to the development of the North Carolina Proposed 2021 State Medical Facilities Plan (SMFP) immediately following the business meeting. Electronic media may not be used in presentations at the public hearing.
March 4, 2020 5:00 p.m.	Deadline for receipt by Healthcare Planning of petitions on statewide issues.
March 18, 2020 5:00 p.m.	Deadline for receipt by Healthcare Planning of all written comments regarding petitions submitted by the March 4 deadline and all other comments related to development of the North Carolina Proposed 2021 SMFP.

2020 Schedule of Summer Public Hearings on the N.C. Proposed 2021 SMFP

(All hearings begin at 1:30 p.m.)

Wednesday July 8	Greensboro	Cone Health Administrative Services Building 721 Green Valley Road, Board Room
Friday July 10	Wilmington	New Hanover Public Library 201 Chestnut Street, Harnett Room
Tuesday July 14	Concord	Atrium Health Cabarrus 920 Church Street, Media Arts Classroom 1, 2 & 3
Friday July 17	Asheville	Mission Health System - Health Education Center 1 Hospital Drive, Conference Room 5205-5207
Tuesday July 21	Greenville	Pitt County Office Building 1717 West 5th Street, Eugene James Auditorium
Wednesday July 29	Raleigh	Dorothea Dix Campus Brown Building, 801 Biggs Dr., Room 104

Electronic media may not be used in presentations at any public hearings.

Deadlines for Summer Petitions and Comments

July 29, 2020 5:00 p.m.	Deadline for receipt by Healthcare Planning of petitions for adjustments to need determinations and comments regarding other issues related to the Proposed 2021 SMFP.
August 12, 2020 5:00 p.m.	Deadline for receipt by Healthcare Planning of any written comments on petitions submitted by the July 29 deadline and all comments regarding other issues related to the Proposed 2021 SMFP.

Chapter 3:

Certificate of Need Review Categories and Schedule

CHAPTER 3

CERTIFICATE OF NEED

REVIEW CATEGORIES AND SCHEDULE

Certificates of need are required prior to the development of new institutional health services. Certificate of Need shall determine the appropriate review category or categories in which an application shall be submitted pursuant to 10A NCAC 14C .0202. For proposals which include more than one category, an applicant must contact Certificate of Need prior to submittal of the application for a determination regarding the appropriate review category or categories and the applicable review period in which the proposal must be submitted.

The categories are as follows:

Category A: Acute Care Services

- new acute care hospitals;
- new or additional campus of an existing acute care hospital;
- new or additional acute care beds;
- relocation of existing or approved acute care beds within the same service area;
- relocation of existing acute care hospital within the same service area;
- new or additional intensive care services;
- new or expanded satellite emergency department;
- offering inpatient dialysis services;
- new transplantation services;
- new open heart surgery services;
- new long-term care hospitals or beds, including conversion of acute care beds to long-term care hospital beds; and
- Policy AC-3 projects.

Category B: Nursing and Adult Care Services

Category B.1

- new nursing facilities or beds pursuant to a need determination;
- relocation of existing or approved nursing facility beds within the same service area;
- transfer of nursing facility beds from state psychiatric hospitals pursuant to Policy NH-5;
- new adult care home facilities or beds pursuant to a need determination;
- relocation of existing or approved adult care home beds within the same service area; and
- new or existing continuing care retirement communities applying pursuant to Policy NH-2 or Policy LTC-1.

Category B.2 (Relocation of Existing Beds to Another Service Area)

- relocation of existing nursing facility beds to another service area pursuant to Policy NH-6; and
- relocation of existing adult care home beds to a another service area pursuant to Policy LTC-2.

Category C: Psychiatric, Substance Use Disorder or Intellectual Disability Services

- new psychiatric facilities or beds;
- relocation of existing or approved psychiatric beds within the same service area;
- transfer of psychiatric beds from state psychiatric hospitals pursuant to Policy PSY-1;
- new substance use disorder facilities or beds;
- relocation of existing or approved substance use disorder beds within the same service area;
- new intermediate care facilities or beds for individuals with intellectual disabilities (ICF/IID);
- relocation of existing or approved ICF/IID beds within the same service area; and
- transfer of ICF/IID beds from state developmental centers pursuant to Chapter 858 of the 1983 Session Laws, Policy ICF/IID-1, Policy ICF/IID-2, Policy ICF/IID-3 or Policy ICF/IID-4.

Category D: Dialysis Services

Category D.1 (County or Facility Need)

- new certified dialysis stations pursuant to the facility need methodology; and
- new kidney disease treatment centers or certified dialysis stations pursuant to the county need methodology.

Category D.2 (Relocation to a Contiguous County)

- relocation of existing kidney disease treatment centers or existing certified dialysis stations to a contiguous county pursuant to Policy ESRD-2.

Category D.3 (All Other Proposals)

- relocation of existing kidney disease treatment centers or existing certified dialysis stations within the same service area; and
- new kidney disease treatment centers for home hemodialysis or peritoneal dialysis services.

Category E: Surgical Services

- new licensed ambulatory surgical facilities;
- new operating rooms;
- relocation of existing or approved operating rooms within the same service area; and
- relocation of existing ambulatory surgical facility within the same service area.

Category F: Home Health and Hospice Services

- new Medicare-certified home health agencies or offices;
- new hospices or hospice offices;
- new hospice inpatient facility beds;
- relocation of existing or approved hospice inpatient facility beds within the same service area;
- new hospice residential care facility beds; and
- relocation of existing or approved hospice residential care facility beds within the same service area.

Category G: Inpatient Rehabilitation Services

- new inpatient rehabilitation facilities or beds; and
- relocation of existing or approved inpatient rehabilitation beds within the same service area.

Category H: Medical Equipment

- cardiac catheterization equipment or new cardiac catheterization services;
- heart-lung bypass machines;
- gamma knives;
- lithotripters;
- magnetic resonance imaging scanners;
- positron emission tomography scanners
- linear accelerators;
- simulators;
- major medical equipment as defined in G.S. 131E-176(14o);
- diagnostic centers as defined in G.S. 131E-176(7a);
- replacement equipment that does not result in an increase in the inventory of the equipment;
- conversion of an existing or approved fixed PET scanner to mobile pursuant to Policy TE-1 (July 1st Review Cycle only);
- intraoperative magnetic resonance scanners acquired pursuant to Policy TE-2; and
- fixed magnetic resonance imaging scanners acquired pursuant to Policy TE-3.

Category I: Gastrointestinal Endoscopy Services

- new or additional gastrointestinal endoscopy rooms as defined in G.S. 131E-176(7d); and
- relocation of existing or approved gastrointestinal endoscopy rooms within the same service area.

Category J: Miscellaneous

- changes of scope and cost overruns;
- reallocation of beds or services pursuant to Policy GEN-1; and
- projects not included in Categories A through I.

Review Dates

Table 3A shows the review schedule, by category, for certificate of need applications requiring review. However, except for proposals involving new dialysis stations pursuant to the facility need methodology, a service, facility, or equipment for which a need determination is identified in the North Carolina State Medical Facilities Plan will have only one scheduled review date and one corresponding application filing deadline in the calendar year, even though the table shows multiple review dates for the broad category. In order to determine the designated filing deadline for a specific need determination in the North Carolina State Medical Facilities Plan, an applicant must refer to the applicable need determination table for that service in the related chapter in the Plan. Applications for certificates of need for new institutional health services not specified in other chapters of the Plan shall be reviewed pursuant to the following review schedule, with the exception that no reviews are scheduled if there is no need determination.

In order to give Certificate of Need sufficient time to provide public notice of review and public notice of public hearings as required by G.S. 131E-185, the deadline for filing certificate of need applications is 5:30 p.m. on the 15th day of the month preceding the “CON Beginning Review Date.” In instances when the 15th day of the month falls on a weekend or holiday, the filing deadline is 5:30 p.m. on the next business day. The filing deadline is absolute and applications received after the deadline shall not be reviewed in that review period. Applicants are strongly encouraged to complete all materials at least one day prior to the filing deadline and to submit material early on the “Certificate of Need Application Due Date.”

Table 3A: 2020 Certificate of Need Review Schedule

CON Beginning Review Date	Category (All HSAs)									
February 1, 2020			C	D.3						
March 1, 2020	A	B.1			E	F	G	H	I	J
April 1, 2020			C	D.1						
May 1, 2020	A	B.2			E	F	G	H		J
June 1, 2020			C	D.2					I	
July 1, 2020	A				E	F	G	H		J
August 1, 2020		B.1	C	D.1						
September 1, 2020	A		C		E			H	I	J
October 1, 2020				D.1			G			
November 1, 2020	A	B.1			E	F		H		J
December 1, 2020				D.3				H	I	J

Chapter 4:

Statement of Policies:

- Acute Care Facilities and Services
 - Acute Care Hospitals
 - End-Stage Renal Disease Dialysis Services
 - Long-Term Care Facilities and Services
 - Nursing Care Facilities
 - Adult Care Homes
 - Home Health Services
 - All Mental Health, Developmental Disabilities, and Substance Use Disorder Facilities
 - Psychiatric Inpatient Services Facilities
 - Intermediate Care Facilities for Individuals with Intellectual Disabilities
 - Technology and Equipment
- All Health Services

CHAPTER 4

STATEMENT OF POLICIES

POLICIES APPLICABLE TO ACUTE CARE FACILITIES AND SERVICES

Acute Care Hospitals (AC)

Policy AC-1: Use of Licensed Bed Capacity Data for Planning Purposes

For planning purposes, the number of licensed beds shall be determined by the Division of Health Service Regulation in accordance with standards found in 10A NCAC 13B - Section .6200 and Section .3102 (d).

Licensed bed capacity of each hospital is used for planning purposes. It is the hospital's responsibility to notify the Division of Health Service Regulation promptly when any of the space allocated to its licensed bed capacity is converted to another use, including purposes not directly related to health care.

Policy AC-3: Exemption from Plan Provisions for Certain Academic Medical Center Teaching Hospital Projects

Projects for which certificates of need are sought by Academic Medical Center Teaching Hospitals may qualify for exemption from the need determinations of this document. The Healthcare Planning and Certificate of Need Section shall designate as an Academic Medical Center Teaching Hospital any facility whose application for such designation demonstrates the following characteristics of the hospital:

1. Serves as a primary teaching site for a school of medicine and at least one other health professional school, providing undergraduate, graduate and postgraduate education.
2. Houses extensive basic medical science and clinical research programs, patients and equipment.
3. Serves the treatment needs of patients from a broad geographic area through multiple medical specialties.

Exemption from the provisions of need determinations of the North Carolina State Medical Facilities Plan shall be granted to projects submitted by Academic Medical Center Teaching Hospitals designated prior to January 1, 1990 provided the projects are necessary to meet one of the following unique academic medical needs:

1. Necessary to complement a specified and approved expansion of the number or types of students, residents or faculty that are specifically required for an expansion of students or residents, as certified by the head of the relevant associated professional school; the applicant shall provide documentation that the project is consistent with any relevant standards, recommendations or guidance from specialty education accrediting bodies; or
2. With respect to the acquisition of equipment, is necessary to accommodate the recruitment or retention of a full-time faculty member who will devote a majority of his or her time to the

combined activities of teaching (including teaching within the clinical setting), research, administrative or other academic responsibilities within the academic medical center teaching hospital or medical school; or

3. Necessary to accommodate patients, staff or equipment for a specified and approved expansion of research activities, as certified by the head of the entity sponsoring the research; and including, to the extent applicable, documentation pertaining to grants, funding, accrediting or other requirements, and any proposed clinical application of the asset; or
4. Necessary to accommodate changes in requirements of specialty education accrediting bodies, as evidenced by copies of documents issued by such bodies.

A project submitted by an Academic Medical Center Teaching Hospital under this policy that meets one of the above conditions shall demonstrate that the Academic Medical Center Teaching Hospital's teaching or research need for the proposed project cannot be achieved effectively at any non-Academic Medical Center Teaching Hospital provider which currently offers and has capacity within the service for which the exemption is requested and which is within 20 miles of the Academic Medical Center Teaching Hospital.

The Academic Medical Center Teaching Hospital shall include in its application an analysis of the cost, benefits and feasibility of engaging that provider in a collaborative effort that achieves the academic goals of the project as compared with the certificate of need application proposal. The Academic Medical Center Teaching Hospital shall also provide a summary of a discussion or documentation of its attempt to engage the provider in discussion regarding its analysis and conclusions.

The Academic Medical Center Teaching Hospital shall include in its application a discussion of any similar assets within 20 miles that are under the control of the applicant or the associated professional school and the feasibility of using those assets to meet the unique teaching or research needs of the Academic Medical Center Teaching Hospital.

For each of the first five years of operation the approved applicant shall submit to Certificate of Need a detailed description of how the project achieves the academic requirements of the appropriate section(s) of Policy AC-3, paragraph 2 [items 1 through 4] as proposed in the certificate of need application.

Applicants who are approved for Policy AC-3 projects after January 1, 2012 shall report those Policy AC-3 assets (including beds, operating rooms and equipment) on the appropriate annual license renewal application or registration form for the asset. The information to be reported for the Policy AC-3 assets shall include: (a) inventory or number of units of AC-3 Certificate of Need-approved assets (including all beds, operating rooms and equipment); (b) the annual volume of days, cases or procedures performed for the reporting year on the Policy AC-3 approved asset; and (c) the patient origin by county. Except for operating rooms, neither the assets under (a) above nor the utilization from (b) above shall be used in the annual State Medical Facilities Plan need determination formulas, but both the assets and the utilization will be available for informational purposes to users of the State Medical Facilities Plan. Operating rooms approved under Policy AC-3 and their utilization shall be reported on the license renewal application and included in the inventory, regardless of the date of Certificate of Need approval.

This policy does not apply to a proposed project or the portion thereof that is based solely upon the inability of the State Medical Facilities Plan methodology to accurately project need for the proposed service(s), due to documented differences in patient treatment times that are attributed to education or research components in the delivery of patient care or to differences in patient acuity or case mix that are related to the applicant's academic mission. However, the applicant may submit a petition pursuant to the State Medical Facilities Plan Petitions for Adjustments to Need Determinations process to meet that need or portion thereof.

Policy AC-3 projects are required to materially comply with representations made in the certificate of need application regarding academic based need. If an asset originally developed or acquired pursuant to Policy AC-3 is no longer used for research and/or teaching, the Academic Medical Center Teaching Hospital shall surrender the certificate of need.

Policy AC-4: Reconversion to Acute Care

Facilities that have redistributed beds from acute care bed capacity to psychiatric, rehabilitation, nursing care, or long-term care hospital use, shall obtain a certificate of need to convert this capacity back to acute care. Applicants proposing to reconvert psychiatric, rehabilitation, nursing care, or long-term care hospital beds back to acute care beds shall demonstrate that the hospital’s average annual utilization of licensed acute care beds as calculated using the most recent Truven Health Analytics Days of Care as provided to Healthcare Planning by The Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill is equal to or greater than the target occupancies shown below, but shall not be evaluated against the acute care bed need determinations shown in Chapter 5 of the North Carolina State Medical Facilities Plan. In determining utilization rates and average daily census, only acute care bed “days of care” are counted.

Facility Average Daily Census	Target Occupancy of Licensed Acute Care Beds
1 – 99	66.7%
100 – 200	71.4%
Greater than 200	75.2%

Policy AC-5: Replacement of Acute Care Bed Capacity

Proposals for either partial or total replacement of acute care beds (i.e., construction of new space for existing acute care beds) shall be evaluated against the utilization of the total number of acute care beds in the applicant’s hospital in relation to utilization targets found below. For hospitals **not** designated by the Centers for Medicare & Medicaid Services as Critical Access Hospitals, in determining utilization of acute care beds, only acute care bed “days of care” shall be counted. For hospitals designated by the Centers for Medicare & Medicaid Services as Critical Access Hospitals, in determining utilization of acute care beds, only acute care bed “days of care” **and** swing bed days (i.e., nursing facility days of care) shall be counted in determining utilization of acute care beds. Any hospital proposing replacement of acute care beds must clearly demonstrate the need for maintaining the acute care bed capacity proposed within the application. Additionally, if the hospital is a Critical Access Hospital and swing bed days are proposed to be counted in determining utilization of acute care beds, the hospital shall also propose to remain a Critical Access Hospital and must demonstrate the need for maintaining the swing bed capacity proposed within the application. If the Critical Access Hospital does not propose to remain a Critical Access Hospital, only acute care bed “days of care” shall be counted in determining utilization of acute care beds and the hospital must clearly demonstrate the need for maintaining the acute care bed capacity proposed within the application.

Facility Average Daily Census	Target Occupancy of Licensed Acute Care Beds
1 – 99	66.7%
100 – 200	71.4%
Greater than 200	75.2%

Policy AC-6: Heart-Lung Bypass Machines for Emergency Coverage

To protect cardiac surgery patients, who may require emergency procedures while scheduled procedures are underway, a need is determined for one additional heart-lung bypass machine whenever a hospital is operating an open heart surgery program with only one heart-lung bypass machine. The additional machine is to be used to assure appropriate coverage for emergencies and in no instance shall this machine be scheduled for use at the same time as the machine used to support scheduled open heart surgery procedures. A certificate of need application for a machine acquired in accordance with this provision shall be exempt from compliance with the performance standards set forth in 10A NCAC 14C .1703.

End-Stage Renal Disease Dialysis Facilities (ESRD)

Policy ESRD-2: Relocation of Dialysis Stations

Relocations of existing dialysis stations are allowed only within the host county and to contiguous counties. Certificate of need applicants proposing to relocate dialysis stations to a contiguous county shall:

1. Demonstrate that the facility losing dialysis stations or moving to a contiguous county is currently serving residents of that contiguous county; and
2. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of dialysis stations in the county that would be losing stations as a result of the proposed project, as reflected in the most recent North Carolina State Medical Facilities Plan, and
3. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of dialysis stations in the county that would gain stations as a result of the proposed project, as reflected in the most recent North Carolina State Medical Facilities Plan.

**POLICIES APPLICABLE TO LONG-TERM CARE
FACILITIES AND SERVICES**

Nursing Care Facilities (NH)

Policy NH-2: Plan Exemption for Continuing Care Retirement Communities

Qualified continuing care retirement communities may include from the outset or add or convert bed capacity for nursing care without regard to the nursing care bed need shown in Chapter 10: Nursing Care Facilities. To qualify for such exemption, applications for certificates of need shall show that the proposed nursing care bed capacity:

1. Will only be developed concurrently with or subsequent to construction on the same site of facilities for both of the following levels of care:
 - a. independent living accommodations (apartments and homes) for people who are able to carry out normal activities of daily living without assistance; such accommodations may be in the form of apartments, flats, houses, cottages and rooms;
 - b. licensed adult care home beds for use by people who, because of age or disability, require some personal services, incidental medical services and room and board to assure their safety and comfort.
2. Will be used exclusively to meet the needs of people with whom the facility has continuing care contracts (in compliance with the North Carolina Department of Insurance statutes and rules) who have lived in a non-nursing unit of the continuing care retirement community for a period of at least 30 days. Exceptions shall be allowed when one spouse or sibling is admitted to the nursing unit at the time the other spouse or sibling moves into a non-nursing unit, or when the medical condition requiring nursing care was not known to exist or be imminent when the individual became a party to the continuing care contract.
3. Reflects the number of nursing care beds required to meet the current or projected needs of residents with whom the facility has an agreement to provide continuing care after making use of all feasible alternatives to institutional nursing care.
4. Will not be certified for participation in the Medicaid program.

One hundred percent of the nursing care beds developed under this exemption shall be excluded from the inventory and the occupancy rate used to project nursing care bed need for the general population. Certificates of need issued under policies analogous to this policy in the North Carolina State Medical Facilities Plans subsequent to the 1985 State Medical Facilities Plan are automatically amended to conform to the provisions of this policy at the effective date of this policy. Certificates of need awarded pursuant to the provisions of Chapter 920, Session Laws 1983 or Chapter 445, Session Laws 1985 shall not be amended.

Policy NH-5: Transfer of Nursing Facility Beds from State Psychiatric Hospital Nursing Facilities to Community Facilities

Beds in state psychiatric hospitals that are certified as nursing facility beds may be relocated to licensed nursing facilities. However, before nursing facility beds are transferred out of the state psychiatric hospitals, services shall be available in the community. State psychiatric hospital nursing facility beds that are relocated to licensed nursing facilities shall be closed within 90 days following the date the transferred beds become operational in the community.

Licensed nursing facilities proposing to operate transferred nursing facility beds shall commit to serve the type of residents who are normally placed in nursing facility beds at the state psychiatric hospitals. To help ensure that relocated nursing facility beds will serve those people who would have been served by state psychiatric hospitals in nursing facility beds, a certificate of need application to transfer nursing facility beds from a state hospital shall include a written memorandum of agreement between the director of the applicable state psychiatric hospital, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services, and the person submitting the proposal.

This policy does not allow the development of new nursing care beds. Nursing care beds transferred from state psychiatric hospitals to the community pursuant to Policy NH-5 shall be excluded from the inventory.

Policy NH-6: Relocation of Nursing Facility Beds

Relocations of existing licensed nursing facility beds are allowed. Certificate of need applicants proposing to relocate licensed nursing facility beds shall:

1. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of licensed nursing facility beds in the county that would be losing nursing facility beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins; and
2. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of licensed nursing facility beds in the county that would gain nursing facility beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins.

Policy NH-8: Innovations in Nursing Facility Design

Certificate of need applicants proposing new nursing facilities and replacement nursing facilities shall pursue innovative approaches in environmental design that address quality of care and quality of life needs of the residents. These plans could include innovative design elements that encourage less institutional, more home-like settings, privacy, autonomy and resident choice, among others.

Adult Care Homes (LTC)

Policy LTC-1: Plan Exemption for Continuing Care Retirement Communities – Adult Care Home Beds

Qualified continuing care retirement communities may include from the outset or add or convert bed capacity for adult care without regard to the adult care home bed need shown in Chapter 11: Adult Care Homes. To qualify for such exemption, applications for certificates of need shall show that the proposed adult care home bed capacity:

1. Will only be developed concurrently with, or subsequent to, construction on the same site of independent living accommodations (apartments and homes) for people who are able to carry out normal activities of daily living without assistance; such accommodations may be in the form of apartments, flats, houses, cottages, and rooms.
2. Will provide for the provision of nursing services, medical services or other health related services as required for licensure by the North Carolina Department of Insurance.
3. Will be used exclusively to meet the needs of people with whom the facility has continuing care contracts (in compliance with the North Carolina Department of Insurance statutes and rules) who have lived in a non-nursing or adult care unit of the continuing care retirement community for a period of at least 30 days. Exceptions shall be allowed when one spouse or sibling is admitted to the adult care home unit at the time the other spouse or sibling moves into a non-nursing or adult care unit, or when the medical condition requiring nursing or adult care home care was not known to exist or be imminent when the individual became a party to the continuing care contract.

4. Reflects the number of adult care home beds required to meet the current or projected needs of residents with whom the facility has an agreement to provide continuing care after making use of all feasible alternatives to institutional adult care home care.
5. Will not participate in the Medicaid program or serve State-County Special Assistance recipients.

One hundred percent of the adult care home beds developed under this exemption shall be excluded from the inventory used to project adult care home bed need for the general population. Certificates of need issued under policies analogous to this policy in the North Carolina State Medical Facilities Plans subsequent to the North Carolina 2002 State Medical Facilities Plan are automatically amended to conform with the provisions of this policy at the effective date of this policy.

Policy LTC-2: Relocation of Adult Care Home Beds

Relocations of existing licensed adult care home beds are allowed to another service area. Certificate of need applicants proposing to relocate licensed adult care home beds to another service area shall:

1. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of licensed adult care home beds in the county that would be losing adult care home beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins; and
2. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of licensed adult care home beds in the county that would gain adult care home beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins.

Policy LTC-3: Certification of Beds for Special Assistance

Certificate of need applicants proposing to develop new adult care home beds pursuant to a need determination shall demonstrate that the proposed beds will be certified for special assistance and that at least 5% of the projected days of care in the third full fiscal year of operation shall be provided to residents receiving State-County Special Assistance.

Home Health Services (HH)

Policy HH-3: Need Determination for Medicare-Certified Home Health Agency in a County

When a county¹ has no Medicare-certified home health agency office physically located within the county's borders, and the county has a population of more than 20,000 people; or, if the county has a population of less than 20,000 people and there is not an existing Medicare-certified home health agency office located in a North Carolina county within 20 miles, need for a new Medicare-certified home health agency office in the county is thereby established through this policy. The need determination shall be reflected in the *next* annual North Carolina State Medical Facilities Plan that is published following determination that a county meets the criteria indicated above. (Population is based on population estimates/projections from the North Carolina Office of State Budget and Management for the plan year in which the need determination would be made excluding active duty military for any county with more than 500 active duty military personnel. The measurement of 20 miles will be in a straight line from the closest point on the

county line of the county in which an existing agency office is located to the county seat of the county in which there is no agency.)

Policies Applicable to All Mental Health, Developmental Disabilities and Substance Use Disorder Facilities (MH)

Policy MH-1: Linkages between Treatment Settings

An applicant for a certificate of need for psychiatric, substance use disorder or intermediate care facilities for individuals with intellectual disabilities (ICF/IID) beds shall document that the affected local management entity-managed care organization has been contacted and invited to comment on the proposed services.

Policies Applicable to Psychiatric Inpatient Services Facilities (PSY)

Policy PSY-1: Transfer of Beds from State Psychiatric Hospitals to Community Facilities

Beds in the state psychiatric hospitals used to serve short-term psychiatric patients may be relocated to community facilities through the certificate of need process. However, before beds are transferred out of the state psychiatric hospitals, services and programs shall be available in the community. State psychiatric hospital beds that are relocated to community facilities shall be closed within 90 days following the date the transferred beds become operational in the community.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need of the North Carolina Department of Health and Human Services and commit to serve the type of short-term patients normally placed at the state psychiatric hospitals. To help ensure that relocated beds will serve those people who would have been served by the state psychiatric hospitals, a proposal to transfer beds from a state hospital shall include a written memorandum of agreement between the local management entity-managed care organization serving the county where the beds are to be located, the secretary of the North Carolina Department of Health and Human Services, and the person submitting the proposal.

Policies Applicable to Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID)

Policy ICF/IID-1: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Medically Fragile Children

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to community facilities through the certificate of need process for the establishment of community ICF/IID facilities to serve children ages birth through six years who have severe to profound developmental disabilities and are medically fragile. This policy allows for the relocation or transfer of beds only and does not provide for transfer of residents with the beds. State operated developmental center ICF/IID beds that are relocated to community facilities shall be closed upon licensure of the transferred beds.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need demonstrating a commitment to serve children ages birth through six years who have severe to profound developmental disabilities and are medically fragile. To help ensure the relocated beds will serve these residents such proposal shall include a written agreement with the following representatives: director of the

local management entity/managed care organization serving the county where the group home is to be located, the director of the applicable state operated developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the group home.

Policy ICF/IID-2: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Individuals Who Currently Occupy the Beds

Existing certified Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be transferred through the certificate of need process to establish ICF/IID group homes in the community to serve people with complex behavioral challenges and/or medical conditions for whom a community ICF/IID placement is appropriate, as determined by the individual's treatment team and with the individual/guardian being in favor of the placement. This policy requires the transfer of the individuals who currently occupy the ICF/IID beds in the developmental center to the community facility when the beds are transferred. The beds in the state operated developmental center shall be closed upon certification of the transferred ICF/IID beds in the community facility. Providers proposing to develop transferred ICF/IID beds, as those beds are described in this policy, shall submit an application to Certificate of Need that demonstrates their clinical experience in treating individuals with complex behavioral challenges or medical conditions in a residential ICF/IID setting. To ensure the transferred beds will be used to serve these individuals, a written agreement between the following parties shall be obtained prior to development of the group home: director of the local management entity-managed care organization serving the county where the group home is to be located, the director of the applicable developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the group home.

Policy ICF/IID-3: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Adults with Severe to Profound Developmental Disabilities

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to existing community facilities through the certificate of need process for the replacement of Community Alternatives Program for Individuals with Intellectual and Developmental Disabilities (CAP I/DD) waiver slots lost as a result of the Centers for Medicaid and Medicare Services (CMS) policy designed to prohibit CAP I/DD waiver and ICF/IID beds from being located on the same campus. This policy allows for the relocation or transfer of beds only and does not provide for transfer of residents with the beds. State operated developmental center ICF/IID beds that are relocated to community facilities shall be closed upon licensure of the transferred beds.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need demonstrating a commitment to serve adults who have severe to profound developmental disabilities. This policy applies only to facilities that have lost waiver slots as a result of the CMS ruling and does not apply for expansion beyond the lost beds. To help ensure the relocated beds will serve these residents such proposal shall include a written agreement with the following representatives: director of the local management entity/managed care organization serving the county where the community-based facility is located, the director of the applicable state operated developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the community-based facility.

Policy ICF/IID-4: Transfer of ICF/IID Beds from State Operated Developmental Centers Pursuant to Session Law 1983 House Bill 1395

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to community facilities pursuant to Session Law 1983 House Bill 1395. The applicant shall include in its certificate of need application a signed written agreement with the Director of the state operated developmental center, the Division of Mental Health, Developmental Disabilities and Substance Abuse Services in the Department of Health and Human Services, and the Secretary of the Department of Health and Human Services. Certificate of need applicants shall demonstrate the following in the application:

1. The maximum number of beds in the facility upon completion of the project will not exceed 15 beds.
2. The projected per diem operating costs are no more than the per diem operating cost in the state operated developmental center.
3. All beds transferred from the state operated developmental center pursuant to this policy shall be utilized for a period of at least 12 months for the transfer of clients from the state operated developmental center to the community facility, after which 50% of the transferred beds may be utilized for non-institutional clients.

POLICIES APPLICABLE TO TECHNOLOGY AND EQUIPMENT (TE)

Policy TE-1: Conversion of Fixed Pet Scanners to Mobile Pet Scanners

Facilities with an existing or approved fixed PET scanner may apply for a Certificate of Need (CON) to convert the existing or approved fixed PET scanner to a mobile PET scanner if the applicant(s) demonstrates in the CON application that the converted mobile PET scanner:

1. Shall continue to operate as a mobile PET scanner at the facility, including satellite campuses, where the fixed PET scanner is located or was approved to be located.
2. Shall be moved at least weekly to provide services at two or more host facilities¹.
3. Shall not serve any mobile host site that is not owned by the PET certificate holder or an entity related to the PET certificate holder such as a parent or subsidiary that is located in the county where any existing or approved fixed PET scanner is located, except as required by subpart (1).

There will be one certificate of need application filing opportunity each calendar year.

¹ The council recommended the revision of the current East and West service areas to a statewide service area to allow flexibility in servicing mobile PET sites.

Policy TE-2: Intraoperative Magnetic Resonance Scanners

Qualified applicants may apply for an intraoperative Magnetic Resonance Scanner (iMRI) to be used in an operating room suite.

To qualify, the health service facility proposing to acquire the iMRI scanner shall demonstrate in its certificate of need application that it is a licensed acute care hospital which:

1. Performed at least 500 inpatient neurosurgical cases during the 12 months immediately preceding the submission of the application; and
2. Has at least two neurosurgeons that perform intracranial surgeries currently on its Active Medical Staff; and
3. Is located in a metropolitan statistical area as defined by the US Census Bureau with at least 350,000 residents.

The iMRI scanner shall not be used for outpatients and may not be replaced with a conventional MRI scanner.

The performance standards in 10A NCAC 14C .2703 would not be applicable.

Intraoperative procedures and inpatient procedures performed on the iMRI shall be reported separately on the Hospital License Renewal Application.

These scanners shall not be counted in the inventory of fixed MRI scanners; the procedures performed on the iMRI will not be used in calculating the need methodology and will be reported in a separate table in Chapter 17.

Policy TE-3: Plan Exemption for Fixed Magnetic Resonance Imaging Scanners

Qualified applicants may apply for a fixed magnetic resonance imaging scanner (MRI).

To qualify, the health service facility proposing to acquire the fixed MRI scanner shall demonstrate in its certificate of need application that it is a licensed North Carolina acute care hospital with emergency care coverage 24 hours a day, seven days a week and that does not currently have an existing or approved fixed MRI scanner as reflected in the inventory in the applicable State Medical Facilities Plan.

The applicant shall demonstrate that the proposed fixed MRI scanner will perform at least 850 weighted MRI procedures during the third full operating year.

The performance standards in 10A NCAC 14C .2703 would not be applicable.

The fixed MRI scanner must be located on the hospital's "main campus" as defined in G.S. 131E-176-(14n)a.

POLICIES APPLICABLE TO ALL HEALTH SERVICES (GEN)

The policy statements below apply to all health services including acute care (acute care hospital beds, ambulatory surgical facilities, operating rooms, rehabilitation facilities or beds, and technology); long-term care (nursing homes, adult care homes, Medicare-certified home health agencies, end-stage renal disease services and hospice services); mental health (psychiatric facilities, substance use disorder facilities, and ICF/IID) and services and equipment including bone marrow transplantation services, burn intensive care services, neonatal intensive care services, open heart surgery services, solid organ transplantation services, cardiac catheterization equipment, heart-lung bypass machines, gamma knives, linear accelerators, lithotripters, magnetic resonance imaging scanners, positron emission tomography scanners, simulators, major medical equipment as defined in G.S. 131E-176(14o), and diagnostic centers as defined in G.S. 131E-176(7a).

Policy GEN-1: Reallocations

1. Reallocations shall be made only to the extent that the methodologies used in this Plan to make need determinations indicate that need exists after the inventories are revised and the need determinations are recalculated.
2. Beds or services that are reallocated once in accordance with this policy shall not be reallocated again. Rather, Healthcare Planning shall make any necessary changes in the next annual North Carolina State Medical Facilities Plan.
3. Dialysis stations that are withdrawn, relinquished, not applied for, decertified, denied, or appealed shall not be reallocated. Instead, any necessary redetermination of need shall be made in the next scheduled publication of the North Carolina State Medical Facilities Plan.
4. Appeals of Certificate of Need Decisions on Applications
Need determinations of beds or services for which Certificate of Need decision to approve or deny the application has been appealed shall not be reallocated until the appeal is resolved.
 - a. Appeals resolved prior to August 17:
If such an appeal is resolved in the calendar year prior to August 17, the beds or services shall not be reallocated by Certificate of Need; rather Healthcare Planning shall make the necessary changes in the next annual North Carolina State Medical Facilities Plan except for dialysis stations which shall be processed pursuant to Item 3.
 - b. Appeals resolved on or after August 17:
If such an appeal is resolved on or after August 17 in the calendar year, the beds or services, except for dialysis stations, shall be made available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from the date that the appeal is resolved. Notice shall be mailed by Certificate of Need to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for receipt of new applications.
5. Withdrawals and Relinquishments
Except for dialysis stations, a need determination for which a certificate of need is issued, but is subsequently withdrawn or relinquished, is available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from:

- a. the last date on which an appeal of the notice of intent to withdraw the certificate could be filed if no appeal is filed;
- b. the date on which an appeal of the withdrawal is finally resolved against the holder; or
- c. the date that Certificate of Need receives from the holder of the certificate of need notice that the certificate has been voluntarily relinquished.

Notice of the scheduled review period for the reallocated services or beds shall be mailed by Certificate of Need to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for submittal of the new applications.

6. Need Determinations for which No Applications are Received

- a. Services or beds with scheduled review in the calendar year on or before September 1: Certificate of Need shall not reallocate the services or beds in this category for which no applications were received, because Healthcare Planning will have sufficient time to make any necessary changes in the determinations of need for these services or beds in the next annual North Carolina State Medical Facilities Plan, except for dialysis stations.
- b. Services or beds with scheduled review in the calendar year after September 1: Except for dialysis stations, a need determination in this category for which no application has been received by the last due date for submittal of applications shall be available to be applied for in the second Category J review period in the next calendar year for the applicable Health Service Area. Notice of the scheduled review period for the reallocated beds or services shall be mailed by Healthcare Planning and Certificate of Need Section to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for submittal of new applications.

7. Need Determinations not Awarded because Application Disapproved

- a. Disapproval in the calendar year prior to August 17:
Need determinations or portions of such need for which applications were submitted but disapproved by Certificate of Need before August 17, shall not be reallocated by Certificate of Need. Instead Healthcare Planning shall make the necessary changes in the next annual North Carolina State Medical Facilities Plan if no appeal is filed, except for dialysis stations.
- b. Disapproval in the calendar year on or after August 17:
Need determinations or portions of such need for which applications were submitted but disapproved by Certificate of Need on or after August 17, shall be reallocated by Certificate of Need, except for dialysis stations. A need in this category shall be available for a review period to be determined by Certificate of Need but beginning no earlier than 95 days from the date the application was disapproved, if no appeal is filed. Notice of the scheduled review period for the reallocation shall be mailed by the Healthcare Planning and Certificate of Need Section to all people on the mailing list for the North Carolina State Medical Facilities Plan no less than 80 days prior to the due date for submittal of the new applications.

8. Reallocation of Decertified Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) Beds

If an ICF/IID facility's Medicaid certification is relinquished or revoked, the ICF/IID beds in the facility may be reallocated by the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Healthcare Planning after consideration of recommendations from the North Carolina Division of Mental Health, Developmental Disabilities, and Substance Abuse Services. The North Carolina Department of Health and Human Services,

Division of Health Service Regulation, Certificate of Need shall schedule reviews of applications for any reallocated beds pursuant to Section (5) of this policy.

Policy GEN-2: Changes in Need Determinations

1. The need determinations adopted in this document shall be revised continuously throughout the calendar year to reflect all changes in the inventories of:
 - a. the health services listed at G.S. 131E-176 (16)f;
 - b. health service facilities;
 - c. health service facility beds;
 - d. dialysis stations;
 - e. the equipment listed at G.S. 131E-176 (16)f1;
 - f. mobile medical equipment;
 - g. operating rooms as defined in Chapter 6; and

as those changes are reported to Healthcare Planning. However, need determinations in this document shall not be reduced if the relevant inventory is adjusted upward 60 days or less prior to the applicable “Certificate of Need Application Due Date.”

2. Inventories shall be updated to reflect:
 - a. decertification of Medicare-certified home health agencies or offices, ICF/IID beds and dialysis stations;
 - b. de-licensure of health service facilities and health service facility beds;
 - c. demolition, destruction, or decommissioning of equipment as listed at G.S. 131E-176(16)f1 and s;
 - d. elimination or reduction of a health service as listed at G.S. 131E-176(16)f;
 - e. addition or reduction in operating rooms as defined in Chapter 6;
 - f. psychiatric beds licensed pursuant to G.S. 131E-184(c);
 - g. certificates of need awarded, relinquished, or withdrawn, subsequent to the preparation of the inventories in the North Carolina State Medical Facilities Plan; and
 - h. corrections of errors in the inventory as reported to Healthcare Planning.
3. Any person who is interested in applying for a new institutional health service for which a need determination is made in this document may obtain information about updated inventories and need determinations from Healthcare Planning.
4. Need determinations resulting from changes in inventory shall be available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from the date of the action identified in Subsection (2). Notice of the scheduled review period for the need determination shall be mailed by the Healthcare Planning and Certificate of Need Section to all people on the mailing list for the North Carolina State Medical Facilities Plan no less than 45 days prior to the due date for submittal of the new applications.

Policy GEN-3: Basic Principles

A certificate of need applicant applying to develop or offer a new institutional health service for which there is a need determination in the North Carolina State Medical Facilities Plan shall demonstrate how the project will promote safety and quality in the delivery of health care services while promoting equitable access and maximizing healthcare value for resources expended. A certificate of need applicant shall

document its plans for providing access to services for patients with limited financial resources and demonstrate the availability of capacity to provide these services. A certificate of need applicant shall also document how its projected volumes incorporate these concepts in meeting the need identified in the State Medical Facilities Plan as well as addressing the needs of all residents in the proposed service area.

Policy GEN-4: Energy Efficiency and Sustainability for Health Service Facilities

Any person proposing a capital expenditure greater than \$2 million to develop, replace, renovate or add to a health service facility pursuant to G.S. 131E-178 shall include in its certificate of need application a written statement describing the project's plan to assure improved energy efficiency and water conservation.

In approving a certificate of need proposing an expenditure greater than \$5 million to develop, replace, renovate or add to a health service facility pursuant to G.S. 131E-178, Certificate of Need shall impose a condition requiring the applicant to develop and implement an Energy Efficiency and Sustainability Plan for the project that conforms to or exceeds energy efficiency and water conservation standards incorporated in the latest editions of the North Carolina State Building Codes. The plan must be consistent with the applicant's representation in the written statement as described in paragraph one of Policy GEN-4.

Any person awarded a certificate of need for a project or an exemption from review pursuant to G.S. 131E-184 is required to submit a plan for energy efficiency and water conservation that conforms to the rules, codes and standards implemented by the Construction Section of the Division of Health Service Regulation. The plan must be consistent with the applicant's representation in the written statement as described in paragraph one of Policy GEN-4. The plan shall not adversely affect patient or resident health, safety or infection control.

Chapter 5:

Acute Care Hospital Beds

CHAPTER 5

ACUTE CARE HOSPITAL BEDS

Introduction

G.S. 131E-176(13) defines a hospital as “a public or private institution which is primarily engaged in providing to inpatients, by or under supervision of physicians, diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons, or rehabilitation services for the rehabilitation of injured, disabled or sick persons. The term includes all facilities licensed pursuant to G.S. 131E-77, except long-term care hospitals.”

There are 110 licensed acute care hospitals in the state. The occupancy rate for acute care beds is 60.0%. Table 5A shows that certificates of need have been issued to decrease the number of beds in some areas and increase the number of beds in other areas, resulting in a net of 769 new beds to be developed.

Definitions

An acute care hospital bed’s service area is the service area in which the bed is located. The acute care bed service areas are the single and multicounty groupings shown in Figure 5.1. See below for the delineation of service areas.

The “reporting year” is October 1 through September 30. The “current” reporting year is October 1, 2017 through September 30, 2018.

The methodology projects bed need four years beyond the current reporting year. The “current projection year” is 2022.

The “planning inventory” is the number of beds used in need determination calculations. It is the number of licensed beds as of the last day of the reporting year as submitted by the hospital, plus any new beds approved by CON that are under development as of the last day of the reporting year, minus any beds delicensed after the end of the reporting year.

A “hospital under common ownership” is a hospital that is owned by the same or a related legal entity as at least one other acute care hospital in the same service area.

Changes from the Previous Plan

This chapter contains no substantive changes from the previous State Medical Facilities Plan. However, the chapter includes substantial technical edits.

Basic Principles

1. Acute care hospitals are the providers of essential health care services, one of the state’s largest employers, the largest single investment of public funds in many communities, magnets for physicians deciding where to practice, and building blocks in the economic development of their communities. North Carolina must safeguard the future of its hospitals.

Even so, it is not the state’s policy to guarantee the survival and continued operation of all the state’s hospitals, or even any one of them. In a dynamic, fast-changing environment, which is moving away from inpatient hospital services, the survival and future activities of hospitals will be a function of many factors beyond the realm of state policy.

The state can, however, facilitate the survival of its hospitals and promote the development of needed health care services, acute and non-acute, by encouraging hospitals to convert unused acute care inpatient facilities to new purposes, to collaborate with other health care providers, and to develop health care delivery networks.

2. The North Carolina Department of Health and Human Services supports the use of swing beds in providing long-term nursing care services in rural acute care hospitals. Section 1883 of the Social Security Act provides that certain small rural hospitals may use their inpatient facilities to furnish skilled nursing facility (SNF) services to Medicare and Medicaid beneficiaries and intermediate care facility (ICF) services to Medicaid beneficiaries.

Data Sources

The inventory of acute care beds comes from the Hospital License Renewal Applications for the reporting year, as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation (Agency).

Annual acute inpatient days of care come from IBM Watson Health (IBM), a collector of hospital patient discharge information. Hospitals report to IBM using the UB04 form. IBM provides general acute care days of care by facility and data on patients' county of residence to the Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill. The Sheps Center provides the Agency with aggregate data from the patient records that have been categorized as an "acute care/general discharge."

Basic Assumptions of the Methodology

1. Target occupancies of hospitals should encourage efficiency of operation, and vary with average daily census.
2. In determining utilization rates and average daily census, the methodology counts only acute care bed days of care.
3. When a hospital receives approval to increase or decrease acute care bed capacity, the planning inventory includes this change regardless of the licensure status of the beds.
4. Beginning with the 2011 SMFP, the Agency updates service areas every three years. The updates use inpatient days of care by county of residence and county of service to delineate service areas. To update service areas, the Agency uses data on inpatient days of care by county of residence and county of service from the three most recent years of data available from the Sheps Center.

Delineation of Service Areas

The SMFP contains two types of acute care bed service areas: single county and multicounty. Counties with at least one licensed acute care hospital that are not grouped with another county are single county service areas. A multicounty service area is created under two conditions: 1) counties without a licensed acute care hospital are grouped with the single county where the largest proportion of its patients received inpatient acute care services; 2) if two counties with at least one licensed acute care hospital each provided inpatient acute care services to at least 35 percent of the residents of a county without a licensed acute care hospital, then the county without a licensed acute care hospital is grouped with both of the counties with a licensed acute care hospital.

If an entity has a certificate of need to develop an acute care hospital in a county without an acute care hospital, the planning inventory in Table 5A will include these beds upon licensure. Before licensure, the

beds remain under development in the multicounty service area. Upon licensure of the beds, the county where they are licensed becomes a single county service area.

Application of the Methodology (Table 5A)

Step 1: Determine the number of acute care beds in the inventory by totaling:

- a. the number of licensed acute care beds at each hospital (*Column D*); and
- b. the number of acute care beds for which certificates of need have been issued, but for which changes in the license were not made by the end of the reporting year (i.e., additions, reductions, and relocations) (*Column E*); and
- c. the number of acute care beds for which a need determination in the SMFP is pending review or appeal (*Column E*); and
- d. the number of beds delicensed after the end of the reporting year (*Column E*).

Step 2: Enter the total number of inpatient days of care provided by each hospital for the reporting year (*Column F*).

Step 3: Calculate the projected inpatient days of care for each service area for the projection year as follows:

- a. Determine the total number of inpatient days of care during each of the last five reporting years.
- b. Calculate the difference in the number of inpatient days of care provided from year to year.
- c. For each of the last four reporting years, determine the percentage change from the previous reporting year by dividing the calculated difference in inpatient days of care by the total number of inpatient days provided during the previous reporting year [$(\{\text{current reporting year} - \text{previous reporting year}\} / \text{previous reporting year})$].

Step 4: Determine the Service Area Growth Rate Multiplier (*Column G*). For each service area, total the annual percentages of change and divide by four to determine the average annual change rate. For positive change, add 1 to obtain the County Growth Rate Multiplier.

Step 5: Determine the Projected Days of Care (*Column H*). If the County Growth Rate Multiplier is negative, carry forward the inpatient days of care for the reporting year unchanged to Column H. If the County Growth Rate Multiplier is positive, calculate the compounded growth factor projected for the next four reporting years by using the County Growth Rate Multiplier (from Step 4) in the first year and compound the change each year thereafter at the same rate [$\text{Inpatient Days of Care} \times (\text{County Growth Rate Multiplier})^4$].

Step 6: Calculate the projected midnight average daily census for each hospital for the projection year by dividing the projected days of care provided at the hospital (from Step 5) by 365.25 days (*Column I*).

Step 7: Multiply each hospital's projected midnight average daily census from Step 6 by the appropriate target occupancy factor below and enter in Column J:

Average Daily Census	Target Occupancy Percentage	Occupancy Factor
Average Daily Census less than 100	66.7%	1.50
Average Daily Census 100-200	71.4%	1.40
Average Daily Census greater than 200 and <=400	75.2%	1.33
Average Daily Census greater than 400	78.0%	1.28

Step 8: Determine the surplus or deficit of beds for each hospital by subtracting the planning inventory of beds (*Column D plus Column E*) from the number of beds generated in Step 7 (*Column J*). Deficits are positive numbers and surpluses are negative numbers (*Column K*).

Step 9: Calculate the number of acute care beds needed in a service area (*Column L*) as follows:

- a. The threshold for a need determination for additional acute care beds is a projected deficit of 20 or more beds, for a single hospital or a projected deficit greater than or equal to 10% of the total bed inventory for hospitals under common ownership.
- b. Apply the threshold individually to each hospital. The methodology generates a need determination irrespective of surpluses at other hospitals in the service area, unless the service area contains other hospitals under common ownership.
- c. If two or more hospitals in the same service area are under common ownership, total the surpluses and deficits of beds for those hospitals to determine the surplus or deficit of beds for each owner of multiple hospitals in the service area.
- d. When the deficit of total acute care beds in the service area for any facility or owner equals or exceeds 20 beds or 10% of the inventory of acute care beds for that facility or owner, sum the deficits of all facilities and owners in the service area to determine the number of acute care beds needed in the service area.

Qualified Applicants

Any qualified applicant may apply for a certificate of need to acquire the needed acute care beds. A person is a qualified applicant if he or she proposes to operate the additional acute care beds in a hospital that will provide:

1. a 24-hour emergency services department;
2. inpatient medical services to both surgical and non-surgical patients; and
3. if proposing a new licensed hospital, medical and surgical services on a daily basis within at least five of the following major diagnostic categories recognized by the Centers for Medicare and Medicaid Services (CMS) listed below:

- MDC 1: Diseases and disorders of the nervous system
- MDC 2: Diseases and disorders of the eye
- MDC 3: Diseases and disorders of the ear, nose, mouth and throat
- MDC 4: Diseases and disorders of the respiratory system
- MDC 5: Diseases and disorders of the circulatory system
- MDC 6: Diseases and disorders of the digestive system
- MDC 7: Diseases and disorders of the hepatobiliary system and pancreas
- MDC 8: Diseases and disorders of the musculoskeletal system and connective tissue

- MDC 9: Diseases and disorders of the skin, subcutaneous tissue and breast
- MDC 10: Endocrine, nutritional and metabolic diseases and disorders
- MDC 11: Diseases and disorders of the kidney and urinary tract
- MDC 12: Diseases and disorders of the male reproductive system
- MDC 13: Diseases and disorders of the female reproductive system
- MDC 14: Pregnancy, childbirth and the puerperium
- MDC 15: Newborns/other neonates with conditions originating in the perinatal period
- MDC 16: Diseases and disorders of the blood and blood-forming organs and immunological disorders
- MDC 17: Myeloproliferative diseases and disorders and poorly differentiated neoplasms
- MDC 18: Infectious and parasitic diseases
- MDC 19: Mental diseases and disorders
- MDC 20: Alcohol/drug use and alcohol/drug-induced organic mental disorders
- MDC 21: Injury, poisoning and toxic effects of drugs
- MDC 22: Burns
- MDC 23: Factors influencing health status and other contacts with health services
- MDC 24: Multiple significant trauma
- MDC 25: Human immunodeficiency virus infections

Figure 5.1 Acute Care Bed Service Areas

Shaded counties are multicounty acute care bed service areas, which consist of a county with one or more hospitals and a nearby county without an acute care hospital.

The asterisk (*) in multicounty service areas denotes the county with at least one hospital.

Hospitals	Multicounty Service Area	Color Code
CarolinaEast Medical Center	Craven, Jones, Pamlico	Green
Duke Regional Hospital, Duke University Hospital, North Carolina Specialty Hospital	Durham, Caswell	Blue
Erlanger Murphy Medical Center	Cherokee, Clay	Teal

Service Area	License Number	Facility Name	Licensed Acute Care Beds	Adjustments for CONs/Previous Need	Inpatient Days of Care	County Growth Rate Multiplier	Projected Days of Care	2022 Projected Average Daily Census (ADC)	2022 Beds Adjusted for Target Occupancy	Projected 2022 Deficit or Surplus (surplus shows as a "-")	2022 Need Determination
Grand Total All Hospitals			21,222	769	4,489,353		4,881,246				436

* Acute care beds in the "Adjustments for CONs/Previous Need" column are to be converted to inpatient psychiatric beds. This conversion is exempt from certificate of need review, pursuant to G.S. 131E-184(c).

** IBM Watson Health acute inpatient days of care data and the Division of Health Service Regulation Hospital License Renewal Application days of care data have a greater than ± 5% discrepancy between the two data sources.

*** Duke University Hospital is licensed for 14 acute care beds under Policy AC-3. The 14 beds are not counted when determining acute care bed need.

**** The State Health Coordinating Council voted to remove the need for 117 beds in Hoke County.

^ The Division of Health Service Regulation received notices from two different prospective buyers regarding designation of Vidant Pungo Hospital as a legacy medical care facility. The prospective buyers had 36 months from the date of their respective notices to reopen the hospital. One notice was effective May 16, 2016, and the other was effective June 14, 2016. Neither prospective buyer reopened the hospital within 36 months of the date of their respective notice.

^^ Effective October 23, 2017, the 70 acute care beds at Franklin Medical Center were licensed as part of Maria Parham Health pursuant to G.S. 131E-77(e1).

^^^ Yadkin Valley Community Hospital has requested to extend its designation as a legacy medical care facility by an additional 36 months. The facility has until January 18, 2022 to reopen the hospital.

† Charles A. Cannon, Jr. Memorial Hospital received a grant from the Dorothea Dix Hospital Property Fund to convert 27 acute care beds to adult psychiatric beds. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 5A.

†† Maria Parham Health received a grant from the Dorothea Dix Hospital Property Fund to renovate and convert 33 acute care beds to adult psychiatric beds on the site of the closed Franklin Medical Center. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 5A.

††† One acute care bed was converted to a psychiatric bed on November 13, 2017, and has been removed from the acute care bed inventory.

†††† 42 long-term acute care beds from Select Specialty Hospital were reconverted back to general acute care beds and added to Novant Health Forsyth Medical Center's license, effective 12/13/2017.

Note: The decimal part of a number resulting from a calculation is not displayed, but it is used in subsequent calculations. Therefore, calculated totals may not be identical to displayed totals.

Projections based on four-year average county-specific growth rates, compounded annually over the next four years. Acute Care Days data from 2014, 2015, 2016, 2017 and 2018 were used to generate four-year growth rate.
 (ADC= Average Daily Census)

Table 5B: Acute Care Bed Need Determination*

Service Area	Acute Care Bed Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
Forsyth	68	June 15, 2020	July 1, 2020
Gaston	64	April 15, 2020	May 1, 2020
Mecklenburg	126	October 15, 2020	November 1, 2020
Moore	25	August 17, 2020	September 1, 2020
New Hanover	36	August 17, 2020	September 1, 2020
It is determined that there is no need for additional beds anywhere else in the state and no other reviews are scheduled.			

* Any person can apply to meet the need, not just the health service facility or facilities that generated the need.

** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

*** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. The filing deadline is absolute (see Chapter 3).

Long-Term Care Hospitals

As a result of the August 2005 change in the certificate of need statute, which made long-term care hospital beds a separate category of health service facility beds, the bed days associated with long-term care hospitals have been removed from the acute care bed need determinations. Table 5C shows long-term care hospital inventory data and days of care for the current reporting year.

Table 5C: Long-Term Care Hospital Bed Inventory and Days of Care

License Number	Facility Name	County	Licensed LTCH Beds	Days of Care	Adjustments for Certificates of Need and Previous Need

Chapter 6:

Operating Rooms

CHAPTER 6

OPERATING ROOMS

Introduction

G.S. 131E-76(6a) defines an operating room as "...a room used for the performance of surgical procedures requiring one or more incisions and that is required to comply with all applicable licensure codes and standards for an operating room."

Across all hospitals and ambulatory surgical facilities, 72.3% of surgical cases were ambulatory and 27.7% were inpatient (*Table 6B*).

Definitions

An operating room's "service area" is the service area in which the room is located. The operating room service areas are the single or multicounty groupings as shown in Figure 6.1. See below for the delineation of service areas.

The "reporting year" is October 1 through September 30. The "current" reporting year is October 1, 2017 through September 30, 2018.

The methodology projects operating room need two years beyond the publication year of the current SMFP. The current "projection year" is 2022.

The "planning inventory" is the number of operating rooms used in need determination calculations. It consists of the number of operating rooms as of the last day of the reporting year, plus any new operating rooms approved by CON that are under development by the end of the reporting year, minus any operating rooms delicensed by the end of the reporting year.

For the purposes of the operating room methodology, a "health system" includes all licensed health service facilities with operating rooms located in the same service area that are owned or leased by:

1. the same legal entity (i.e., the same individual, trust or estate, partnership, corporation, hospital authority, or the State or political subdivision, agency or instrumentality of the State); or
2. the same parent corporation or holding company; or
3. a subsidiary of the same parent corporation or holding company; or
4. a joint venture in which the same parent, holding company, or a subsidiary of the same parent or holding company is a participant and has the authority to propose changes in the location or number of ORs in the health service facility.

A health system consists of one or more health service facilities. In the event that the relocation or transfer of operating rooms to a different health system generates a need, the need determination will not appear until the relocated or transferred operating rooms are licensed in their new location.

Changes from the Previous Plan

There is one substantive change from the previous State Medical Facilities Plan, which is the creation of the Avery-Watauga multicounty operating room service area as described under “Delineation of Service Areas”. The chapter also includes substantial technical edits.

Data Sources

The number of cases and procedures come from the Hospital License Renewal Applications and the Ambulatory Surgical Facility License Renewal Applications for the reporting year, as submitted to the Acute and Home Care Licensure and Certification Section of the Division of Health Service Regulation.

The inventory of operating rooms comes from License Renewal Applications submitted to the Acute and Home Care Licensure and Certification Section and certificates issued by Certificate of Need.

Population data by county for the reporting year and the projection year come from the North Carolina Office of State Budget and Management.

Assumptions of the Methodology

1. In the current State Medical Facilities Plan, for the methodology to determine an operating room need for a service area, the minimum deficit must be two, after rounding.
2. The planning inventory and need determination calculation exclude one operating room for each Level I and Level II trauma center, and one operating room for each designated burn intensive care unit.
3. Beginning with the 2011 SMFP, the Agency updates service areas every three years. The updates use inpatient and ambulatory surgical procedures by county of residence and county of service to delineate service areas as reported on the License Renewal Applications (see below).
4. For purposes of these need projections, the number of surgical hours is anticipated to change in direct proportion to the change in the general population of the operating room service area.

Delineation of Service Areas

The SMFP contains two types of operating room service areas: single county and multicounty. Counties with at least one facility having a licensed operating room that are not grouped with another county are single county service areas. A multicounty service area is created under two conditions: 1) counties without a facility with a licensed operating room are grouped with the single county where the largest proportion of its patients received surgery; 2) if two counties with at least one facility having a licensed operating room each provided surgical services to at least 35 percent of the residents of a county without at least one facility with a licensed operating room, then the county without at least one facility with a licensed operating room is grouped with both of the counties with facilities that have at least one operating room.

If an entity has a certificate of need to develop a facility with a licensed operating room in a county without a facility with a licensed operating room, the planning inventory in Table 6B will include these operating rooms upon licensure. Before licensure, the operating rooms remain under development in the multicounty service area.

In response to an adjusted need determination petition, the State Health Coordinating Council created the Avery-Watauga multicounty operating room service area. There are operating rooms in both Avery and Watauga counties.

Application of the Methodology

Step 1: Inventory of Operating Rooms (Table 6A, Columns D through J)

- a. In each operating room service area, list the number of operating rooms by type, and sum them for each health system by summing the following for all licensed hospitals and ambulatory surgical facilities:
 - (1) Number of Inpatient Operating Rooms (*Column D*)
 - (2) Number of Ambulatory Operating Rooms (*Column E*)
 - (3) Number of Shared Operating Rooms (*Column F*)
- b. For each facility:
 - (1) Exclude the number of dedicated Cesarean Section (C-Section) operating rooms from the Hospital License Renewal Application (*Column G*).
 - (2) Exclude one operating room for each Level I and Level II Trauma Center and one additional operating room for each designated Burn Intensive Care Unit (*Column H*).
 - (3) List the number of operating rooms (*Column I*) and C-Section operating rooms (*Column J*) for which certificates of need have been issued or settlement agreements signed but operating rooms were not licensed/delicensed as of the end of the reporting year (*Columns I and J*).
- c. Enter placeholders for need determinations from previous plans that are pending certificate of need review (*Columns I and Column J*).

Step 2: Determine Each Facility's Adjusted Case Times

- a. For each facility, compare the Average Case Time in Minutes for inpatient and ambulatory cases on the annual License Renewal Application to its average case time used in the methodology in the previous year's State Medical Facilities Plan.
 - (1) If either the inpatient or ambulatory case time is more than 10 percent longer than the previous year's case time, then the Adjusted Case Time is the previous year's reported case time plus 10 percent.
 - (2) If either the inpatient or ambulatory case time is more than 20 percent shorter than the previous year's case time, then the Adjusted Case Time is the previous year's reported case time minus 20 percent.
 - (3) If neither of the above situations occurs, then the Adjusted Case Time is the average case time(s) reported on the License Renewal Application(s).

Step 3: Group Facilities (Table 6A, Columns K through M)

- a. For each hospital, multiply the total inpatient surgical cases (excluding C-sections performed in dedicated C-Section operating rooms) reported in the Surgical Cases by Specialty Area table on the annual Hospital License Renewal Application by the inpatient average case time from Step 2. Then divide by 60 to obtain the total inpatient surgical hours.

- b. For each facility, multiply the total ambulatory cases reported in the Surgical Cases by Specialty Area table on the annual License Renewal Application by the ambulatory average case time from Step 2. Then divide by 60 to obtain the total ambulatory surgical hours.
- c. Add the total inpatient and ambulatory surgical hours together to obtain each facility's Total Surgical Hours for Grouping (*Column K*).
- d. Assign each facility to a group based on the following criteria (*Column L*):

Group	Facility Type
1	Academic Medical Center Teaching Hospitals
2	Hospitals reporting more than 40,000 surgical hours
3	Hospitals reporting 15,000 to 40,000 surgical hours
4	Hospitals reporting less than 15,000 surgical hours
5	Separately licensed ambulatory surgical facilities that perform at least 50 percent of their procedures in either ophthalmology or otolaryngology, or a combination of the two specialties.
6	All separately licensed ambulatory surgical facilities not in Group 5.

- e. For purposes of the State Medical Facilities Plan, the average operating room is anticipated to be staffed based on its group membership and utilized at least 75 percent of the available time. Assumptions regarding hours per day and days per year of availability are shown in the table below. Multiply the Hours per Day by the Days Per Year. Then multiply by 75 percent to obtain the Standard Hours per Operating Room per Year (*Column M*).

Group	Hours per Day	Days per Year	Standard Hours per Operating Room per Year
1	10	260	1,950
2	10	260	1,950
3	9	260	1,755
4	8	250	1,500
5	7	250	1,312
6	7	250	1,312

Step 4: Project Future Operating Room Requirements Based on Growth of Operating Room Hours (*Table 6B, Columns D through K*)

- a. For Groups 2 through 6, use the Adjusted Case Time from Step 2 to calculate the average (mean) inpatient and ambulatory case times for each group. If the Adjusted Case Time exceeds one standard deviation above the mean case time for its group, substitute the value equivalent to the mean plus one standard deviation of the Adjusted Case Time to obtain the Final Inpatient Case Time (*Column E*) and Final Ambulatory Case Time (*Column G*), as applicable. Otherwise use the Adjusted Case Time from Step 2 as the final case times. Facilities that perform no surgical procedures in the category being calculated are excluded from the calculations. The Average Final Inpatient and Ambulatory Case Times for each group are as follows for the current plan:

Group	Average Final Inpatient Case Time		Average Final Ambulatory Case Time	
	in Minutes	in Hours	in Minutes	in Hours
1	240.0	4.00	138.4	2.31
2	200.4	3.34	117.9	1.97
3	175.1	2.92	113.5	1.89
4	111.6	1.86	70.9	1.18
5	--	--	40.8	0.68
6	--	--	71.2	1.19

- b. For each facility, multiply the inpatient surgical cases reported on the License Renewal Application (*Column D*) by the Final Inpatient Case Time in minutes (*Column E*), and multiply the ambulatory surgical cases reported on the License Renewal Application (*Column F*) by the Final Ambulatory Case Time in minutes (*Column G*). Sum these amounts for each facility and divide by 60 to obtain the Total Adjusted Estimated Surgical Hours (*Column H*).
- c. For each service area with a projected population increase, calculate the Growth Factor based on each service area's projected population change between the reporting year and the projection year (*Column I: Growth Factor = [projection year service area population - reporting year service area population] ÷ reporting year service area population.*). If the calculated population growth is negative, the Growth Factor is considered to be zero.
- d. Multiply each facility's Total Adjusted Estimated Surgical Hours (*Column H*) for the most recent reporting year by each service area's Growth Factor (*Column I*). Then add the product to the Total Adjusted Estimated Surgical Hours to determine the Projected Surgical Hours for the projection year (*[Column H x Column I]/100 + Column H = Column J*).
- e. Divide each facility's Projected Surgical Hours for the projection year by the Standard Hours per Operating Room per Year (based on group assignment) to determine the Projected Surgical Operating Rooms Required in the projection year (*Table 6B, Column J ÷ Table 6A, Column M = Table 6B, Column K*).

Step 5: Determination of Health System Deficit/Surplus (*Table 6B, Columns L - M*)

- a. Sum the operating rooms, adjustments, and exclusions (*Table 6A, Columns D through J*) for each facility to obtain the Adjusted Planning Inventory (*Table 6B, Column L*).
- b. Subtract the Adjusted Planning Inventory from the Projected Surgical Operating Rooms Required to obtain the surpluses and deficits for each facility (*Column M*). (*Note: In Column M, projected deficits appear as positive numbers indicating that the methodology projects that more operating rooms will be needed in the projection year than are in the current inventory.*) Then sum the deficits and surpluses for each facility in each health system to arrive at the Projected Operating Room Deficit or Surplus for the service area (*Column K – Column L = Column M*).

Step 6: Determination of Service Area Operating Room Need (*Table 6B, Column N*)

- a. Round the health system deficits according to the rounding rules, below:

If a health system located in an operating room service area with more than 10 operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.50 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with more than 10 operating rooms and a projected deficit less than 0.50 or in which there is a projected surplus, there is no need.

If a health system located in an operating room service area with six to 10 operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.30 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with six to 10 operating rooms and a projected deficit less than 0.30 or in which there is a projected surplus, there is no need.

If a health system located in an operating room service area with five or fewer operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.20 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with five or fewer operating rooms and a projected deficit less than 0.20 or in which there is a projected surplus, there is no need.

- b. Add all rounded health systems deficits. Then adjust for any placeholders for need determinations in previous State Medical Facilities Plans to calculate the Service Area Need (*Column N*).
- c. For the current plan, the Service Area Need must be at least two to show an Operating Room Need Determination in Table 6C.

NOTE: The need methodology excludes Dedicated C-Section operating rooms and associated cases from the calculation of need determinations.

A dedicated C-section operating room shall only be used to perform C-sections and other procedures performed on the patient in the same visit to the C-section operating room, such that a patient receiving another procedure at the same time as the C-section would not need to be moved to a different operating room for the second procedure.

Hospitals proposing to add a new operating room for use as a dedicated C-section operating room must obtain a certificate of need but may apply for a certificate of need without regard to the need determinations in this chapter.

Figure 6.1 Operating Room Service Areas

Shaded counties are multicounty operating room service areas. Refer to Delineation of Service Areas in Chapter 6 for additional information on service area assignment.

An asterisk (*) in a multicounty service area denotes a county with at least one facility with at least one operating room.

Hospitals	Multicounty Service Area	Color Code
CarolinaEast Medical Center	Craven, Jones, Pamlico	
Cone Health, High Point Regional Health, and Kindred Hospital - Greensboro	Guilford, Caswell

* This facility is a legacy medical care facility based on G.S. 131E-176-(14f).

** Duke University Hospital has 16 licensed operating rooms (ORs) approved under Policy AC-3 (J-008030-07). North Carolina Baptist Hospital has certificates of need (G-008460-10 & G-011519-18) for 11 ORs approved under Policy AC-3. These 27 ORs are counted when determining OR need.

*** This is a dental single-specialty ambulatory surgery demonstration project that is in the inventory but is not included in the need determination calculations.

**** All ORs have been relocated from Plastic Surgery Center of NC to a facility formerly identified as Clemmons Medical Park Ambulatory Surgical Center in previous SMFPs. The new facility retains Plastic Surgery Center's license number. Procedures reported are for Plastic Surgery Center.

***** CON approval has been granted to relocate three ORs to this facility from New Hanover Regional Medical Center. Until the ORs are licensed to this facility, they will remain in New Hanover Regional Medical Center's planning inventory.

^ Effective October 23, 2017, the three ORs at Franklin Medical Center were licensed as part of Maria Parham Health pursuant to G.S. 131E-77(e1).

Grand Total			254,677		665,492								17

* This facility is a legacy medical care facility based on G.S. 131E-176-(14f).

** Duke University Hospital has 16 licensed operating rooms (ORs) approved under Policy AC-3 (J-008030-07). North Carolina Baptist Hospital has certificates of need (G-008460-10 & G-011519-18) for 11 ORs approved under Policy AC-3. These 27 ORs are counted when determining OR need.

*** This is a dental single-specialty ambulatory surgery demonstration project that is in the inventory but is not included in need determination calculations.

**** All ORs have been relocated from Plastic Surgery Center of NC to a facility formerly identified as Clemmons Medical Park Ambulatory Surgical Center in previous SMFPs. The new facility retains Plastic Surgery Center's license number. Procedures reported are for Plastic Surgery Center.

***** CON approval has been granted to relocate 3 ORs to this facility from New Hanover Regional Medical Center. Until the ORs are licensed to this facility, they will remain in New Hanover Regional Medical Center's planning inventory.

^ Inpatient case time substitution: Current year's reported case time is greater than 1 standard deviation (SD) above group average. Substituted average inpatient case time plus 1 SD for group (see Step 5a of the Methodology).

^^ Ambulatory case time substitution: Current year's reported case time is greater than 1 SD above group average. Substituted average ambulatory case time plus 1 SD for group (see Step 5a of the Methodology).

† Inpatient case time substitution: Current year's reported case time is greater than 110% of previous year. Substituted previous year's average inpatient case time plus 10% (see Step 3a.1. of the Methodology).

†† Inpatient case time substitution: Current year's reported case time is less than 80% of previous year. Substituted previous year's average inpatient case time minus 20% (see Step 3a.2. of the Methodology).

††† Ambulatory case time substitution: Current year's reported case time is greater than 110% of previous year. Substituted previous year's average ambulatory case time plus 10% (see Step 3a.1. of the Methodology).

†††† Ambulatory case time substitution: Current year's reported case time is less than 80% of previous year. Substituted previous year's average ambulatory case time minus 20% (see Step 3a.2. of the Methodology).

Table 6C: Operating Room Need Determination*

Operating Room Service Area	Operating Room Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
Forsyth	2	June 15, 2020	July 1, 2020
Mecklenburg	12	October 15, 2020	November 1, 2020
Wake	3	August 17, 2020	September 1, 2020
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

- * Any person can apply to meet the need, not just the health service facility or facilities that generated the need.
- ** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).
- *** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

Table 6D: Dental Single Specialty Ambulatory Surgical Facility Demonstration Project

Region	Provider	ORs
Region 1: HSA IV	Surgical Center for Dental Professionals of NC	2
Region 2: HSA III	Carolinas Center for Ambulatory Dentistry	2
Region 3: HSA V and HSA VI	Valleygate Dental Surgery Center	2
Region 4: HSA I and HSA II	Valleygate Dental Surgery Center of the Triad	2
The North Carolina 2016 State Medical Facilities Plan included need determinations for a Dental Single Specialty Ambulatory Surgical Facility Demonstration Project, consisting of four facilities with two operating rooms each to be located throughout the state. In Region 1, a Certificate of Need was awarded to the Surgical Center for Dental Professionals of Raleigh on March 1, 2017 (J-011170-16). In Region 2, a Certificate of Need was awarded to Carolinas Center for Ambulatory Dentistry in Charlotte on March 1, 2017 (F-011202-16). In Region 3, a Certificate of Need was awarded to Valleygate Dental Surgery Center of Fayetteville on March 6, 2017 (M-011176-16). In Region 4, a Certificate of Need was awarded to Valleygate Dental Surgery Center of the Triad on March 1, 2017 (G-011203-16).		

Inventory of Endoscopy Rooms in Licensed Facilities

Endoscopy procedure rooms are not operating rooms. For information purposes only, Table 6E provides a listing of licensed endoscopy procedure rooms and their associated procedures for the current reporting year.

Other Acute Care Services

- Burn Intensive Care Services
- Open Heart Surgery Services
- Transplantation Services

CHAPTER 7

OTHER ACUTE CARE SERVICES

Introduction

This chapter covers three acute care services: burn intensive care, open-heart surgery, and transplantation services (bone marrow and solid organ).

Definitions

The “reporting year” is October 1 through September 30. The “current” reporting year is October 1, 2017 through September 30, 2018.

An “academic medical center teaching hospital” is one of the five hospitals listed in Appendix G of the State Medical Facilities Plan (SMFP).

Changes from the Previous Plan

This chapter contains no substantive changes from the previous SMFP. However, the chapter includes substantial technical edits.

A. BURN INTENSIVE CARE SERVICES

Introduction

G.S. 131E-176 (2b) defines “burn intensive care services” as “services provided in a unit designed to care for patients who have been severely burned.”

North Carolina has two designated burn intensive care services: a 21-bed unit at University of North Carolina Hospitals in Chapel Hill; and an eight-bed unit at North Carolina Baptist Hospital in Winston Salem. Each hospital received a certificate of need in 2012 to develop four new burn intensive care beds.

Definitions

The methodology projects bed need one year beyond the current reporting year. The current “projection year” is 2019.

The “planning inventory” is the number of beds used in need determination calculations. It includes licensed beds and beds for which a certificate of need has been issued.

Application of the Methodology

The SMFP shows a need for new burn intensive care services when each of the existing services reported an average annual occupancy rate of at least 80% during the last two reporting years.

Step 1: Determine whether to calculate a need determination.

- a. Sum the actual days of care reported across all facilities for each of the last two reporting years (*Table 7A-1, Columns H and I*).
- b. For each of the last two reporting years, multiply the total number of beds in the planning inventory across all facilities (*Table 7A-1, Column D*) by 365.25.

- c. Divide the result of Step 1.a by the result of Step 1.b for each year [days of care ÷ possible bed days] (*Table 7A-2, Columns H and I*).

Step 2: If Step 1.c. yields at least 80% utilization for both of the last two reporting years, calculate the overall number of beds needed as follows:

- a. Calculate the state's total four-year average annual change rate in days of care across all facilities using the five most recent reporting years (*Table 7A-1, Columns E-I*).
- b. Calculate the projected days of care for the projection year by adding 1 to the four-year average annual growth rate calculated in Step 2.a. Then multiply the result by the reporting year's total days of care across all facilities.
- c. Use the following formula to calculate the number of beds needed such that the utilization rate for the sum of the state's total licensed and approved burn intensive care beds is 80%. Round fractions of 0.5 or greater to the next highest whole number:

$$[(\text{Projected Days} \div 365.25) \div 0.8] - [\text{Total Beds}] = \text{Additional Beds Needed}$$

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

B. OPEN-HEART SURGERY SERVICES

Introduction

G.S. 131E-176 (18b) defines “open-heart surgery services” as “the provision of surgical procedures that utilize a heart-lung bypass machine during surgery to correct cardiac and coronary artery disease or defects.”

Table 7B lists the open-heart surgery procedures performed during the reporting year that used heart-lung bypass machines. This data shows a 0.45% decrease in open-heart surgeries from the previous reporting year. Table 7B and Figure 7B show reported numbers of open-heart surgery performed using heart-lung bypass machines for the last fourteen reporting years.

The SMFP does not have a methodology to project need for additional open heart surgery services. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to obtain the new service.

C. TRANSPLANTATION SERVICES

Bone Marrow Transplantation Services

Introduction

G.S. 131E-176 (2a) defines “bone marrow transplantation services” as “the process of infusing bone marrow into people with diseases to stimulate the production of blood cells.”

Bone marrow transplants may be autologous (using a patient’s own marrow, drawn early in the course of the disease), syngeneic (using marrow from an identical twin), or allogeneic (using marrow from an unrelated individual or from a relative other than an identical twin). For allogeneic bone marrow transplants, the transplant service must have the ability to ascertain that a donor’s human leucocyte antigens (HLA) correspond to those of the transplant patient. It is also more difficult to manage allogeneic transplant patients postoperatively than patients receiving other types of bone marrow transplants.

Table 7C-1 shows the number of bone marrow transplants performed for the last four reporting years.

Application of the Methodology

North Carolina needs a new bone marrow transplantation service when each of the existing services has performed at least 20 allogeneic transplants during the current reporting year. Allogeneic bone marrow transplants shall be provided only in facilities having the capability of doing HLA matching and of management of patients having solid organ transplants. Allogeneic bone marrow transplantation services shall be limited to academic medical center teaching hospitals.

Solid Organ Transplantation Services

Introduction

G.S. 131R-176 (24d) defines “solid organ transplantation services” as “the provision of surgical procedures and the interrelated medical services that accompany the surgery to remove an organ from a patient and surgically implant an organ from a donor.”

Table 7C-3 shows the number of solid organ transplants performed during the reporting year.

Basic Principles and Application of the Methodology

The offering of a solid organ transplant service is an organized, interrelated medical, diagnostic, therapeutic and/or rehabilitative activity that is integral to the prevention of disease or to the clinical management of a sick, injured, or disabled person.

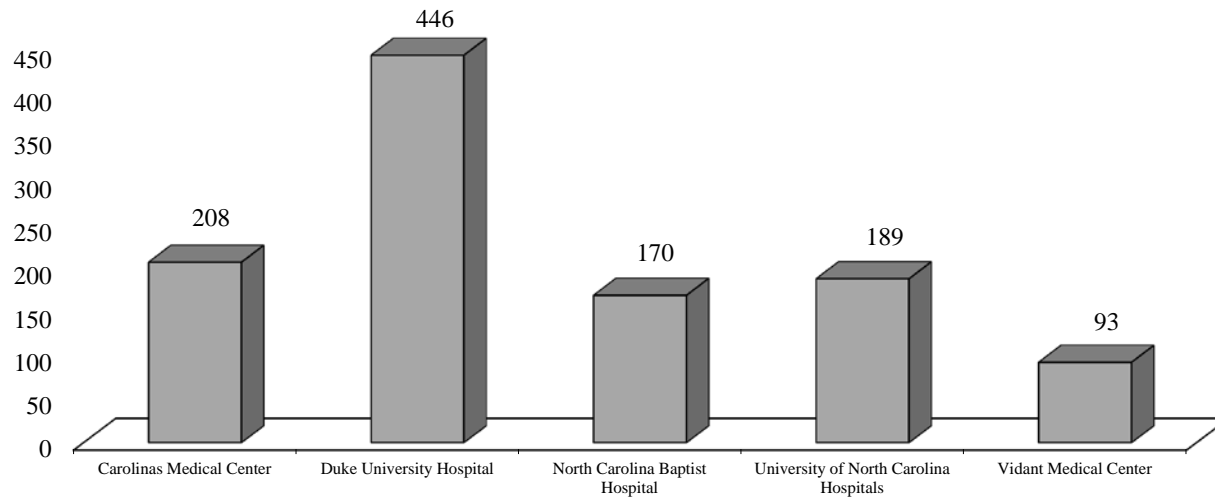

Solid organ transplant services shall be limited to academic medical center teaching hospitals. The introduction of a new solid organ transplantation program in a facility that already is performing other types of solid organ transplantation is not considered a new institutional health service.

The SMFP does not have a methodology to project need for additional solid organ transplantation services. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to obtain the new service.

Chapter 8:

Inpatient Rehabilitation Services

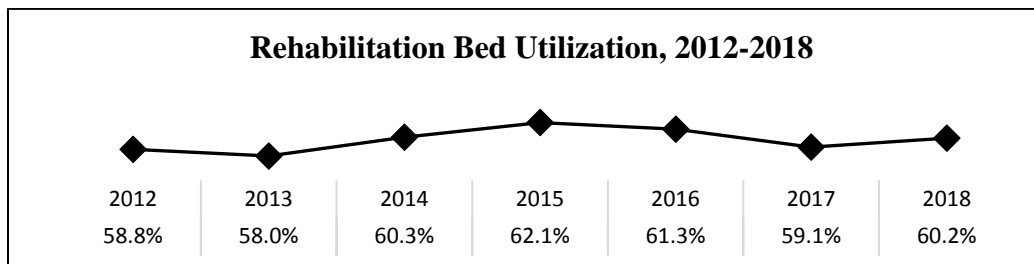

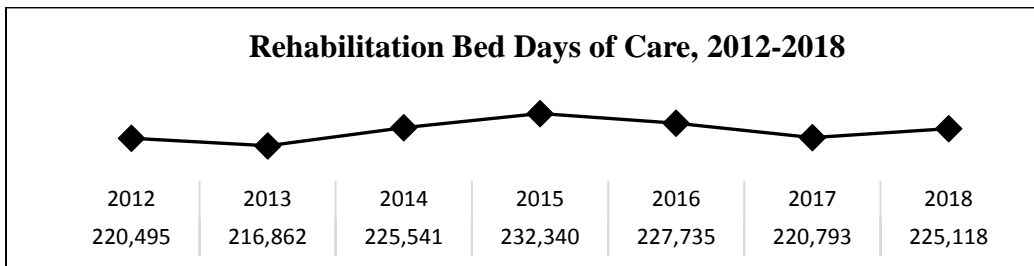

CHAPTER 8

INPATIENT REHABILITATION SERVICES

Introduction

G.S. 113E-176(22) defines a “rehabilitation facility” as a “public or private inpatient facility which is operated for the primary purpose of assisting in the rehabilitation of disabled persons through an integrated program of medical and other services which are provided under competent, professional supervision.”

The charts below summarize the rehabilitation bed days of care and utilization for the past seven years.

Definitions

A rehabilitation bed’s service area is the Health Service Area (HSA) in which the beds are located. Appendix A contains a map showing the six HSAs in the state.

The “reporting year” is October 1 through September 30. The “current” reporting year is October 1, 2017 through September 30, 2018.

The methodology projects bed need for the SMFP publication one year beyond the current reporting year. The “projection year” is 2019.

The “planning inventory” is the number of beds used in need determination calculations. It is the number of licensed beds as of the last day of the reporting year, plus any new beds approved by CON that are under development as of the last day of the reporting year, plus placeholders for any beds from previous SMFPs for which certificates have not yet been issued, minus any beds delicensed after the end of the reporting year.

Changes from Previous Plans

This chapter contains no substantive changes from the previous State Medical Facilities Plan. However, the chapter includes substantial technical edits.

Basic Principles

1. The scope of services covered is limited to rehabilitation services provided to people who are physically disabled. Physical rehabilitation services exclude mental health and substance use disorder services, but include those mental health services needed by individuals primarily suffering from physical injury or disease, and rehabilitation services provided to people who are cognitively disabled as a result of physical injury or disease.
2. The combination of component services required to meet the needs of the individual is provided using an interdisciplinary approach and continues as long as, within a reasonable period of time, significant and observable improvement toward established goals is taking place. Where necessary, these services are provided through a spectrum of care using a system of case management.
3. Inpatient rehabilitation facilities' beds are located in general acute care or rehabilitation hospitals to ensure that there is available medical back-up for medical emergencies.

Basic Assumptions of the Methodology

1. The HSA is the planning area for inpatient rehabilitation beds even though many patients elect to enter rehabilitation facilities outside the region in which they reside.
2. The bed need determination methodology is based on rehabilitation bed utilization for the last two reporting years.

Data Sources

The numbers of inpatient rehabilitation bed days of care for the last two reporting years come from the Hospital License Renewal Applications as submitted to the Division of Health Service Regulation of the North Carolina Department of Health and Human Services.

Application of the Methodology

The SMFP shows a need for additional inpatient rehabilitation beds when the total number of existing and certificate of need-approved inpatient rehabilitation beds in an HSA report an overall average annual occupancy rate of 80% or higher for the last two reporting years.

Step 1: Determine whether to calculate a need determination.

- a. Sum the actual days of care reported by all facilities in each HSA for each of the last two reporting years (*Table 8A, Columns J and K*).
- b. For each of the last two reporting years, multiply the total number of beds in the planning inventory across all facilities in each HSA by 365.25 to obtain the possible days of care. *Table 8A (Column G)* contains the planning inventory for the current reporting year. Adjust the calculation if the planning inventory for the previous reporting year is different.
- c. Divide the result of Step 1.a. by the result of Step 1.b. for each year and each HSA [actual days of care ÷ possible days of care] (*Table 8A, Columns L and M*).

Step 2: If Step 1.b. yields at least 0.8 (80% utilization) for both reporting years, calculate each HSA's three-year average annual change rate in days of care using the four most recent reporting years as follows:

- a. Calculate the projected days of care for the HSA by adding 1 to the three-year average annual change rate calculated in Step 2.a. Then multiply the result by the reporting year's days of care for the HSA.
- b. Use the following formula to calculate the number of beds needed in the HSA such that the utilization rate for the sum of the HSA's total licensed and approved beds is 0.8 (80%). Round resulting fractions greater than or equal to 0.5 to the next highest whole number:

$$[(\text{Projected Days of Care} \div 365.25) \div 0.8] - [\text{Total Beds}] = \text{Additional Beds Needed}$$

Chapter 9:

End Stage Renal Disease Dialysis Facilities

CHAPTER 9

END-STAGE RENAL DISEASE DIALYSIS FACILITIES

Introduction

End-stage renal disease (ESRD) dialysis facilities (also known as kidney disease treatment centers) provide dialysis services, which is defined in 10A NCAC 14C .2201(5) as “the artificially aided process of transferring body wastes from a person’s blood to a dialysis fluid to permit discharge of the wastes from the body.” There are two types of dialysis: hemodialysis and peritoneal dialysis. Hemodialysis is the form of dialysis in which the blood is circulated outside the body through an apparatus which permits the transfer of waste through synthetic membranes. Peritoneal dialysis is the form of dialysis in which a dialysis fluid is introduced into the person’s peritoneal cavity and is subsequently withdrawn. Peritoneal dialysis is performed in the patient’s home. Hemodialysis can be performed in the patient’s home (home hemodialysis) or in an ESRD facility (in-center hemodialysis).

Definitions

For the county need methodology, the service area is the county in which the dialysis station is located. Each county comprises a service area except for two multicounty service areas: Cherokee, Clay and Graham counties and Avery, Mitchell, and Yancey counties.

An “in-center” patient receives dialysis services at the ESRD facility only.

A “home” patient receives hemodialysis or peritoneal dialysis in his or her home, except for training that is provided in an ESRD facility.

ESRD facilities report utilization data once each year on December 31. The “current” reporting date for this SMFP is December 31, 2018.

“Utilization” is the number of in-center patients served by the facility during the last week of December.

The “projection” date is one year beyond the current reporting date. The projection date for this SMFP is December 31, 2019.

The “past five years reporting dates” are December 31 in 2014, 2015, 2016, 2017, and 2018.

Changes from the Previous Plan

The Semiannual Dialysis Report (SDR) will not be prepared after the release of the July 2019 SDR. Beginning with the 2020 State Medical Facilities Plan (SMFP), the county and facility need methodologies are fully incorporated into the annual healthcare planning process. In addition, ESRD facilities are now under the purview of the Acute Care Services Committee of the State Health Coordinating Council. As such, the previous Chapter 14 of the SMFP (End-Stage Renal Disease Dialysis Facilities) has moved to the Acute Care Services section of the SMFP and is now Chapter 9. Finally, the chapter has had technical edits and substantive edits to reflect these changes.

These changes will be evaluated after the first year of implementation of the modified facility need methodology.

Basic Principles

1. New facilities must have a projected need for at least 10 stations to be cost effective and to assure quality of care.
2. As a means of making ESRD services more accessible to patients, one goal of the N.C. Department of Health and Human Services is to minimize patient travel time to and from the facility. Therefore, end-stage renal disease treatment should be available within 30 miles from the patients' homes. In areas where it is apparent that patients currently travel more than 30 miles for in-center dialysis, proposed new facilities that would serve patients who are farthest away from operational or approved facilities should receive favorable consideration.
3. The State Health Coordinating Council encourages applicants for dialysis stations to provide or arrange for: home training and backup for facility-based patients suitable for home dialysis or in a facility that is a reasonable distance from the patient's residence; ESRD dialysis service availability at times that do not interfere with ESRD patients' work schedules; and services in rural areas.

Assumptions of the Methodology

1. Home patients will not be included in the determination of need for new stations. Home patients include those that receive hemodialysis or peritoneal dialysis in their home.
2. Facilities may have at least one dialysis station dedicated to training of home dialysis patients. If so, these stations are included in the planning inventory.
3. Under the facility need methodology, any facility at 75% utilization or greater as of the current reporting date may apply to add dialysis stations.
4. Facilities that are eligible to add stations based on the facility need methodology may add the number of stations calculated by the methodology, up to a maximum of 20 stations in a single calendar year.
5. Facilities certified and in operation at least 9 but less than 21 months do not have a need determination in the SMFP. Rather, they may apply to add stations based on Condition 1 in the Facility Need Methodology.

Data Sources

Data on the current number of dialysis facilities and stations comes from the Healthcare Planning and Certificate of Need Section and from the Acute and Home Care Licensure and Certification Section, Division of Health Service Regulation, N. C. Department of Health and Human Services. ESRD providers that operate certified dialysis facilities report data on the number of patients served to the Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section.

Application of the Methodologies

ESRD services have two methodologies: the county need methodology projects need for the county; the facility need methodology projects need for a specific facility. When a county need determination exists, any qualified applicant may apply to add stations in an existing facility or apply to develop a new facility. When a facility need determination exists, only the facility that generated the need may apply to add stations.

County Need Determination Methodology (Table 9C)

- Step 1: Multiply the average annual change in the total number of dialysis patients resident in each county for the past five reporting dates (*Columns B through F*) by the county's total number of patients for the current reporting date (*Column F*).
- Step 2: Add the result of Step 1 to the county's total number of patients for the current reporting date (*Column F*). The sum is the county's projected total number of patients (*Column H*).
- Step 3: Multiply the percentage of each county's total patients who were home dialysis patients (*Column I*) on the current reporting date (*Column J*) by the county's projected total patients as of the projection date (*Column H*). Subtract the product (*Column K*) from the county's projected total patients. The remainder is the county's projected in-center dialysis patients (*Column L*).
- Step 4: Divide the result of Step 3 by 3.2. The quotient is the projected number of in-center dialysis stations needed in the county (*Column M*).
- Step 5: Subtract from the result of Step 4 (*Column M*) the county's number of stations certified for Medicare, stations that are certificate of need-approved and awaiting certification, stations awaiting resolution of certificate of need appeals, and the number represented by need determinations in previous State Medical Facilities Plans for which certificate of need decisions have not been made (*Column N*). The remainder is the county's projected station surplus or deficit (*Column O*).
- Step 6: If the result of Step 5 is 10 or greater and the SMFP shows that utilization of each dialysis facility in the county is 80% or greater, the county station need determination is the same as the projected station deficit rounded to the nearest whole number (round fractions of 0.5 or greater to the next highest whole number) (*Column P*). If a county's projected station deficit is less than 10 or if the utilization of any dialysis facility in the county is less than 80%, the county has no need for additional stations. When a county has a need determination, applicants may apply for any number of stations up to and including the number of stations in the need determination.

Facility Need Determination Methodology

A dialysis facility located in a county that has no county need determination in the current SMFP may apply for additional stations under one of the two following conditions.

Condition 1: Pertains to “new” facilities and “small” facilities.

- a. “New” facilities are defined as those facilities certified and in operation at least nine but less than 21 months as of the “data cut-off date” for the current SMFP. This date is the last date on which the Agency updates data before publication of the current SMFP; the date is listed on the inside cover page of the SMFP. The number of days in a month is calculated as $365.25/12$. (The “data cut-off date” occurs during the first week in October, but the actual date varies by year.) Facilities meeting this definition will be identified as such in Table 9B of the SMFP.

“Small” facilities are defined as those facilities with fewer than a total of 13 certified stations, which includes CON-approved stations and stations applied for, as of the data cut-off date for the current SMFP.

The facility's “current” reported utilization must be at least 3.0 patients per station in a given week. For purposes of Condition 1 only, “current” means in-center utilization as of

a reporting date no more than 90 days before the date the certificate of need application is submitted.

- b. If the facility meets Condition 1.a, use the following definitions and calculations to determine the number of stations needed:
 - i. Use the “current” and “previous” reporting dates to calculate the facility’s growth in utilization. For purposes of Condition 1 only, “previous” means in-center utilization as of a reporting date six months before the “current” reporting date.
 - ii. Subtract the facility’s number of in-center dialysis patients on the previous reporting date from the facility’s number of in-center dialysis patients on the current reporting date. The difference is the net in-center change for six months.
 - iii. Divide the result of Condition 1.b.ii by the number of in-center patients from the previous reporting date. Then multiply that result by 2 to determine the projected annual growth rate.
 - iv. Multiply the result from Condition 1.b.iii by the facility’s number of in-center patients as of the current reporting date.
 - v. Add the result from Condition 1.b.iv to the number of in-center patients as of the current reporting date.
 - vi. Divide the result of Condition 1.b.v by 2.8.
 - vii. Subtract the sum of (a) the facility’s number of stations as of the current reporting date and (b) the number of pending new stations for which a certificate of need application has been approved or is under review from the result of Condition 1.b.vi. The remainder is the number of stations needed. Round fractions of 0.5 or greater to the next highest whole number.
- c. The facility may apply for any number of stations up to the number calculated in Condition 1.b.vii, up to a maximum of 10 stations.
- d. New facilities and small facilities may be eligible to apply to add stations in one Category D.1 certificate of need review cycle. That is, a new facility may apply to add stations in any Category D.1 review cycle, but it can apply only once during the period that it is defined as a new facility (see Chapter 3). A small facility may apply to add stations in any Category D.1 review cycle, but it can apply only once during a calendar year.

Condition 2: Pertains to facilities certified and in operation at least 21 months as of the data cut-off date for the current SMFP (*Table 9B*).

- a. A facility may add stations if its utilization reported in the current SMFP is at least 75%, or 3.0 patients per station per week or greater [$((\text{Column L}/\text{Column K})/4) = \text{Column M}$].
- b. If the facility’s utilization reported in the current SMFP meets Condition 2.a, use the following calculations to determine the number of stations needed:

- i. Subtract the facility's number of in-center dialysis patients reported in the previous SMFP from the number of in-center dialysis patients reported in the current SMFP (*Column L*). The difference is the net in-center change for one year. For the 2020 SMFP only, use Table B in the July 2018 SDR rather than the previous SMFP to obtain the number of in-center dialysis patients for the previous reporting year.
 - ii. Divide the result of Condition 2.b.i by the number of in-center patients from the previous SMFP to determine the projected annual growth rate.
 - iii. Multiply the result from Condition 2.b.ii by the facility's number of in-center patients reported in the current SMFP (*Column L*).
 - iv. Add the result of Condition 2.b.iii to the number of in-center patients reported in the current SMFP.
 - v. Divide the result of Condition 2.b.iv by 2.8.
 - vi. Subtract the sum of (a) the facility's number of stations as of the current reporting date (*Column J*) and (b) the number of pending new stations for which a certificate of need application has been approved or is under review from the result of Condition 2.b.v. The remainder is the number of stations needed (*Column N*). Round fractions of 0.5 or greater to the next highest whole number.
- c. The facility may apply to add stations to meet the need calculated in Condition 2.b.vi, up to a maximum of 20 stations. When a facility has a need determination, applicants may apply to add any number of stations up to and including the number of stations in the need determination. However, applicants must demonstrate the need for the number of stations applied for in the CON application. When a facility has a need determination, the applicant may apply to add stations up to three times per calendar year, but the total stations applied for in a single calendar year cannot exceed the total number of stations in the facility's need determination, as calculated in Condition 2.b.vi.

Table 9D: Dialysis Station Need Determination by County*

County Service Area	Dialysis Station Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
Orange****	4	March 16, 2020	April 1, 2020
It is determined, based on the County Need portion of the methodology, that there is no need anywhere else in the state and no other reviews are scheduled.			

* Any person can apply to meet the need, not just the health service facility or facilities that generated the need.

** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

*** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**** In response to a petition, the State Health Coordinating Council approved the adjusted need determination for four outpatient dialysis stations located on the campus of an acute care hospital in Orange County. Certificate of Need shall impose a condition requiring the approved applicant to document that it has applied for Medicare certification no later than three (3) years from the effective date on the certificate of need.

Chapter 10:

Nursing Care Facilities

CHAPTER 10

NURSING CARE FACILITIES

Introduction

G.S. 131E-176(17b) defines a “nursing home facility” as “a health service facility whose bed complement of health service facility beds is composed principally of nursing home facility beds.”

Definitions

A nursing care bed’s service area is the county in which the bed is located. Each of the 100 counties in the state is a separate service area.

The “reporting year” is October 1 through September 30. The current reporting year is October 1, 2017 through September 30, 2018.

The methodology projects bed need three years beyond the publication year of the current SMFP. The current “projection year” is 2023.

The “planning inventory” is the number of beds used in need determination calculations. It is the number of licensed beds plus any new beds approved by CON that are under development, minus any exclusions (see below) and beds to be relocated out of the county.

Changes from the Previous Plan

This chapter contains no substantive changes from the previous State Medical Facilities Plan. However, the chapter includes substantial technical edits.

Basic Principles

1. The methodology should project need three years beyond the current SMFP year because that is the least amount of time required to bring a new or expanded facility into service.
2. Any advantages to patients that may arise from competition will be fostered by policies which lead to the establishment of new provider institutions. Consequently, whenever feasible, need determinations should be for at least 90 beds. However, such allocations do not always result in new entities.
3. Counties whose deficits represent at least 10% of their total needs (deficit index) and who report an occupancy rate of licensed beds in the county of at least 90%, excluding continuing care retirement communities, should receive need determinations even though such increments may be too small to encourage establishment of new facilities.
4. A goal of the planning process is a reasonable level of parity among people in their geographic access to nursing home facilities.

Data Sources

The North Carolina Office of State Budget and Management provides projected numbers of North Carolina residents for the projection year by county.

Estimates of active duty military personnel come from the category of “Employment Status – Armed Forces” from the most recent American Community Survey 5-Year Estimates.

Utilization data comes from the current and four immediately previous reporting years' License Renewal Applications to Operate a Nursing Home and the Nursing Care Facility/Unit Beds: Annual Data Supplement to Hospital License Applications, as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

Assumptions of the Methodology

1. Planning inventory and need determination calculations exclude all beds and days of care for:
 - a. nursing care beds converted to care for head injury or ventilator-dependent patients;
 - b. nursing care beds developed pursuant to Policy NH-2; and
 - c. nursing care beds transferred from state psychiatric hospitals to the community pursuant to Policy NH-5.
2. The inventory excludes beds and the occupancy rate calculation excludes days of care for out-of-county patients served by facilities operated by religious or fraternal organizations.
3. The methodology excludes the estimated active duty military population from the county's population for any county with more than 500 active duty military personnel.
4. The methodology uses the county bed use rate as the utilization measure in determining needs. Bed use rates are calculated per 1,000 population per county. Each county bed rate is calculated using a five-year average annual change projected forward three years beyond the current SMFP publication year. For any county with an average annual change rate that is one-half of one standard deviation above or below the statewide average annual change rate, the bed use rate calculations substitute the statewide rate.
5. The methodology uses the higher of two different occupancy rate calculations to obtain the need determination with the greatest advantage. The adjusted occupancy rate for each county is calculated using the higher of the median of all facilities' occupancy rates in a county or a countywide occupancy, whichever is higher. The calculations remove the equivalent days of care for the initial occupancy from calculations for beds that have been excluded from the inventory.

Application of the Methodology

Table 10A shows the inventory data and Table 10B shows the patient, population and bed use data that form the basis for the calculations discussed in the following steps. Table 10C shows projected bed utilization, bed surpluses/deficits and occupancy rates that are used to determine bed need.

Step 1: Multiply the county bed use rates (*Table 10B, Column G and Table 10C, Column B*) by each county's corresponding projected civilian population in thousands for the projection year (*Table 10C, Column C*) to calculate the projected bed utilization (*Table 10C, Column D*).

Step 2: For each county, divide the projected bed utilization by a 95% vacancy factor (*Table 10C, Column E*).

Step 3: For each county, calculate the planning inventory (*Table 10C, Column H*) by adjusting the licensed beds by the number of: CON-Approved/License Pending beds, by beds available in prior Plans that have not been CON-approved (*Table 10C, Column F*), and by exclusions from the county's inventory, if any (*Table 10C, Column G*). For each county, subtract the projected bed utilization with applied vacancy factor

derived in Step 2 (*Table 10C, Column E*), from the planning inventory (*Table 10C, Column H*). The result is the county's surplus or deficit (*Table 10C, Column I*).

Step 4: Determine need for each county.

- a. For a county with a deficit of 71 to 90 beds, if the adjusted occupancy of licensed beds in the county is 90% or greater based on utilization data reported for the current reporting year (*Table 10C, Column K*), the need determination is 90 beds (*Table 10C, Column L*).
- b. For a county with a deficit of 91 or more beds, if the adjusted occupancy of licensed beds in the county is 90% or greater based on utilization data reported for the current reporting year (*Table 10C, Column K*), the need determination is the amount of the deficit rounded to 10. The maximum need determination for each county is 150 beds (*Table 10C, Column L*).
- c. For any other county with a deficit, calculate the county's deficit index by dividing the amount of the deficit by the result of Step 2 (*Table 10C, Column E*). If the county's deficit (deficit index) is 10% or more of its projected utilization (*Table 10C, Column J*), and the adjusted occupancy of licensed beds in the county is 90% or greater for the current reporting year (*Table 10C, Column K*), the need determination is the amount of the deficit rounded to 10. The maximum need determination for each county is 150 beds.
- d. For purposes of rounding need determinations, numbers greater than 10 and ending in one to four round to the next lower number divisible by 10. Numbers ending in five to nine round to the next higher number divisible by 10.

Table 10A: Inventory of Nursing Home and Hospital Nursing Care Beds

Grand Totals		45,241	1,011	46,252	317	0	-37	0	46,532	3,134	43,398

Note: Methodology Inventory Identifiers

* State or federal facility

** Facilities whose beds are licensed, but whose occupancy is reported as 0 due to renovation, replacement, and/or a decision not to delicense beds. These beds are counted in the planning inventory.

Note: Methodology Planning Inventory Exclusion Reminders

* State and federal facilities excluded from planning inventory

-- Head injury beds, ventilator beds, bed transfers from state psychiatric hospitals, and a percentage of out-of-area placements in non-profit religious/fraternal facilities are excluded from the planning inventory.

- Continuing Care Retirement Communities (CCRCs) developed under policy NH-2 have 100% of their nursing home beds excluded from the planning inventory and occupancy calculation.

Note: Methodology Occupancy Reminders

* State and federal facilities are not counted in occupancy calculations.

** Facilities whose beds are licensed, but whose occupancy is reported as 0 due to renovation, replacement and/or a decision not to decertify beds, are counted in occupancy calculations.

*** Pursuant to policy AC-4, a total of 37 beds from two WakeMed nursing care facilities were approved for re-conversion to acute care beds at WakeMed Raleigh - 24 beds from WakeMed Cary Hospital's Fuquay-Varina Outpatient and Skilled Nursing Facility and 13 beds from WakeMed Zebulon/Wendell Outpatient and Skilled Nursing Facility. In addition, PruittHealth-Raleigh (formerly UniHealth Post-Acute Care) received approval to relocate 18 beds to its facility from these two WakeMed nursing care facilities - 12 beds from WakeMed Cary/Fuquay-Varina and 6 beds from WakeMed Zebulon/Wendell. After these re-conversions and transfers are complete, no beds will remain at WakeMed Cary/Fuquay-Varina (36) and WakeMed Zebulon/Wendell (19) nursing care facilities.

**** 51 of 60 beds have been transferred. 31 were transferred to Universal Healthcare/Fuquay-Varina and 20 beds were transferred to Universal Healthcare/North Raleigh.

* Projected Bed Utilization with Vacancy Factor is calculated by dividing Projected Bed Utilization by 95%.

** NH-2 beds are 100% excluded.

*** Calculated using higher of the median or weighted mean.

Table 10D: Nursing Care Bed Need Determination

County	HSA	Nursing Care Bed Need Determination*	Certificate of Need Application Due Date**	Certificate of Need Beginning Review Date
It is determined that there is no need anywhere in the state and no reviews are scheduled.				

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the Application due date. The filing deadline is absolute (see Chapter 3).

Chapter 11:

Adult Care Homes

CHAPTER 11

ADULT CARE HOMES

Introduction

G.S. 131E-176(1) defines an “adult care home” as “a facility with seven or more beds licensed under G.S. 131D-2 or Chapter 131E of the General Statutes that provides residential care for aged or disabled persons whose principal need is a home which provides the supervision and personal care appropriate to their age and disability and for whom medical care is only occasional or incidental.”

Before enactment of Senate Bill 937 in 2001 to regulate the development of adult care homes under the Certificate of Need law, legislation ratified in 1997 (S. L. 1997-443) placed a statewide moratorium on the development of new adult care home beds. However, the 1997 legislation allowed for the development of additional adult care home beds under defined circumstances. Some of these beds remain eligible to be developed pursuant to settlements of contested cases. These “settlement” beds are also subject to conditions set out in the terms of the controlling settlement agreements. The planning inventory of adult care home beds included in the current North Carolina State Medical Facilities Plan (SMFP) is subject to change based on whether conditions have been met to allow for development of the settlement beds. In addition, litigation may result in changes to the inventory.

Definitions

An adult care home bed’s service area is the county in which the adult care home bed is located. Each of the 100 counties is a separate service area.

The “reporting year” is August 1 through July 31. The “current” reporting year is August 1, 2017 through July 31, 2018.

The methodology projects bed need three years beyond the publication year of the current SMFP. The current “projection year” is 2023.

The “planning inventory” is the number of beds used in need determination calculations. It is the number of licensed beds, plus any new beds approved by CON that are under development, minus any exclusions (see below) and beds to be relocated out of the county.

Changes from the Previous Plan

This chapter contains no substantive changes from the previous SMFP. However, the chapter includes substantial technical edits.

Basic Principles

1. The methodology should project need three years beyond the SMFP year because at least that amount of time is required to bring a new or expanded facility into service.
2. A goal of the planning process is a reasonable level of parity among individuals in their geographic access to adult care home facilities.

Data Sources

The North Carolina Office of State Budget and Management provides projected numbers of North Carolina residents for the projection year, by county and age group.

Estimates of the active duty military population come from the category of “Employment Status-Armed Forces” from the most recent American Community Survey 5-Year Estimates.

The methodology combines utilization data for the current and four immediately previous reporting years, as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation from: License Renewal Applications to Operate a Nursing Home; Nursing Care Facility/Unit Beds Annual Data Supplement to Hospital License Applications; and License Renewal Applications for Adult Care Homes.

Assumptions of the Methodology

1. The inventory excludes 100% of the beds developed as part of a qualified continuing care retirement community (*Table 11E*), including those developed before enactment of Policy LTC-1; the occupancy rate calculation excludes their associated days of care.
2. The methodology excludes the estimated active duty military population under the age of 35 from the county’s population for any county with more than 500 active duty military personnel.
3. The methodology uses a county bed use rate as the utilization measure in determining needs. Bed use rates are calculated per 1,000 population per county. Each service area bed rate is calculated using a five-year average annual change rate projected forward three years beyond the current SMFP publication year. Any county with an average annual change rate that exceeds the average plus one-half of one standard deviation of all county rates will receive a rate equal to the average plus one half of a standard deviation of all county rates.
4. The methodology uses the highest of four occupancy rate calculations such that the need determination in each service area reflects the highest of the average or the median of all facilities’ occupancy rates based on a one-day census in a county, or the average or median of all the facilities’ occupancy rates based on annual days of care in a county.

Application of the Methodology

Table 11A shows the inventory data and Table 11B shows the patient, population and bed use data that form the basis for the calculations discussed in the following steps. Table 11C shows projected bed utilization, bed surpluses/deficits and occupancy rates that are used to determine bed need.

Step 1: Multiply the county bed use rates (*Table 11B, Column G and Table 11C, Column B*) by each county’s corresponding projected civilian population in thousands for the projection year (*Table 11C, Column C*) to calculate the projected bed utilization.

Step 2: For each county, divide the projected bed utilization by a 95% vacancy factor (*Table 11C, Column E*).

Step 3: For each county, calculate the planning inventory (*Table 11A, Column K*) by adjusting the number of licensed beds (*Table 11A, Column G*) for: license pending beds (*total of Table 11A, Columns H and I*); and beds available in prior SMFPs that have not been CON approved (*Table 11A, Column J*).

Step 4: For each county, subtract the projected bed utilization derived in Step 2 (*Table 11C, Column E*) from the planning inventory derived in Step 3 (*appears in Table 11A, Column K and Table 11C, Column F*). The result is the service area’s surplus or deficit (*Table 11C, Column G*).

Step 5: Determine each county’s bed occupancy rate (*Table 11C, Column I*) by calculating occupancy according to the following four methods and then select the highest of the four rates:

- a. compute the average occupancy rate using the one-day census for all facilities in the service area;
- b. compute the median occupancy rate using the one-day census for all facilities in the service area;
- c. compute the average occupancy rate using the annual days of care for all facilities in the service area; and
- d. compute the median occupancy rate using the annual days of care for all facilities in the service area.

Step 6: Determine each county's need.

- a. For any county with a deficit, calculate the county's deficit index by dividing the deficit (*Table 11C, Column G*) by the result of Step 2 (*Table 11C, Column E*).
- b. If any county's deficit index (*Table 11C, Column H*) is from 10% up to, but not including, 50%, and the average occupancy of licensed beds in the county is 80% or greater, the need determination is the amount of the deficit rounded to the nearest 10 (*Table 11C, Column J*);
- c. If any county's deficit index is 50% or more, the need determination is the amount of the deficit rounded to the nearest 10 (*Table 11C, Column J*);
- d. For purposes of rounding need determinations, numbers greater than 10 and ending in one to four round to the next lower number divisible by 10, and numbers ending in five to nine round to the next higher number divisible by 10.

For reference, Table 11E lists adult care beds developed as part of a qualified continuing care retirement community. Also, for reference, Table 11F lists the nursing homes with six or fewer adult care home beds.

* The 2017 patient data point for Hyde County is hypothetical and based on the proportion of the Hyde/Tyrrell service area 2017 population that was located in Hyde County (57.7%) of the total number of ACH patients served by Tyrrell House according to the 2017 facility census data (42). Therefore, the methodology assumes that 57.7% of the 42 patients in Tyrrell House were from Hyde County.

** The 2017 patient data point for Tyrrell County is hypothetical and based on the proportion of the Hyde/Tyrrell service area 2017 population that was located in Tyrrell County (42.3%) of the total number of ACH patients served by Tyrrell House according to the 2017 facility census data (42). Therefore, the methodology assumes that 42.3% of the 42 patients in Tyrrell House were from Tyrrell County.

* Projected Bed Utilization with Vacancy Factor is calculated by dividing Projected Bed Utilization by 95%.

** Calculated using highest of the median or weighted mean of the one-day census or the total days of care of facilities in the service area.

Table 11D: Adult Care Home Bed Need Determination*

County	HSA	Adult Care Home Bed Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
Gates	VI	100	February 17, 2020	March 1, 2020
Pamlico	VI	90	July 15, 2020	August 1, 2020

Tyrrell	VI	80	July 15, 2020	August 1, 2020
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.				

- * Any person can apply to meet the need, not just the health service facility or facilities that generated the need.
- ** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).
- *** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. The filing deadline is absolute (see Chapter 3).

Chapter 12:

Home Health Services

CHAPTER 12

HOME HEALTH SERVICES

Introduction

G.S. 131E-176(12) defines a “home health agency” as “a private organization or public agency, whether owned or operated by one or more persons or legal entities, which furnishes or offers to furnish home health services.” Home health services are outpatient services that patients may receive in their own home or in a health care facility. The definition also specifies the activities that comprise home health services, including: part-time or intermittent nursing care; physical, occupational, or speech therapy; medical social services, home health aide services; other therapeutic services and; medical supplies and appliances.

Definitions

A home health “agency or office” is an agency or office that meets the definition in G.S. 131E-176(12), as quoted above.

A Medicare-certified home health agency or office’s service area is the county in which the agency or office is located. Each of the 100 counties in the state is a separate service area.

The “reporting year” for a home health agency or office is either October 1 through September 30 or July 1 through June 30; facilities may choose their reporting period. The “current” reporting year is either October 1, 2017 through September 30, 2018, or July 1, 2017 through June 30, 2018.

The methodology projects need one year beyond the publication year of the current State Medical Facilities Plan. The current projection year is 2021.

Changes from the Previous Plan

This chapter contains no substantive changes from the previous State Medical Facilities Plan. However, the chapter includes substantial technical edits.

Basic Principles

The North Carolina State Health Coordinating Council encourages home health applicants to:

1. provide an expanded scope of services (including nursing, physical therapy, speech therapy, and home health aide services;
2. provide the widest range of treatments within a given service;
3. offer services seven days per week as required to meet patient needs; and
4. address special needs populations.

Data Sources

Patient origin and utilization data for the three previous reporting years comes from the Home Health Agency Annual Data Supplement to License Application for each reporting year, as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation (*Table 12A*).

The North Carolina Office of State Budget and Management provides county population projections for the reporting and projection years (*Table 12B*).

Estimates of active duty military personnel come from the category of “Employment Status – Armed Forces” from the most recent American Community Survey 5-year Estimates.

Assumptions of the Methodology

1. The projection year is one year beyond the Plan year to allow time for completion of the certificate of need review cycles and for staffing of new agencies or offices.
2. Data aggregation and projections use four age groups (under 18, 18-64, 65-74, and 75 and over) to allow a more definitive examination of trends in services to children and to senior adults.
3. The methodology uses current age-specific use rates as the basis for projection of future need.
4. The methodology excludes the estimated active duty military population in the 18-64 age group for any county with more than 500 active duty military personnel.
5. The methodology calculates the average annual change in use rates per 1,000 population over the previous three reporting years for each age group in each Councils of Governments (COG) region. The calculations apply this result to the current use rates per 1,000 population for each county within each COG region to calculate changes in the number of patients projected to need home health services by the projection year.
6. A county needs a new home health agency or office if the projected unmet need in a single county is 325 patients or more.
7. When the methodology or policy determines a need for additional agencies or offices, the three annual Plans following certification of the agencies or offices developed based on that need, count the greater of 325 patients or the actual number of patients served as part of the total patients served by the new agency or office.

Application of the Methodology

Step 1: For each COG region and each age group, calculate the Average Annual Change Rate in Number of Patients (*Table 12B, Columns B, E, and H*) over the three previous reporting years (*Table 12B, Column K*).

Step 2: For each COG region and each age group, calculate the Average Annual Change Rate in Use Rates per 1,000 Population (*Table 12B, Columns D, G, and J*) over the three previous reporting years (*Table 12B, Column L*). The use rates for the current reporting year are:

Age Group	2018 Use Rate
Under Age 18	0.87
Ages 18 – 64	9.89
Ages 65 – 74	61.41
Ages 75 & Over	165.63

Step 3: For each county, for each age group, total the number of home health patients served during the reporting year (*Table 12C, Column B*).

- Step 4: For each county, multiply the COG's Average Annual Change Rate in Number of Patients for each age group from the affiliated COG region by the number of patients for each age group from Step 3 (*Table 12C, Column C*).
- Step 5: Multiply the product from Step 4 by three and add that product to the results of Step 3 for each age group. The result is the projected number of patients in each age group during the projection year (*Table 12C, Column D*).
- Step 6: For each county and age group, divide the number of patients served during the reporting year (*Table 12C, Column B*) by the county population in thousands for each age group to obtain county use rates per 1,000 population (*Table 12C, Column E*).
- Step 7: Multiply the COG's Average Annual Rate of Change in Use Rate per 1,000 Population (*Table 12C, Column F*) for each age group from the affiliated COG region by the county use rates per 1,000 population for each age group from Step 6 (*Table 12C, Column E*).
- Step 8: Multiply the product from Step 7 by three and add that product to the results from Step 6 for each age group. The result is the projected use rate per 1,000 population in the projection year for each age group (*Table 12C, Column G*).
- Step 9: For the projection year for each age group, multiply the projected use rate per 1,000 population (*Table 12C, Column G*) by the projected population (*Table 12C, Column H*). The result is the projected number of patients during the projection year (*Table 12C, Column I*).
- Step 10: In counties that have a need determination for additional agencies or offices, the three annual Plans following certification of the agencies or offices developed based on that need, count the greater of 325 patients or the actual number of patients served as part of the total patients served by the new agency or office. (*Table 12D, Column B*).
- Step 11: For each county, sum the projected number of patients in the projection year (from Step 5) across all four age groups and the adjustment placeholder (from Step 10), if applicable. The result is an Adjusted Projected Total Patients for each county for the projection year (*Table 12D, Column C*).
- Step 12: For each county, sum the projected number of patients in the projection year (from Step 9) across all four age groups. The result is the Projected Utilization in the projection year (*Table 12D, Column D*).
- Step 13: For each county, subtract the Projected Utilization in the projection (*Table 12D, Column D*) from the Adjusted Total Projected Patients (*Table 12D, Column C*). The remainder is the projected additional number of patients who will need home health services in the projection year (*Table 12D, Column E*). A deficit (unmet need) shows as a negative number of patients. A remainder of 0.50 or greater rounds to the next highest whole number. A remainder of less than 0.50 rounds to the next lowest whole number.
- Step 14: For each county, each projected deficit of 325 patients results in a need determination for one new Medicare-certified agency or office (*Table 12D, Column F*).

**Table 12E: Medicare-certified Home Health Agency or Office
Need Determination**

County Service Area	Home Health Agency/Office Need Determination*	Certificate of Need Application Due Date**	Certificate of Need Beginning Review Date
It is determined that there is no need anywhere in the state and no reviews are scheduled.			

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

Chapter 13:

Hospice Services

CHAPTER 13

HOSPICE SERVICES

Introduction

G.S. 131E-176(13a) defines “hospice” as “any coordinated program of home care with provision for inpatient care for terminally ill patients and their families.” A “hospice inpatient facility” is “a freestanding licensed hospice facility or a designated inpatient unit in an existing health service facility which provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of terminally ill patients and their families in an inpatient setting” (G.S. 131E 176 (13b)). A “hospice residential care facility” is “a freestanding licensed hospice facility which provides” the same services as an inpatient facility but in a “group residential setting” (G.S. 131E 176 (13c)).

Definitions

A hospice office service area is the county in which the hospice office is located. Each of the 100 counties in the state is a separate hospice office service area.

A hospice inpatient facility bed service area is the county in which the bed is located. Each of the 100 counties in the state is a separate hospice inpatient facility bed service area.

The “reporting year” for hospice facilities and offices is either October 1 through September 30 or July 1 through June 30; facilities may choose their reporting period. The “current” reporting year is either October 1, 2017 through September 30, 2018, or July 1, 2017 through June 30, 2018.

The hospice home care office methodology projects needs one year beyond the publication year of the current SMFP. The “projection year” for hospice home care offices is 2021.

The hospice inpatient bed methodology projects needs three years beyond the publication year of the current SMFP. The “projection year” for hospice inpatient beds is 2023.

The SMFP uses county death rates for the most recent five calendar years available. The current SMFP uses data from 2013-2017.

The methodology bases many calculations on the “three most recent years” of deaths served. For the current SMFP, these years are 2016, 2017 and 2018.

Changes from the Previous Plan

This chapter contains no substantive changes from the previous State Medical Facilities Plan. However, the chapter includes substantial technical edits.

Data Sources

Patient origin and utilization data for the current reporting year come from the Hospice Agency Annual Data Supplement to Licensure Application for the reporting year, as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation (*Table 13A*).

The North Carolina Office of State Budget and Management provides county population estimates and projections.

Estimates of the active duty military population come from the category of “Employment Status-Armed Forces” in the most recent American Community Survey 5-year Estimates.

The number of deaths and crude (unadjusted) death rates per 1,000 population come from “North Carolina Vital Statistics, Vol. 1” published by the North Carolina Department of Health and Human Services, State Center for Health Statistics.

Assumptions of the Methodologies

1. The methodologies exclude the active duty military population for any county with more than 500 estimated active duty military personnel.
2. Hospice Home Care Offices
 - a. The methodology uses county mortality (death) rates for the most recent five years as the basis for hospice patient need projection. The five-year death rate is an indicator of deaths from all sites in each county.
 - b. Because previous years’ data forms the basis for projections, the methodology calculates a two-year trailing average growth rate in statewide number of deaths served and applies it to the current reported number of deaths served to project changes in the capacity of existing agencies to serve deaths from each county by the projection year. Projected hospice deaths served will not exceed 60% of total deaths.
 - c. To calculate the median projected hospice deaths, the methodology applies a projected statewide median percentage of deaths served by hospice to projected deaths in each county. The methodology calculates the projected statewide median percentage of deaths served by applying the two-year trailing average growth rate in the statewide median percentage of deaths served over the most recent three years to the current statewide median percentage of deaths served.
 - d. A need for an additional hospice home care office exists if: the county’s deficit is 90 patients or more and the number of licensed hospice home care offices located in the county is three or fewer per 100,000 population.
3. Hospice Inpatient Beds
 - a. The methodology calculates the two-year trailing average growth rate in statewide hospice admissions over the three most recent reporting years and applies it to the current reported number of hospice admissions to project total hospice admissions.
 - b. Choose the lower of the statewide median average length of stay per admission or each county’s average length of stay per admission to form the basis for projecting inpatient days for each county.
 - c. A two-year trailing average statewide inpatient utilization rate of the total estimated days of care in each county forms the basis for projecting days of care in licensed hospice inpatient facility beds.
4. Hospice Residential Beds

This category of beds does not have a methodology to project need. A certificate of need is required.

Application of the Methodologies

Hospice Home Care Offices:

- Step 1: Enter the five-year mortality rate per 1,000 population for each county (*Table 13B, Column B*).
- Step 2: Enter the estimated population of each county for the projection year, with adjustments for the counties with more than 500 active duty military personnel (*Table 13B, Column C*).
- Step 3: Calculate the projected deaths for the projection year for each county by multiplying the county death rate (Step 1) by the estimated population in the projection year (Step 2) divided by 1,000 (*Table 13B, Column D*).
- Step 4: Enter the total number of reported hospice patient deaths, by county of patient residence, for the reporting year (*Table 13B, Column E*).
- Step 5: Calculate the Two-Year Trailing Average Growth Rate in the statewide number of deaths served for the three most recent reporting years.

Year	Statewide Number Deaths Served	Growth
2016	40,438	
2017	41,685	3.1%
2018	42,352	1.6%
Two-Year Trailing Average Growth Rate		2.3%

- Step 6: Determine the number of hospice deaths served for the projection year:
- Calculate the projected number of hospice deaths served for the projection year using the two-year trailing average growth rate by multiplying the number of reported hospice deaths (Step 4) by the statewide two-year trailing average growth rate for deaths served for three years (Step 5) (*Table 13B, Column F*).
 - Calculate the allowable number of hospice deaths served for the projection year by multiplying the projected deaths for each county (Step 2) by 60% (*Table 13B, Column G*).
 - Enter the number of hospice deaths served for the projection year (*Table 13B, Column H*). This number is the lower of:
 - the number of hospice deaths served for the projection year using the two-year trailing average growth rate (Step 6a), or;
 - the number of hospice deaths served for the projection year, limited to 60% (Step 6b).
- Step 7: Calculate the Two-Year Trailing Average Growth Rate in Statewide Median Percentage of Deaths Served over the most recent three years.

Year	Median Percent of Deaths Served	Growth
2016	41.59%	
2017	41.05%	-1.3%
2018	42.69%	4.0%
Two Year Trailing Average Growth Rate		1.3%

- Step 8: Calculate the projected median statewide percentage of deaths served for the projection year by multiplying the current statewide median percentage of deaths served by the statewide two-year trailing average growth rate for median percentage of deaths served (Step 7) for the three most recent reporting years.
- Step 9: Calculate the median hospice deaths for the projection year by multiplying deaths for the projection year (Step 3) by the statewide median percentage of deaths served for the projection year (Step 8) (*Table 13B, Column I*).
- Step 10: In counties with a need determination in a previous SMFP for at least one additional hospice home care office:
- a. Before a CON is issued, enter a placeholder of 90 for the county.
 - b. When the CON is issued to a new office, reassign the placeholder to that office.
 - c. If a new office reports more than 90 hospice patient deaths in the county, do not adjust the office's reported number of hospice patient deaths.
 - d. If a new office reported 90 or fewer hospice patient deaths, include an adjustment placeholder equal to the difference between the reported number of hospice patient deaths and 90. Include the placeholder through the third annual Plan following either:
 - 1) issuance of the certificate of need if the approved applicant had a hospice home care office in the county before issuance of the certificate; or
 - 2) certification of the new office that received the certificate of need if the approved applicant did not have an existing hospice home care office in the county before issuance of the certificate.
- Step 11: Calculate the deficit or surplus of patients by subtracting the median projected hospice deaths for the projection year (Step 9) for each county from the projected number of hospice deaths served for the projection year (Step 6c) plus any adjustment (Step 10) (*Table 13B, Column K*).
- Step 12: Enter the number of licensed hospice home care offices located in each county (*Table 13B, Column L*).
- Step 13: Calculate the number of licensed hospice home care offices per 100,000 population for each county by dividing the number of licensed hospice offices (Step 12) by the estimated population for the projection year (Step 2). Then multiply the result by 100,000 (*Table 13B, Column M*).
- Step 14: The county has a need determination if both of the following are true (*Table 13B, Column N*):
- a. the county's deficit (Step 11) is 90 or more, and;
 - b. the county's number of licensed hospice home care offices per 100,000 population (Step 13) is three or fewer.

Hospice Inpatient Beds:

- Step 1: Enter the total number of reported hospice admissions by county of patient residence (*Table 13C, Column B*).

- Step 2: Enter the total number of days of care by county of patient residence (*Table 13C, Column C*).
- Step 3: Calculate the average length of stay (ALOS) per admission by dividing total days of care (Step 2) by total admissions (Step 1) (*Table 13C, Column D*).
- Step 4: Calculate the two-year trailing average growth rate in the statewide number of admissions over the previous three reporting years:

Year	Statewide Hospice Admissions	Growth
2016	45,538	
2017	46,763	2.7%
2018	47,646	1.9%
Two-Year Trailing Average Growth Rate		2.3%

- Step 5: Calculate total admissions for each county for the projection year by multiplying the total admissions (Step 1) by the statewide two-year trailing average growth rate for hospice admissions (Step 4) for five years [total admissions x (1 + two-year trailing average growth rate)⁵] (*Table 13C, Column E*).

Step 6:

- Calculate the total county days of care at the county ALOS for the projection year by multiplying the total admissions (Step 5) by the ALOS per admission for each county (Step 3) (*Table 13C, Column F*).
- Calculate the total county days of care at the state ALOS for the projection year by multiplying the total admissions (Step 5) by the statewide median ALOS per admission (*Table 13C, Column G*).
- The projected days of care for inpatient hospice beds for the projection year is the lower of (*Table 13C, Column H*):
 - days of care for the projection year, based on the county ALOS (Step 6a), or;
 - days of care for the projection year, based on the statewide ALOS (Step 6b).

- Step 7: Calculate the projected inpatient days for each county for the projection year by multiplying the days of care for the projection year for inpatient estimates (Step 6c) by the two-year trailing average statewide inpatient utilization rate (*Table 13C, Column I*).

Year	General Inpatient Days of Care	Statewide Total Days of Care	Two Year Trailing Average Statewide Inpatient Utilization Rate
2017	110,072	3,489,295	
2018	108,970	3,603,617	
Totals	219,042	7,092,912	3.09%

- Step 8: Calculate the projected inpatient hospice beds by dividing inpatient days for the projection year (Step 7) by 365.25 days. Then divide by 0.85 to adjust for the targeted 85% occupancy (*Table 13C, Column J*).

- Step 9: Adjust the projected hospice inpatient beds (Step 8) for the projection year by the number of licensed hospice beds in each county (*Table 13C, Column K*), and by the certificate of need approved/licensure pending beds and beds available in previous Plans (*Table 13C, Column L*).
- Step 10: Calculate occupancy rates of existing hospice inpatient facilities for the reporting year (*Table 13C, Column N*).
- Step 11: Adjust projected beds in Step 9 for occupancy rates of existing facilities in counties (Step 10) that are not at 85% occupancy. For such counties, enter either zero or the deficit indicated in Step 9, whichever is greater.
- Step 12: A need exists for single counties with a projected deficit of six or more hospice inpatient beds. The single county deficit is the number of beds needed.

Chapter 14:

Psychiatric Inpatient Services

CHAPTER 14

PSYCHIATRIC INPATIENT SERVICES

Introduction

Psychiatric facilities, acute care (community) hospitals, and state-operated psychiatric facilities provide psychiatric inpatient services. The State Medical Facilities Plan (SMFP) does not cover state-operated facilities. Entities may develop psychiatric inpatient beds in three ways. First, an entity may obtain a certificate of need pursuant to a need determination published in the SMFP. Second, pursuant to Policy PSY-1 in the SMFP, acute care hospitals may obtain a required certificate of need to transfer beds from state-operated psychiatric facilities. Finally, acute care hospitals may convert acute care beds to psychiatric beds pursuant to G.S. 131E-184 by executing a contract with the North Carolina Division of Mental Health, Developmental Disabilities and Substance Abuse Services or one or more of the local management entities-managed care organizations (LME-MCOs), which exempts the hospital from certificate of need review.

Definitions

A psychiatric inpatient bed's service area is the LME-MCO in which the bed is located. The North Carolina Division of Mental Health, Developmental Disabilities and Substance Abuse Services of the Department of Health and Human Services establishes the LME-MCOs.

The "reporting year" is October 1 through September 30. The "current" reporting year is October 1, 2017 through September 30, 2018.

The methodology projects bed need two years beyond the SMFP publication year. The current "projection year" is 2022.

The "planning inventory" is the number of beds used in need determination calculations. It is the number of licensed beds as of the end of the current reporting year, adjusted for any beds approved by CON that are under development, minus any beds delicensed after the end of the current reporting year.

Two separate methodologies exist, one for children/adolescents and one for adults. Children/adolescents are individuals who had not yet reached their 18th birthday at the time of inpatient treatment or generation of population estimates. Adults are individuals 18 years of age and older at the time of inpatient treatment or generation of population estimates.

Changes from the Previous Plan

This chapter contains one substantive change. Rutherford County moved from the Vaya Health LME-MCO to Partners Behavioral Health Management. In addition, the chapter includes substantial technical edits to the language of the narrative.

Basic Principles

1. The SMFP covers inpatient psychiatric services that are more extensive than stabilization of people in crisis but less extensive than long-term institutionalization. The facilities in this chapter generally provide inpatient stays of fewer than 60 days.
2. Providers should organize services for people with a mental disorder in such a way that a continuum of care is available. People with a mental disorder require access to a wide array of services

including outpatient treatment, housing resources, day treatment services, residential treatment services and hospitalization.

3. Admission to a community-based facility is preferable to admission to a state operated facility for most individuals in acute distress, because community-based treatment provides greater potential for reintegration into the community.
4. The role of state facilities is to complement and supplement the community mental health system. Therefore, state facilities should be the treatment setting of last resort and should provide services that community-based facilities cannot provide economically.
5. Providers can develop community programs by establishing appropriate treatment programs and support services in the community. Community-based programs may avoid institutionalization of individuals in acute distress, and aid in the relocation of people from state facilities to community programs to the extent that appropriate services exist in the community.
6. Inpatient psychiatric treatment of children and adolescents shall occur in units that are separate and distinct from both adult psychiatric units and general pediatric units. To maximize efficiency and ensure the availability of a continuum of care, providers should develop psychiatric beds for children and adolescents in conjunction with outpatient treatment programs.

Data Sources

Bed inventory data comes from the North Carolina Department of Health and Human Services, Division of Health Service Regulation: Mental Health Licensure and Certification Section; Acute and Home Care Licensure and Certification Section; and Certificate of Need.

Days of care come from two sources. The first source is IBM Watson Health (IBM), a collector of hospital patient discharge information. All acute care hospitals and several private psychiatric hospitals provide data to IBM. The data include days of care for all psychiatric patients by their county of residence and age group. Major Diagnostic Category (MDC) code 19 (Mental Diseases and Disorders) was used to select discharge records. IBM provides this data to the Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill. The Sheps Center compiles the information and provides data to the Agency on days of care and patient origin by county. Second, where data from IBM is not available, the Agency obtains days of care and patient origin data from the Mental Health/Substance Abuse Hospital License Renewal Application for the current reporting year.

The North Carolina Office of State Budget and Management (OSBM) provides county population estimates by age.

Assumptions of the Methodology

1. A psychiatric inpatient bed's service area is the catchment area for the LME-MCO for mental health, developmental disabilities and substance use disorder services in which the bed is located. Table 14B lists the counties comprising each of the LME-MCOs.
2. The methodology considers 75% to be the optimum occupancy of freestanding psychiatric hospitals and psychiatric units in acute care hospitals.
3. Calculations project bed need two years beyond the SMFP publication year because that amount of time may be required to bring a needed facility or expansion into service.

Application of the Methodology

The methodology calculates need separately for children/adolescents and adults for each LME-MCO.

Part 1: Determining Projected Patient Days of Care and Bed Need for Children and Adolescents

- Step 1: Obtain the planning inventory (*Table 14A, Column G*) by adjusting licensed beds (*Table 14A, Column D*) for CON-Approved/License Pending beds (*Table 14A, Column E*) and beds available in prior Plans that have not been CON-approved (*Table 14A, Column F*).
- Step 2: Calculate the days of care for children/adolescents for the projection year (*Table 14B, Column E*) by multiplying the days of care for the child/adolescent age group (*Table 14B, Column B*) by the child/adolescent population for the projection year (*Table 14B, Column D*). Then divide the result by the child/adolescent population for the reporting year (*Table 14B, Column C*).
- Step 3: Divide the days of care for the projection year (*Table 14B, Column E*) by 365.25 (*Table 14B, Column F*) and then by 75% to arrive at the number of beds needed for the projection year, assuming 75% occupancy (*Table 14B, Column G*).
- Step 4: Subtract the final number of beds needed (*Table 14B, Column G*) from the number of child/adolescent beds in the planning inventory (*Table 14B, Column H*) to arrive at the bed need determination for the child/adolescent population (*Table 14B, Column I*).

Part 2: Determining Projected Patient Days of Care and Bed Need for Adults

- Step 1: Obtain the planning inventory (*Table 14A, Column K*) by adjusting licensed beds (*Table 14A, Column H*) for CON-Approved/License Pending beds (*Table 14A, Column I*) and beds available in prior Plans that have not been CON-approved (*Table 14A, Column J*).
- Step 2: Calculate the days of care for adults for the projection year (*Table 14C, Column E*) by multiplying the days of care for the adult age group (*Table 14C, Column B*) by the adult population for the projection year (*Table 14C, Column D*). Then divide the result by the adult population for the reporting year (*Table 14C, Column C*).
- Step 3: Divide the days of care for the projection year (*Table 14C, Column E*) by 365.25 (*Table 14C, Column F*) and then divide by 75% to arrive at the adult bed need for the projection year, assuming 75% occupancy (*Table 14C, Column G*).
- Step 4: Subtract the final number of beds needed (*Table 14C, Column G*) from the number of adult beds in the planning inventory (*Table 14C, Column H*) to arrive at the bed need determination for adults (*Table 14C, Column I*).

* CON-approved projects that are Policy PSY-1 bed transfers from State Psychiatric Hospitals.

** Consolidation of Duke Life Point Maria Parham Medical Center with the closed Franklin Medical Center was effective October 23, 2017. The licensee received a grant from the Dorothea Dix Hospital Property Fund to renovate and convert 33 acute care beds to adult psychiatric beds at the site of the closed Franklin Medical Center. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 14A.

*** Adult beds are to be converted from acute care beds to inpatient psychiatric beds. This conversion is exempt from certificate of need review, pursuant to G.S. 131E-184(c).

**** Facility closed. License expired on June 30, 2019; 24 beds removed from inventory.

^ Southeastern Regional Medical Center was awarded a grant to develop 10 adult psychiatric inpatient beds. These beds do not require a certificate of need and are not yet accounted for in Table 14A.

^^ Charles A. Cannon, Jr. Memorial Hospital received a grant from the Dorothea Dix Hospital Property Fund to convert 27 acute care beds to adult psychiatric beds. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 14A.

^^^ Beds were added pursuant to Session law 2017-57 using allocations from the Dorothea Dix Hospital Property Fund. Development of these beds do not require a certificate of need, but they are included in the inventory and the standard need determination methodology calculations once licensed.

Chapter 15:

Substance Use Disorder Inpatient and Residential Services (Chemical Dependency Treatment Beds)

CHAPTER 15

SUBSTANCE USE DISORDER INPATIENT AND RESIDENTIAL SERVICES (CHEMICAL DEPENDENCY TREATMENT BEDS)

Introduction

G.S. 131E-176 (5a) defines a chemical dependency treatment facility as “a public or private facility, or unit in a facility, which is engaged in providing 24-hour a day treatment for chemical dependency or substance abuse.” The facility may be a unit within or attached to a general hospital or psychiatric hospital. It may also be a freestanding facility “specializing in treatment of people who are substance abusers or chemically dependent” that is licensed under Article 1 or Article 1A of G.S. 122. The statute specifically excludes facilities that provide social setting or medical detoxification only. In addition, Session Law 2003-390, House Bill 815 resulted in changing the existing medical detoxification beds on acute care hospital licenses to licensed chemical dependency/substance use disorder beds (Appendix I).

Definitions

A chemical dependency treatment bed’s service area, for purposes of the State Medical Facilities Plan, is the substance use disorder services region in which the bed is located. Regions are comprised of Licensed Management Entities-Managed Care Organizations (LME-MCO). The North Carolina Division of Mental Health, Developmental Disabilities and Substance Abuse Services of the Department of Health and Human Services establishes the LME-MCOs. Table 15B lists the LME-MCOs and their constituent counties that comprise the three regions for substance use disorder services.

The “reporting year” is October 1 through September 30. The “current” reporting year is October 1, 2017 through September 30, 2018.

The methodology projects bed need two years beyond the SMFP publication year. The current “projection year” is 2022.

The “planning inventory” is the number of beds used in need determination calculations. It is the number of licensed beds as of the end of the current reporting year, adjusted for any beds approved by Certificate of Need (CON), minus any beds delicensed after the end of the current reporting year.

Two separate methodologies exist, one for children/adolescents and one for adults. Children/adolescents are individuals who had not yet reached their 18th birthday at the time of inpatient treatment or generation of population estimates. Adults are individuals 18 years of age and older at the time of inpatient treatment or generation of population estimates.

Changes from the Previous Plan

This chapter contains one substantive change. Rutherford County moved from the Vaya Health LME-MCO to Partners Behavioral Health Management. In addition, the chapter includes substantial technical edits.

Basic Principles

1. It is essential that a continuum of services be available for the treatment of substance use disorders. Physical withdrawal from addicting substances is accomplished through detoxification services. Following detoxification, the individual should receive substance use disorder-related services addressing his or her physical, emotional, psychological and social needs. Hospitalization should be considered the most restrictive form of therapeutic intervention or treatment and shall be used

only when this level of 24-hour care and supervision is required to meet the patient's health care needs.

2. For most individuals in acute distress, admission to a community-based facility is preferable to admission to a regional, state-operated facility because community-based treatment provides greater potential for reintegration into the community. The role of state facilities is to complement and supplement the community mental health system. State facilities should be the treatment setting of last resort and should provide services that cannot be economically provided in the community.
3. Children and adolescents require substance use disorder treatment services in facilities or units that are programmatically and physically separate from services provided to adults.
4. The relevant licensure categories of beds covered in this chapter require that patients receive detoxification before admission to a residential facility.

Data Sources

Bed inventory data comes from the North Carolina Department of Health and Human Services, Division of Health Service Regulation: Mental Health Licensure and Certification Section; Acute and Home Care Licensure and Certification Section; and Certificate of Need.

The North Carolina Office of State Budget and Management provides county population estimates by age.

Substance use disorder days of care come from two sources. The first source is IBM Watson Health (IBM), a collector of hospital discharge information. All acute care (general) hospitals and several private psychiatric hospitals provide data to IBM. The data include days of care for all patients by their county of residence and age group. Major Diagnostic Category (MDC) code 20 (Alcohol/Drug Use or Induced Mental Disorders) was used to identify discharges relevant to this methodology. IBM provides this data to the Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill. The Sheps Center compiles the information and provides data on days of care and patient origin by county. Second, where IBM data is not available, the Agency obtains days of care and patient origin data for the reporting year from the following license renewal documents submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation: Mental Health/Substance Abuse Hospital License Renewal Application; or the Substance Abuse Residential Treatment Data Collection Form, as attached to the License Renewal Application for MH/DD/SAS Facilities.

Assumptions of the Methodology

1. The methodology projects bed need separately for the child/adolescent and adult populations.
2. Based on utilization patterns reflected in past data, the methodology assumes that children and adolescents require 9% of the days of care.
3. The target occupancy of substance use disorder treatment units in hospitals and residential facilities is 85%.
4. The methodology projects bed need two years beyond the current State Medical Facilities Plan publication year because that amount of time may be required to bring a needed facility or expansion into service.

Application of the Methodology

Apply each step below individually to each LME-MCO. All calculations are carried out to at least four decimal places.

- Step 1: Obtain the total planning inventory (*Table 15A, Column E*) by adjusting licensed beds (*Table 15A, Column F*) for CON-Approved/License Pending beds (*Table 15A, Column G*), and beds available in prior Plans that have not been CON-approved (*Table 15A, Column H*).
- Step 2: Calculate the days of care for all age groups for the projection year (*Table 15B, Column E*) by multiplying the days of care for the reporting year (*Table 15B, Column B*), by the projected population for the projection year (*Table 15B, Column D*). Then divide the result by the population for the reporting year (*Table 15B, Column C*).
- Step 3: Divide the days of care for the projection year by 365.25 (*Table 15B, Column F*) and then by 85% to arrive at the total bed need in the projection year (*Table 15B, Column G*).
- Step 4: Obtain the child/adolescent planning inventory by adjusting the total planning inventory (*Table 15B, Column H*). Subtract the number of beds in the planning inventory from the total bed need (*Table 15B, Column G*) to calculate the surplus or deficit for all age groups for the projection year (total bed surplus/deficit) (*Table 15B, Column I*).
- Step 5: Multiply the total bed need (*Table 15B, Column G*) by 9% to calculate the estimated child/adolescent bed deficit for the projection year (*Table 15B, Column J*).
- Step 6: Subtract the estimated child/adolescent bed need for the projection year (*Table 15B, Column J*) from the child/adolescent planning inventory (*Table 15B, Column K*) to calculate the child/adolescent bed surplus/deficit for the projection year (*Table 15B, Column L*).
- Step 7: Subtract the child/adolescent bed need (*Table 15B, Column L*) from the total bed need (*Table 15B, Column I*) to obtain the adult bed surplus or deficit (*Table 15B, Column M*).
- Step 8: Add together the child/adolescent surpluses/deficits for each LME-MCO to calculate the child/adolescent bed need for each region. Then add together the adult surpluses/deficits for each LME-MCO to calculate the adult bed need for each region (*Table 15B, Column N*).

Chapter 16:

Intermediate Care Facilities for Individuals with
Intellectual Disabilities (ICF/IID)

CHAPTER 16

INTERMEDIATE CARE FACILITIES FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES

Background Information

Intermediate Care Facilities for Individuals with Intellectual Disabilities or developmental disabilities is a category of group home care designated by the federal-state Medicaid program. Under G.S. 122C-117(a)(2), area mental health, developmental disability and substance use disorder authorities – the Local Management Entity-Managed Care Organizations (LME-MCO) – have responsibility to ensure provision of services to people in need within their catchment areas.

The North Carolina Department of Health and Human Services (DHHS) is committed to the integration of people with intellectual disabilities/developmental disabilities into community living to the fullest extent possible. One way DHHS encourages community-based alternatives is through the transfer of ICF/IID beds from state developmental centers. Other alternatives may include small, community-based, non-ICF/IID residential options as well as other sites through the Medicaid Waiver Community Alternatives Program (CAP) -MR/DD Program.

The LME-MCOs shall serve as the portals of entry and exit for the admission and discharge of clients in ICF/IID facilities (G.S. 122C-115.4) within the applicable Mental Health, Developmental Disabilities, and Substance Abuse Services (MH/DD/SAS) catchment areas. This involvement is essential to ensure that only clients in need of the intensive array of services provided in an ICF/IID program are admitted and served as close as possible to their own homes, and ensured coordination with services outside the facility.

Definitions

The service area is the LME-MCO in which the bed is located.

Healthcare Planning obtains the inventory of ICF/IID beds each January. The inventory for the current SMFP was prepared in January 2019.

Changes from the Previous Plan

This chapter contains one substantive change. Rutherford County moved from the Vaya Health LME-MCO to Partners Behavioral Health Management. In addition, the chapter includes substantial technical edits.

Basic Principles

1. People with conditions other than an intellectual disability (such as autism, cerebral palsy, epilepsy or related conditions) may be appropriate for placement in an ICF/IID setting if they are in need of the services the program is certified to provide. In the development of services for this population, potential providers should explore the full continuum of services to determine the most appropriate level of care for their needs.
2. Services for people with a developmental disability should provide a continuum of care. For most individuals, admission to a community-based facility is preferable to admission to a regional, state operated facility because community-based treatment provides greater potential for reintegration into the community. The role of state facilities is to complement and supplement the community mental health system. State facilities should be the setting of last resort and should provide services that cannot be economically provided in the community. Development of community programs

may be accomplished through establishing appropriate treatment programs and support services in the community to avoid institutionalization, and by relocating people from state facilities to community programs to the extent appropriate services exist in the community.

3. The ICF/IID bed inventory excludes beds located in state developmental centers because such facilities are not subject to the state's certificate of need (CON) law.

Data Sources

Healthcare Planning obtains the inventory of ICF/IID beds for the current reporting time point from the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Mental Health Licensure and Certification Section.

The number of beds in state developmental centers comes from the Division of State Operated Healthcare Facilities (*Table 16B*).

Data on certificates of need comes from the Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section.

Development of ICF/IID Beds

Table 16A lists the LME-MCOs and ICF/IID bed inventory.

The State Medical Facilities Plan does not have a methodology to project the need for additional ICF/IID beds. Entities may only develop ICF/IID beds by transferring existing beds from state development centers. To develop new beds (in an existing or new facility) applicants must obtain a certificate of need pursuant to one of the four Policies Applicable to ICF/IID Facilities in Chapter 4 of the SMFP.

Chapter 17:

Technology and Equipment

- Cardiac Catheterization Equipment
- Gamma Knives
- Linear Accelerators
- Lithotriptors
- Magnetic Resonance Imaging Scanners
- Positron Emission Tomography Scanners

CHAPTER 17

TECHNOLOGY AND EQUIPMENT

Introduction

This chapter covers six types of medical equipment subject to the Certificate of Need Law: cardiac catheterization equipment, gamma knives, linear accelerators, lithotripters, magnetic resonance imaging scanners, and positron emission tomography scanners.

The reporting year for all types of equipment is October 1 through September 30. The “current” reporting year is October 1, 2017 through September 30, 2018.

The “inventory” is the number of units of equipment in operation, as reported at the end of the reporting year. The “planning inventory” is the inventory and any adjustments for certificates of need and prior need determinations.

Changes from the Previous Plan

No substantive changes have been incorporated into this chapter. However, the chapter has had extensive technical edits.

Data Sources

Inventory and utilization data come from the Hospital License Renewal Application for equipment on a hospital campus or owned by a hospital. Data for equipment in freestanding facilities and mobile units come from the Registration and Inventory of Medical Equipment form for each type of equipment.

A. CARDIAC CATHETERIZATION EQUIPMENT

Introduction

G.S. 131E-176(2f) defines cardiac catheterization equipment, as “equipment used to provide cardiac catheterization services.” G.S. 131E-176(2g) defines “cardiac catheterization services” as “those procedures, excluding pulmonary angiography procedures, in which a catheter is introduced into a vein or artery and threaded through the circulatory system into the heart specifically to diagnose abnormalities in the motion, contraction, and blood flow of the moving heart or to perform surgical therapeutic interventions to restore, repair, or reconstruct the coronary blood vessels of the heart.” Tables 17A-1 and 17A-2 show the number of cardiac catheterization procedures performed during the reporting year.

Assumptions of the Methodology

1. Cardiac catheterization equipment service areas are the Acute Care Bed Service Areas defined in Chapter 5 and shown in Figure 5.1.
2. The capacity of a unit of cardiac catheterization equipment is defined as 1,500 diagnostic-equivalent procedures per year, with the trigger of need at 80% of capacity. One interventional cardiac catheterization procedure is valued at 1.75 diagnostic-equivalent procedures. One cardiac catheterization procedure performed on a patient age 14 or younger is valued at two diagnostic-equivalent procedures. All other procedures are valued at one diagnostic-equivalent procedure.
3. Cardiac catheterization equipment and services shall only be approved for development on hospital sites, i.e., in facilities that are on a hospital’s license.

Application of the Methodology

Methodology 1 (Table 17A-3)

The need determination methodology in service areas with at least one unit of equipment in the current inventory is as follows:

- Step 1: Determine the planning inventory (*Column F*) for each facility with fixed cardiac catheterization equipment, to include the total of: existing equipment in operation (*Column C*), approved equipment for which a certificate of need was issued but is under development (*Column D*), and need determinations for which no certificate of need has yet been issued (*Columns E*).
- Step 2: Determine the number of adult and pediatric diagnostic and interventional procedures performed at each facility during the current reporting year (*Table A-1*). If mobile procedures are provided in a county that is part of more than one service area, divide the procedures equally between the service areas.
- Step 3: Calculate the total weighted (diagnostic-equivalent) cardiac catheterization procedures for each facility by multiplying adult diagnostic procedures by 1.0, interventional procedures by 1.75, and pediatric procedures performed on patients age 14 or younger by 2.00 (*Column H*).
- Step 4: For each facility, determine the number of units of fixed cardiac catheterization equipment required for the number of procedures performed by dividing the number of weighted (diagnostic-equivalent) cardiac catheterization procedures performed at each facility by 1,200 procedures (i.e., 80% of the 1,500-procedure capacity). Round the result to the nearest hundredth (*Column I*).

Step 5: Sum the number of units of fixed cardiac catheterization equipment required for all facilities in the same service area as calculated in Step 4 (*Column I*). Round to the nearest whole number (*Column J*).

Step 6: In each service area, subtract the total planning inventory (*Column F*) from the number of units of fixed cardiac catheterization equipment required (*Column I*). The difference is the number of additional units of fixed cardiac catheterization equipment needed (*Column J*).

Methodology 2:

For cardiac catheterization equipment in a service area that does not have a unit of fixed cardiac catheterization equipment, a need determination exists for one unit of shared fixed cardiac catheterization equipment (i.e., fixed equipment that is used to perform both cardiac catheterization procedures and angiography procedures) when:

1. The number of cardiac catheterization procedures as defined in 10A NCAC 14C .1601(5) performed at any mobile site in the service area exceeds 240 (300 procedures x 80%) procedures per year for each eight hours per week the mobile equipment is operated at that site during the current reporting year (*Table 17A-2*); and
2. No other fixed or mobile cardiac catheterization service is provided in the same service area.

The SMFP does not have a methodology to project need for additional mobile cardiac catheterization equipment. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to acquire the mobile cardiac catheterization equipment.

Table 17A-4: Fixed Cardiac Catheterization Equipment Need Determination

Cardiac Catheterization Service Area	Fixed Cardiac Catheterization Equipment Need Determination*	Certificate of Need Application Due Date**	Certificate of Need Beginning Review Date
It is determined that there is no need anywhere in the state and no reviews are scheduled.			

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

Table 17A-5: Shared Fixed Cardiac Catheterization Equipment Need Determination*

Cardiac Catheterization Service Area	Shared Cardiac Catheterization Equipment Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
Henderson****	1	February 17, 2020	March 1, 2020
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

* Any person can apply to meet the need, not just the health service facility or facilities that generated the need.

** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

*** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**** In response to a petition, the State Health Coordinating Council approved the adjusted need determination for one additional unit of shared fixed cardiac catheterization equipment in Henderson County.

B. GAMMA KNIVES

Introduction

"Gamma knife," as defined in G.S.131E-176(7c), means "equipment which emits photon beams from a stationary radioactive cobalt source to treat lesions deep within the brain and is one type of stereotactic radiosurgery." Two types of equipment, both using photon beams, perform this kind of radiosurgery. In one type, beams from a linear accelerator are focused from a device that rotates around the patient. The other type of equipment, gamma knife, emits 201 beams from stationary radioactive cobalt sources.

North Carolina has two gamma knife planning regions (service areas) - the western region (Health Service Areas [HSA] I, II, and III) and the eastern region (HSAs IV, V, and VI). Appendix A identifies the multicounty groupings that comprise the HSAs. The gamma knife at North Carolina Baptist Hospital in Forsyth County (HSA II) serves the western region. This facility performed 495 procedures during the reporting year. The gamma knife at Vidant Medical Center in Pitt County (HSA VI) serves the eastern region. This facility performed 195 procedures during the reporting year.

The SMFP does not have a methodology to project need for additional gamma knives. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to acquire the gamma knife.

Table 17B-1: Gamma Knife Need Determination*

Service Area	Gamma Knife Need Determination**	Certificate of Need Application Due Date***	Certificate of Need Beginning Review Date
HSA III****	1	April 15, 2020	May 1, 2020
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

* Any person can apply to meet the need, not just the health service facility or facilities that generated the need.

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**** In response to a petition, the State Health Coordinating Council approved an adjusted need determination for 1 gamma knife in HSA III.

C. LINEAR ACCELERATORS

Introduction

G.S. 131E-176 (14g) defines a linear accelerator as “a machine used to produce ionizing radiation in excess of 1,000,000 electron volts in the form of a beam of electrons or photons to treat cancer patients.”

Table 17C-1 lists the facilities that have linear accelerators. Table 17C-2 lists the facilities that also provide stereotactic radiosurgery treatment using appropriately equipped linear accelerators.

Data Sources

In addition to the data sources listed in the Introduction to this chapter, this methodology also obtains the July 1 estimated county population for 2019 provided by the North Carolina Office of State Budget and Management.

Assumptions of the Methodology

1. The methodology incorporates: (a) a geographic accessibility criterion, which is a population base of 120,000 as suggested by the Inter-Society Council for Radiation Oncology; (b) a criterion aimed at assuring efficient use of megavoltage radiation facilities (when Equivalent Simple Treatment Visit [ESTV] procedures divided by 6,750 minus the number of present linear accelerators equals ≥ 0.25); and (c) a patient origin criterion (when a service area has 45% or more of the patients coming from outside the service area). A need determination exists when two of the three criteria are met within a service area.
2. The American College of Radiology recommends use of ESTVs because radiation treatments vary in complexity. In addition, when developing the original methodology ESTVs were recommended as part of the comments received during public hearings. Providers report procedures by Current Procedural Terminology (CPT) codes, which are converted to ESTVs (*Table 17C-3*).
3. Patient origin data from the current reporting year forms the basis for defining service areas (*Table 17C-4*). Counties are the basic units for the formation of linear accelerator service areas, based on proximity, utilization patterns, and patient origin data. A small percentage of the population lives some distance from a linear accelerator, but the sparsity of population in and around these areas does not provide the population required to support a linear accelerator. In these cases, two exceptions apply:
 - a. Where patient origin data indicates a county's residents primarily use a linear accelerator that is outside their home county, the county is aligned with the county where at least 45% of its residents go for linear accelerator services.
 - b. When a county with a linear accelerator has a population less than 120,000, that county is combined with an adjacent county to which the largest percentage of patients go for linear accelerator services, based on patient origin data.
4. Three principal questions must be addressed when determining whether a service area needs an additional linear accelerator:
 - a. Do the linear accelerators in the service area perform more than 6,750 procedures (ESTVs) per accelerator per year?
 - b. Is the population of the service area greater than 120,000 per accelerator?

- c. Does the patient origin data show that more than 45% of the patients come from outside the service area?

Application of the Methodology

The standard methodology for determining need for linear accelerators is calculated as follows:

Criterion 1:

- Step 1: Sum the 2019 population estimates for the counties that comprise each linear accelerator service area to determine the population for the service areas (*Table 17C-4*).
- Step 2: For each linear accelerator service area, sum the number of existing linear accelerators, the number of approved linear accelerators not yet operational but for which a certificate of need has been awarded, and the linear accelerator need determinations from previous years (*Table 17C-1*).
- Step 3: Divide the service area population by the result of Step 2 to determine the population residing in the service area per linear accelerator. If the result is greater than or equal to 120,000 per linear accelerator, Criterion 1 is satisfied (*Table 17C-5*).

Criterion 2:

- Step 4: For each service area, use current patient origin data for the reporting year to count the number of patients served on linear accelerators located in the service area, and who reside in a county outside the service area.
- Step 5: For each service area, divide the results of Step 4 by the total number of patients served on linear accelerators located in the service area. If more than 45% of total patients served on linear accelerators located in a service area reside outside the service area, then Criterion 2 is satisfied (*Table 17C-5*).

Criterion 3:

- Step 6: For each linear accelerator service area, sum the number of reported ESTV procedures performed on the linear accelerators located in the service area.
- Step 7: Divide the results of Step 6 by the number of linear accelerators in the service area which are counted in Step 2 to determine the average number of ESTV procedures performed per linear accelerator in each linear accelerator service area.
- Step 8: Divide the results of Step 7 by 6,750 ESTV procedures.
- Step 9: Subtract the number of linear accelerators in the service area counted in Step 2 from the results of Step 8. If the difference is greater than or equal to positive 0.25, Criterion 3 is satisfied (*Table 17C-5*).

If any two of the above three criteria are satisfied in a linear accelerator service area, the service area has a need determination for one additional linear accelerator (*Table 17C-5*).

Criterion 4:

Regardless of the results of Steps 1-9 above, if a county has a population of 120,000 or more and there is not a linear accelerator counted in Step 2 for that county, a need is determined for one linear accelerator in that county. As a result, the county becomes a separate, new linear accelerator service area.

D. LITHOTRIPTERS

Introduction

A lithotripter, according to G.S. 131E-176(14i), means “extra-corporeal shockwave technology used to treat persons with kidney stones and gallstones.” Lithotripsy is defined as the pulverization of urinary stones by means of a lithotripter. A technician places an emitter in contact with the patient's abdomen to focus the shock waves on the stone. The shock waves then shatter the stone, which can be expelled in the urine. Extracorporeal shock wave lithotripsy (ESWL) is the non-invasive procedure to which this section pertains.

Data Sources

In addition to the standard data sources listed in the Introduction to this chapter, this methodology also obtains the July 1 estimated population data from the North Carolina Office of State Budget and Management. The data is for the current SMFP publication year, which is two years beyond the current reporting year.

Assumptions of the Methodology

1. The incidence of urinary stone disease forms the basis of the methodology. The annual incidence of urinary stone disease is approximately 16 per 10,000 population. Lithotripsy is not an appropriate treatment for all cases of urinary stone disease. It has been estimated that lithotripsy is appropriate for 85% to 90% of kidney stone patients, when surgery is indicated¹. Therefore, the need determination methodology assumes that lithotripsy is appropriate in 90% of cases of urinary stone disease.
2. The annual treatment capacity of a lithotripter is 1,500 cases. The methodology considers 67% (or 1,000 cases) to be full utilization for purposes of projecting need.
3. The lithotripter service area is the entire state.

Application of the Methodology

- Step 1: Divide the July 1 estimated state population by 10,000 and multiply the result by 16, which yields the estimated incidence of urinary stone disease per 10,000 population.
- Step 2: Multiply the result from Step 1 by 90% to calculate the number of patients in the state who have the potential to be treated by lithotripsy in one year.
- Step 3: Divide the result of Step 2 by 1,000 and round to the nearest whole number to calculate the low range of the annual treatment capacity of a lithotripter. A remainder of 0.50 or greater rounds to the next highest whole number; a remainder of less than 0.50 rounds to the next lowest whole number.
- Step 4: Sum the number of existing lithotripters in the state (*Table 17D-1*), lithotripters not yet operational but for which a certificate of need has been issued, and lithotripter need determinations from previous years for which a certificate of need has yet to be issued.
- Step 5: Subtract the result of Step 4 from the result of Step 3 to calculate the number of additional lithotripters needed in the state (*Table 17D-2*).

E. MAGNETIC RESONANCE IMAGING SCANNERS

Introduction

G.S. 131E-176 (14m) defines a magnetic resonance imaging (MRI) scanner as “medical imaging equipment that uses nuclear magnetic resonance.” The methodology designates MRI scanners as either fixed or mobile. A mobile MRI scanner means the MRI scanner and transporting equipment that is moved at least weekly to provide services at two or more host facilities. A fixed MRI scanner means an MRI scanner that is not a mobile MRI scanner.

Assumptions of the Methodology

1. An MRI procedure is a single procedure performed on one patient on one defined body part during one visit. Each MRI procedure must be directly linked to a single billable CPT code associated with the MRI procedure. For example, an MRI brain scan with and without contrast is a single procedure with a single CPT code.
2. A fixed MRI service area is the same as an Acute Care Bed Service Area as defined in Chapter 5, and shown in Figure 5.1.
3. A placeholder of one MRI scanner appears in the inventory in Table 17E-1 for each new fixed MRI scanner for which a certificate of need has been issued.
4. The inventory shall exclude: MRI scanners used for research only, non-clinical MRI scanners, and MRI scanners awarded based on need determinations for a dedicated purpose or demonstration project (Table 17E-2).
5. Intraoperative Magnetic Resonance Imaging Scanners (iMRI), approved through Policy TE-2, shall not be counted in the inventory of fixed MRI scanners and the procedures performed on an iMRI will not be used in calculating the need methodology. Hospitals shall report intraoperative procedures and inpatient procedures performed on an iMRI separately (Table 17E-2). An iMRI scanner shall not be used for outpatients and may not be replaced with a conventional MRI scanner.
6. Need thresholds are arranged in tiers based on the number of scanners, weighting of procedures based on complexity, and a component addressing MRI service areas that have no fixed MRIs but have mobile MRI scanners serving the area. The complexity of an MRI procedure is weighted based on whether the procedure is inpatient or outpatient and whether the procedure includes contrast or sedation. The methodology for determining need is based on fixed and mobile procedures performed at hospitals, fixed procedures performed at freestanding facilities, and procedures performed on mobile MRI scanners at mobile sites.

The tiers are based on the assumption that the time necessary to complete one MRI procedure (an outpatient procedure without contrast or sedation) is 30 minutes, or an average throughput of two procedures per hour on an MRI scanner. Capacity of a single MRI scanner is defined as that of an MRI scanner being available and staffed for use at least 66 hours per week for 52 weeks per year, which equals 6,864 procedures annually, at 30 minutes per procedure ($66 \times 52 \times 2 = 6,864$). This definition of capacity represents 100% of the procedure volume the equipment can complete under ideal conditions.

7. The need determination for any one service area shall not exceed one MRI scanner per year, unless the SMFP includes an adjusted need determination for a specific MRI service area.

8. A facility that offers MRI services on a full-time basis pursuant to a service agreement with an MRI provider is not precluded from applying for a need determination to replace the existing contracted service with a fixed MRI scanner under the applicant’s ownership and control. It is consistent with the purposes of the Certificate of Need law and the State Medical Facilities Plan for a facility to acquire and operate an MRI scanner to replace such a contracted service, if the acquisition and operation of the facility’s own MRI scanner will allow the facility to reduce the cost of providing the MRI service at that facility.

Application of the Methodology

Use the following table to obtain the appropriate planning threshold, based on the number of fixed scanners in the service area. Multiply 6,864 by the Planning Threshold to obtain the Inpatient and Contrast Adjusted Threshold corresponding to the number of fixed scanners in the service area (e.g., for facilities with four or more MRIs, multiply 6,864 by 70% to obtain the Inpatient and Contrast Adjusted Threshold of 4,805).

Number of Fixed Scanners in Service Area	Planning Threshold	Inpatient and Contrast Adjusted Thresholds
4 and over	70.0%	4,805
3	65.0%	4,462
2	60.0%	4,118
1	55.0%	3,775
0	25.0%	1,716

The following shows the weighting values to be assigned based on the complexity of the procedure type. Weights of 0.4 add 12 minutes to the standard 30-minute procedure time.

Procedure Type	Base Weight	Inpatient Weight	Contrast Weight	Procedure Time in Minutes
Outpatient - No Contrast/Sedation	1.0	0.0	0.0	30
Outpatient - with Contrast/Sedation	1.0	0.0	0.4	42
Inpatient - No Contrast/Sedation	1.0	0.4	0.0	42
Inpatient - with Contrast/Sedation	1.0	0.4	0.4	54

The standard methodology used to determine need for fixed MRI scanners is as follows, with results presented in Table 17E-1:

- Step 1: List the number of clinical fixed and mobile MRI scanners in each MRI service area by site to include: existing fixed or mobile MRI scanners in operation, approved fixed or mobile MRI scanners for which a certificate of need was issued but is pending development, and prior need determinations for which no certificate of need has yet been issued. The total is the number of fixed magnets in each service area (*Column E*).
- Step 2: Convert the number of fixed and mobile MRI scanners to fixed equivalent magnets as follows (*Column F*):
 - a. For each existing fixed MRI scanner, assign a value of one fixed equivalent magnet;
 - b. For each approved fixed MRI scanner, assign a value of one fixed equivalent magnet, even though the site may be receiving mobile services temporarily until the fixed scanner is operational. Table

17E-1 does not list mobile services separately from the approved fixed MRI scanner if the mobile unit will no longer be used when the fixed MRI scanner is operational.

- c. For each existing mobile MRI scanner site, calculate the fixed equivalent for each mobile site by dividing the number of MRI scans performed at each site by the threshold for the MRI service area, with the exception that the fixed equivalent shall be no greater than one; and

- Step 3: Sum the number of fixed equivalent magnets for each MRI service area (*Column F*).
- Step 4: Determine the total number of MRI procedures performed at each site regardless of whether the MRI scanner is fixed or mobile. If procedures are provided in a county that is part of more than one MRI service area, divide the procedures equally between the service areas (*Column G*).
- Step 5: Of the total number of procedures performed, determine the number performed by type (i.e., inpatient, outpatient, with contrast or sedation, without contrast or sedation) (*Columns H-K*).
- Step 6: For each site, multiply the number of inpatient procedures by 0.40 to calculate the inpatient adjustment.
- Step 7: For each site, multiply the number of contrast or sedation procedures by 0.40 to calculate the contrast adjustment.
- Step 8: For each site, sum the total number of procedures performed (Step 4), the inpatient adjustment (Step 6), and the contrast adjustment (Step 7) to calculate the total number of adjusted MRI procedures for each site (*Column L*).
- Step 9: For each service area, sum the number of adjusted total procedures for all sites in the service area (*Column L*).
- Step 10: Calculate the average number of adjusted total procedures per MRI scanner in the service area by dividing the adjusted total procedures for the service area (Step 9) by the sum of fixed equivalent magnets in the service area (Step 3) (*Column M*). If the number of fixed equivalent scanners (*Column F*) is less than one, then no calculation is performed. The adjusted total number of scans (*Column L*) is carried over for the calculation in Column M.
- Step 11: Apply the MRI Tiered Planning Threshold (see Assumptions of the Methodology) for the service area based on the number of existing, approved and pending fixed MRI scanners in the service area as identified in Step 1 (*Column N*).
- Step 12: In each service area, compare the average procedures per fixed equivalent magnet (Step 10) with the threshold for the service area (Step 11). If the average procedure per magnet is greater than or equal to the service area threshold, the service area has a need determination for one additional MRI scanner (*Column O*).

The SMFP does not have a methodology to project need for additional mobile MRI scanners. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to acquire the mobile MRI scanner.

Guilford	1	October 15, 2020	November 1, 2020
Mecklenburg	1	August 17, 2020	September 1, 2020
Watauga	1	April 15, 2020	May 1, 2020
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

* Any person can apply to meet the need, not just the health service facility or facilities that generated the need.

** Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

*** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**** In response to a petition, the State Health Coordinating Council approved the removal of the fixed MRI scanner need determination in Pasquotank/Camden/Currituck/Perquimans Service Area.

F. POSITRON EMISSION TOMOGRAPHY SCANNERS

Introduction

A positron emission tomography (PET) scanner, as defined in G.S. 131E-176(19a), means “equipment that utilizes a computerized radiographic technique that employs radioactive substances to examine the metabolic activity of various body structures.”

The first PET scanners were dedicated machines performing only that service, supported by cyclotrons on-site. However, PET scanners also include hybrid machines, performing a variety of nuclear medicine studies and supported by new tracer production facilities housing cyclotrons in stand-alone facilities. Many PET scanners are configured with a single gantry to accommodate computed tomography (CT) to acquire sequential PET and CT images during the same exam. All of these machines are PET scanners as defined in G.S. 131E-176 (19a), but they vary widely in their capabilities.

Dedicated PET scanners can be fixed or mobile. “Mobile PET scanner” means a dedicated PET scanner and its transporting equipment that is moved, at least weekly, to provide services at two or more host facilities.

Assumptions of the Methodology

1. The methodology concerns dedicated PET scanners only. Dedicated scanners do not perform other nuclear medicine procedures.
2. A dedicated fixed PET scanner's service area is the Health Service Area (HSA) in which the scanner is located (*Table 17F-1*). Appendix A identifies the multicounty groupings that comprise the HSAs.
3. A dedicated mobile PET scanner has a statewide service area (*Table 17F-2*).
4. There is a need for one additional fixed dedicated PET scanner when each existing fixed dedicated PET scanner was utilized at or above 80% of capacity during the current reporting year. For the purposes of need determination calculations, the annual capacity of a fixed dedicated PET scanner is 3,000 procedures; 80% capacity is 2,400 procedures.

Application of the Methodology

Part 1 (*Table 17F-1*):

Determine the planning inventory of all fixed PET scanners in the state to include existing fixed PET scanners in operation, approved fixed PET scanners for which a certificate of need was issued but is pending development, and need determinations in prior SMFPs for which a certificate of need has not yet been issued (*Column C*).

- Step 1: For each facility that operates a PET scanner, determine the total number of procedures performed on all fixed PET scanners located at the facility for the current reporting year (*Column D*).
- Step 2: Multiply the number of fixed PET scanners at each facility by 3,000 procedures to determine the PET scanner capacity at each facility.
- Step 3: Divide the total number of PET scanner procedures performed at each facility, as determined in Step 1, by the capacity calculated in Step 2. Multiply the results by 100 to convert the numbers to a utilization percentage (*Column E*).

Step 4: A service area has a need determination for an additional fixed PET scanner if the utilization percentage is 80% or greater at a facility, except as provided in Step 7 for both parts of the methodology combined.

Part 2:

Step 5: Identify each major cancer treatment facility, program or provider in the state, defined as providers that operate two linear accelerators that performed over 12,500 ESTV procedures during the current reporting year (*Table 17C-5*).

Step 6: A service area has a need determination for one additional fixed PET scanner if a major cancer treatment facility, program, or provider identified in Step 5 is hospital-based (i.e., on a hospital's license) and does not own or operate a fixed dedicated PET scanner, except as provided in Step 7 for both parts of the methodology combined.

Step 7: The maximum need determination for a single HSA in any one year will be no more than two additional fixed PET scanners regardless of the numbers generated individually by each part of the methodology (*Table 17F-1, Column F*).

The SMFP does not have a methodology to project need for additional mobile PET scanners. A summer petition is required to place a need in the upcoming SMFP. If the need determination is approved, any person may apply for a certificate of need to acquire the mobile PET scanner.

APPENDIX B

PARTIAL LISTING OF HEALTHCARE PLANNING ACRONYMS/TERMS

Statute 131 E – 175 et. seq. – Certificate of Need Law

Acronym / Term Refers to / Meaning

AC	Acute Care
ACH	Adult Care Home
ACS	Acute Care Services
AIDS	Acquired Immune Deficiency Syndrome
APA	Administrative Procedures Act
ASC	Ambulatory Surgery Center
CAP MR/DD	Community Alternatives Program for Mentally Retarded/Developmentally Disabled Persons (same as CAP/MR Waiver Program)
CCRC	Continuing Care Retirement Community
CD	Chemical Dependency
CMS	Centers for Medicare & Medicaid Services (Federal Agency)
COG	Council of Governments
CON	Certificate of Need
CPT	Current Procedural Terminology (code set maintained by the American Medical Association)
C-Section	Cesarean Section
DD	Developmental Disability
DFS	Division of Facility Services which has become the DHSR
DHSR	Division of Health Service Regulation
DHHS	Department of Health and Human Services
DMA	Division of Medical Assistance
DMH/DD/SAS	Division of Mental Health, Developmental Disabilities and Substance Abuse Services
DRG	Diagnosis Related Group
DSM III R	Diagnostic and Statistical Manual of Mental Disorders (revised)
Endo	Endoscopy
ESRD	End-Stage Renal Disease
ESTV	Equivalent Simple Treatment Visits
ESWL	Extracorporeal Shock Wave Lithotripsy
GS	General Statute(s)
HCUP	Healthcare Cost and Utilization Project
HPCON	Healthcare Planning and Certificate of Need Section (A section within DHSR that reviews applications and awards Certificates of Need)
HIV+	Infection with Human Immunodeficiency Virus
HH	Home Health
HSA	Health Service Area
HUD	Housing and Urban Development (Federal Agency)
ICD	International Classification of Diseases

ICF/IID	Intermediate Care Facility for Individuals with Intellectual Disabilities (new name for Intermediate Care Facility for the Mentally Retarded based on 2010 Rosa's Law)
ICU	Intensive Care Unit
IP	Inpatient
LME	Local Management Entity
LRA	License Renewal Application
LTC	Long-Term Care
LTCH	Long-Term Care Hospital
MCO	Managed Care Organization
MDC	Major Diagnostic Category
MH	Mental Health
MRI	Magnetic Resonance Imaging Scanner
NCAC	North Carolina Administrative Code (also known as: Rules)
NH	Nursing Home and Nursing Care Facilities
OP	Outpatient
OR	Operating Room
PET	Positron Emission Tomography Scanner
Plan	North Carolina State Medical Facilities Plan
PSY	Psychiatric
QAV	Quality, Access and Value
SA	Substance Abuse
SDR	Semiannual Dialysis Report (prepared by Healthcare Planning)
SHCC	State Health Coordinating Council (Official Title: North Carolina State Health Coordinating Council)
SMFP	State Medical Facilities Plan

APPENDIX C

LIST OF CONTIGUOUS COUNTIES

For purposes of the State Medical Facilities Plan, Healthcare Planning defines contiguous groupings in relation to a base county and includes any North Carolina county that touches that base county.

State of North Carolina

PAT McCRORY
GOVERNOR

March 4, 2014

EXECUTIVE ORDER NO. 46

REAUTHORIZING THE STATE HEALTH COORDINATING COUNCIL

WHEREAS, the State Health Coordinating Council is a public advisory body established by Executive Order No. 139 on March 3, 2008; and

WHEREAS, the State Health Coordinating Council plays an important role in working with the Department of Health and Human Services to prepare the State Medical Facilities Plan approved annually by the Governor; and

WHEREAS, the success of the State Health Coordinating Council depends on the membership of persons knowledgeable about healthcare services, facilities, and technology including physicians, representatives of business and industry, medical educators and members of professional associations; and

WHEREAS, the State Health Coordinating Council has only advisory authority and therefore is not a covered board under the State Ethics Act; and

WHEREAS, it is important that the State Health Coordinating Council exercise its advisory authority in a transparent manner so that the Governor and citizens have full knowledge of the professional and economic interests of members of the State Health Coordinating Council represent; and

By the power vested in me as Governor by the Constitution and laws of the State of North Carolina, **IT IS ORDERED:**

Section 1. Establishment

The North Carolina State Health Coordinating Council (hereinafter "NCSHCC") is hereby reestablished.

Section 2. Membership

The NCSHCC shall have the following duties and functions:

- a) Serve as a forum for hearing regional concerns and recommendations related to health planning;
- b) Compile a list of state health needs and advise the Department of Health and Human Services;
- c) Advise the Department of Human Resources on issues related to state health needs, giving attention to local, regional, and statewide needs;

- d) Review and comment on contents of documents related to health planning and make recommendations concerning them to the Secretary of Human and Human Services and the Governor;
- e) Advise the Department of Health and Human Services on cost-effective mechanisms for achieving health needs;
- f) Prepare the Annual State Medical Facilities Plan and present the plan to the Governor.

Section 3. Membership

The NCSHCC shall consist of 25 members who shall be appointed by the Governor as follows:

- a) One member from an academic medical center;
- b) Two members from business and industry (at least one individual representing small business and one representing large business);
- c) One member from the health insurance industry;
- d) Two members from county government (one representing a rural county and one representing an urban county);
- e) One member representing nursing homes;
- f) One members representing hospitals;
- g) One member representing home care facilities;
- h) One member representing hospice;
- i) One local health director;
- j) One licensed physician;
- k) One member from the North Carolina House of Representatives;
- l) One member from the North Carolina Senate;
- m) Eleven at-large members to represent other health professionals, business, industry and to ensure regional representation.

Section 4. Terms of Membership

The terms of membership of the NCSHCC shall be staggered so that the terms of approximately one-third of the members shall expire in a single calendar year. All members shall be appointed for a term of three years. Terms shall expire on December 31, and new terms shall begin on January 1. Members of the NCSHCC shall serve at the pleasure of the Governor.

Members currently serving on February 28, 2014 shall continue to serve at the pleasure of the Governor until their successors are appointed or otherwise noticed by the Office of the Governor.

Section 5. Vacancies

A vacancy occurring during a term of appointment is filled in the same manner as the original appointment and for the balance of the unexpired terms.

Section 6. Travel Expenses

Members of the NCSHCC shall receive necessary travel and subsistence expenses in accordance with the provision of G.S. § 138-5.

Section 7. Chairman

The Chairman and Vice Chairman of the NCSHCC shall be appointed by the Governor. The Chairman and Vice Chairman shall serve at the pleasure of the Governor. The NCSHCC may elect other such officers as it deems necessary.

Section 8. Meetings

The NCSHCC shall meet quarterly and at other times at the call of the Chairman or upon written request of at least ten (10) of its members. All business meetings of the NCSHCC, its committees and subcommittees, or special task forces shall be open to the public.

Section 9. Staff Assistance

The Department of Health and Human Services shall provide clerical support and other services required by the NCSHCC.

Section 10. Ethical Standards

1. The members of the NCSHCC shall always act in the best interests of the public and shall bring their particular knowledge and experience to the NCSHCC to serve the public interest as identified in the Certificate of Needs Law, Chapter 131E, Article 9 of the General Statutes.
2. The following process shall be observed for all meetings of the NCSHCC and NCSHCC subcommittees at which the NCSHCC or NCSHCC subcommittee takes any action:
 - a. At the beginning of each meeting, the Chair shall remind all members of their duty to act always in the best interest of the public without regard for their own professional, institutional or financial interests and that members should recuse themselves from voting on any matter on which they cannot meet this standard.
 - b. Prior to conducting any business, each member shall disclose any professional or institutional interest he or she may have in any matter coming before the NCSHCC or NCSHCC subcommittee for action at that meeting. The Chair will determine if the member needs to recuse himself or herself from voting on the matter in order to ensure the integrity of the actions of the NCSHCC or NCSHCC subcommittee.
 - c. Prior to conducting any business, each member shall also disclose any financial benefit he or she may derive from any matter coming before the NCSHCC or NCSHCC subcommittee for action at that meeting. A member derives a financial benefit from a matter under consideration if the person or his/her spouse (i) has an ownership interest in an entity that is a party to the matter under consideration; (ii) will derive any income or commission as a direct result of action on the matter under consideration; or (iii) will acquire property as a direct result of action on the matter under consideration. When any member indicates that he or she will derive a financial benefit from a matter coming before the NCSHCC or any subcommittee, the member shall recuse himself or herself from voting on the matter.
 - d. A member who has recused himself or herself from voting is not prohibited from deliberating on the matter unless the Chair determines, after review, that participation by the member in deliberations would impair the integrity of the actions of the NCSHCC or NCSHCC subcommittee.
 - e. The minutes of the NCSHCC and its subcommittees will reflect all disclosures and recusals made pursuant to this section, and such minutes will be provided to the Governor for review with the SMFP.
 - f. A challenge to a member's participation in a vote on issues under this Executive Order may be raised only by a member of the NCSHCC or an employee of the

Division of Health Services Regulation of DHHS. In such case where a challenge is made, the Chair, in consultation with the DHHS legal counsel, shall determine whether the challenge is valid and the action that should be taken.

- g. For the purposes of this Executive Order, the term "Chair" means the Chair of the NCSHCC or the Chair of any NCSHCC subcommittee. In the absence of the Chair or if the professional, institutional, or financial interests of the Chair must be reviewed pursuant to this section, then the Vice-Chair of the NCSHCC or NCSHCC subcommittee shall make the determinations required by this section.
3. Members of the NCSHCC are expected to and should confer with DHHS on any matters that come before them in the development of the SMFP. No member of the NCSHCC, however, may confer with any DHHS employee regarding any proposed provision of the SMFP or any proposed or pending certificate of need application in which the member has a direct, conflicting professional, institutional or financial interest, except in public meetings conducted by DHHS or the NCSHCC.
4. This Executive Order is for the Governor's purposes in reviewing and approving or amending the proposed SMFP submitted by the NCSHCC and DHHS. This Order does not and shall not be construed to create any rights, nor create claims, under the Certificate of Need Law, State Government Ethics Act, or otherwise.

This Executive Order is retroactive to March 1, 2014 and shall remain in effect until December 31, 2016, pursuant to N.C. Gen. Stat. § 147-16.2(b), or until earlier rescinded. This order supersedes and replaces all other executive orders on this subject and specifically rescinds Executive Order No. 139 issued on March 3, 2008, Executive Order No. 10 issued on March 3, 2009, Executive Order No. 52 issued on March 2, 2010, and Executive Order No. 67 issued on October 4, 2010.

IN WITNESS WHEREOF, I have hereunto signed my name and affixed the Great Seal of the State of North Carolina at the Capitol in the City of Raleigh, this 4th day of March in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-eight.

EXECUTIVE ORDER NO. 122

EXTENDING THE STATE HEALTH COORDINATING COUNCIL

WHEREAS, the State Health Coordinating Council is a public body established by Executive Order No. 46 on March 4, 2014; and

WHEREAS, the State Health Coordinating Council plays an important role in working with the Department of Health and Human Services to prepare the State Medical Facilities Plan approved annually by the Governor; and

WHEREAS, the order establishing the State Health Coordinating Council expires on December 31, 2016; and

NOW THEREFORE, by the power vested in me as Governor by the Constitution and laws of the State of North Carolina, **IT IS ORDERED**:

Executive Order Number 46, *Reauthorizing the State Health Coordinating Council*, signed on March 4, 2014, is hereby extended until December 31, 2020 pursuant to N.C. Gen. Stat. § 147-16.2(b), or until earlier rescinded.

IN WITNESS WHEREOF, I have hereunto signed my name and affixed the Great Seal of the State of North Carolina at the Capitol in the City of Raleigh, this twenty-ninth day of December in the year of our Lord two thousand and sixteen.

APPENDIX E

NORTH CAROLINA CERTIFICATE OF NEED STATUTE

Article 9 Certificate of Need

§ 131E-175. Findings of fact.

The General Assembly of North Carolina makes the following findings:

- (1) That the financing of health care, particularly the reimbursement of health services rendered by health service facilities, limits the effect of free market competition and government regulation is therefore necessary to control costs, utilization, and distribution of new health service facilities and the bed complements of these health service facilities.
- (2) That the increasing cost of health care services offered through health service facilities threatens the health and welfare of the citizens of this State in that citizens need assurance of economical and readily available health care.
- (3) That, if left to the market place to allocate health service facilities and health care services, geographical maldistribution of these facilities and services would occur and, further, less than equal access to all population groups, especially those that have traditionally been medically underserved, would result.
- (3a) That access to health care services and health care facilities is critical to the welfare of rural North Carolinians, and to the continued viability of rural communities, and that the needs of rural North Carolinians should be considered in the certificate of need review process.
- (4) That the proliferation of unnecessary health service facilities results in costly duplication and underuse of facilities, with the availability of excess capacity leading to unnecessary use of expensive resources and overutilization of health care services.
- (5) Repealed.
- (6) That excess capacity of health service facilities places an enormous economic burden on the public who pay for the construction and operation of these facilities as patients, health insurance subscribers, health plan contributors, and taxpayers.
- (7) That the general welfare and protection of lives, health, and property of the people of this State require that new institutional health services to be offered within this State be subject to review and evaluation as to need, cost of service, accessibility to services, quality of care, feasibility, and other criteria as determined by provisions of this Article or by the North Carolina Department of Health and Human Services pursuant to provisions of this Article prior to such services being offered or developed in order that only appropriate and needed institutional health services are made available in the area to be served.
- (8) That because persons who have received exemptions under Section 11.9(a) of S.L. 2000-67, as amended, and under Section 11.69(b) of S.L. 1997-443, as amended by Section 12.16C(a) of S.L. 1998-212, and as amended by Section 1 of S.L. 1999-135, have had sufficient time to complete development plans and initiate construction of beds in adult care homes.
- (9) That because with the enactment of this legislation, beds allowed under the exemptions noted above and pending development will count in the inventory of adult care home beds available to provide care to residents in the State Medical Facilities Plan.
- (10) That because State and county expenditures provide support for nearly three-quarters of the residents in adult care homes through the State County Special Assistance program, and excess bed capacity increases costs per resident day, it is in the public interest to promote efficiencies in

delivering care in those facilities by controlling and directing their growth in an effort to prevent underutilization and higher costs and provide appropriate geographical distribution.

- (11) That physicians providing gastrointestinal endoscopy services in unlicensed settings should be given an opportunity to obtain a license to provide those services to ensure the safety of patients and the provision of quality care.
- (12) That demand for gastrointestinal endoscopy services is increasing at a substantially faster rate than the general population given the procedure is recognized as a highly effective means to diagnose and prevent cancer.

§ 131E-176. Definitions.

The following definitions apply in this Article:

- (1) Adult care home. – A facility with seven or more beds licensed under Part 1 of Article 1 of Chapter 131D of the General Statutes or under this Chapter that provides residential care for aged individuals or individuals with disabilities whose principal need is a home which provides the supervision and personal care appropriate to their age and disability and for whom medical care is only occasional or incidental.
- (1a) Air ambulance. – Aircraft used to provide air transport of sick or injured persons between destinations within the State.
- (1b) Ambulatory surgical facility. – A facility designed for the provision of a specialty ambulatory surgical program or a multispecialty ambulatory surgical program. An ambulatory surgical facility serves patients who require local, regional, or general anesthesia and a period of post-operative observation. An ambulatory surgical facility may only admit patients for a period of less than 24 hours and must provide at least one designated operating room or gastrointestinal endoscopy room and at least one designated recovery room, have available the necessary equipment and trained personnel to handle emergencies, provide adequate quality assurance and assessment by an evaluation and review committee, and maintain adequate medical records for each patient. An ambulatory surgical facility may be operated as a part of a physician or dentist's office, provided the facility is licensed under Part 4 of Article 6 of this Chapter, but the performance of incidental, limited ambulatory surgical procedures which do not constitute an ambulatory surgical program and which are performed in a physician's or dentist's office does not make that office an ambulatory surgical facility.
- (1c) Ambulatory surgical program. – A formal program for providing on a same-day basis those surgical procedures which require local, regional, or general anesthesia and a period of post-operative observation to patients whose admission for more than 24 hours is determined, prior to surgery or gastrointestinal endoscopy, to be medically unnecessary.
- (2) Bed capacity. – Space used exclusively for inpatient care, including space designed or remodeled for licensed inpatient beds even though temporarily not used for such purposes. The number of beds to be counted in any patient room shall be the maximum number for which adequate square footage is provided as established by rules of the Department except that single beds in single rooms are counted even if the room contains inadequate square footage. The term "bed capacity" also refers to the number of dialysis stations in kidney disease treatment centers, including freestanding dialysis units.
- (2a) Bone marrow transplantation services. – The process of infusing bone marrow into persons with diseases to stimulate the production of blood cells.
- (2b) Burn intensive care services. – Services provided in a unit designed to care for patients who have been severely burned.
- (2c) Campus. – The adjacent grounds and buildings, or grounds and buildings not separated by more than a public right-of-way, of a health service facility and related health care entities.
- (2d) Capital expenditure. – An expenditure for a project, including but not limited to the cost of construction, engineering, and equipment which under generally accepted accounting principles is

- not properly chargeable as an expense of operation and maintenance. Capital expenditure includes, in addition, the fair market value of an acquisition made by donation, lease, or comparable arrangement by which a person obtains equipment, the expenditure for which would have been considered a capital expenditure under this Article if the person had acquired it by purchase.
- (2e) Repealed by Session Laws 2005-325, s. 1, effective for hospices and hospice offices December 31, 2005.
 - (2f) Cardiac catheterization equipment. – The equipment used to provide cardiac catheterization services.
 - (2g) Cardiac catheterization services. – Those procedures, excluding pulmonary angiography procedures, in which a catheter is introduced into a vein or artery and threaded through the circulatory system into the heart specifically to diagnose abnormalities in the motion, contraction, and blood flow of the moving heart or to perform surgical therapeutic interventions to restore, repair, or reconstruct the coronary blood vessels of the heart.
 - (3) Certificate of need. – A written order which affords the person so designated as the legal proponent of the proposed project the opportunity to proceed with the development of such project.
 - (4) Repealed by Session Laws 1993, c. 7, s. 2.
 - (5) Change in bed capacity. – Any of the following:
 - a. Any relocation of health service facility beds, or dialysis stations from one licensed facility or campus to another.
 - b. Any redistribution of health service facility bed capacity among the categories of health service facility bed.
 - c. Any increase in the number of health service facility beds, or dialysis stations in kidney disease treatment centers, including freestanding dialysis units.
 - (5a) Chemical dependency treatment facility. – A public or private facility, or unit in a facility, which is engaged in providing 24-hour a day treatment for chemical dependency or a substance use disorder. This treatment may include detoxification, administration of a therapeutic regimen for the treatment of individuals with chemical dependence or substance use disorders, and related services. The facility or unit may be any of the following:
 - a. A unit within a general hospital or an attached or freestanding unit of a general hospital licensed under Article 5 of this Chapter.
 - b. A unit within a psychiatric hospital or an attached or freestanding unit of a psychiatric hospital licensed under Article 1A of former Chapter 122 of the General Statutes or Article 2 of Chapter 122C of the General Statutes.
 - c. A freestanding facility specializing in treatment of individuals with chemical dependence or substance use disorders that is licensed under Article 1A of former Chapter 122 of the General Statutes or Article 2 of Chapter 122C of the General Statutes. The facility may be identified as "chemical dependency, substance abuse, alcoholism, or drug abuse treatment units," "residential chemical dependency, substance use disorder, alcoholism or drug abuse facilities," or by other names if the purpose is to provide treatment of individuals with chemical dependence or substance use disorders. The term, however, does not include social setting detoxification facilities, medical detoxification facilities, halfway houses, or recovery farms.
 - (5b) Chemical dependency treatment beds. – Beds that are licensed for the inpatient treatment of chemical dependency. Residential treatment beds for the treatment of chemical dependency or substance use disorder are chemical dependency treatment beds. Chemical dependency treatment beds do not include beds licensed for detoxification.
 - (6) Department. – The North Carolina Department of Health and Human Services.
 - (7) Develop. – When used in connection with health services, means to undertake those activities which will result in the offering of institutional health service or the incurring of a financial obligation in relation to the offering of such a service.

- (7a) Diagnostic center. – A freestanding facility, program, or provider, including but not limited to, physicians' offices, clinical laboratories, radiology centers, and mobile diagnostic programs, in which the total cost of all the medical diagnostic equipment utilized by the facility which cost ten thousand dollars (\$10,000) or more exceeds five hundred thousand dollars (\$500,000). In determining whether the medical diagnostic equipment in a diagnostic center costs more than five hundred thousand dollars (\$500,000), the costs of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater.
- (7b) Expedited review. – The status given to an application's review process when the applicant petitions for the review and the Department approves the request based on findings that all of the following are met:
- a. The review is not competitive.
 - b. The proposed capital expenditure is less than five million dollars (\$5,000,000).
 - c. A request for a public hearing is not received within the time frame defined in G.S. 131E-185.
 - d. The agency has not determined that a public hearing is in the public interest.
- (7c) Gamma knife. – Equipment which emits photon beams from a stationary radioactive cobalt source to treat lesions deep within the brain and is one type of stereotactic radiosurgery.
- (7d) Gastrointestinal endoscopy room. – A room used for the performance of procedures that require the insertion of a flexible endoscope into a gastrointestinal orifice to visualize the gastrointestinal lining and adjacent organs for diagnostic or therapeutic purposes.
- (8),(9) Repealed by Session Laws 1987, c. 511, s. 1.
- (9a) Health service. – An organized, interrelated activity that is medical, diagnostic, therapeutic, rehabilitative, or a combination thereof and that is integral to the prevention of disease or the clinical management of an individual who is sick or injured or who has a disability. "Health service" does not include administrative and other activities that are not integral to clinical management.
- (9b) Health service facility. – A hospital; long-term care hospital; psychiatric facility; rehabilitation facility; nursing home facility; adult care home; kidney disease treatment center, including freestanding hemodialysis units; intermediate care facility for individuals with intellectual disabilities; home health agency office; chemical dependency treatment facility; diagnostic center; hospice office, hospice inpatient facility, hospice residential care facility; and ambulatory surgical facility.
- (9c) Health service facility bed. – A bed licensed for use in a health service facility in the categories of (i) acute care beds; (ii) psychiatric beds; (iii) rehabilitation beds; (iv) nursing home beds; (v) intermediate care beds for individuals with intellectual disabilities; (vi) chemical dependency treatment beds; (vii) hospice inpatient facility beds; (viii) hospice residential care facility beds; (ix) adult care home beds; and (x) long-term care hospital beds.
- (10) Health maintenance organization (HMO). – A public or private organization which has received its certificate of authority under Article 67 of Chapter 58 of the General Statutes and which either is a qualified health maintenance organization under Section 1310(d) of the Public Health Service Act or satisfies all of the following:
- a. Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services: usual physician services, hospitalization, laboratory, X ray, emergency and preventive services, and out-of-area coverage.
 - b. Is compensated, except for copayments, for the provision of the basic health care services listed in sub-subdivision a. of this subdivision to enrolled participants by a payment which is paid on a periodic basis without regard to the date the health care services are provided

- and which is fixed without regard to the frequency, extent, or kind of health service actually provided.
- c. Provides physicians' services primarily (i) directly through physicians who are either employees or partners of such organizations, or (ii) through arrangements with individual physicians or one or more groups of physicians organized on a group practice or individual practice basis.
- (10a) Heart-lung bypass machine. – The equipment used to perform extra-corporeal circulation and oxygenation during surgical procedures.
- (11) Repealed by Session Laws 1991, c. 692, s. 1.
- (12) Home health agency. – A private organization or public agency, whether owned or operated by one or more persons or legal entities, which furnishes or offers to furnish home health services.
- (12a) Home health services. – Items and services furnished to an individual by a home health agency, or by others under arrangements with such others made by the agency, on a visiting basis, and except for sub-subdivision e. of this subdivision, in a place of temporary or permanent residence used as the individual's home as follows:
- a. Part-time or intermittent nursing care provided by or under the supervision of a registered nurse.
 - b. Physical, occupational, or speech therapy.
 - c. Medical social services, home health aid [sic] services, and other therapeutic services.
 - d. Medical supplies, other than drugs and biologicals and the use of medical appliances.
 - e. Any of the items and services listed in this subdivision which are provided on an outpatient basis under arrangements made by the home health agency at a hospital or nursing home facility or rehabilitation center and the furnishing of which involves the use of equipment of such a nature that the items and services cannot readily be made available to the individual at home, or which are furnished at the facility while the individual is there to receive any such item or service, but not including transportation of the individual in connection with any such item or service.
- (13) Hospital. – A public or private institution which is primarily engaged in providing to inpatients, by or under supervision of physicians, diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons, or rehabilitation services for the rehabilitation of injured, disabled, or sick persons. The term includes all facilities licensed pursuant to G.S. 131E-77, except long-term care hospitals.
- (13a) Hospice. – Any coordinated program of home care with provision for inpatient care for terminally ill patients and their families. This care is provided by a medically directed interdisciplinary team, directly or through an agreement under the direction of an identifiable hospice administration. A hospice program of care provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of patients and their families, which are experienced during the final stages of terminal illness and during dying and bereavement.
- (13b) Hospice inpatient facility. – A freestanding licensed hospice facility or a designated inpatient unit in an existing health service facility which provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of terminally ill patients and their families in an inpatient setting. For purposes of this Article only, a hospital which has a contractual agreement with a licensed hospice to provide inpatient services to a hospice patient as defined in G.S. 131E-201(4) and provides those services in a licensed acute care bed is not a hospice inpatient facility and is not subject to the requirements in sub-subdivision (5)b. of this section for hospice inpatient beds.
- (13c) Hospice residential care facility. – A freestanding licensed hospice facility which provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of terminally ill patients and their families in a group residential setting.
- (14) Repealed by Session Laws 1987, c. 511, s. 1.

- (14a) Intermediate care facility for individuals with intellectual disabilities. – Facilities licensed pursuant to Article 2 of Chapter 122C of the General Statutes for the purpose of providing health and habilitative services based on the developmental model and principles of normalization for individuals with intellectual disabilities, autism, cerebral palsy, epilepsy or related conditions.
- (14b) Repealed by Session Laws 1991, c. 692, s. 1.
- (14c) Reserved for future codification.
- (14d) Repealed by Session Laws 2001-234, s. 2, effective January 1, 2002.
- (14e) Kidney disease treatment center. – A facility that is certified as an end-stage renal disease facility by the Centers for Medicare and Medicaid Services, Department of Health and Human Services, pursuant to 42 C.F.R. § 405.
- (14f) “Legacy Medical Care Facility” means a facility that meets all of the following requirements:
 - a. Is not presently operating.
 - b. Has not continuously operated for at least the past six months.
 - c. Within the last 24 months:
 - 1. Was operated by a person holding a license under G.S. 131E-77; and
 - 2. Was primarily engaged in providing to inpatients or outpatients, by or under supervision of physicians, (i) diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons or (ii) rehabilitation services for the rehabilitation of injured, disabled, or sick persons.
- (14g) Linear accelerator. – A machine used to produce ionizing radiation in excess of 1,000,000 electron volts in the form of a beam of electrons or photons to treat cancer patients.
- (14h) Reserved for future codification.
- (14i) Lithotripter. – Extra-corporeal shock wave technology used to treat persons with kidney stones and gallstones.
- (14j) Reserved for future codification.
- (14k) Long-term care hospital. – A hospital that has been classified and designated as a long-term care hospital by the Centers for Medicare and Medicaid Services, Department of Health and Human Services, pursuant to 42 C.F.R. § 412.
- (14l) Reserved for future codification.
- (14m) Magnetic resonance imaging scanner. – Medical imaging equipment that uses nuclear magnetic resonance.
- (14n) Main campus. – All of the following for the purposes of G.S. 131E-184(f) and (g) only:
 - a. The site of the main building from which a licensed health service facility provides clinical patient services and exercises financial and administrative control over the entire facility, including the buildings and grounds adjacent to that main building.
 - b. Other areas and structures that are not strictly contiguous to the main building but are located within 250 yards of the main building.
- (14o) Major medical equipment. – A single unit or single system of components with related functions which is used to provide medical and other health services and which costs more than seven hundred fifty thousand dollars (\$750,000). In determining whether the major medical equipment costs more than seven hundred fifty thousand dollars (\$750,000), the costs of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the major medical equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater. Major medical equipment does not include replacement equipment.
- (15) Repealed by Session Laws 1987, c. 511, s. 1.
- (15a) Multispecialty ambulatory surgical program. – A formal program for providing on a same-day basis surgical procedures for at least three of the following specialty areas: gynecology, otolaryngology, plastic surgery, general surgery, ophthalmology, orthopedic, or oral surgery.

- (15b) Neonatal intensive care services. – Those services provided by a health service facility to high-risk newborn infants who require constant nursing care, including but not limited to continuous cardiopulmonary and other supportive care.
- (16) New institutional health services. – Any of the following:
- a. The construction, development, or other establishment of a new health service facility.
 - b. Except as otherwise provided in G.S. 131E-184(e), the obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service. The cost of any studies, surveys, designs, plans, working drawings, specifications, and other activities, including staff effort and consulting and other services, essential to the acquisition, improvement, expansion, or replacement of any plant or equipment with respect to which an expenditure is made shall be included in determining if the expenditure exceeds two million dollars (\$2,000,000).
 - c. Any change in bed capacity.
 - d. The offering of dialysis services or home health services by or on behalf of a health service facility if those services were not offered within the previous 12 months by or on behalf of the facility.
 - e. A change in a project that was subject to certificate of need review and for which a certificate of need was issued, if the change is proposed during the development of the project or within one year after the project was completed. For purposes of this subdivision, a change in a project is a change of more than fifteen percent (15%) of the approved capital expenditure amount or the addition of a health service that is to be located in the facility, or portion thereof, that was constructed or developed in the project.
 - f. The development or offering of a health service as listed in this subdivision by or on behalf of any person:
 1. Bone marrow transplantation services.
 2. Burn intensive care services.
 - 2a. Cardiac catheterization services, except cardiac catheterization services provided on equipment furnished by a person authorized to operate the equipment in North Carolina pursuant to either a certificate of need issued for mobile cardiac catheterization equipment or a settlement agreement executed by the Department for provision of cardiac catheterization services.
 3. Neonatal intensive care services.
 4. Open-heart surgery services.
 5. Solid organ transplantation services.
 - f1. The acquisition by purchase, donation, lease, transfer, or comparable arrangement of any of the following equipment by or on behalf of any person:
 1. Air ambulance.¹
 2. Repealed.
 3. Cardiac catheterization equipment.
 4. Gamma knife.
 5. Heart-lung bypass machine.
 - 5a. Linear accelerator.
 6. Lithotripter.
 7. Magnetic resonance imaging scanner.
 8. Positron emission tomography scanner.
 9. Simulator.

¹ Pursuant to an Order of Permanent Injunction issued by the United States District Court for the Eastern District of North Carolina Western Division on October 15, 2008, the North Carolina Department of Health and Human Services is prohibited from requiring that any person obtain a certificate of need before acquiring an air ambulance.

- g.to k. Repealed.
- l. The purchase, lease, or acquisition of any health service facility, or portion thereof, or a controlling interest in the health service facility or portion thereof, if the health service facility was developed under a certificate of need issued pursuant to G.S. 131E-180.
 - m. Any conversion of nonhealth service facility beds to health service facility beds.
 - n. The construction, development or other establishment of a hospice, hospice inpatient facility, or hospice residential care facility;
 - o. The opening of an additional office by an existing home health agency **or** hospice within its service area as defined by rules adopted by the Department; or the opening of any office by an existing home health agency or hospice outside its service area as defined by rules adopted by the Department.
 - p. The acquisition by purchase, donation, lease, transfer, or comparable arrangement by any person of major medical equipment.
 - q. The relocation of a health service facility from one service area to another.
 - r. The conversion of a specialty ambulatory surgical program to a multispecialty ambulatory surgical program or the addition of a specialty to a specialty ambulatory surgical program.
 - s. The furnishing of mobile medical equipment to any person to provide health services in North Carolina, which was not in use in North Carolina prior to the adoption of this provision, if the equipment would otherwise be subject to review in accordance with sub-subdivision f1. of this subdivision or sub-subdivision p. of this subdivision if it had been acquired in North Carolina.
 - t. Repealed.
 - u. The construction, development, establishment, increase in the number, or relocation of an operating room or gastrointestinal endoscopy room in a licensed health service facility, other than the relocation of an operating room or gastrointestinal endoscopy room within the same building or on the same grounds or to grounds not separated by more than a public right-of-way adjacent to the grounds where the operating room is or gastrointestinal endoscopy room is currently located.
 - v. The change in designation, in a licensed health service facility, of an operating room to a gastrointestinal endoscopy room or change in designation of a gastrointestinal endoscopy room to an operating room that results in a different number of each type of room than is reflected on the health service facility's license in effect as of January 1, 2005.
- (17) North Carolina State Health Coordinating Council. – The Council that prepares, with the Department of Health and Human Services, the State Medical Facilities Plan.
- (17a) Nursing care. – Any of the following:
- a. Skilled nursing care and related services for residents who require medical or nursing care.
 - b. Rehabilitation services for the rehabilitation of individuals who are injured or sick or who have disabilities.
 - c. Health-related care and services provided on a regular basis to individuals who because of their mental or physical condition require care and services above the level of room and board, which can be made available to them only through institutional facilities.
- These are services which are not primarily for the care and treatment of mental diseases.
- (17b) Nursing home facility. – A health service facility whose bed complement of health service facility beds is composed principally of nursing home facility beds.
- (18) Offer. – In connection with health services, the act by a person of holding out as capable of providing, or as having the means to provide, specified health services.
- (18a) Repealed by Session Laws 2005-325, s. 1, effective for hospices and hospice offices December 31, 2005.
- (18b) Open-heart surgery services. – The provision of surgical procedures that utilize a heart-lung bypass machine during surgery to correct cardiac and coronary artery disease or defects.

- (18c) Operating room. – A room used for the performance of surgical procedures requiring one or more incisions and that is required to comply with all applicable licensure codes and standards for an operating room.
- (19) Person. – An individual; a trust or estate; a partnership; a corporation, including associations, joint stock companies, and insurance companies; the State; or a political subdivision or agency or instrumentality of the State.
- (19a) Positron emission tomography scanner. – Equipment that utilizes a computerized radiographic technique that employs radioactive substances to examine the metabolic activity of various body structures.
- (20) Project or capital expenditure project. – A proposal to undertake a capital expenditure that results in the offering of a new institutional health service. A project, or capital expenditure project, or proposed project may refer to the project from its earliest planning stages up through the point at which the specified new institutional health service may be offered. In the case of facility construction, the point at which the new institutional health service may be offered must take place after the facility is capable of being fully licensed and operated for its intended use, and at that time it shall be considered a health service facility.
- (21) Psychiatric facility. – A public or private facility licensed pursuant to Article 2 of Chapter 122C of the General Statutes and which is primarily engaged in providing to inpatients, by or under the supervision of a physician, psychiatric services for the diagnosis and treatment of individuals with mental illness.
- (22) Rehabilitation facility. – A public or private inpatient facility which is operated for the primary purpose of assisting in the rehabilitation of individuals with disabilities through an integrated program of medical and other services which are provided under competent, professional supervision.
- (22a) Replacement equipment. – Equipment that costs less than two million dollars (\$2,000,000) and is purchased for the sole purpose of replacing comparable medical equipment currently in use which will be sold or otherwise disposed of when replaced. In determining whether the replacement equipment costs less than two million dollars (\$2,000,000), the costs of equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the replacement equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater.
- (23) Repealed by Session Laws 1991, c. 692, s. 1.
- (24) Repealed by Session Laws 1993, c. 7, s. 2.
- (24a) Service area. – The area of the State, as defined in the State Medical Facilities Plan or in rules adopted by the Department, which receives services from a health service facility.
- (24b) Simulator. – A machine that produces high quality diagnostic radiographs and precisely reproduces the geometric relationships of megavoltage radiation therapy equipment to the patient.
- (24c) Reserved for future codification.
- (24d) Solid organ transplantation services. – The provision of surgical procedures and the interrelated medical services that accompany the surgery to remove an organ from a patient and surgically implant an organ from a donor.
- (24e) Reserved for future codification.
- (24f) Specialty ambulatory surgical program. – A formal program for providing on a same-day basis surgical procedures for only the specialty areas identified on the ambulatory surgical facility's 1993 Application for Licensure as an Ambulatory Surgical Center and authorized by its certificate of need.
- (25) State Medical Facilities Plan. – The plan prepared by the Department of Health and Human Services and the North Carolina State Health Coordinating Council, and approved by the Governor. In preparing the Plan, the Department and the State Health Coordinating Council shall maintain a mailing list of persons who have requested notice of public hearings regarding the Plan. Not less

than 15 days prior to a scheduled public hearing, the Department shall notify persons on its mailing list of the date, time, and location of the hearing. The Department shall hold at least one public hearing prior to the adoption of the proposed Plan and at least six public hearings after the adoption of the proposed Plan by the State Health Coordinating Council. The Council shall accept oral and written comments from the public concerning the Plan.

(26) Repealed by Session Laws 1983 (Regular Session, 1984), c. 1002, s. 9.

(27) Repealed by Session Laws 1987, c. 511, s.1.

§ 131E-177. Department of Health and Human Services is designated State Health Planning and Development Agency; powers and duties.

The Department of Health and Human Services is designated as the State Health Planning and Development Agency for the State of North Carolina, and is empowered to exercise the following powers and duties:

- (1) To establish standards and criteria or plans required to carry out the provisions and purposes of this Article and to adopt rules pursuant to Chapter 150B of the General Statutes, to carry out the purposes and provisions of this Article;
- (2) Adopt, amend, and repeal such rules and regulations, consistent with the laws of this State, as may be required by the federal government for grants-in-aid for health service facilities and health planning which may be made available by the federal government. This section shall be liberally construed in order that the State and its citizens may benefit from such grants-in-aid;
- (3) Define, by rule, procedures for submission of periodic reports by persons or health service facilities subject to agency review under this Article;
- (4) Develop policy, criteria, and standards for health service facilities planning; shall conduct statewide registration and inventories of and make determinations of need for health service facilities, health services as specified in G.S. 131E-176(16)f., and equipment as specified in G.S. 131E-176(16)f1., which shall include consideration of adequate geographic location of equipment and services; and develop a State Medical Facilities Plan;
- (5) Implement, by rule, criteria for project review;
- (6) Have the power to grant, deny, or withdraw a certificate of need and to impose such sanctions as are provided for by this Article;
- (7) Solicit, accept, hold and administer on behalf of the State any grants or bequests of money, securities or property to the Department for use by the Department in the administration of this Article; and
- (8) Repealed.
- (9) Collect fees for submitting applications for certificates of need.
- (10) The authority to review all records in any recording medium of any person or health service facility subject to agency review under this Article which pertain to construction and acquisition activities, staffing or costs and charges for patient care, including but not limited to, construction contracts, architectural contracts, consultant contracts, purchase orders, cancelled checks, accounting and financial records, debt instruments, loan and security agreements, staffing records, utilization statistics and any other records the Department deems to be reasonably necessary to determine compliance with this Article.

The Secretary of Health and Human Services shall have final decision-making authority with regard to all functions described in this section.

§ 131E-178. Activities requiring certificate of need.

- (a) No person shall offer or develop a new institutional health service without first obtaining a certificate of need from the Department; provided, however, no person who provides gastrointestinal endoscopy procedures in one or more gastrointestinal endoscopy rooms located in

a nonlicensed setting, shall be required to obtain a certificate of need to license that setting as an ambulatory surgical facility with the existing number of gastrointestinal endoscopy rooms, provided that:

- (1) The license application is postmarked for delivery to the Division of Health Service Regulation by December 31, 2006;
- (2) The applicant verifies, by affidavit submitted to the Division of Health Service Regulation within 60 days of the effective date of this act, that the facility is in operation as of the effective date of this act or that the completed application for the building permit for the facility was submitted by the effective date of this act;
- (3) The facility has been accredited by The Accreditation Association for Ambulatory Health Care, The Joint Commission on Accreditation of Healthcare Organizations, or The American Association for Accreditation of Ambulatory Surgical Facilities by the time the license application is postmarked for delivery to the Division of Health Service Regulation of the Department; and
- (4) The license application includes a commitment and plan for serving indigent and medically underserved populations.

All other persons proposing to obtain a license to establish an ambulatory surgical facility for the provision of gastrointestinal endoscopy procedures shall be required to obtain a certificate of need. The annual State Medical Facilities Plan shall not include policies or need determinations that limit the number of gastrointestinal endoscopy rooms that may be approved.

- (b) No person shall make an acquisition by donation, lease, transfer, or comparable arrangement without first obtaining a certificate of need from the Department, if the acquisition would have been a new institutional health service if it had been made by purchase. In determining whether an acquisition would have been a new institutional health service, the capital expenditure for the asset shall be deemed to be the fair market value of the asset or the cost of the asset, whichever is greater.
- (c) No person shall incur an obligation for a capital expenditure which is a new institutional health service without first obtaining a certificate of need from the Department. An obligation for a capital expenditure is incurred when:
 - (1) An enforceable contract, excepting contracts which are expressly contingent upon issuance of a certificate of need, is entered into by a person for the construction, acquisition, lease or financing of a capital asset;
 - (2) A person takes formal action to commit funds for a construction project undertaken as his own contractor; or
 - (3) In the case of donated property, the date on which the gift is completed.
- (d) Where the estimated cost of a proposed capital expenditure, including the fair market value of equipment acquired by purchase, lease, transfer, or other comparable arrangement, is certified by a licensed architect or engineer to be equal to or less than the expenditure minimum for capital expenditure for new institutional health services, such expenditure shall be deemed not to exceed the amount for new institutional health services regardless of the actual amount expended, provided that the following conditions are met:
 - (1) The certified estimated cost is prepared in writing 60 days or more before the obligation for the capital expenditure is incurred. Certified cost estimates shall be available for inspection at the facility and sent to the Department upon its request.
 - (2) The facility on whose behalf the expenditure was made notifies the Department in writing within 30 days of the date on which such expenditure is made if the expenditure exceeds the expenditure minimum for capital expenditures. The notice shall include a copy of the certified cost estimate.
- (e) The Department may grant certificates of need which permit capital expenditures only for predevelopment activities. Predevelopment activities include the preparation of architectural designs, plans, working drawings, or specifications, the preparation of studies and surveys, and the acquisition of a potential site.

§ 131E-179. Research activities.

- (a) Notwithstanding any other provisions of this Article, a health service facility may offer new institutional health services to be used solely for research, or incur the obligation of a capital expenditure solely for research, without a certificate of need, if the Department grants an exemption. The Department shall grant an exemption if the health service facility files a notice of intent with the Department in accordance with rules promulgated by the Department and if the Department finds that the offering or obligation will not:
 - (1) Affect the charges of the health service facility for the provision of medical or other patient care services other than services which are included in the research;
 - (2) Substantially change the bed capacity of the facility; or
 - (3) Substantially change the medical or other patient care services of the facility.
- (b) After a health service facility has received an exemption pursuant to subsection (a) of this section, it shall not offer the new institutional health services, or use a facility acquired through the capital expenditure, in a manner which affects the charges of the facility for the provision of medical or other patient care services, other than the services which are included in the research and shall not charge patients for the use of the service for which an exemption has been granted, without first obtaining a certificate of need from the Department; provided, however, that any facility or service acquired or developed under the exemption provided by this section shall not be subject to the foregoing restrictions on its use if the facility or service could otherwise be offered or developed without a certificate of need.
- (c) Any of the activities described in subsection (a) of this section shall be deemed to be solely for research even if they include patient care provided on an occasional and irregular basis and not as a part of the research program.

§ 131E-180. Repealed. 8-26-05

§ 131E-181. Nature of certificate of need.

- (a) A certificate of need shall be valid only for the defined scope, physical location, and person named in the application. A certificate of need shall not be transferred or assigned except as provided in G.S. 131E-189(c).
- (b) A recipient of a certificate of need, or any person who may subsequently acquire, in any manner whatsoever permitted by law, the service for which that certificate of need was issued, is required to materially comply with the representations made in its application for that certificate of need. The Department shall require any recipient of a certificate of need, or its successor, whose service is in operation to submit to the Department evidence that the recipient, or its successor, is in material compliance with the representations made in its application for the certificate of need which granted the recipient the right to operate that service. In determining whether the recipient of a certificate of need, or its successor, is operating a service which materially differs from the representations made in its application for that certificate of need, the Department shall consider cost increases to the recipient, or its successor, including, but not limited to, the following:
 - (1) Any increase in the consumer price index;
 - (2) Any increased cost incurred because of Government requirements, including federal, State, or any political subdivision thereof; and
 - (3) Any increase in cost due to professional fees or the purchase of services and supplies.
- (c) Whenever a certificate of need is issued more than 12 months after the application for the certificate of need began review, the Department shall adjust the capital expenditure amount proposed by increasing it to reflect any inflation in the Department of Commerce's Construction Cost Index that

has occurred since the date when the application began review; and the Department shall use this recalculated capital expenditure amount in the certificate of need issued for the project.

- (d) A project authorized by a certificate of need is complete when the health service or the health service facility for which the certificate of need was issued is licensed and certified and is in material compliance with the representations made in the certificate of need application.

§ 131E-182. Application.

- (a) The Department in its rules shall establish schedules for submission and review of completed applications. The schedules shall provide that applications for similar proposals in the same service area will be reviewed together. However, there shall not be a review schedule prior to February 1, 2006, for submission and review of certificate of need applications that propose an increase in the number of licensed gastrointestinal endoscopy rooms. An applicant for a certificate of need to establish a licensed gastrointestinal endoscopy room shall show that it is performing or reasonably projects to perform at least 1,500 gastrointestinal endoscopy procedures per gastrointestinal endoscopy room per year.
- (b) An application for a certificate of need shall be made on forms provided by the Department. The application forms, which may vary according to the type of proposal, shall require such information as the Department, by its rules deems necessary to conduct the review. An applicant shall be required to furnish only that information necessary to determine whether the proposed new institutional health service is consistent with the review criteria implemented under G.S. 131E-183 and with duly adopted standards, plans and criteria.
- (c) An application fee is imposed on an applicant for a certificate of need. An applicant must submit the fee with the application. The fee is not refundable, regardless of whether a certificate of need is issued. Fees collected under this section shall be credited to the General Fund as nontax revenue. The application fee is five thousand dollars (\$5,000) plus an amount equal to three-tenths of one percent (.3%) of the amount of the capital expenditure proposed in the application that exceeds one million dollars (\$1,000,000). In no event may the fee exceed fifty thousand dollars (\$50,000).

§ 131E-183. Review criteria.

- (a) The Department shall review all applications utilizing the criteria outlined in this subsection and shall determine that an application is either consistent with or not in conflict with these criteria before a certificate of need for the proposed project shall be issued.
 - (1) The proposed project shall be consistent with applicable policies and need determinations in the State Medical Facilities Plan, the need determination of which constitutes a determinative limitation on the provision of any health service, health service facility, health service facility beds, dialysis stations, operating rooms, or home health offices that may be approved.
 - (2) Repealed.
 - (3) The applicant shall identify the population to be served by the proposed project, and shall demonstrate the need that this population has for the services proposed, and the extent to which all residents of the area, and, in particular, low income persons, racial and ethnic minorities, women, handicapped persons, the elderly, and other underserved groups are likely to have access to the services proposed.
- (3a) In the case of a reduction or elimination of a service, including the relocation of a facility or a service, the applicant shall demonstrate that the needs of the population presently served will be met adequately by the proposed relocation or by alternative arrangements, and the effect of the reduction, elimination or relocation of the service on the ability of low income persons, racial and ethnic minorities, women, handicapped persons, and other underserved groups and the elderly to obtain needed health care.

- (4) Where alternative methods of meeting the needs for the proposed project exist, the applicant shall demonstrate that the least costly or most effective alternative has been proposed.
- (5) Financial and operational projections for the project shall demonstrate the availability of funds for capital and operating needs as well as the immediate and long-term financial feasibility of the proposal, based upon reasonable projections of the costs of and charges for providing health services by the person proposing the service.
- (6) The applicant shall demonstrate that the proposed project will not result in unnecessary duplication of existing or approved health service capabilities or facilities.
- (7) The applicant shall show evidence of the availability of resources, including health manpower and management personnel, for the provision of the services proposed to be provided.
- (8) The applicant shall demonstrate that the provider of the proposed services will make available, or otherwise make arrangements for, the provision of the necessary ancillary and support services. The applicant shall also demonstrate that the proposed service will be coordinated with the existing health care system.
- (9) An applicant proposing to provide a substantial portion of the project's services to individuals not residing in the health service area in which the project is located, or in adjacent health service areas, shall document the special needs and circumstances that warrant service to these individuals.
- (10) When applicable, the applicant shall show that the special needs of health maintenance organizations will be fulfilled by the project. Specifically, the applicant shall show that the project accommodates:
 - a. The needs of enrolled members and reasonably anticipated new members of the HMO for the health service to be provided by the organization; and
 - b. The availability of new health services from non-HMO providers or other HMOs in a reasonable and cost-effective manner which is consistent with the basic method of operation of the HMO. In assessing the availability of these health services from these providers, the applicant shall consider only whether the services from these providers:
 1. Would be available under a contract of at least five years' duration;
 2. Would be available and conveniently accessible through physicians and other health professionals associated with the HMO;
 3. Would cost no more than if the services were provided by the HMO; and
 4. Would be available in a manner which is administratively feasible to the HMO.
- (11) Repealed
- (12) Applications involving construction shall demonstrate that the cost, design, and means of construction proposed represent the most reasonable alternative, and that the construction project will not unduly increase the costs of providing health services by the person proposing the construction project or the costs and charges to the public of providing health services by other persons, and that applicable energy saving features have been incorporated into the construction plans.
- (13) The applicant shall demonstrate the contribution of the proposed service in meeting the health-related needs of the elderly and of members of medically underserved groups, such as medically indigent or low income persons, Medicaid and Medicare recipients, racial and ethnic minorities, women, and handicapped persons, which have traditionally experienced difficulties in obtaining equal access to the proposed services, particularly those needs identified in the State Health Plan as deserving of priority. For the purpose of determining the extent to which the proposed service will be accessible, the applicant shall show:

- a. The extent to which medically underserved populations currently use the applicant's existing services in comparison to the percentage of the population in the applicant's service area which is medically underserved;
 - b. Its past performance in meeting its obligation, if any, under any applicable regulations requiring provision of uncompensated care, community service, or access by minorities and handicapped persons to programs receiving federal assistance, including the existence of any civil rights access complaints against the applicant;
 - c. That the elderly and the medically underserved groups identified in this subdivision will be served by the applicant's proposed services and the extent to which each of these groups is expected to utilize the proposed services; and
 - d. That the applicant offers a range of means by which a person will have access to its services. Examples of a range of means are outpatient services, admission by house staff, and admission by personal physicians.
- (14) The applicant shall demonstrate that the proposed health services accommodate the clinical needs of health professional training programs in the area, as applicable.
- (15) through (18) Repealed.
- (18a) The applicant shall demonstrate the expected effects of the proposed services on competition in the proposed service area, including how any enhanced competition will have a positive impact upon the cost effectiveness, quality, and access to the services proposed; and in the case of applications for services where competition between providers will not have a favorable impact on cost effectiveness, quality, and access to the services proposed, the applicant shall demonstrate that its application is for a service on which competition will not have a favorable impact.
- (19) Repealed.
- (20) An applicant already involved in the provision of health services shall provide evidence that quality care has been provided in the past.
- (21) Repealed.
- (b) The Department is authorized to adopt rules for the review of particular types of applications that will be used in addition to those criteria outlined in subsection (a) of this section and may vary according to the purpose for which a particular review is being conducted or the type of health service reviewed. No such rule adopted by the Department shall require an academic medical center teaching hospital, as defined by the State Medical Facilities Plan, to demonstrate that any facility or service at another hospital is being appropriately utilized in order for that academic medical center teaching hospital to be approved for the issuance of a certificate of need to develop any similar facility or service.
- (c) Repealed.

§ 131E-184. Exemptions from review.

- (a) Except as provided in subsection (b) of this section, the Department shall exempt from certificate of need review a new institutional health service if it receives prior written notice from the entity proposing the new institutional health service, which notice includes an explanation of why the new institutional health service is required, for any of the following:
- (1) To eliminate or prevent imminent safety hazards as defined in federal, State, or local fire, building, or life safety codes or regulations.
 - (1a) To comply with State licensure standards.
 - (1b) To comply with accreditation or certification standards which must be met to receive reimbursement under Title XVIII of the Social Security Act or payments under a State plan for medical assistance approved under Title XIX of that act.
 - (2) Repealed.

- (3) To provide data processing equipment.
 - (4) To provide parking, heating or cooling systems, elevators, or other basic plant or mechanical improvements, unless these activities are integral portions of a project that involves the construction of a new health service facility or portion thereof and that is subject to certificate of need review.
 - (5) To replace or repair facilities destroyed or damaged by accident or natural disaster.
 - (6) To provide any nonhealth service facility or service.
 - (7) To provide replacement equipment.
 - (8) To acquire an existing health service facility, including equipment owned by the health service facility at the time of acquisition. A facility not currently licensed as an adult care home that was licensed as an adult care home within the preceding 12 months is considered an existing health service facility for the purposes of this subdivision.
 - (9) To develop or acquire a physician office building regardless of cost, unless a new institutional health service other than defined in G.S. 131E-176(16)b. is offered or developed in the building.
- (b) Those portions of a proposed project which are not proposed for one or more of the purposes under subsection (a) of this section are subject to certificate of need review, if these non-exempt portions of the project are new institutional health services under G.S. 131E-176(16).
- (c) The Department shall exempt from certificate of need review any conversion of existing acute care beds to psychiatric beds provided all of the following are true:
- (1) The hospital proposing the conversion has executed a contract with the Department's Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, one or more of the area mental health, developmental disabilities, and substance abuse authorities, or a combination thereof to provide psychiatric beds to patients referred by the contracting agency or agencies.
 - (2) The total number of beds to be converted shall not be more than twice the number of beds for which the contract pursuant to subdivision (1) of this subsection shall provide.
- (d) In accordance with, and subject to the limitations of G.S. 148-19.1, the Department shall exempt from certificate of need review the construction and operation of a new chemical dependency or substance abuse facility for the purpose of providing inpatient chemical dependency or substance abuse services solely to inmates of the Department of Correction. If an inpatient chemical dependency or substance abuse facility provides services both to inmates of the Department of Correction and to members of the general public, only the portion of the facility that serves inmates shall be exempt from certificate of need review.
- (e) The Department shall exempt from certificate of need review a capital expenditure that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(16)b. if all of the following conditions are met:
- (1) The proposed capital expenditure would meet all of the following requirements:
 - a. Be used solely for the purpose of renovating, replacing on the same site, or expanding any of the following existing facilities:
 - 1. Nursing home facility.
 - 2. Adult care home facility.
 - 3. Intermediate care facility for individuals with intellectual disabilities.
 - b. Not result in a change in bed capacity, as defined in G.S. 131E-176(5), or the addition of a health service facility or any other new institutional health service other than that allowed in G.S. 131E-176(16)b.
 - (2) The entity proposing to incur the capital expenditure provides prior written notice to the Department, which notice includes documentation that demonstrates that the proposed capital expenditure would be used for one or more of the following purposes:
 - a. Conversion of semiprivate resident rooms to private rooms.

- b. Providing innovative, homelike residential dining spaces, such as cafes, kitchenettes, or private dining areas to accommodate residents and their families or visitors.
 - c. Renovating, replacing, or expanding residential living or common areas to improve the quality of life of residents.
- (f) The Department shall exempt from certificate of need review the purchase of any replacement equipment that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(22a) if all of the following conditions are met:
 - (1) The equipment being replaced is located on the main campus.
 - (2) The Department has previously issued a certificate of need for the equipment being replaced. This subdivision does not apply if a certificate of need was not required at the time the equipment being replaced was initially purchased by the licensed health service facility.
 - (3) The licensed health service facility proposing to purchase the replacement equipment shall provide prior written notice to the Department, along with supporting documentation to demonstrate that it meets the exemption criteria of this subsection.
- (g) The Department shall exempt from certificate of need review any capital expenditure that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(16)b. if all of the following conditions are met:
 - (1) The sole purpose of the capital expenditure is to renovate, replace on the same site, or expand the entirety or a portion of an existing health service facility that is located on the main campus.
 - (2) The capital expenditure does not result in (i) a change in bed capacity as defined in G.S. 131E-176(5) or (ii) the addition of a health service facility or any other new institutional health service other than that allowed in G.S. 131E-176(16)b.
 - (3) The licensed health service facility proposing to incur the capital expenditure shall provide prior written notice to the Department, along with supporting documentation to demonstrate that it meets the exemption criteria of this subsection.
- (h) The Department must exempt from certificate of need review the acquisition or reopening of a Legacy Medical Care Facility. The person seeking to operate a Legacy Medical Care Facility shall give the Department written notice of all of the following:
 - (1) Its intention to acquire or reopen a Legacy Medical Care Facility within the same county and the same service area as the facility that ceased continuous operations. If the Legacy Medical Care Facility will become operational in a new location within the same county and the same service area as the facility that ceased continuous operations, then the person responsible for giving the written notice required by this section shall notify the Department, as soon as reasonably practicable and prior to becoming operational, of the new location of the Legacy Medical Care Facility. For purposes of this subdivision, "service area" means the service area identified in the North Carolina State Medical Facilities Plan in effect at the time the written notice required by this section is given to the Department.
 - (2) That the facility will be operational within 36 months of the notice.

The Department shall extend the time by which a facility must be operational in order to be exempt from certificate of need review under this subsection by one additional 36-month period if the person seeking to reopen or acquire the Legacy Medical Care Facility gives the Department written notice of extension within 36 months of the original notice of intent to acquire or reopen the Legacy Medical Care Facility. The written notice of extension must notify the Department

 - (i) that the person has undertaken all reasonable efforts to make the facility operational within 36 months of the notice of intent,
 - (ii) that, despite these reasonable efforts, the person does not anticipate the facility will be operational within that time, and

- (iii) of its intention that the facility will be operational within 36 months of the notice of extension.

§ 131E-185. Review process.

- (a) Repealed.
- (a1) Except as provided in subsection (c) of this section, there shall be a time limit of 90 days for review of the applications, beginning on the day established by rule as the day on which applications for the particular service in the service area shall begin review.
 - (1) Any person may file written comments and exhibits concerning a proposal under review with the Department, not later than 30 days after the date on which the application begins review. These written comments may include:
 - a. Facts relating to the service area proposed in the application;
 - b. Facts relating to the representations made by the applicant in its application, and its ability to perform or fulfill the representations made;
 - c. Discussion and argument regarding whether, in light of the material contained in the application and other relevant factual material, the application complies with relevant review criteria, plans, and standards.
 - (2) No more than 20 days from the conclusion of the written comment period, the Department shall ensure that a public hearing is conducted at a place within the appropriate service area if one or more of the following circumstances apply; the review to be conducted is competitive; the proponent proposes to spend five million dollars (\$5,000,000) or more; a written request for a public hearing is received before the end of the written comment period from an affected party as defined in G.S. 131E-188(c); or the agency determines that a hearing is in the public interest. At such public hearing oral arguments may be made regarding the application or applications under review; and this public hearing shall include the following:
 - a. An opportunity for the proponent of each application under review to respond to the written comments submitted to the Department about its application;
 - b. An opportunity for any person, except one of the proponents, to comment on the applications under review;
 - c. An opportunity for a representative of the Department, or such other person or persons who are designated by the Department to conduct the hearing, to question each proponent of applications under review with regard to the contents of the application;The Department shall maintain a recording of any required public hearing on an application until such time as the Department's final decision is issued, or until a final agency decision is issued pursuant to a contested case hearing, whichever is later; and any person may submit a written synopsis or verbatim statement that contains the oral presentation made at the hearing.
 - (3) The Department may contract or make arrangements with a person or persons located within each service area for the conduct of such public hearings as may be necessary. The Department shall publish, in each service area, notice of the contracts that it executes for the conduct of those hearings.
 - (4) Within 15 days from the beginning of the review of an application or applications proposing the same service within the same service area, the Department shall publish notice of the deadline for receipt of written comments, of the time and place scheduled for the public hearing regarding the application or applications under review, and of the name and address of the person or agency that will preside.
 - (5) The Department shall maintain all written comments submitted to it during the written comment stage and any written submissions received at the public hearing as part of the

Department's file respecting each application or group of applications under review by it. The application, written comments, and public hearing comments, together with all documents that the Department used in arriving at its decision, from whatever source, and any documents that reflect or set out the Department's final analysis of the application or applications under review, shall constitute the Department's record for the application or applications under review.

- (a2) When an expedited review has been approved by the Department, no public hearing shall be held. The Department may contact the applicant and request additional or clarifying information, amendments to, or substitutions for portions of the application. The Department may negotiate conditions to be imposed on the certificate of need with the applicant.
- (b) Repealed.
- (c) The Department may extend the review period for a period not to exceed 60 days and provide notice of such extension to all applicants. For expedited reviews, the Department may extend the review period only if it has requested additional substantive information from the applicant.

§ 131E-186. Decision.

- (a) Within the prescribed time limits in G.S. 131E-185, the Department shall issue a decision to "approve," "approve with conditions," or "deny," an application for a new institutional health service. Approvals involving new or expanded bed capacity for nursing care or intermediate care for individuals with intellectual disabilities shall include a condition that specifies the earliest possible date the new institutional health service may be certified for participation in the Medicaid program. The date shall be set far enough in advance to allow the Department to identify funds to pay for care in the new or expanded facility in its existing Medicaid budget or to include these funds in its State Medicaid budget request for the year in which Medicaid certification is expected.
- (b) Within five business days after it makes a decision on an application, the Department shall provide written notice of all the findings and conclusions upon which it based its decision, including the criteria used by the Department in making its decision, to the applicant.

§ 131E-187. Issuance of a certificate of need.

- (a) Deleted. See Session Law 2009-373; SB 804.
- (b) Deleted. See Session Law 2009-373; SB 804.
- (c) The Department shall issue a certificate of need in accordance with the time line requirements of this section but only after all applicable conditions of approval that can be satisfied before issuance of the certificate of need have been met. The Department shall issue a certificate of need within:
 - (1) Thirty-five days of the date of the decision referenced in G.S. 131E-186, when no request for a contested case hearing has been filed in accordance with G.S. 131E-188.
 - (2) Five business days after it receives a file-stamped copy of the notice of voluntary dismissal, unless the voluntary dismissal is a stipulation of dismissal without prejudice.
 - (3) Thirty-five days of the date of the written notice of the final agency decision affirming or approving the issuance, unless a notice of appeal to the North Carolina Court of Appeals is timely filed.
 - (4) Twenty days after a mandate is issued by the North Carolina Court of Appeals affirming the issuance of a certificate of need, unless a notice of appeal or petition for discretionary review to the North Carolina Supreme Court is timely filed.
 - (5) Five business days after the North Carolina Supreme Court issues a mandate affirming the issuance of a certificate of need or an order declining to certify the case for discretionary review if the order declining to certify the case disposes of the appeal in its entirety.

§ 131E-188. Administrative and judicial review.

- (a) After a decision of the Department to issue, deny or withdraw a certificate of need or exemption or to issue a certificate of need pursuant to a settlement agreement with an applicant to the extent permitted by law, any affected person, as defined in subsection (c) of this section, shall be entitled to a contested case hearing under Article 3 of Chapter 150B of the General Statutes. A petition for a contested case shall be filed within 30 days after the Department makes its decision. When a petition is filed, the Department shall send notification of the petition to the proponent of each application that was reviewed with the application for a certificate of need that is the subject of the petition. Any affected person shall be entitled to intervene in a contested case.

A contested case shall be conducted in accordance with the following timetable:

- (1) An administrative law judge or a hearing officer, as appropriate, shall be assigned within 15 days after a petition is filed.
- (2) The parties shall complete discovery within 90 days after the assignment of the administrative law judge or hearing officer.
- (3) The hearing at which sworn testimony is taken and evidence is presented shall be held within 45 days after the end of the discovery period.
- (4) The administrative law judge or hearing officer shall make a final decision within 75 days after the hearing.

The administrative law judge or hearing officer assigned to a case may extend the deadlines in subdivisions (2) through (4) so long as the administrative law judge or hearing officer makes a final decision in the case within 270 days after the petition is filed.

- (a1) On or before the date of filing a petition for a contested case hearing on the approval of an applicant for a certificate of need, the petitioner shall deposit a bond with the clerk of superior court where the new institutional health service that is the subject of the petition is proposed to be located. The bond shall be secured by cash or its equivalent in an amount equal to five percent (5%) of the cost of the proposed new institutional health service that is the subject of the petition, but may not be less than five thousand dollars (\$5,000) and may not exceed fifty thousand dollars (\$50,000). A petitioner who received approval for a certificate of need and is contesting only a condition in the certificate is not required to file a bond under this subsection.

The applicant who received approval for the new institutional health service that is the subject of the petition may bring an action against a bond filed under this subsection in the superior court of the county where the bond was filed. Upon finding that the petition for a contested case was frivolous or filed to delay the applicant, the court may award the applicant part or all of the bond filed under this subsection. At the conclusion of the contested case, if the court does not find that the petition for a contested case was frivolous or filed to delay the applicant, the petitioner shall be entitled to the return of the bond deposited with the superior court upon demonstrating to the clerk of superior court where the bond was filed that the contested case hearing is concluded.

- (b) Any affected person who was a party in a contested case hearing shall be entitled to judicial review of all or any portion of any final decision in the following manner. The appeal shall be to the Court of Appeals as provided in G.S. 7A-29(a). The procedure for the appeal shall be as provided by the rules of appellate procedure. The appeal of the final decision shall be taken within 30 days of the receipt of the written notice of final decision, and notice of appeal shall be filed with Office of Administrative Hearings and served on the Department and all other affected persons who were parties to the contested hearing.

- (b1) Before filing an appeal of a final decision granting a certificate of need, the affected person shall deposit a bond with the Clerk of the Court of Appeals. The bond requirements of this subsection shall not apply to any appeal filed by the Department.

- (1) The bond shall be secured by cash or its equivalent in an amount equal to five percent (5%) of the cost of the proposed new institutional health service that is the subject of the appeal, but may not be less than five thousand dollars (\$5,000) and may not exceed fifty thousand

dollars (\$50,000); provided that the applicant who received approval of the certificate of need may petition the Court of Appeals for a higher bond amount for the payment of such costs and damages as may be awarded pursuant to subdivision (2) of this subsection. This amount shall be determined by the Court in its discretion, not to exceed three hundred thousand dollars (\$300,000). A holder of a certificate of need who is appealing only a condition in the certificate is not required to file a bond under this subsection.

- (2) If the Court of Appeals finds that the appeal was frivolous or filed to delay the applicant, the court shall remand the case to the superior court of the county where a bond was filed for the contested case hearing on the certificate of need. The superior court may award the holder of the certificate of need part or all of the bond. The court shall award the holder of the certificate of need reasonable attorney fees and costs incurred in the appeal to the Court of Appeals. If the Court of Appeals does not find that the appeal was frivolous or filed to delay the applicant and does not remand the case to superior court for a possible award of all or part of the bond to the holder of the certificate of need, the person originally filing the bond shall be entitled to a return of the bond.
- (c) The term "affected persons" includes: the applicant; any individual residing within the service area or the geographic area served or to be served by the applicant; any individual who regularly uses health service facilities within that geographic area or the service area; any person who provides services, similar to the services under review, to individuals residing within the service area or the geographic area proposed to be served by the applicant; any person who, prior to receipt by the agency of the proposal being reviewed, has provided written notice to the agency of an intention to provide similar services in the future to individuals residing within the service area or the geographic area to be served by the applicant; third party payers who reimburse health service facilities for services in the service area in which the project is proposed to be located; and any agency which establishes rates for health service facilities or HMOs located in the service area in which the project is proposed to be located.

§ 131E-189. Withdrawal of a certificate of need.

- (a) The Department shall specify in each certificate of need the time the holder has to make the service or equipment available or to complete the project and the timetable to be followed. The timetable shall be the one proposed by the holder of the certificate of need unless the Department specifies a different timetable in its decision letter. The holder of the certificate shall submit such periodic reports on his progress in meeting the timetable as may be required by the Department. If no progress report is provided or, after reviewing the progress, the Department determines that the holder of the certificate is not meeting the timetable and the holder cannot demonstrate that it is making good faith efforts to meet the timetable, the Department may withdraw the certificate. If the Department determines that the holder of the certificate is making a good faith effort to meet the timetable, the Department may, at the request of the holder, extend the timetable for a specified period.
- (b) The Department may withdraw any certificate of need, if the holder of the certificate fails to develop the service in a manner consistent with the representations made in the application or with any condition or conditions the Department placed on the certificate of need.
- (c) The Department may immediately withdraw any certificate of need if the holder of the certificate, before completion of the project or operation of the facility, transfers ownership or control of the facility, the project, or the certificate of need. Any transfer after that time will be subject to the requirement that the service be provided consistent with the representations made in the application and any applicable conditions the Department placed on the certificate of need. Transfers resulting from death or personal illness or other good cause, as determined by the Department, shall not result in withdrawal if the Department receives prior written notice of the transfer and finds good cause. Transfers resulting from death shall not result in withdrawal.

§ 131E-190. Enforcement and sanctions.

- (a) Only those new institutional health services which are found by the Department to be needed as provided in this Article and granted certificates of need shall be offered or developed within the State.
- (b) No formal commitments made for financing, construction, or acquisition regarding the offering or development of a new institutional health service shall be made by any person unless a certificate of need for such service or activities has been granted.
- (c) Repealed.
- (d) If any person proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services, the penalty for such violation of this Article and rules hereunder may include the withholding of federal and State funds under Titles V, XVIII, and XIX of the Social Security Act for reimbursement of capital and operating expenses related to the provision of the new institutional health service.
- (e) The Department may revoke or suspend the license of any person who proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services.
- (f) The Department may assess a civil penalty of not more than twenty thousand dollars (\$20,000) against any person who knowingly offers or develops any new institutional health service within the meaning of this Article without a certificate of need issued under this Article and the rules pertaining thereto, or in violation of the terms or conditions of such a certificate, whenever it determines a violation has occurred and each time the service is provided in violation of this provision. In determining the amount of the penalty the Department shall consider the degree and extent of harm caused by the violation and the cost of rectifying the damage. A person who is assessed a penalty shall be notified of the penalty by registered or certified mail. The notice shall state the reasons for the penalty. If a person fails to pay a penalty, the Department shall refer the matter to the Attorney General for collection. For the purpose of this subsection, the word "person" shall not include an individual in his capacity as an officer, director, or employee of a person as otherwise defined in this Article.
- (g) No agency of the State or any of its political subdivisions may appropriate or grant funds or financially assist in any way a person, applicant, or facility which is or whose project is in violation of this Article.
- (h) If any person proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services, the Secretary of Health and Human Services or any person aggrieved, as defined by G.S. 150B-2(6), may bring a civil action for injunctive relief, temporary or permanent, against the person offering, developing or operating any new institutional health service. The action may be brought in the superior court of any county in which the health service facility is located or in the superior court of Wake County.
- (i) If the Department determines that the recipient of a certificate of need, or its successor, is operating a service which materially differs from the representations made in its application for that certificate of need, the Department may bring an action in Wake County Superior Court or the superior court of any county in which the certificate of need is to be utilized for injunctive relief, temporary or permanent, requiring the recipient, or its successor, to materially comply with the representations in its application. The Department may also bring an action in Wake County Superior Court or the superior court of any county in which the certificate of need is to be utilized to enforce the provisions of this subsection and G.S. 131E-181(b) and the rules adopted in accordance with this subsection and G.S. 131E-181(b).

APPENDIX F

CERTIFICATE OF NEED REGULATIONS

10A NCAC 14C .0102 LOCATION OF THE AGENCY

As used in this Subchapter, the agency is the Certificate of Need Section in the Division of Health Service Regulation, North Carolina Department of Health and Human Services. The location of the agency is 809 Ruggles Drive, Raleigh, North Carolina, 27603. The mailing address of the agency is Certificate of Need Section, Division of Health Service Regulation, 2704 Mail Service Center, Raleigh, NC 27699-2704. The telephone number of the agency is 919-855-3873.

10A NCAC 14C .0202 DETERMINATION OF REVIEW

- (a) After receipt of a letter of intent, the agency shall determine whether the proposed project requires a certificate of need.
- (b) When any of the equipment listed in G.S. 131E-176(16)(f1) or (p) is acquired in parts or piecemeal fashion, the acquisition shall be determined to require a certificate of need on the date that the components are assembled.
- (c) If the agency determines that the project requires a certificate of need, the agency shall determine the appropriate review category or categories for the proposed project, the type or types of application forms to be submitted, the number of separate applications to be submitted, the applicable review period for each application, and the deadline date for submitting each application, as contained in this Subchapter.
- (d) Copies of the application forms may be obtained from the agency.
- (e) Proposals requiring review shall be reviewed according to the categories and schedule set forth in the duly adopted State Medical Facilities Plan in effect at the time the scheduled review period commences, as contained in this Subchapter.
- (f) Applications are competitive if they, in whole or in part, are for the same or similar services and the agency determines that the approval of one or more of the applications may result in the denial of another application reviewed in the same review period.

10A NCAC 14C .0203 FILING APPLICATIONS

- (a) A certificate of need application shall not be reviewed by the Certificate of Need Section until it is filed in accordance with this Rule.
- (b) An original and a copy of the application shall be file-stamped as received by the agency no later than 5:30 p.m. on the 15th day of the month preceding the scheduled review period. In instances when the 15th of the month falls on a weekend or holiday, the filing deadline is 5:30 p.m. on the next business day. An application shall not be included in a scheduled review if it is not received by the agency by this deadline. Each applicant shall transmit, with the application, a fee to be determined according to the formula as stated in G.S. 131E-182(c).
- (c) After an application is filed, the agency shall determine whether it is complete for review. An application shall not be considered complete if:
 - (1) the requisite fee has not been received by the agency; or
 - (2) a signed original and copy of the application have not been submitted to the agency on the appropriate application form.
- (d) If the agency determines the application is not complete for review, it shall mail notice of such determination to the applicant within five business days after the application is filed and shall specify what is necessary to complete the application. If the agency determines the application is

complete, it shall mail notice of such determination to the applicant prior to the beginning of the applicable review period.

- (e) Information requested by the agency to complete the application must be received by the agency no later than 5:30 p.m. on the last working day before the first day of the scheduled review period. The review of an application shall commence in the next applicable review period that commences after the application has been determined to be complete.

10A NCAC 14C .0204 AMENDMENTS TO APPLICATIONS

An applicant may not amend an application. Responding to a request for additional information made by the agency after the review has commenced is not an amendment.

10A NCAC 14C .0205 REVIEW PERIOD

- (a) The review of an application for a certificate of need shall be completed within 90 days from the beginning date of the review period for the application, except as provided in Paragraph (b) of this Rule.
- (b) Except in the case of an expedited review, the period for review may be extended for up to 60 days by the agency if it determines that, for one or more of the following reasons, it cannot complete the review within 90 days:
 - (1) the extension is necessary to consider conflicting, contradictory, or otherwise relevant matters;
 - (2) the total number of applications assigned to the project analyst for review, including those in other review periods, preclude the project analyst from completing the review within 90 days;
 - (3) the complexity of the application or applications to be reviewed make it necessary to extend the review period;
 - (4) the review of an applicant's response to the agency's request for additional information has not been completed;
 - (5) the timing of the public hearing which was held for the application or applications under review does not allow sufficient time to consider the information presented;
 - (6) extension of previous reviews necessitated that the project analyst delay the commencement of the review; or
 - (7) the unavailability of the project analyst due to illness, annual leave, litigation associated with other reviews, or other duties and responsibilities.
- (c) In the case of an expedited review, the review period may be extended only if the Agency has requested additional substantive information from the applicant in accordance with G.S. 131E-185(c).
- (d) Applicants will be provided written notice of the extension of the review period after the agency determines that an extension is necessary. Failure to receive such notice prior to the last day of the scheduled review period, however, does not entitle an applicant to a certificate of need nor authorize an applicant to proceed with a project without one.

10A NCAC 14C .0303 REPLACEMENT EQUIPMENT

- (a) The purpose of this Rule is to define the terms used in the definition of "replacement equipment" set forth in G.S. 131E-176(22a).
- (b) "Activities essential to acquiring and making operational the replacement equipment" means those activities which are indispensable and requisite, absent which the replacement equipment could not be acquired or made operational.
- (c) "Comparable medical equipment" means equipment which is functionally similar and which is used for the same diagnostic or treatment purposes.
- (d) Replacement equipment is comparable to the equipment being replaced if:

- (1) it has the same technology as the equipment currently in use, although it may possess expanded capabilities due to technological improvements; and
 - (2) it is functionally similar and is used for the same diagnostic or treatment purposes as the equipment currently in use and is not used to provide a new health service; and
 - (3) the acquisition of the equipment does not result in more than a 10% increase in patient charges or per procedure operating expenses within the first twelve months after the replacement equipment is acquired.
- (e) Replacement equipment is not comparable to the equipment being replaced if:
- (1) the replacement equipment is new or reconditioned, the existing equipment was purchased second-hand, and the replacement equipment is purchased less than three years after the acquisition of the existing equipment; or
 - (2) the replacement equipment is new, the existing equipment was reconditioned when purchased, and the replacement equipment is purchased less than three years after the acquisition of the existing equipment; or
 - (3) the replacement equipment is capable of performing procedures that could result in the provision of a new health service or type of procedure that has not been provided with the existing equipment; or
 - (4) the replacement equipment is purchased and the existing equipment is leased, unless the lease is a capital lease; or
 - (5) the replacement equipment is a dedicated PET scanner and the existing equipment is:
 - (A) a gamma camera with coincidence capability; or
 - (B) nuclear medicine equipment that was designed, built, or modified to detect only the single photon emitted from nuclear events other than positron annihilation.

10A NCAC 14C .0402 ISSUES

The correctness, adequacy, or appropriateness of criteria, plans, and standards shall not be an issue in a contested case hearing.

SECTION .1100 – CRITERIA AND STANDARDS FOR NURSING FACILITY OR ADULT CARE HOME SERVICES

10A NCAC 14C .1102 PERFORMANCE STANDARDS

- (a) An applicant proposing to add nursing facility beds to an existing facility, except an applicant proposing to transfer existing certified nursing facility beds from a State Psychiatric Hospital to a community facility, shall not be approved unless the average occupancy, over the nine months immediately preceding the submittal of the application, of the total number of licensed nursing facility beds within the facility in which the new beds are to be operated was at least 90 percent.
- (b) An applicant proposing to establish a new nursing facility or add nursing facility beds to an existing facility, except an applicant proposing to transfer existing certified nursing facility beds from a State Psychiatric Hospital to a community facility, shall not be approved unless occupancy is projected to be at least 90 percent for the total number of nursing facility beds proposed to be operated, no later than two years following the completion of the proposed project. All assumptions, including the specific methodologies by which occupancies are projected, shall be clearly stated.
- (c) An applicant proposing to add adult care home beds to an existing facility shall not be approved unless the average occupancy, over the nine months immediately preceding the submittal of the application, of the total number of licensed adult care home beds within the facility in which the new beds are to be operated was at least 85 percent.
- (d) An applicant proposing to establish a new adult care home facility or add adult care home beds to an existing facility shall not be approved unless occupancy is projected to be at least 85 percent for the total number of adult care home beds proposed to be operated, no later than two years following

the completion of the proposed project. All assumptions, including the specific methodologies by which occupancies are projected, shall be stated.

SECTION .1400 – CRITERIA AND STANDARDS FOR NEONATAL SERVICES

10A NCAC 14C .1401 DEFINITIONS

The definitions in this Rule shall apply to all rules in this Section:

- (1) "Approved neonatal service" means a neonatal service that was not operational prior to the beginning of the review period.
- (2) "Existing neonatal service" means a neonatal service in operation prior to the beginning of the review period.
- (3) "High-risk obstetric patients" means those patients requiring specialized services provided by an acute care hospital to the mother and fetus during pregnancy, labor, delivery and to the mother after delivery. The services are characterized by specialized facilities and staff for the intensive care and management of high-risk maternal and fetal patients before, during, and after delivery.
- (4) "Level I neonatal services" means services provided by an acute care hospital to full term and pre-term neonates that are stable, without complications, and may include neonates that are small for gestational age or large for gestational age.
- (5) "Level II neonatal service" means services provided by an acute care hospital in a licensed acute care bed to neonates and infants that are stable without complications but require special care and frequent feedings; infants of any weight who no longer require Level III or Level IV neonatal services, but still require more nursing hours than normal infants; and infants who require close observation in a licensed acute care bed.
- (6) "Level III neonatal service" means services provided by an acute care hospital in a licensed acute care bed to neonates or infants that are high-risk, small (approximately 32 and less than 36 completed weeks of gestational age) but otherwise healthy, or sick with a moderate degree of illness that are admitted from within the hospital or transferred from another facility requiring intermediate care services for sick infants, but not intensive care. Level III neonates or infants require less constant nursing care than Level IV services, but care does not exclude respiratory support.
- (7) "Level IV neonatal service" means neonatal intensive care services provided by an acute care hospital in a licensed acute care bed to high-risk medically unstable or critically ill neonates (approximately under 32 weeks of gestational age) or infants requiring constant nursing care or supervision not limited to continuous cardiopulmonary or respiratory support, complicated surgical procedures, or other intensive supportive interventions.
- (8) "Neonatal bed" means a licensed acute care bed used to provide Level II, III or IV neonatal services.
- (9) "Neonatal intensive care services" shall have the same meaning as defined in G.S. 131E-176(15b).
- (10) "Neonatal service area" means a geographic area defined by the applicant from which the patients to be admitted to the service will originate.
- (11) "Neonatal services" means any of the Level I, Level II, Level III or Level IV services defined in this Rule.
- (12) "Obstetric services" means any normal or high-risk services provided by an acute care hospital to the mother and fetus during pregnancy, labor, delivery and to the mother after delivery.
- (13) "Perinatal services" means services provided during the period shortly before and after birth.

10A NCAC 14C .1403 PERFORMANCE STANDARDS

- (a) An applicant shall demonstrate that the proposed project is capable of meeting the following standards:
 - (1) if an applicant is proposing to increase the total number of neonatal beds (i.e., the sum of Level II, Level III and Level IV beds), the overall average annual occupancy of the combined number of existing Level II, Level III and Level IV beds in the facility is at least 75 percent, over the 12 months immediately preceding the submittal of the proposal;
 - (2) if an applicant is proposing to increase the total number of neonatal beds (i.e., the sum of Level II, Level III and Level IV beds), the projected overall average annual occupancy of the combined number of Level II, Level III and Level IV beds proposed to be operated during the third year of operation of the proposed project shall be at least 75 percent; and
 - (3) The applicant shall document the assumptions and provide data supporting the methodology used for each projection in this rule.
- (b) If an applicant proposes to develop a new Level III or Level IV service, the applicant shall document that an unmet need exists in the applicant's defined neonatal service area, unless the State Medical Facilities Plan includes a need determination for neonatal beds in the service area. The need for Level III and Level IV beds shall be computed for the applicant's neonatal service area by:
 - (1) identifying the annual number of live births occurring at all hospitals within the proposed neonatal service area, using the latest available data compiled by the State Center for Health Statistics;
 - (2) identifying the low birth weight rate (percent of live births below 2,500 grams) for the births identified in (1) of this Paragraph, using the latest available data compiled by the State Center for Health Statistics;
 - (3) dividing the low birth weight rate identified in (2) of this Paragraph by .08 and subsequently multiplying the resulting quotient by four; and
 - (4) determining the need for Level III and Level IV beds in the proposed neonatal service area as the product of:
 - (A) the product derived in (3) of this Paragraph, and
 - (B) the quotient resulting from the division of the number of live births in the initial year of the determination identified in (1) of this Paragraph by the number 1000.

SECTION .1600 – CRITERIA AND STANDARDS FOR CARDIAC CATHETERIZATION EQUIPMENT AND CARDIAC ANGIOPLASTY EQUIPMENT

10A NCAC 14C .1601 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Approved" means the equipment was not in operation prior to the beginning of the review period and had been issued a certificate of need.
- (2) "Capacity" of an item of cardiac catheterization equipment means 1500 diagnostic-equivalent procedures per year. One therapeutic cardiac catheterization procedure is valued at 1.75 diagnostic-equivalent procedures. One cardiac catheterization procedure performed on a patient age 14 or under is valued at two diagnostic-equivalent procedures. All other procedures are valued at one diagnostic-equivalent procedure.
- (3) "Cardiac catheterization equipment" shall have the same meaning as defined in G.S. 131E-176(2f).
- (4) "Cardiac catheterization procedure," for the purpose of determining utilization in a certificate of need review, means a single episode of diagnostic or therapeutic catheterization which occurs during one visit to a cardiac catheterization room, whereby a flexible tube is inserted into the patient's body and advanced into the heart chambers to perform a hemodynamic or angiographic examination or therapeutic intervention of the left or right heart chamber, or coronary arteries. A cardiac catheterization procedure does

not include a simple right heart catheterization for monitoring purposes as might be done in an electrophysiology laboratory, pulmonary angiography procedure, cardiac pacing through a right electrode catheter, temporary pacemaker insertion, or procedures performed in dedicated angiography or electrophysiology rooms.

- (5) "Cardiac catheterization room" means a room or a mobile unit in which there is cardiac catheterization or cardiac angioplasty equipment for the performance of cardiac catheterization procedures. Dedicated angiography rooms and electrophysiology rooms are not cardiac catheterization rooms.
- (6) "Cardiac catheterization service area" means a geographical area defined by the applicant, which has boundaries that are not farther than 90 road miles from the facility, if the facility has a comprehensive cardiac services program; and not farther than 45 road miles from the facility if the facility performs only diagnostic cardiac catheterization procedures; except that the cardiac catheterization service area of an academic medical center teaching hospital designated in 10A NCAC 14B shall not be limited to 90 road miles.
- (7) "Cardiac catheterization services" means the provision of diagnostic cardiac catheterization procedures or therapeutic cardiac catheterization procedures performed utilizing cardiac catheterization equipment in a cardiac catheterization room.
- (8) "Comprehensive cardiac services program" means a cardiac services program which provides the full range of clinical services associated with the treatment of cardiovascular disease including community outreach, emergency treatment of cardiovascular illnesses, non-invasive diagnostic imaging modalities, diagnostic and therapeutic cardiac catheterization procedures, open heart surgery and cardiac rehabilitation services. Community outreach and cardiac rehabilitation services shall be provided by the applicant or through arrangements with other agencies and facilities located in the same city. All other components of a comprehensive cardiac services program shall be provided within a single facility.
- (9) "Diagnostic cardiac catheterization procedure," for the purpose of determining utilization in a certificate of need review, means a cardiac catheterization procedure performed for the purpose of detecting and identifying defects or diseases in the coronary arteries or veins of the heart, or abnormalities in the heart structure, but not the pulmonary artery.
- (10) "Electrophysiology procedure" means a diagnostic or therapeutic procedure performed to study the electrical conduction activity of the heart and characterization of atrial ventricular arrhythmias.
- (11) "Existing" means the equipment was in operation prior to the beginning of the review period.
- (12) "High-risk patient" means a person with reduced life expectancy because of left main or multi-vessel coronary artery disease, often with impaired left ventricular function and with other characteristics as referenced in the American College of Cardiology/ Society for Cardiac Angiography and Interventions Clinical Expert Consensus Document on Cardiac Catheterization Laboratory Standards (June 2001) report.
- (13) "Mobile equipment" means cardiac catheterization equipment and transporting equipment which is moved to provide services at two or more host facilities.
- (14) "Percutaneous transluminal coronary angioplasty (PTCA)" is one type of therapeutic cardiac catheterization procedure used to treat coronary artery disease in which a balloon-tipped catheter is placed in the diseased artery and then inflated to compress the plaque blocking the artery.
- (15) "Primary cardiac catheterization service area" means a geographical area defined by the applicant, which has boundaries that are not farther than 45 road miles from the facility, if the facility has a comprehensive cardiac services program; and not farther than 23 road miles from the facility if the facility performs only diagnostic cardiac catheterization procedures; except that the primary cardiac catheterization service area of an academic

medical center teaching hospital designated in 10A NCAC 14B shall not be limited to 45 road miles.

- (16) "Therapeutic cardiac catheterization procedure," for the purpose of determining utilization in a certificate of need review, means a cardiac catheterization procedure performed for the purpose of treating or resolving anatomical or physiological conditions which have been determined to exist in the heart or coronary arteries or veins of the heart, but not the pulmonary artery.

10A NCAC 14C .1603 PERFORMANCE STANDARDS

- (a) An applicant proposing to acquire cardiac catheterization equipment shall demonstrate that the project is capable of meeting the following standards:
- (1) each proposed item of cardiac catheterization equipment, including mobile equipment but excluding shared fixed cardiac catheterization equipment, shall be utilized at an annual rate of at least 60 percent of capacity excluding procedures not defined as cardiac catheterization procedures in 10A NCAC 14C .1601(5), measured during the fourth quarter of the third year following completion of the project;
 - (2) if the applicant proposes to perform therapeutic cardiac catheterization procedures, each of the applicant's therapeutic cardiac catheterization teams shall be performing at an annual rate of at least 100 therapeutic cardiac catheterization procedures, during the third year of operation following completion of the project;
 - (3) if the applicant proposes to perform diagnostic cardiac catheterization procedures, each diagnostic cardiac catheterization team shall be performing at an annual rate of at least 200 diagnostic-equivalent cardiac catheterization procedures by the end of the third year following completion of the project;
 - (4) at least 50 percent of the projected cardiac catheterization procedures shall be performed on patients residing within the primary cardiac catheterization service area;
- (b) An applicant proposing to acquire mobile cardiac catheterization equipment shall:
- (1) demonstrate that each existing item of cardiac catheterization equipment, excluding mobile equipment, located in the proposed primary cardiac catheterization service area of each host facility shall have been operated at a level of at least 80 percent of capacity during the 12 month period reflected in the most recent licensure form on file with the Division of Health Service Regulation;
 - (2) demonstrate that the utilization of each existing or approved item of cardiac catheterization equipment, excluding mobile equipment, located in the proposed primary cardiac catheterization service area of each host facility shall not be expected to fall below 60 percent of capacity due to the acquisition of the proposed mobile cardiac catheterization equipment;
 - (3) demonstrate that each item of existing mobile equipment operating in the proposed primary cardiac catheterization service area of each host facility shall have been performing at least an average of four diagnostic-equivalent cardiac catheterization procedures per day per site in the proposed cardiac catheterization service area in the 12 month period preceding the submittal of the application;
 - (4) demonstrate that each item of existing or approved mobile equipment to be operating in the proposed primary cardiac catheterization service area of each host facility shall be performing at least an average of four diagnostic-equivalent cardiac catheterization procedures per day per site in the proposed cardiac catheterization service area in the applicant's third year of operation; and
 - (5) provide documentation of all assumptions and data used in the development of the projections required in this Rule.
- (c) An applicant proposing to acquire cardiac catheterization equipment excluding shared fixed and mobile cardiac catheterization shall:

- (1) demonstrate that its existing items of cardiac catheterization equipment, except mobile equipment, located in the proposed cardiac catheterization service area operated at an average of at least 80 percent of capacity during the twelve month period reflected in the most recent licensure renewal application form on file with the Division of Health Service Regulation;
 - (2) demonstrate that its existing items of cardiac catheterization equipment, except mobile equipment, shall be utilized at an average annual rate of at least 60 percent of capacity, measured during the fourth quarter of the third year following completion of the project; and
 - (3) provide documentation of all assumptions and data used in the development of the projections required in this Rule.
- (d) An applicant proposing to acquire shared fixed cardiac catheterization equipment as defined in the applicable State Medical Facilities Plan shall:
- (1) demonstrate that each proposed item of shared fixed cardiac catheterization equipment shall perform a combined total of at least 225 cardiac catheterization and angiography procedures during the fourth quarter of the third year following completion of the project; and
 - (2) provide documentation of all assumptions and data used in the development of the projections required in this Rule.
- (e) If the applicant proposes to perform cardiac catheterization procedures on patients age 14 and under, the applicant shall demonstrate that it meets the following additional criteria:
- (1) the facility has the capability to perform diagnostic and therapeutic cardiac catheterization procedures and open heart surgery services on patients age 14 and under; and
 - (2) the proposed project shall be performing at an annual rate of at least 100 cardiac catheterization procedures on patients age 14 or under during the fourth quarter of the third year following initiation of the proposed cardiac catheterization procedures for patients age 14 and under.

SECTION .1700 - CRITERIA AND STANDARDS FOR OPEN-HEART SURGERY SERVICES AND HEART-LUNG BYPASS MACHINES

10A NCAC 14C .1701 DEFINITIONS

The following definitions apply to all rules in this Section:

- (1) "Approved heart-lung bypass machine" means a heart-lung bypass machine that was not operational prior to the beginning of the review period.
- (2) "Capacity" of a heart-lung bypass machine means 400 adult-equivalent open heart surgical procedures per year. One open heart surgical procedure on persons age 14 and under is valued at two adult open heart surgical procedures. For purposes of determining capacity, one open heart surgical procedure is defined to be one visit or trip by a patient to an operating room for an open heart operation.
- (3) "Cardiac Surgical Intensive Care Unit" means an intensive care unit as defined in 10A NCAC 14C .1201(2) and that is for exclusive use by post-surgical open heart patients.
- (4) "Existing heart-lung bypass machine" means a heart-lung bypass machine in operation prior to the beginning of the review period.
- (5) "Heart-lung bypass machine" has the same meaning as defined in G.S. 131E-176(10a).
- (6) "Open heart surgery services" has the same meaning as defined in G.S. 131E-176(18b).
- (7) "Open heart surgical procedures" means specialized surgical procedures that:
 - (a) utilize a heart-lung bypass machine (the "pump"); and
 - (b) are designed to correct congenital or acquired cardiac and coronary disease by opening the chest for surgery on the heart muscle, valves, arteries, or other parts of the heart.

10A NCAC 14C .1703 PERFORMANCE STANDARDS

- (a) An applicant that proposes to develop open-heart surgery services shall:
 - (1) demonstrate that the projected utilization and proposed staffing patterns are such that each open heart surgical team shall perform at least 150 open heart surgical procedures in the third year following completion of the project; and
 - (2) document the assumptions and provide data supporting the methodology used to make these projections.
- (b) An applicant that proposes to acquire a heart-lung bypass machine shall demonstrate either:
 - (1) that the applicant's projected annual utilization of its existing, approved, and proposed heart-lung bypass machines (other than a machine acquired pursuant to 10A NCAC 14C .1703(b)(3)) will be at least 200 open heart surgical procedures per machine during the third year following completion of the project;
 - (2) that the projected annual utilization of its existing, approved, and proposed heart-lung bypass machines (other than a machine acquired pursuant to 10A NCAC 14C .1703(b)(3)), will be at least 900 hours per year during the third year following completion of the project, as measured in minutes used or staffed on standby for all procedures; or
 - (3) that the proposed machine is needed to provide coverage for open-heart surgery emergencies and will not be scheduled for use at the same time as the applicant's equipment used to support scheduled open heart surgical procedures.

SECTION .1900 – CRITERIA AND STANDARDS FOR RADIATION THERAPY EQUIPMENT

10A NCAC 14C .1901 DEFINITIONS

These definitions shall apply to all rules in this Section:

- (1) "Approved linear accelerator" means a linear accelerator which was not operational prior to the beginning of the review period.
- (2) "Complex Radiation treatment" is equal to 1.0 ESTV and means: treatment on three or more sites on the body; use of techniques such as tangential fields with wedges, rotational or arc techniques; or use of custom blocking.
- (3) "Equivalent Simple Treatment Visit [ESTV]" means one basic unit of radiation therapy which normally requires up to fifteen (15) minutes for the uncomplicated set-up and treatment of a patient on a megavoltage teletherapy unit including the time necessary for portal filming.
- (4) "Existing linear accelerator" means a linear accelerator in operation prior to the beginning of the review period.
- (5) "Intermediate Radiation treatment" means treatment on two separate sites on the body, three or more fields to a single treatment site or use of multiple blocking and is equal to 1.0 ESTV.
- (6) "Linear accelerator" shall have the same meaning as defined in G.S. 131E-176(14g).
- (7) "Linear accelerator service area" means a single or multi-county area as used in the development of the need determination in the applicable State Medical Facilities Plan.
- (8) "Megavoltage unit" means MRT equipment which provides a form of teletherapy that involves the delivery of energy greater than, or equivalent to, one million volts by the emission of x-rays, gamma rays, electrons, or other radiation.
- (9) "Megavoltage radiation therapy (MRT)" means the use of ionizing radiation in excess of one million electron volts in the treatment of cancer.
- (10) "MRT equipment" means a machine or energy source used to provide megavoltage radiation therapy including linear accelerators and other particle accelerators.
- (11) "Radiation therapy equipment" means medical equipment which is used to provide radiation therapy services.

- (12) "Radiation therapy services" means those services which involve the delivery of controlled and monitored doses of radiation to a defined volume of tumor bearing tissue within a patient. Radiation may be delivered to the tumor region by the use of radioactive implants or by beams of ionizing radiation or it may be delivered to the tumor region systemically.
- (13) "Radiation therapy service area" means a single or multi-county area as used in the development of the need determination in the applicable State Medical Facilities Plan.
- (14) "Simple Radiation treatment" means treatment on a single site on the body, single treatment field or parallel opposed fields with no more than simple blocks and is equal to 1 ESTV.
- (15) "Simulator" shall have the same meaning as defined in G.S. 131E-176(24b).
- (16) "Special technique" means radiation therapy treatments that may require increased time for each patient visit including:
 - (a) total body irradiation (photons or electrons) which equals 2.5 ESTVs;
 - (b) hemi-body irradiation which equals 2.0 ESTVs;
 - (c) intraoperative radiation therapy which equals 10.0 ESTVs;
 - (d) neutron and proton radiation therapy which equals 2.0 ESTVs;
 - (e) intensity modulated radiation treatment (IMRT) which equals 1.0 ESTV;
 - (f) limb salvage irradiation at lengthened SSD which equals 1.0 ESTV;
 - (g) additional field check radiographs which equals .50 ESTV;
 - (h) stereotactic radiosurgery treatment management with linear accelerator or gamma knife which equals 3.0. ESTVs; and
 - (i) pediatric patient under anesthesia which equals 1.5 ESTVs.

10A NCAC 14C .1903 PERFORMANCE STANDARDS

- (a) An applicant proposing to acquire a linear accelerator shall demonstrate that each of the following standards will be met:
 - (1) an applicant's existing linear accelerators located in the proposed radiation therapy service area performed at least 6,750 ESTV treatments per machine or served at least 250 patients per machine in the twelve months prior to the date the application was submitted;
 - (2) each proposed new linear accelerator will be utilized at an annual rate of 250 patients or 6,750 ESTV treatments during the third year of operation of the new equipment; and
 - (3) an applicant's existing linear accelerators located in the proposed radiation therapy service area are projected to be utilized at an annual rate of 6,750 ESTV treatments or 250 patients per machine during the third year of operation of the new equipment.
- (b) A linear accelerator shall not be held to the standards in Paragraph (a) of this Rule if the applicant provides documentation that the linear accelerator has been or will be used exclusively for clinical research and teaching.
- (c) An applicant proposing to acquire radiation therapy equipment other than a linear accelerator shall provide the following information:
 - (1) the number of patients who are projected to receive treatment from the proposed radiation therapy equipment, classified by type of equipment, diagnosis, treatment procedure, and county of residence; and
 - (2) the maximum number and type of procedures that the proposed equipment is capable of performing.
- (d) The applicant shall document all assumptions and provide data supporting the methodology used to determine projected utilization as required in this Rule.

SECTION .2000 – CRITERIA AND STANDARDS FOR HOME HEALTH SERVICES

10A NCAC 14C .2001 DEFINITIONS

The following definitions in this Rule shall apply to all rules in this Section:

- (1) "Home Health Agency" shall have the same meaning as defined in G.S. 131E-176(12).
- (2) "Home Health Services" shall have the same meaning as defined in G.S. 131E-176(12).

10A NCAC 14C .2003 PERFORMANCE STANDARDS

An applicant shall project, in the third year of operation, an annual unduplicated patient caseload for the county in which the facility will be located that meets or exceeds the minimum need used in the applicable State Medical Facilities Plan to justify the establishment of a new home health agency office in that county. An applicant shall not be required to meet this performance standard if the home health agency office need determination in the applicable State Medical Facilities Plan was not based on application of the standard methodology for a Medicare-certified home health agency office.

SECTION .2100 – CRITERIA AND STANDARDS FOR SURGICAL SERVICES AND OPERATING ROOMS

10A NCAC 14C .2101 DEFINITIONS

The following definitions apply to all rules in this Section:

- (1) "Approved operating rooms" means those operating rooms that were approved for a certificate of need by the Healthcare Planning and Certificate of Need Section (Agency) prior to the date on which the applicant's proposed project was submitted to the Agency, but that have not been licensed.
- (2) "Dedicated C-section operating room" means an operating room as defined in Chapter 6 in the 2018 State Medical Facilities Plan. For purposes of this Section, Chapter 6 in the 2018 State Medical Facilities Plan is hereby incorporated by reference including subsequent amendments and editions. This document is available at no cost at <https://www.ncdhhs.gov/dhsr/ncsmfp/index.html>.
- (3) "Existing operating rooms" means those operating rooms in ambulatory surgical facilities and hospitals that were reported in the Ambulatory Surgical Facility License Renewal Application Form or in the Hospital License Renewal Application Form submitted to the Acute and Home Care Licensure and Certification Section of the Division of Health Service Regulation, and that were licensed prior to the beginning of the review period.
- (4) "Health System" shall have the same meaning as defined in Chapter 6 in the 2018 State Medical Facilities Plan.
- (5) "Operating room" means a room as defined in G.S. 131E-176(18c).
- (6) "Operating Room Need Methodology" means the Methodology for Projecting Operating Room Need in Chapter 6 in the 2018 State Medical Facilities Plan.
- (7) "Service area" means the Operating Room Service Area as defined in Chapter 6 in the 2018 State Medical Facilities Plan.

10A NCAC 14C .2103 PERFORMANCE STANDARDS

- (a) An applicant proposing to increase the number of operating rooms (excluding dedicated C-section operating rooms) in a service area shall demonstrate the need for the number of proposed operating rooms in addition to the existing and approved operating rooms in the applicant's health system in the applicant's third full fiscal year following completion of the proposed project based on the Operating Room Need Methodology set forth in the 2018 State Medical Facilities Plan. The applicant is not required to use the population growth factor.
- (b) The applicant shall document the assumptions and provide data supporting the methodology used for each projection in this Rule.

SECTION .2200 – CRITERIA AND STANDARDS FOR END-STAGE RENAL DISEASE SERVICES

10A NCAC 14C .2201 DEFINITIONS

The definitions in this Rule will apply to all rules in this Section:

- (1) "End stage renal disease (ESRD) services" means those dialysis or transplantation services necessary for the treatment of patients with end stage renal disease provided by transplantation centers, dialysis centers or dialysis facilities.
- (2) "Renal transplantation center" means a hospital unit which furnishes directly renal transplantation and other medical and surgical specialty services required for transplant candidates or patients.
- (3) "Renal dialysis center" is a hospital unit which furnishes the full spectrum of diagnostic, therapeutic, and rehabilitative services.
- (4) "Renal dialysis facility" is a unit, usually freestanding, which furnishes dialysis service to ESRD patients.
- (5) "Dialysis" means the artificially aided process of transferring body wastes from a person's blood to a dialysis fluid to permit discharge of the wastes from the body.
- (6) "Hemodialysis" means the form of dialysis in which the blood is circulated outside the body through an apparatus which permits transfer of waste through synthetic membranes.
- (7) "Peritoneal dialysis" means the form of dialysis in which a dialysis fluid is introduced into the person's peritoneal cavity and is subsequently withdrawn.
- (8) "Maintenance dialysis" is the term used to describe routine repetitive dialysis treatments necessary to sustain life of patients with ESRD.
- (9) "Self-care dialysis or home dialysis training" means the systematic training of patients and their helpers in the techniques of self-care dialysis.
- (10) "Self-care dialysis" means the self administration of maintenance dialysis treatments in ESRD facility or elsewhere and may be assisted by an aide who is either a family member or a non-family member assistant.
- (11) "Dialysis station" means a unit in an ESRD facility equipped with the apparatus for performing hemodialysis or peritoneal dialysis on a single patient. Stations may be designated for maintenance dialysis, self-care dialysis, self-care training, or isolation.
- (12) "Isolation station" means a dialysis station located apart from other maintenance dialysis stations to serve patients who either have or are suspected to have an infectious disease, i.e., hepatitis.
- (13) "Shift" means the scheduled time when a group of patients are provided their dialysis treatment.
- (14) "Transplantation" means a surgical procedure in which a functioning kidney is removed from a donor and implanted in the patient with ESRD.
- (15) "Organ procurement" means the process of acquiring kidneys for transplantation from potential donors.
- (16) "Histocompatibility testing" means laboratory testing procedures which determine compatibility between a potential donor organ and a potential organ transplant recipient.

10A NCAC 14C .2203 PERFORMANCE STANDARDS

- (a) An applicant proposing to establish a new End Stage Renal Disease facility shall document the need for at least 10 stations based on utilization of 3.2 patients per station per week as of the end of the first operating year of the facility, with the exception that the performance standard shall be waived for a need in the State Medical Facilities Plan that is based on an adjusted need determination.

- (b) An applicant proposing to increase the number of dialysis stations in an existing End Stage Renal Disease facility or one that was not operational prior to the beginning of the review period but which had been issued a certificate of need shall document the need for the additional stations based on utilization of 3.2 patients per station per week as of the end of the first operating year of the additional stations.
- (c) An applicant shall provide all assumptions, including the methodology by which patient utilization is projected.

SECTION .2300 – CRITERIA AND STANDARDS FOR COMPUTED TOMOGRAPHY EQUIPMENT

10A NCAC 14C .2301 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Approved computed tomography (CT) scanner" means a CT scanner which was not operational prior to the beginning of the review period but which had been issued a certificate of need.
- (2) "Computed tomography" means a technique whereby a sharply collimated X-ray beam is passed through the human body from a source which rotates around the body in a specific arc. As the beam passes through the body from its perimeter, its intensity is reduced. The transmitted intensity of the beam varies in accordance with the density of the tissue it passes through and is measured by sensitive detectors and, from this information, two-dimensional cross-sectional pictures or other images may be generated. A computer is used to generate the image from the measurements of X-ray beam intensity. Tissue images can be done with or without contrast agents. Computed tomography services are rendered by CT scanners.
- (3) "Computed tomography (CT) scanner" means an imaging machine which combines the information generated by a scanning X-ray source and detector system with a computer to reconstruct a cross-sectional image of the full body, including the head.
- (4) "Computed tomography (CT) service area" means a geographical area defined by the applicant from which the applicant projects to serve patients.
- (5) "CT scan" means one discrete image of a patient produced by a CT scanner.
- (6) "Existing CT scanner" means a computed tomography scanner in operation prior to the beginning of the review period.
- (7) "Fixed CT scanner" means a CT scanner that is used at only one location or campus.
- (8) "HECT unit" means a unit that is equivalent to one CT scan which is derived by applying a weighted conversion factor to a CT scan in accordance with the Head Equivalent Computed Tomography studies formula developed by the National Electric Manufacturers, based on the "Leonard Methodology".
- (9) "Mobile CT scanner" means a CT scanner and transporting equipment which is moved to provide services at two or more host facilities.
- (10) "Related entity" means the parent company of the applicant, a subsidiary company of the applicant (i.e., the applicant owns 50 percent or more of another company), a joint venture in which the applicant is a member, or a company that shares common ownership with the applicant (i.e., the applicant and another company are owned by some of the same persons).

10A NCAC 14C .2303 PERFORMANCE STANDARDS

An applicant proposing to acquire a CT scanner shall demonstrate each of the following:

- (1) each fixed or mobile CT scanner to be acquired shall be projected to perform 5,100 HECT units annually in the third year of operation of the proposed equipment;

- (2) each existing fixed or mobile CT scanner which the applicant or a related entity owns a controlling interest in and is located in the applicant's CT service area shall have performed at least 5,100 HECT units in the 12 month period prior to submittal of the application; and
- (3) each existing and approved fixed or mobile CT scanner which the applicant or a related entity owns a controlling interest in and is located in the applicant's CT service area shall be projected to perform 5,100 HECT units annually in the third year of operation of the proposed equipment.

SECTION .2400 – CRITERIA AND STANDARDS FOR INTERMEDIATE CARE FACILITY/MENTALLY RETARDED (ICF/MR)

10A NCAC 14C .2401 DEFINITIONS

The definitions in this Rule shall apply to all rules in this Section:

- (1) "Intermediate care facility for the mentally retarded (ICF/MR)" shall have the same meaning as defined in G.S. 131E-176(14a).
- (2) "Active treatment" means:
 - (a) regular participation in professionally developed and supervised activities, experiences, or therapies in accordance with an individual plan of care;
 - (b) an individual plan of care which is a written plan that is based on individual choice and sets forth measurable goals or behaviorally stated objectives and prescribes an integrated program of individually designed activities, experiences or therapies necessary to achieve such goals or objectives;
 - (c) an interdisciplinary professional evaluation consisting of complete medical, social, or psychological diagnosis and an evaluation of the individual's need for the facility's care, prior to admission but not to exceed three months before admission to the facility or, in the case of individuals who make application while in such facility, before requesting payment under the plan;
 - (d) re-evaluation medically, socially, and psychologically, at least annually by the staff involved in carrying out the resident's individual plan of care, including review of the individual's progress toward meeting the plan of care, assessment of continuing need for facility care, and consideration of alternate methods of care; and
 - (e) an individual plan (as part of the individual's total plan of care) developed prior to discharge that is based on individual choice by a qualified developmental disabilities professional and other appropriate professionals, which includes the present residence, specifying the type of care and services that will be needed to enable the individual to function in a different environment and also includes provisions for protective supervision.
- (3) "Qualified Developmental Disabilities Professional" means a staff person in an ICF/MR facility designated to be responsible for supervising the implementation of each resident's individual plan of care, integrating the various aspects of the facility's program, recording each resident's progress and initiating periodic review of each individual plan of care. A Qualified Developmental Disabilities Professional shall meet the minimum qualifications for employment as defined in the 42 CFR 483.430 which is incorporated by reference including all subsequent amendments.
- (4) "Catchment area" means the geographic part of the State served by a specific area authority ("Area authority" means the Mental Health, Developmental Disabilities, and Substance Abuse Authority.)

10A NCAC 14C .2403 PERFORMANCE STANDARDS

- (a) An applicant proposing to add ICF/MR beds to an existing facility shall not be approved unless the average occupancy, over the six months immediately preceding the submittal of the application, of

- the total number of ICF/MR beds within the facility in which the new beds are to be operated was at least 90 percent.
- (b) An applicant proposing to establish new ICF/MR beds shall not be approved unless occupancy is projected to be at least 90 percent for the total number of ICF/MR beds proposed to be operated in the entire facility, no later than one year following the completion of the proposed project.
 - (c) An applicant proposing to establish new ICF/MR beds shall comply with one of the following models:
 - (1) a residential community based freestanding facility with six beds or less, i.e., group home model;
 - (2) a community-based facility with 7 to 15 beds if documentation is provided that a facility of this size is necessary because adequate residential community based freestanding facilities are not available in the Area Authority catchment area to meet the needs of the population to be served; or
 - (3) a facility with greater than 15 beds if the proposed new beds are to be established in response to an adjusted need determination contained in the 2003 State Medical Facilities Plan.
 - (d) No more than three intermediate care facilities for the mentally retarded housing a combined total of 18 persons shall be developed on contiguous pieces of property, with the exception that this standard shall be waived for beds proposed to be established in response to an adjusted need determination contained in the 2003 State Medical Facilities Plan.

SECTION .2500 – CRITERIA AND STANDARDS FOR SUBSTANCE ABUSE/CHEMICAL DEPENDENCY TREATMENT BEDS

10A NCAC 14C .2501 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Chemical dependency treatment beds" shall have the same meaning as defined in G.S. 131E-176(5b).
- (2) "Detoxification beds" means chemical dependency treatment beds that are used during the period of time when the patient is withdrawing from psycho-active substances under medical direction.
- (3) "Intensive treatment beds" means chemical dependency treatment beds that are not detoxification beds.
- (4) "Clinical staff members" means the employees of a chemical dependency treatment program who provide treatment or rehabilitation services to a patient.
- (5) "Aftercare plan" means a component of a treatment plan which provides continued contact with the patient after completion of the structured treatment process in order to maintain or improve on the patient's recovery progress.

10A NCAC 14C .2503 PERFORMANCE STANDARDS

- (a) An applicant proposing additional intensive treatment beds shall not be approved unless the overall occupancy, over the nine months immediately preceding the submittal of the application, of the total number of intensive treatment beds within the facility in which the beds are to be located has been:
 - (1) 75 percent for facilities with a total of 1 through 15 intensive treatment beds; or
 - (2) 85 percent for facilities with a total of 16 or more intensive treatment beds.
- (b) An applicant shall not be approved unless the overall occupancy of the total number of intensive treatment beds to be operated in the facility is projected by the fourth quarter of the third year of operation following completion of the project, to be:
 - (1) 75 percent for facilities with a total of 1 through 15 intensive treatment beds; or
 - (2) 85 percent for facilities with a total of 16 or more intensive treatment beds.

- (c) The applicant shall document the specific methodology and assumptions by which occupancies are projected, including the average length of stay and anticipated recidivism rate.

SECTION .2600 – CRITERIA AND STANDARDS FOR PSYCHIATRIC BEDS

10A NCAC 14C .2601 DEFINITIONS

The definitions in this Rule apply to all rules in this Section:

- (1) "Psychiatric Beds" means beds in:
 - (a) psychiatric units of general hospitals licensed under G.S. Chapter 131E-77, Article 5;
 - (b) free-standing psychiatric hospitals licensed under G.S. Chapter 122C-23, Article 2.
- (2) "Involuntary Admissions" means those persons admitted under the involuntary commitment procedure defined in G.S. Chapter 122, Article 5, Part 7.
- (3) "Service Area" means the counties in the Mental Health Planning Area, as defined in the applicable State Medical Facilities Plan.
- (4) "Professional Staff" means any employee who provides treatment or habilitation services to a patient receiving psychiatric treatment in a general hospital, psychiatric hospital or inpatient unit of a community mental health center. This includes, but is not necessarily limited to, physicians licensed to practice medicine in North Carolina, psychiatric nurses, practicing psychologists or psychiatric social workers.

10A NCAC 14C .2603 PERFORMANCE STANDARDS

- (a) An applicant proposing to add psychiatric beds in an existing facility shall not be approved unless the average occupancy over the six months immediately preceding the submittal of the application of the total number of licensed psychiatric beds within the facility in which the beds are to be operated was at least 75 percent.
- (b) An applicant proposing to establish new psychiatric beds shall not be approved unless occupancy is projected to be 75% for the total number of licensed psychiatric beds proposed to be operated in the facility no later than the fourth quarter of the second operating year following completion of the project.

SECTION .2700 - CRITERIA AND STANDARDS FOR MAGNETIC RESONANCE IMAGING SCANNER

10A NCAC 14C .2701 DEFINITIONS

The following definitions apply to all rules in this Section:

- (1) "Approved MRI scanner" means an MRI scanner which was not operational prior to the beginning of the review period but which had been issued a certificate of need.
- (2) "Capacity of fixed MRI scanner" means 100 percent of the procedure volume that the MRI scanner is capable of completing in a year, given perfect scheduling, no machine or room downtime, no cancellations, no patient transportation problems, no staffing or physician delays and no MRI procedures outside the norm. Annual capacity of a fixed MRI scanner is 6,864 weighted MRI procedures, which assumes two weighted MRI procedures are performed per hour and the scanner is operated 66 hours per week, 52 weeks per year.
- (3) "Capacity of mobile MRI scanner" means 100 percent of the procedure volume that the MRI scanner is capable of completing in a year, given perfect scheduling, no machine or room downtime, no cancellations, no patient transportation problems, no staffing or physician delays and no MRI procedures outside the norm. Annual capacity of a mobile MRI scanner is 4,160 weighted MRI procedures, which assumes two weighted MRI

procedures are performed per hour and the scanner is operated 40 hours per week, 52 weeks per year.

- (4) "Dedicated breast MRI scanner" means an MRI scanner that is configured to perform only breast MRI procedures and is not capable of performing other types of non-breast MRI procedures.
- (5) "Existing MRI scanner" means an MRI scanner in operation prior to the beginning of the review period.
- (6) "Extremity MRI scanner" means an MRI scanner that is utilized for the imaging of extremities and is of open design with a field of view no greater than 25 centimeters.
- (7) "Fixed MRI scanner" means an MRI scanner that is not a mobile MRI scanner.
- (8) "Magnetic Resonance Imaging" (MRI) means a non-invasive diagnostic modality in which electronic equipment is used to create tomographic images of body structure. The MRI scanner exposes the target area to nonionizing magnetic energy and radio frequency fields, focusing on the nuclei of atoms such as hydrogen in the body tissue. Response of selected nuclei to this stimulus is translated into images for evaluation by the physician.
- (9) "Magnetic resonance imaging scanner" (MRI Scanner) is defined in G.S. 131E-176(14m).
- (10) "Mobile MRI region" means either the eastern part of the State which includes the counties in Health Service Areas IV, V and VI (Eastern Mobile MRI Region), or the western part of the State which includes the counties in Health Service Areas I, II, and III (Western Mobile MRI Region). The counties in each Health Service Area are identified in Appendix A of the State Medical Facilities Plan.
- (11) "Mobile MRI scanner" means an MRI scanner and transporting equipment which is moved at least weekly to provide services at two or more campuses or physical locations.
- (12) "MRI procedure" means a single discrete MRI study of one patient.
- (13) "MRI service area" means the Magnetic Resonance Imaging Planning Areas, as defined in the applicable State Medical Facilities Plan, except for proposed new mobile MRI scanners for which the service area is a mobile MRI region.
- (14) "MRI study" means one or more scans relative to a single diagnosis or symptom.
- (15) "Multi-position MRI scanner" means an MRI scanner as defined in the State Medical Facilities Plan, pursuant to a special need determination for a demonstration project.
- (16) "Related entity" means the parent company of the applicant, a subsidiary company of the applicant (i.e., the applicant owns 50 percent or more of another company), a joint venture in which the applicant is a member, or a company that shares common ownership with the applicant (i.e., the applicant and another company are owned by some of the same persons).
- (17) "Temporary MRI scanner" means an MRI scanner that the Certificate of Need Section has approved to be temporarily located in North Carolina at a facility that holds a certificate of need for a new fixed MRI scanner, but which is not operational because the project is not yet complete.
- (18) "Weighted MRI procedures" means MRI procedures which are adjusted to account for the length of time to complete the procedure, based on the following weights: one outpatient MRI procedure without contrast or sedation is valued at 1.0 weighted MRI procedure, one outpatient MRI procedure with contrast or sedation is valued at 1.4 weighted MRI procedures, one inpatient MRI procedure without contrast or sedation is valued at 1.4 weighted MRI procedures; and one inpatient MRI procedure with contrast or sedation is valued at 1.8 weighted MRI procedures.
- (19) "Weighted breast MRI procedures" means MRI procedures which are performed on a dedicated breast MRI scanner and are adjusted to account for the length of time to complete the procedure, based on the following weights: one diagnostic breast MRI procedure is valued at 1.0 weighted MRI procedure (based on an average of 60 minutes per procedure), one MRI-guided breast needle localization MRI procedure is valued at 1.1 weighted MRI procedure (based on an average of 66 minutes per procedure), and one MRI-guided breast

biopsy procedure is valued at 1.6 weighted MRI procedures (based on an average of 96 minutes per procedure).

10A NCAC 14C .2703 PERFORMANCE STANDARDS

- (a) An applicant proposing to acquire a mobile magnetic resonance imaging (MRI) scanner shall:
 - (1) demonstrate that each existing mobile MRI scanner which the applicant or a related entity owns a controlling interest in and operates in the mobile MRI region in which the proposed equipment will be located, except temporary MRI scanners, performed 3,328 weighted MRI procedures in the most recent 12 month period for which the applicant has data [Note: This is not the average number of weighted MRI procedures performed on all of the applicant's mobile MRI scanners.]; with the exception that in the event an existing mobile MRI scanner has been in operation less than 12 months at the time the application is filed, the applicant shall demonstrate that this mobile MRI scanner performed an average of at least 277 weighted MRI procedures per month for the period in which it has been in operation;
 - (2) demonstrate annual utilization in the third year of operation is reasonably projected to be at least 3328 weighted MRI procedures on each of the existing, approved and proposed mobile MRI scanners owned by the applicant or a related entity to be operated in the mobile MRI region in which the proposed equipment will be located [Note: This is not the average number of weighted MRI procedures performed on all of the applicant's mobile MRI scanners.]; and
 - (3) document the assumptions and provide data supporting the methodology used for each projection required in this Rule.
- (b) An applicant proposing to acquire a fixed magnetic resonance imaging (MRI) scanner, except for fixed MRI scanners described in Paragraphs (c) and (d) of this Rule, shall:
 - (1) demonstrate that the existing fixed MRI scanners which the applicant or a related entity owns a controlling interest in and locates in the proposed MRI service area performed an average of 3,328 weighted MRI procedures in the most recent 12 month period for which the applicant has data;
 - (2) demonstrate that each existing mobile MRI scanner which the applicant or a related entity owns a controlling interest in and operates in the proposed MRI service area except temporary MRI scanners, performed 3,328 weighted MRI procedures in the most recent 12 month period for which the applicant has data [Note: This is not the average number of weighted MRI procedures performed on all of the applicant's mobile MRI scanners.];
 - (3) demonstrate that the average annual utilization of the existing, approved and proposed fixed MRI scanners which the applicant or a related entity owns a controlling interest in and locates in the proposed MRI service area are reasonably expected to perform the following number of weighted MRI procedures, whichever is applicable, in the third year of operation following completion of the proposed project:
 - (A) 1,716 weighted MRI procedures in MRI service areas in which the SMFP shows no fixed MRI scanners are located,
 - (B) 3,775 weighted MRI procedures in MRI service areas in which the SMFP shows one fixed MRI scanner is located,
 - (C) 4,118 weighted MRI procedures in MRI service areas in which the SMFP shows two fixed MRI scanners are located,
 - (D) 4,462 weighted MRI procedures in MRI service areas in which the SMFP shows three fixed MRI scanners are located, or
 - (E) 4,805 weighted MRI procedures in MRI service areas in which the SMFP shows four or more fixed MRI scanners are located;
 - (4) if the proposed MRI scanner will be located at a different site from any of the existing or approved MRI scanners owned by the applicant or a related entity, demonstrate that the

annual utilization of the proposed fixed MRI scanner is reasonably expected to perform the following number of weighted MRI procedures, whichever is applicable, in the third year of operation following completion of the proposed project:

- (A) 1,716 weighted MRI procedures in MRI service areas in which the SMFP shows no fixed MRI scanners are located,
 - (B) 3,775 weighted MRI procedures in MRI service areas in which the SMFP shows one fixed MRI scanner is located,
 - (C) 4,118 weighted MRI procedures in MRI service areas in which the SMFP shows two fixed MRI scanners are located,
 - (D) 4,462 weighted MRI procedures in MRI service areas in which the SMFP shows three fixed MRI scanners are located, or
 - (E) 4,805 weighted MRI procedures in MRI service areas in which the SMFP shows four or more fixed MRI scanners are located;
- (5) demonstrate that annual utilization of each existing, approved and proposed mobile MRI scanner which the applicant or a related entity owns a controlling interest in and locates in the proposed MRI service area is reasonably expected to perform 3,328 weighted MRI procedures in the third year of operation following completion of the proposed project [Note: This is not the average number of weighted MRI procedures to be performed on all of the applicant's mobile MRI scanners.]; and
- (6) document the assumptions and provide data supporting the methodology used for each projection required in this Rule.
- (c) An applicant proposing to acquire a fixed dedicated breast magnetic resonance imaging (MRI) scanner for which the need determination in the State Medical Facilities Plan was based on an approved petition for an adjustment to the need determination shall:
- (1) demonstrate annual utilization of the proposed MRI scanner in the third year of operation is reasonably projected to be at least 1,664 weighted MRI procedures which is .80 times 1 procedure per hour times 40 hours per week times 52 weeks per year; and
 - (2) document the assumptions and provide data supporting the methodology used for each projection required in this Rule.
- (d) An applicant proposing to acquire a fixed extremity MRI scanner for which the need determination in the State Medical Facilities Plan was based on an approved petition for an adjustment to the need determination shall:
- (1) demonstrate annual utilization of the proposed MRI scanner in the third year of operation is reasonably projected to be at least 80 percent of the capacity defined by the applicant in response to 10A NCAC 14C .2702(f)(7); and
 - (2) document the assumptions and provide data supporting the methodology used for each projection required in this Rule.
- (e) An applicant proposing to acquire a fixed multi-position MRI scanner for which the need determination in the State Medical Facilities Plan was based on an approved petition for a demonstration project shall:
- (1) demonstrate annual utilization of the proposed multi-position MRI scanner in the third year of operation is reasonably projected to be at least 80 percent of the capacity defined by the applicant in response to 10A NCAC 14C .2702(g)(7); and
 - (2) document the assumptions and provide data supporting the methodology used for each projection required in this Rule.

SECTION .2800 - CRITERIA AND STANDARDS FOR REHABILITATION SERVICES

10A NCAC 14C .2801 DEFINITIONS

The definitions in this Rule will apply to all rules in this Section.

- (1) "Rehabilitation Facility" means a facility as defined in G.S. 131E-176.
- (2) "Rehabilitation" means the process to maintain, restore or increase the function of disabled individuals so that an individual can live in the least restrictive environment, consistent with his or her objective.
- (3) "Outpatient Rehabilitation Clinic" is defined as a program of coordinated and integrated outpatient services, evaluation, or treatment with emphasis on improving the functional level of the person in coordination with the patient's family.
- (4) "Rehabilitation Beds" means inpatient beds for which a need determination is set forth in the current State Medical Facilities Plan and which are located in a hospital licensed pursuant to G.S. 131E-77.
- (5) "Traumatic Brain Injury" is defined as an insult to the brain that may produce a diminished or altered state of consciousness which results in impairment of cognitive abilities or physical functioning. It can also result in the disturbance of behavioral or emotional functioning. These impairments may be either temporary or permanent and cause partial or total functional disability or psychological maladjustment.
- (6) "Stroke" (cerebral infarction, hemorrhage) is defined as the sudden onset of a focal neurologic deficit due to a local disturbance in the blood supply to the brain.
- (7) "Spinal Cord Injury" is defined as an injury to the spinal cord that results in the loss of motor or sensory function.
- (8) "Pediatric Rehabilitation" is defined as inpatient rehabilitation services provided to persons 14 years of age or younger.

10A NCAC 14C .2803 PERFORMANCE STANDARDS

- (a) An applicant proposing to establish new rehabilitation beds shall not be approved unless the average occupancy, over the nine months immediately preceding the submittal of the application, of the total number of licensed rehabilitation beds within the facility in which the new beds are to be operated was at least 80 percent.
- (b) An applicant proposing to establish new rehabilitation beds shall not be approved unless occupancy is projected to be 80 percent for the total number of rehabilitation beds to be operated in the facility no later than two years following completion of the proposed project.

SECTION .3700 - CRITERIA AND STANDARDS FOR POSITRON EMISSION TOMOGRAPHY SCANNER

10A NCAC 14C .3701 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Approved positron emission tomography (PET) scanner" means a PET scanner which was not operational prior to the beginning of the review period but which had been issued a certificate of need.
- (2) "Cyclotron" means an apparatus for accelerating protons or neutrons to high energies by means of a constant magnet and an oscillating electric field.
- (3) "Dedicated PET Scanner" means PET Scanners as defined in the applicable State Medical Facilities Plan.
- (4) "Existing PET scanner" means a PET scanner in operation prior to the beginning of the review period.
- (5) "Mobile PET Scanner" means a PET scanner and transporting equipment that is moved, at least weekly, to provide services at two or more host facilities.

- (6) "PET procedure" means a single discrete study of one patient involving one or more PET scans.
- (7) "PET scan" means an image-scanning sequence derived from a single administration of a PET radiopharmaceutical, equated with a single injection of the tracer. One or more PET scans comprise a PET procedure.
- (8) "PET scanner service area" means the PET Scanner Service Area as defined in the applicable State Medical Facilities Plan.
- (9) "Positron emission tomographic scanner" (PET) is defined in G.S. 131E-176(19a).
- (10) "Radioisotope" means a radiochemical which directly traces biological processes when introduced into the body.

10A NCAC 14C .3703 PERFORMANCE STANDARDS

- (a) An applicant proposing to acquire a dedicated PET scanner, including a mobile dedicated PET scanner, shall demonstrate that:
 - (1) the proposed dedicated PET scanner, including a proposed mobile dedicated PET scanner, shall be utilized at an annual rate of at least 2,080 PET procedures by the end of the third year following completion of the project;
 - (2) if an applicant operates an existing dedicated PET scanner, its existing dedicated PET scanners, excluding those used exclusively for research, performed an average of at least 2,080 PET procedures per PET scanner in the last year; and
 - (3) its existing and approved dedicated PET scanners shall perform an average of at least 2,080 PET procedures per PET scanner during the third year following completion of the project.
- (b) The applicant shall describe the assumptions and provide data to support and document the assumptions and methodology used for each projection required in this Rule.

SECTION .3800 - CRITERIA AND STANDARDS FOR ACUTE CARE BEDS

10A NCAC 14C .3801 DEFINITIONS

The following definitions shall apply to all Rules in this Section:

- (1) "Acute care beds" means acute care beds licensed by the Division of Health Service Regulation in accordance with standards in 10A NCAC 13B .6200, and located in hospitals licensed pursuant to G.S. 131E-79.
- (2) "Average daily census" means the number of days of inpatient acute care provided in licensed acute care beds in a given year divided by 365 days.
- (3) "Campus" shall have the same meaning as defined in G.S. 131E-176(2c).
- (4) "Service Area" means the single or multi-county area as used in the development of the acute care bed need determination in the applicable State Medical Facilities Plan.

10A NCAC 14C .3803 PERFORMANCE STANDARDS

- (a) An applicant proposing to develop new acute care beds shall demonstrate that the projected average daily census (ADC) of the total number of licensed acute care beds proposed to be licensed within the service area, under common ownership with the applicant, divided by the total number of those licensed acute care beds is reasonably projected to be at least 66.7 percent when the projected ADC is less than 100 patients, 71.4 percent when the projected ADC is 100 to 200 patients, and 75.2 percent when the projected ADC is greater than 200 patients, in the third operating year following completion of the proposed project or in the year for which the need determination is identified in the State Medical Facilities Plan, whichever is later.
- (b) An applicant proposing to develop new acute care beds shall provide all assumptions and data used to develop the projections required in this rule and demonstrate that they support the projected inpatient utilization and average daily census.

SECTION .3900 - CRITERIA AND STANDARDS FOR GASTROINTESTINAL ENDOSCOPY PROCEDURE ROOMS IN LICENSED HEALTH SERVICE FACILITIES

10A NCAC 14C .3901 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Ambulatory surgical facility" means a facility as defined in G.S. 131E-176(1b).
- (2) "Gastrointestinal (GI) endoscopy room" means a room as defined in G.S. 131E-176(7d) that is used to perform one or more GI endoscopy procedures.
- (3) "Gastrointestinal (GI) endoscopy procedure" means a single procedure, identified by CPT code or ICD-9-CM procedure code, performed on a patient during a single visit to the facility for diagnostic or therapeutic purposes.
- (4) "Operating room" means a room as defined in G.S. 131E-176(18c).)
- (5) "Related entity" means the parent company of the applicant, a subsidiary company of the applicant (i.e., the applicant owns 50 percent or more of another company), a joint venture in which the applicant is a member, or a company that shares common ownership with the applicant (i.e., the applicant and another company are owned by some of the same persons).
- (6) "Service area" means the geographical area, as defined by the applicant using county lines, from which the applicant projects to serve patients.

10A NCAC 14C .3903 PERFORMANCE STANDARDS

- (a) In providing projections for operating rooms, as required in this rule, the operating rooms shall be considered to be available for use 250 days per year, which is five days per week, 52 weeks per year, excluding ten days for holidays.
- (b) An applicant proposing to establish a new licensed ambulatory surgical facility for performance of GI endoscopy procedures or develop a GI endoscopy room in an existing licensed health service facility shall reasonably project to perform an average of at least 1,500 GI endoscopy procedures only per GI endoscopy room in each licensed facility the applicant or a related entity owns in the proposed service area, during the second year of operation following completion of the project.
- (c) An applicant proposing to establish a new licensed ambulatory surgical facility for performance of GI endoscopy procedures or develop a GI endoscopy room in an existing licensed health service facility shall demonstrate that at least the following types of GI endoscopy procedures will be provided in the proposed facility or GI endoscopy room: upper endoscopy procedures, esophagoscopy procedures, and colonoscopy procedures.
- (d) If an applicant, which proposes to establish a new licensed ambulatory surgical facility for performance of GI endoscopy procedures or develop a GI endoscopy room in an existing licensed health service facility, or a related entity to the applicant owns operating rooms located in the proposed service area, the applicant shall meet one of the following criteria:
 - (1) if the applicant or a related entity performs GI endoscopy procedures in any of its surgical operating rooms in the proposed service area, reasonably project that during the second operating year of the project the average number of surgical and GI endoscopy cases per operating room, for each category of operating room in which these cases will be performed, shall be at least: 4.8 cases per day for each facility for the outpatient or ambulatory surgical operating rooms and 3.2 cases per day for each facility for the shared operating rooms; or
 - (2) demonstrate that GI endoscopy procedures were not performed in the applicant's or related entity's inpatient operating rooms, outpatient operating rooms, or shared operating rooms in the last 12 months and will not be performed in those rooms in the future.
- (e) An applicant proposing to establish a new licensed ambulatory surgical facility for performance of GI endoscopy procedures or develop an additional GI endoscopy room in an existing licensed health service facility shall describe all assumptions and the methodology used for each projection in this Rule.

SECTION .4000 - CRITERIA AND STANDARDS FOR HOSPICE INPATIENT FACILITIES AND HOSPICE RESIDENTIAL CARE FACILITIES

10A NCAC 14C .4001 DEFINITIONS

The following definitions shall apply to all rules in this Section:

- (1) "Bereavement counseling" means counseling provided to a hospice patient's family or significant others to assist them in dealing with issues of grief and loss.
- (2) "Caregiver" means the person whom the patient designates to provide the patient with emotional support, physical care, or both.
- (3) "Care plan" means a plan as defined in 10A NCAC 13K .0102 of the Hospice Licensing Rules.
- (4) "Home-like" means furnishings of a hospice inpatient facility or a hospice residential care facility as defined in 10A NCAC 13K .1110 or .1204 of the Hospice Licensing Rules.
- (5) "Hospice" means any coordinated program of home care as defined in G.S. 131E-176(13a).
- (6) "Hospice inpatient facility" means a facility as defined in G.S. 131E-176(13b).
- (7) "Hospice residential care facility" means a facility as defined in G.S. 131E-176(13c).
- (8) "Hospice service area" means for residential care facilities, the county in which the hospice residential care facility will be located and the contiguous counties for which the hospice residential care facility will provide services.
- (9) "Hospice services" means services as defined in G.S. 131E-201(5b).
- (10) "Hospice staff" means personnel as defined in 10A NCAC 13K .0102 of the Hospice Licensing Rules.

10A NCAC 14C .4003 PERFORMANCE STANDARDS

- (a) An applicant proposing to develop hospice inpatient facility beds or hospice residential care facility beds shall demonstrate that:
 - (1) the average occupancy rate of the licensed hospice beds, for each level of care, in the facility is projected to be at least 50 percent for the last six months of the first operating year following completion of the project;
 - (2) the average occupancy rate for the licensed hospice beds, for each level of care, in the facility is projected to be at least 65 percent for the second operating year following completion of the project; and
 - (3) if the application is submitted to address the need for hospice residential care beds, each existing hospice residential care facility which is located in the hospice service area operated at an occupancy rate of at least 65 percent for the 12 month period reported on that facility's most recent Licensure Renewal Application Form.
- (b) An applicant proposing to add hospice inpatient facility beds to an existing hospice inpatient facility shall document that the average occupancy of the licensed hospice inpatient facility beds in its existing facility was at least 65 percent for the nine months immediately preceding the submittal of the proposal.
- (c) An applicant proposing to add residential care beds to an existing hospice residential care facility shall document that the average occupancy of the licensed hospice residential care beds in its existing facility was at least 65 percent for the nine months immediately preceding the submittal of the proposal.

APPENDIX G

ACADEMIC MEDICAL CENTER TEACHING HOSPITALS

Academic Medical Center Teaching Hospital	Medical School Affiliation	Date Designated
North Carolina Baptist Hospital Medical Center Boulevard Winston-Salem, North Carolina 27157 Telephone: (336) 716-2011	Wake Forest University School of Medicine	February 16, 1983

DFS ADVISORY

Title: Regulation of Detoxification Services Provided in Hospitals Licensed under Article 5, Chapter 131E, of the General Statutes
Date: October 22, 2003

Purpose

The purpose of this Advisory is to provide The Agency's interpretation of the certificate of need requirements for acute care hospitals to develop new or expanded detoxification services and interpretation of hospital licensing requirements for beds used for detoxification services.

Background

House Bill 815, which revised Article 9, Chapter 131E, the Certificate of Need Law, was approved August 7, 2003, and excludes "social setting detoxification" and "medical detoxification" facilities from the definition of chemical treatment facilities licensed under Chapter 122C. Consequently, the Certificate of Need Law no longer regulates the development of facilities licensed as "non-hospital medical detoxification for individuals who are substance abusers" or "social setting detoxification for substance abuse."

Policy

The change in the law did not revise the definition of a "chemical treatment facility" for detoxification units in an acute care hospital licensed under Article 5, Chapter 131E. Pursuant to enactment of House Bill 815, the Agency recently reviewed the licensure regulations for acute care hospitals and determined there is no licensure category for medical detoxification services that is separate from the licensure categories for psychiatric, substance abuse or acute care beds. In other words, medical detoxification services may be a component of licensed psychiatric, substance abuse and acute care services in acute care hospitals. Therefore, acute care hospitals may provide medical detoxification services in existing licensed psychiatric, substance abuse/chemical dependency treatment or acute care beds without a certificate of need. As a result of this interpretation, the Agency will revise current licenses for acute care hospitals to change the existing licensed medical detoxification beds to licensed chemical dependency/substance abuse treatment beds given that, to date, detoxification beds have been recognized by the Agency as one type of substance abuse bed.

In summary, if an acute care hospital wants to develop new or expanded detoxification services at this time, it may do so without a certificate of need, as long as the services are provided in an existing licensed acute care, psychiatric or substance abuse bed. However, if an acute care hospital wants to increase the bed capacity in its facility to develop or expand detoxification services, it must first obtain a certificate of need to add either licensed acute care, psychiatric or substance abuse beds for that purpose.
