

NC Department of Health and Human Services
NC Home Care Aide Curriculum

Module 14 – Nutrition

July 2021

1

OBJECTIVES

1. Explain the MyPlate guide to healthy eating
2. Identify positive and negative food safety practices
3. Shop and prepare healthy meals for patients
4. Recognize the importance of hydration
5. Explain how to avoid dehydration in patients

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021

2

Patient-Focused Nutrition

- Each person is unique
- Nutritional status of a patient is based on many factors unique to the patient

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021

3

FACTORS AFFECTING NUTRITION

There could be physiological and/or psychological factors affecting a patient's nutritional practices.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021

14

MODULE 14-B

**SPECIAL DIETS
&
READING FOOD LABELS**

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 15

15

SPECIAL DIETS

- A special diet might be recommended for your patient for several reasons.
- Your nurse or supervisor will inform you if there is a special diet or dietary restriction.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 16

16

Handout #2 Special Diets

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 17

17

The Nutrition Facts Label

- It is very important to read all of the labels on a food package.
- The Nutrition Facts Label - An Overview

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 18

18

Handout #3

High Sodium Foods

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 19

19

MODULE 14-C

**FOOD SAFETY
&
MEAL PREPARATION**

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 20

20

Preparing and Handling Food

- Safe handling of food
- Preparing food
- Handout #4 –
Food Temperature
- Handout #5 –
Cold Storage Chart

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 21

21

Making Food Choices

- Be aware of potential dietary restrictions and food allergies
- Ask your patient about preferences and be respectful of food choices based on these factors.
- If there is a special diet recommended, the nurse will inform the home care aide of those restrictions.
- It is not the role of the home care aide to suggest dietary changes or limitations to the patient.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 22

22

Assisting with Nutritional Needs

While it is ultimately the role of the nurse or supervisor to determine what recommendations to follow, the home care aide can offer support to the patient in other ways.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 23

23

POOR FOOD CHOICES

- If your patient has diabetes, high blood pressure, high cholesterol, etc., do not overreact if they cheat on their diet.
- The patient has the right to make poor choices.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 24

24

CLASSROOM ACTIVITY
Shopping on a Budget

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 28

28

Handout #6
Becoming a Better Shopper

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 29

29

MODULE 14-E

HYDRATION

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 30

30

WATER

Water is the most essential nutrient for life

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 31

31

WATER

- Infant, children, and adult home care patients will be at risk of dehydration.
- Older adults sometimes drink less for various reasons.

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 32

32

Handout #7

Dehydration

NCDHHS/DHSR/HCPEC | Module 14 Nutrition | July 2021 33

33

Altered Water Intake

- Forcing Fluids
- Restricting Fluids
- Nothing by Mouth

NCDHHS/DHSR/HCEPC | Module 14 Nutrition | July 2021 34

34

	GRAINS 3/4 CUP	<small>TIP:</small> <small>Give your preferences to whole grains.</small>	<h3>The importance of nutrition, health, and hydration cannot be stressed enough. It is important to encourage our patients to eat healthy, well-balanced meals. If we follow our own advice and do the same, we can live up to our fullest potential every day!</h3>
	DAIRY 3 CUPS	<small>TIP:</small> <small>Read much labels and butter. These are high fat foods.</small>	
	FRUITS 2 CUPS	<small>TIP:</small> <small>Try to avoid much juice, prefer whole or cut up fruits.</small>	
	VEGGIES 2 1/2 CUPS	<small>TIP:</small> <small>Try your vegetables in different ways.</small>	
	PROTEIN 2 1/2 CUPS	<small>TIP:</small> <small>Try your protein food, use beans and nuts more often.</small>
