

Chapter 12

Home Health Services

Application of the Standard Methodology

Step 13: For each county, subtract the “Projected Utilization in 2015” from the “Adjusted Potential Total People Served.” The remainder is the projected additional number of home health patients who will need home health services in 2015 (unmet need shows as a negative number of patients, *i.e.*, a “patient deficit”). A remainder including fractions of 0.50 or greater is rounded to the next highest whole number and a remainder including fractions less than ~~of~~ 0.50 ~~or less~~ is rounded to the next lowest whole number.
