Denominator	8	6	13	15	25	18	15	20	10	10	9	35
<b>Total</b>	100.0%	83.3%	69.2%	93.3%	96.0%	100.0%	100.0%	95.0%	100.0%	90.0%	88.9%	91.4%
Benchmark	90%	90%	90%	90%	90%	90%	90%	90%	90%	90%	90%	90%

Hands are the most common mode of pathogen transmission. Even with all the emphasis on this safety measure, on a national level trends show that proper hand hygiene still remains low. MCSC recognizes the importance of proper hand hygiene in the prevention of surgical site infections and transmission of communicable diseases.

MCSC conducts chart audits to:

1. Monitoring the accuracy of clinical measures that are required by CMS and AAAHC.
2. Meet federal regulations that require medical records documentation to justify charges coded and billed for.
3. Review accurate, thorough and timely documentation by caregivers which is crucial for patient safety.
4. Measure quality of care in order to improve it.

MCSC monitors this measure monthly and has set a benchmark of 100%.

Surgical fires are rare but serious events. It is important that staff are well trained and prepared in this type of emergency. Evacuation routes, securing of safe areas and patient safety are the priority of MCSC. Monthly rounding and quarterly drills are conducted to increase awareness of factors that contribute to surgical and facility fires, and promote the adoption of risk reduction practices throughout the facility.

MCSC monitors these measures monthly and has set a benchmark of 100%.

Studies have shown that having nurses contact same-day surgical patients by telephone early in the patients' recovery process may help guide recovery. Findings suggest that continuous contact by nurses in the recovery period helped patients discuss and process the surgical experience. MCSC calls 100% of patients post operatively. Our goal is to reach all patients in some form. After 3 failed telephone attempts, the patient is mailed a letter.

The statistics to this quality measure show our success rate in first call attempts. MCSC monitors this measure monthly and has set a benchmark of 100%.

Administering medication is one of the high risk areas for any health professional. It is a multidisciplinary process, which begins with the doctor's order, followed by review, preparation and administration by a nurse. Several studies have highlighted a high medication incident rate at several healthcare institutions. MCSC monitors this measure with high expectations of staff and address issues immediately if and when there is an occurrence.

MCSC monitors these measures monthly and has set a benchmark of 0%.

The safety eyewash is station designed to wash off any contaminants or biohazard materials that a staff member maybe exposed to during work environments. It is important for the safety of the staff to maintain eyewash stations in proper function order and be kept clear of any obstructions. MCSC test these stations weekly.

MCSC monitors these measures monthly and has set a benchmark of 100%.
