M E M O R A N D U M

TO: Individuals Interested in the North Carolina Semiannual Dialysis Reports

FROM: Elizabeth K. Brown, Planner
Healthcare Planning and Certificate of Need Section

SUBJECT: January 2019 North Carolina Semiannual Dialysis Report

DATE: January 2, 2019

The North Carolina State Health Coordinating Council and the Healthcare Planning and Certificate of Need Section are pleased to make the “January 2019 Semiannual Dialysis Report” available. This report is published pursuant to Chapter 14 of the North Carolina 2019 State Medical Facilities Plan. It applies the County Need methodology based on patient data as of June 30, 2018 and calculates utilization rates for implementation of the Facility Need methodology.

Certificate of Need applications in response to the “January 2019 Semiannual Dialysis Report” are due on March 15, 2019 for review beginning April 1, 2019. The filing deadline is 5:30 p.m. on the Application Due Date. The filing deadline is absolute.

General questions about the Semiannual Dialysis Report may be directed to Healthcare Planning at 919-855-3865. For additional information regarding the Certificate of Need application process, contact the Division of Health Service Regulation, Certificate of Need at 919-855-3873.

END-STAGE RENAL DISEASE DIALYSIS FACILITIES

Semiannual Dialysis Report, January 2019

Introduction

The North Carolina 2019 State Medical Facilities Plan requires semiannual determination of need for new dialysis stations in North Carolina. This approach calls for publication of “Semiannual Dialysis Reports” (SDR) during January and July. The North Carolina 2019 State Medical Facilities Plan specifies that the Semiannual Dialysis Reports “...will use facility, station and active patient data as of June 30, 2018 for the ‘January 2019 SDR,’ and as of December 31, 2018 for the ‘July 2019 SDR.’” It reiterates the methodology and presents need determinations for the certificate of need review beginning April 1, 2019.

Summary of Dialysis Station Supply and Utilization

For purposes of the Semiannual Dialysis Report, as of December 3, 2018 there were 224 End-Stage Renal Disease (ESRD) dialysis facilities certified and operating in North Carolina providing a total of 5,259 dialysis stations. Certificates of need had been issued for an additional 185 dialysis stations, but the stations were not yet certified. Another 122 dialysis stations had been requested, but had not completed the certificate of need review and appeals process. The number of facilities per county ranged from zero to 23.

Utilization data as of June 30, 2018 are presented in the final two columns of Table B. Of the 210 certified facilities operational on that date, 105 were at or above 80 percent utilization (*i.e., operating with at least 3.2 patients per station*).

Changes from the Previous Plan

No substantive changes to the dialysis need methodology have been incorporated into the North Carolina 2019 State Medical Facilities Plan. Dates have been advanced by one year, as needed to represent the time period for the 2019 Plan.

Sources of Data

Inventory Data:

Data on the current number of dialysis facilities and stations were obtained from Certificate of Need and from the Licensure and Certification Section, Division of Health Service Regulation, North Carolina Department of Health and Human Services.

Dialysis Patient Data:

Data on the dialysis population by county and by facility as of June 30, 2018 were provided by End-Stage Renal Disease providers operating certified dialysis facilities to the Division of Health Service Regulation, Healthcare Planning.

County data are designed to include all North Carolina residents of each county who are receiving dialysis, regardless of where they are currently being served. The numbers of North Carolina patients being served in North Carolina as of June 30, 2018 were provided by certified dialysis providers. Data for December 31 of 2013, 2014, 2015, 2016 and 2017 provide for the five-year trend analysis.

Facility data include all patients being served by each provider as of June 30, 2018 regardless of the county or state of each patient's residence. These figures were also provided by certified dialysis providers.

Method for Projection of New Dialysis Station Need

The North Carolina 2019 State Medical Facilities Plan (SMFP) directs Healthcare Planning to "...determine need for new dialysis stations two times each calendar year, and...make a report of such determinations available to all who request it." The basic principles, methodology and timeline to be used were specified in the 2019 SMFP and are presented below:

Basic Principles

The principles underlying projection of need for additional dialysis stations are as follows:

1. Increases in the number of facilities or stations should be done to meet the specific need for either a new facility or an expansion.
2. New facilities must have a projected need for at least 10 stations (or 32 patients at 3.2 patients per station) to be cost-effective and to assure quality of care.
3. Healthcare Planning will maintain a list of existing facilities and stations, utilization rates and projected need by county that is updated semiannually. Updated projections will be available two times a year on a published schedule.

Existing or potential providers interested in expanding in any area of the state may contact Healthcare Planning for projected need in the area of interest. *(Note: A dialysis station's service area is the dialysis station planning area in which the dialysis station is located. Except for the Cherokee-Clay-Graham and the Avery-Mitchell-Yancey Multi-County Planning Areas, each of the 94 remaining counties is a separate dialysis station planning area.)*

4. Updates of the projections may target counties that have developed sufficient need to warrant consideration for facility expansion or for establishment of a new facility. Actual numbers are not published in the North Carolina State Medical Facilities Plan so they can be updated as appropriate by Healthcare Planning.
5. Home patients will not be included in the determination of need for new stations. Home patients include those that receive hemodialysis or peritoneal dialysis in their home.
6. No existing facility may expand unless its utilization is 80 percent or greater. Any facility at 80 percent utilization or greater may apply to expand.
7. Facilities reporting no patients to Healthcare Planning for four consecutive Semiannual Dialysis Reports will be excluded from future inventories.
8. Quality of Care: All facilities should comply with Medicare and Medicaid regulations relating to the delivery and certification of ESRD services and with relevant North Carolina statutory provisions. An applicant already involved in the provision of end-stage renal disease services should provide evidence that care of high quality has been provided in the past. The following are considered indicators of quality of care. Existing providers

proposing to expand their operations should include in their applications data which include, but are not limited to, the following:

- a. utilization rates;
 - b. morbidity and mortality rates;
 - c. numbers of patients that are home trained and patients on home dialysis;
 - d. number of patients receiving transplants;
 - e. number of patients currently on the transplant waiting list;
 - f. hospital admission rates; and,
 - g. conversion rates for patients who have acquired hepatitis or AIDS.
9. Availability of Manpower and Ancillary/Support Services: The applicant should show evidence of the availability of qualified staff and other health manpower and management for the provision of quality ESRD services as well as the availability of a safe and adequate water supply, provision for treatment of wastewater discharge and a standing electrical service with backup capabilities.
10. Patient Access to In-Center ESRD Services: As a means of making ESRD services more accessible to patients, one of the goals of the North Carolina Department of Health and Human Services is to minimize patient travel time to and from the center. Therefore,
- a. end-stage renal disease treatment should be provided in North Carolina such that patients who require renal dialysis are able to be served in a facility no farther than 30 miles from the patients' homes; and,
 - b. in areas where it is apparent that patients are currently traveling more than 30 miles for in-center dialysis, favorable consideration should be given to proposed, new facilities which would serve patients who are farthest away from existing, operational or approved facilities.
11. Transplantation Services: Transplantation services should be available to, and a priority for, all ESRD patients whose conditions make them suitable candidates for this treatment. New enrollees should meet with and have access to a transplantation representative to provide patient education and evaluation for transplantation.
12. Availability of Dialysis Care: The North Carolina State Health Coordinating Council encourages applicants for dialysis stations to provide or arrange for:
- a. home training and backup for patients suitable for home dialysis in the ESRD dialysis facility or in a facility that is a reasonable distance from the patient's residence;
 - b. ESRD dialysis service availability at times that do not interfere with ESRD patients' work schedules; and,
 - c. services in rural, remote areas.

Methodology

Need for new dialysis stations shall be determined as follows:

- (1) County Need (*for the January 2019 SDR – Using the trend line ending with 12/31/2017 data*)
 - a. The average annual rate (percent) of change in total number of dialysis patients resident in each county from the end of 2013 to the end of 2017 is multiplied by the county's June 30, 2018 total number of patients in the SDR, and the product is added to each county's most recent total number of patients reported in the SDR. The sum is the county's projected total June 30, 2019 patients.
 - b. The percent of each county's total patients who were home dialysis patients on June 30, 2018 is multiplied by the county's projected total June 30, 2019 patients, and the product is subtracted from the county's projected total June 30, 2019 patients. The remainder is the county's projected June 30, 2019 in-center dialysis patients.
 - c. The projected number of each county's June 30, 2019 in-center patients is divided by 3.2. The quotient is the projection of the county's June 30, 2019 in-center dialysis stations.
 - d. From each county's projected number of June 30, 2019 in-center stations, is subtracted the county's number of stations certified for Medicare, CON-approved and awaiting certification, awaiting resolution of CON appeals, and the number represented by need determinations in previous State Medical Facilities Plans or Semiannual Dialysis Reports for which CON decisions have not been made. The remainder is the county's June 30, 2019 projected station surplus or deficit.
 - e. If a county's June 30, 2019 projected station deficit is 10 or greater, and the January SDR shows that utilization of each dialysis facility in the county is 80 percent or greater, the June 30, 2019 county station need determination is the same as the June 30, 2019 projected station deficit. If a county's June 30, 2019 projected station deficit is less than 10 or if the utilization of any dialysis facility in the county is less than 80 percent, the county's June 30, 2019 station need is zero.

(2) Facility Need

A dialysis facility located in a county for which the result of the County Need methodology is zero in the current Semiannual Dialysis Report (SDR) is determined to need additional stations to the extent that:

- a. Its utilization, reported in the current SDR, is 3.2 patients per station or greater.
- b. Such need, calculated as follows, is reported in an application for a certificate of need:
 - (i) The facility's number of in-center dialysis patients reported in the previous Dialysis Report (SDR₁) is subtracted from the number of in-center dialysis patients reported in the current SDR (SDR₂). The difference is multiplied by 2 to project the net in-center change for 1 year. Divide the projected net in-center change for the year by the number of in-center patients from SDR₁ to determine the projected annual growth rate.

- (ii) The quotient from (2)(b)(i) is divided by 12.
 - (iii) The quotient from (2)(b)(ii) is multiplied by 6 (*the number of months from June 30, 2018 until December 31, 2018*) for the January 2019 SDR.
 - (iv) The product from (2)(b)(iii) is multiplied by the number of the facility's in-center patients reported in the current SDR and that product is added to such reported number of in-center patients.
 - (v) The sum from (2)(b)(iv) is divided by 3.2, and from the quotient is subtracted the facility's current number of certified stations as recorded in the current SDR and the number of pending new stations for which a certificate of need has been issued. The remainder is the number of stations needed.
- c. The facility may apply to expand to meet the need established in (2)(b)(v), up to a maximum of 10 stations.

[NOTE: "Rounding" to the nearest whole number is allowed only in Step 1(c) and Step 2(b)(v). In these instances, fractions of 0.5000 or greater shall be rounded to the next highest whole number.]

Unless specific "adjusted need determinations" are recommended by the North Carolina State Health Coordinating Council, an application for a certificate of need for additional dialysis stations can be considered consistent with the need determinations of the North Carolina 2019 State Medical Facilities Plan only if it demonstrates a need by utilizing one of the methods of determining need outlined in Chapter 14.

Timeline

The schedule for publication of the North Carolina Semiannual Dialysis Report and for receipt of certificate of need applications based on each issue of that report in 2019 shall be as follows:

| Data for Period Ending | Publication of Semiannual Dialysis Report | Certificate of Need Application Due Dates | Certificate of Need Beginning Review Dates |
|-------------------------------|--|--|---|
| June 30, 2018 | January 2, 2019 | March 15, 2019 | April 1, 2019 |

Please be advised that 5:30 p.m. on the specified application due date is the filing deadline for any certificate of need application in response to these dialysis reports. The filing deadline is absolute.

Table E: Dialysis Station Need Determination by County

(Based on the County Need Methodology 2019 SMFP)

| County | HSA | Number of Dialysis Stations, Need Determination* | Certificate of Need Application Due Date** | Certificate of Need Beginning Review Date |
|---|------------|---|---|--|
| It is determined, based on the County Need portion of the methodology, that there is no need for dialysis stations anywhere in the state. | | | | |

* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

** Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. The filing deadline is absolute (see Chapter 3).
