RE: Letter of support for J. Arthur Doshier Memorial Hospital's 2015 Spring Petition for Change in 2016 Proposed North Carolina State Medical Facilities Plan regarding Magnetic Resonance Imaging equipment

Dear Dr. Ullrich and Ms. Carraway,

Please add my support to the petition from J. Arthur Doshier Memorial Hospital (Doshier) for a new Policy in the *2016 Proposed North Carolina State Medical Facilities Plan (SMFP)* regarding Magnetic Resonance Imaging (MRI) equipment.

A community hospital that offers 24/7 emergency room services, demonstrates a history of MRI services, and that has a fixed MRI, should have the option to offer that service in the most cost-effective way possible. MRI is now a common tool for diagnosing soft tissue. It provides information that CT and x-ray cannot. It stands to reason that wherever possible residents of this state should have access to it, and the institution providing the service should be able to organize it in a way that makes it most accessible.

As a board certified radiologist of Delaney Radiologists, PA that provides real-time interpretation services for Doshier, I fully support this request.

Sincerely,
