

My name is Jim Wrenn. I'm with Smith Anderson law firm. We represent the North Carolina Healthcare Facilities Association and we just wanted to thank the North Carolina nursing home and care licensure section for taking into consideration the comments we previously made to the proposed rules. We had concerns when they were originally drafted about differences between state and federal rules and definitions and many of our comments were taken into account. We may have some additional feedback but understand the section schedule and that type of thing so we look forward to working with you if we identify any other issues. We don't anticipate substantial additional comment thank you.
